The varieties of corn used in the experiments cover a wide range in the length of the growing season required. The data tabulated are limited to the characters that seem to have been consistently affected, although the points studied included the rapidity of germination, the number of days from emergence to ripening, the height of stalks, the number of ears per plant, the average weight of ears, the average yield per plant, and the number of suckers.

In all the experiments the germination of corn increased in rapidity as the date of seeding occurred later. When sown early the short-season northern varieties came up sooner than the varieties from the central and southern states. When sown later the differences in this respect were not usually apparent.

May or June Favored.

The total growth of stalk was greatest from the seedings in June and

Plant Corn in May or June for Best Growth and Yield.

May. The total growth was least and rate of growth slowest from the April seedings. Development was more rapid in the later than in the earlier seedings.

The number of ears per stalk, the size of the ear, and the amount of suckering bore no consistent relation to the date of seeding. The pollen-shedding period was longer in plants from the early seedings than in those from the later seedings. Seedings earlier than normal resulted in slight gains in the date of silking.

These experiments corroborate the conclusions of the state experiment stations, that corn may be planted in the vicinity of Washington and other localities with a similar season, any time after May 1, without danger of the seed rotting. The best conditions of soil and atmosphere usually come between May 10 and May 20.

Taste is a matter of tobacco quality

We state it as our honest belief that the tobaccos used in Chesterfield are of finer quality (and hence of better taste) than in any other cigarette at the price.

"They Satisfy"

A HARD SCHOOL

By MARY LOUISE BUZZELL

©, 1922, by McClure Newspaper Syndicate.

Jerry, mending his lobster pots on the beach, scowled as he saw Ellen and "that fellow" Templeton hurrying down to the inlet where the young man's boat lay; for Templeton, while ostensibly taking a much-needed rest, was paying assiduous court to the girl whom Jerry had looked upon as his future wife ever since they had played together as children.

Jerry turned his back on the approaching couple, but when they had passed he gave his rival a surreptitious glance—noting the white silk shirt, the immaculate white trousers and the wrist watch. Turning suddenly, Ellen caught his criticizing eye, laughed, and called back:

"Better forget your lobster pots today, Jerry, and bring Sarah over to the island and picnic with us!" to which her escort added a languid, "Yes, dear boy, get your Sarah and come!"

"Thanks!" snapped Jerry. "I have no 'Sarah'—and I've something to do besides picnicking and—and—reading poetry!" seeing the book Templeton carried.

Receiving no answer save a tolerant shrug from his rival, he sullenly resumed his work, but a moment later, after a troubled look at the sky, he strode after the picnickers, and as Templeton pushed off the wharf, he gave him a brusque:

"Better keep an eye on the nor'wester, Templeton, those clouds mean wind; and I'd come in with the tide, it's tough rowing against it."

Templeton raised his brows, then vouchsafed a supercilious: "Ah! Thanks awfully, my good man, but have no fears, I've handled a boat several times before today!" with an emphasis on the "several" that made Jerry long to pitch him into the water; but instead, with a smothered "Humph!" he swung up the beach to the cottage he shared with his crippled grandfather. The old man seeing Jerry, he stopped smoking to mutter fretfully:

"If that chap had a sense of a-a-sculpin, he'd keep off'n the water with such clouds abroad!" waving his pipe skyward; then added with a senile chuckle: "I shouldn't wonder if he found it true that 'experience is a hard school, but fools will learn from no other,' afore he gets home!"

"Very likely, but if anything happens to Ellen through his ignorance, I'll—I'll—"

"You amin' to let that whippersnapper grab your girl away right from under you nose?" queried the old man, irascibly.

"Why, no!" blazed Jerry, "but he flatters her till she—"

"Doesn't know any more'n she oughter!" interrupted his grandfather. "All the same, I'd kinder row out toward the island—you see what's coming?" Jerry nodded and sat down.

The weather grew more threatening every minute; but he waited till the tide turned, sending choppy waves inshore. Then, unable to bear the suspense, he ran down to his dory, thrust the oars into the oarlocks and pushed off into the foaming waters.

Something smashed into the dory, scraped by and was gone. Twisting around, he strained his eyes to make out the tossing thing astern—it was Templeton's empty boat being driven shoreward!

His breath came in horrified gasps as he sensed the awful significance of the sight; then wild rebellion fired his soul as he thought of Ellen being [illegible] and buffeted into nothingness by the cruel waters. It must not—should not be! He sent a stentorian shout toward the island; it came back in a mocking echo.

Again and again he called her name, with a wild hope that somehow, in some miraculous manner, she had escaped death. Suddenly the island loomed before him—a black blot against the sky. With a mighty effort, he sent his spent voice shoreward and listened. His heart almost stopped beating for very joy, for across the lashing waters a faint hail came to him out of the darkness. It was Ellen's voice!

With a superhuman effort, his strained and swollen muscles beached the dory; two sodden figures were lifted over its high side to safety, and in silence, save for murmured "Thank Heaven!"—Jerry backed away, turned his boat toward home, and the racing tide did the rest.

Giving no heed to the babbled explanations of the mollified Templeton, he lifted the shivering girl out and carried her up the beach to her home, but before reaching her door he asked:

"By what fool stunt did Templeton lose his boat?"

"He tied it to a rock with a silly little rope, which sawed in two in no time after it came on to blow, though even then he might have got it if he hadn't been afraid of getting wet!" answered the girl, angrily.

"But the salt water would have ruined his wrist watch," said Jerry, dryly, which remark brought an hysterical giggle from the girl in his arms. But the next moment she pulled his head down, and with her arms tight around his neck, whispered:

"Jerry, I simply detest a wrist watch on a man, and I just adore the smell of lobsters. Come over tomorrow, dear!"

And with a hug that left her breathless, Jerry whispered a jubilant: "You bet, honey!"

PREPARING PORK TO USE OR SELL

Selling Hogs and Buying Pork Is Not a Profitable Practice for Farmers.

DIFFERENT WAYS OF CURING

Young Animals From 8 to 12 Months Old Are Best for Furnishing Home Meat Supply—Avoid Danger of Disease.

(Prepared by the United States Department of Agriculture.)

Every farmer can well produce the pork and pork products which are consumed on his farm, for selling hogs and buying pork involves profits, but not to the farmer engaged in the practice. This point is brought out in Farmers' Bulletin 1186, published by the United States Department of Agriculture, which tells how hogs should be killed and describes different methods of curing and canning pork on the farm. Highly nutritious and palatable pork products for home use are easily made, says the bulletin. Pork can be cured and canned in a number of ways and the variety of products affords a supplement to the daily meals.

Young Hogs Yield Best Meat.

A hog of medium condition, gaining rapidly in weight, yields the best quality of meat. A reasonable amount of fat gives juiciness and flavor to the meat, but large amounts of fat are objectionable. Smooth, even, and deeply-fleshed hogs yield nicely-marbled meats. The meat of old hogs will be improved if they are properly fattened before slaughter, but young hogs from eight to twelve months old are best for furnishing the home meat supply.

The bulletin emphasizes especially the importance of selecting only healthy hogs for slaughter and of thoroughly cooking all pork products used for food.

Even if the hog has been properly fed and carries a prime finish, the

Proper Equipment for Rapid and Skillful Work at Killing Time Is Important.

best quality of meat cannot be obtained if the animal is not healthy. There is always some danger that diseases may be transmitted to the person who eats the meat, particularly if it is not thoroughly cooked.

Hogs Before Killing.

Hogs intended for slaughter should not be kept on full feed up to the time of killing. It is better to hold them entirely without feed for 18 to 24 hours prior to that time, but they should have all the fresh drinking water they want. It is essential to have the proper equipment for rapid and skillful work at killing time. Such equipment includes a straight sticking knife, a cutting knife, a 14-inch steel to keep the knives sharp, a hog hook for holding the animals, a bell-shaped stick scraper, a gambrel for holding the hog to facilitate cleaning and cutting the meat, and a meat saw. If the hog is not too large, a barrel is a convenient receptacle for scalding.

Complete directions for killing and cleaning a hog, properly cutting the portions of meat, rendering lard, making sausage, smoking cured meat, and home canning of pork and pork products are described in the bulletin, copies of which can be obtained free on application to the Department of Agriculture.

RIGHT TIME TO PLANT CORN

In Central Corn Belt Seed Planted in April Is Slow in Coming Up and Is Not Hardy.

There is a right time to plant corn, and usually the better farmers whether they figure by the calendar, by the size of oak leaves, or by the phases of the moon, in every neighborhood know when that right time comes. It is suggested, however, that more corn is planted too early than too late. Corn is a hot weather plant. In the central corn belt the seed that is planted in April is usually slow in coming up, and less hardy than the seed planted about the middle of May. The distribution of rainfall affects the yield, and this varies from season to season, but the corn experts say, and this theory is verified by common experience, that the best yields and most rapid growth may be expected from the medium planting dates.

In Days of Old

Your grandfather waked when he went courting, and probably carried his boots in his hands part of the way to save wear on the leather.

Those were economical days. Times have changed. Your grandfather had but little money and what little he had he carried with him or hid it in an old tin can in the cellar. When short of money he traded coonskins for sugar. We have passed the coonskin stage long age. The modern way is to keep your funds in a bank and pay by check. Our bank is modern. The only exception is that we are old-fashioned. Honest, courteous and neighborly. In every other way we are up to the minute.

EQUIPPED WITH X-RAY
For Spinal Photography when needed.
More than ten years exderience.

Consultation Free

One of the most interesting developments of the last ten or fifteen years has been the complete rehabilitation of the road, in its age-long role as one of the chief means of communication. The years that intervened between the coming of the railway and the coming of the motorcar saw a great silence and a great quiet settle down over vast numbers of the world's highways, says Christian Science Monitor. The motorcar, however, has changed all that, and today states and countries are vying with one another in the matter of road building, as to both quantity and quality. All honor, therefore to the state of Illinois with its 341 miles of new permanent hard roads, last year, "a record for such construction in any state in the Union prior to 1920."

COW WILL INCREASE INCOME

Animal Is Most Efficient Money Maker on Farm and Is Entitled to Good Treatment.

E. A. Hanson, dairy extension specialist at University farm, renews the inquiry, "Are you keeping cows or are they keeping you," in a collection of feeding suggestions recently issued by him.

"Put the cow to work," he says, "and she is the most efficient money maker on the farm today. A cow producing 25 pounds of 4 per cent milk daily makes one pound of butterfat a day, worth about 50 cents. This cow needs rations and hay and silage which should not cost more than 15 cents daily, leaving 35 cents daily above the cost of her feed. Where can you invest your time and efforts to better advantage? Give your cows a chance. They are all capable of doing better when properly fed."

GREEN FOOD FOR FOWLS.

It is very easy to have a few flats in the basement to raise green food for the chickens before it is time for the early spring grass on the vacant lot.

Oats, wheat, rye, barley, corn or other greens may easily enough be produced in quick succession. By planting a few days apart, a stand of the green food two or three inches in height may be had. By using judgment, a fresh flat of green food may be had for the poultry every few days. After the green tops have been devoured replant, set in a reasonably light place and have another crop within a few days.

MAKING SUCCESS OF GARDEN

Soils Must Be Deep, Mellow and Friable and In Crumbly State When Plowed or Hoed.

The success of a garden is largely due to the manner in which the soil has been prepared. The soil must be deep, mellow and friable, so that it will be in a crumbly state when plowed or hoed. That is, the minute particles of the soil must be granular, each maintaining its form and consistency. When such soil is wet, each portion is enveloped by a film of water which is retained for some time. The plant food is thus dissolved and this water-laden plant food is taken by the roots of the plants.

Virtue Its Own Reward.

The business girl was not an official reformer, but she practiced somewhat on a little ragamuffin of a boy. Many times had he slipped off the straight and narrow and as many times had she pulled him back again. When the reformatory threatened she always pleaded with the authorities and kept him out.

Recently the boy came in to call on his benefactress. "Have you been a good boy lately?" asked the B. G. solicitously. "Have I? I should say I have," replied her ragamuffin friend with firmness and fervor. Then, confidentially, he added: "You know, I find you get more."—Chicago Journal.

Statistics About Pins

Until the outbreak of the war no less than 90,000,000 pins were manufactured daily. The largest pin factory of the world is in Birmingham. It produces 38,000,000 pins in a single day. As the consumption of pins is not so enormously large there would soon result a great superabundance of them were not 82 per cent demonstrably lost. The remainder get worn out by use. It has been calculated that pins lost in one day represent a value of $4,500.

THE GOODRIDGE BANNER

MINNESOTA HISTORICAL SOCIETY

VOLUME XVI, No. 8. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, APRIL 7, 1922. $1.50 PER YEAR.

The Senior Class Play Makes a Hit

"A Deal in Ducks," the class play given by the Seniors in the school auditorium last Friday evening, was a grand success, both in point of rendition and of attendance. The building was filled to capacity with a highly appreciative audience.

The play itself was a good one and it was well rendered.

The scene was laid in a country print shop, the Goodridge Banner. Roy Olson as Jack Gilmore was the publisher and proprietor. As an editor he would have made his mark in the world, but unfortunately he was called to the war. Joseph Christianson, as Robert White, was left in charge of the establishment, and played the part splendidly of a colossal failure as a newspaper man. Kathleen Lang, as Betty Hart, showed exceptional ability in impersonating her character. Alvin Halvorson, the grasping capitalist, was opposed to the marriage of his daughter to the editor and played the character to perfection. Christina Bundlund, as Ruth Hardnock, the capitalist's daughter, very cleverly won her father's consent to her marriage, playing her role excellently. Daniel Payne, the printer's devil, was the comedian of the play. All the actors starred in their respective parts, bringing the play to a happy conclusion by all "going to press."

Credit is due to Mr. John Nystul, who as director of the play, left no stone unturned to make it a success. The orchestra furnished live music between acts. The gross proceeds of the play amounts to $55.45

Billions of Tax Exempt Securities

According to President Harding nearly twenty billions of dollars in tax exempt securities are in existence. That means clearly that this vast sum of wealth is escaping taxation, and that rich tax dodgers are having things made easy for them by a system which has grown and grown until it has become a menace. [illegible] if the very rich dodge twenty billion dollars worth of taxes the rest of the people of the country are paying it for them. The time will come, unless the evil of issuing tax exempt securities is checked, when half of the people of the country will be paying the entire burden of taxes of the other class; that class best able to pay will be relieved from the payment of taxes. The outcome will be the complete tax exemption of moneys and credits and the imposition of heavier taxes upon farm farm and other lands

Elected Teachers

At the meeting of the board of education of consolidated school No. 8 held Tuesday evening the principal and all teachers were reelected, to serve in our schools during the coming year. The salaries were fixed as follows: B. O. Norby, $150 per month for 12 months; John Nystul, $150 per month for 9 months; E. J. Beithon, $125 per month; Miss Giefor, Mrs. Breen and Miss Vaughan, $110 per month; Miss Hegland $115 per month.

These salaries are all substantial reductions and we understand all the have signified their intention not to accept.

Community Club

The next meeting of the Community club will occur Friday evening, April 21. The president has appointed as program committee for that meeting Mrs. Carl Christianson chairman, Mrs. O. S. Kirklie, Miss Sarah Vaughan.

At the end of the third meeting a vote will be taken as to who in the opinion of the club put out the best program.

ERIE ERRORS

Born, to Mr. and Mrs. Olaf Kompeli on Tuesday of last week a bouncing baby boy.

Mrs. S. Rouze and Misses Ose and Knutson conducted state examination in the Clover Nook school house Thursday and Friday.

Sakarias Hole shopped in Erie village Friday.

Hilmer Iverson returned Thursday from a business trip to Minneapolis.

Born, to Mr. and Mrs. Knut Danielson Wednesday, a boy. All are reported as doing well.

Mrs. John Bannerud and son Alvin of Rhoda were callers at the G. A. Iverson home Thursday.

Omund Lovrak recently returned from the lumbering region northeast of Red lake.

Ludvig Johnson and Iver Iverson transacted business in Goodridge Monday.

The H. A. Dahlen family visited with friends in the Little Oaks neighborhood Sunday.

A large crowd attended the wedding reception given by Mr. and Mrs. Floyd G. Baird at the Erie hall Saturday evening.

Loyland brothers sawed up a supply of wood for G. A. Iverson Thursday and Friday.

The Star town board of trustees held a meeting at town clerk H. A. Dahlen's Saturday afternoon.

Messrs. Alexander Larsen, I. K. Enebo, L. P. Johnson and Z. J. Hole were pleasant callers at Camp Sub-Urban Sunday.

Masters Hjalmar Lundblad and Arnold Hovet called on their friend Christ Amundson Thursday afternoon.

Olaf and Alice H Dahlen have been ill for a few days with the grip.

Peter Meyers of Thief River Falls autoed out this way Saturday for a brief visit with his home folks in south west Star.

Daniel Danielson called on his friend Tharald Tharald Tharaldson Sunda.

The play, "Opaket Utstilling," by the Norwegian dramatist, Hr. Amundson, is to be presented at the "Rendevoo" theatre in the evening of Wednesday, March 19. Particulars as to the the cast are being withheld for strategic reasons.

Eila Gunild Nerhus of Hickory was a week end visitor at her parental home in eastern Star.

The Ole Quam family is reported as seriously ill with the flu.

L B. Johnson is out canvessing for the Stetson Oil Co. and reports business as picking up at a fair rate.

Olaf Kompelien has traded his farm adjoining this village for the Prucha farm in the north part of Star township.

MARRIED

Miss Minnie Nelson of Highlanding and Mr. Gilbert Vad of Erie were married Tuesday, April 4, at Thief River Falls, by Rev. T. E. Sweger. The attendants were Miss Olga Vad, sister of the groom, and Edwin Nelson, brother of tee bride. Mr. and Mrs. Vad will make their home at Erie.

The [illegible]w Grocery Store

Mon[illegible]y, April 10, das been set as the opening day of the new Gulrud Grocery store. In additien to tee regular line of Drugs, Mr. Gulrud will have on his shelves a complete line of Groceries. The store has been remodeled and rearranged in order to make room for the new stock. Your attention is directed to the announcement printed elsewhere in this issue.

LOUISE'S CAR

By ELIZABETH M'NAUGHT

© 1922, by McClure Newspaper Syndicate.

The streets were treacherously icy and the heels on the patent leather pumps of Louise's Sunday and every-day shoes were high. Gingerly, she tripped along, pausing momentarily at the junction of three automobile-infested streets to await an opportunity to gain the other side.

Glaring headlights were to the right of her, more to the left and countless more behind and beyond.

Life had been a struggle for Louise; it still was, yet she realized that her present mode of living in a single furnished room, with housekeeping privileges, was really an upward step. She was at least happy, and—well, what more could one desire?

"For the love of Pete, look out!" roared a hoarse voice, almost in her ear. Something terrible had happened to something and Louise knew she was the Something. The girl's mind was quite clear. She knew she was lying in the mud, ignominiously, like a stray cat, and her fur coat was likely ruined; and then it came to her that the kindest, sweetest voice she had ever heard was caressing her and two very willing arms were making frantic efforts to retrieve her befurred, perhaps dismembered, anatomy from the mud.

"Poor little girl," he was saying, "it wasn't my fault," and then most sternly, "Let her alone, you; I'll take care of her."

He placed her among the velvet cushions in the large tonneau of his magnificent car and a moment later the girl knew she was being rushed to the hospital. She cast a critical eye over the interior of the car. A hummer, to be sure, she thought, and just her luck, too. Her eyes glanced toward the proud head, yet he was not too proud to drive his own car.

Her charming Sir Gallahad did not desert her as abruptly as she had expected. In fact, he returned to the hospital day after day to inquire about the fractured ankle. He was the quiet, courteous gentleman.

"They tell me you may go home tomorrow," he announced by way of greeting one morning, "and, honestly, I'm sorry."

"So'm I," replied Louise, and an expression of extreme sadness overshadowed the thin, piquant face, "very, very sorry."

"Sorry? Why?" he asked in surprise.

"Oh, just because—" she hesitated, and he, noticing a very small tear quivering on the black eyelash, made a hasty departure, flinging back buoyantly, "Well, so long. I'll see that you get home safely and comfortably."

That would be the end, thought Louise.

When the girl faced the large machine the following day it seemed even more formidable than her imagination or her memory of it conceived.

Very few words were spoken during the trip, mainly because of the fact that he was without a chauffeur and so was once again forced to drive the car. Louise was glad that he at least was not a parasite. In no time at all he was helping her up the gray stone steps that led to her front door.

Suddenly, almost impulsively, he asked, "Say, would you go to the movies with me some night?"

"Go to the movies?" in amazement.

"Oh, of course, if you don't care for the movies I'll get tickets for symphony, or anywhere you say. I personally like the movies, but it's more or less habit. Having little time to spare, I run in when things get too dull."

"When things get too dull?" she repeated. Then, eagerly, "Please, just what do you do?"

"I'm a taxi driver."

"Well, I'll be jiggered!" In relief, the girl's tired expression changed to repose and she was very sweet and appealing in her natural mood of laughing and crying and talking all in one breath. "And I thought you were rich and educated and oh, ever so wealthy and as far above me as the moon, and now, isn't that a hummer?" she demanded, pointing to the car.

"Hummer nothing! But that's my car and it's as good as any old hummer. I practically made it myself. It boasts parts from every second-hand shop in the city. I can't very well name it unless, perhaps, I might call it Louise."

"Oh, please do," she whispered from the depths of his raccoon shoulder. "Don't things always turn out perfectly grand?"

HIDE AND SEEK

By MOLLIE MATHER

Copyright, 1922, Western Newspaper Union

"I don't see anything interesting about her, or charming either. If that's your heart-crushing maiden Ted, my first impression is, that she's tooeasily friendly."

This is what Charlotte Winters, coming down the stair overheard one afternoon concerning herself. If Miss Charlotte had come at the same hour upon the following day, she would have heard that same pleasing manly tone withdrawing much of his former statement. But Charlotte did not hear the amendment, which is often the unfortunate way with gossip. Upon the following afternoon, John Ainsworth said to Ted, "Your little Miss Winters is not over friendly Ted, as I, yesterday flippantly concluded. She's just absolutely natural. I realize that, as I am in her company, though she is far from paying any attention to my worthy self; which," added John ruefully, "grows disappointing."

"You see," Ted explained, "Charlie has five brothers who are her admiring pals. It was they, who dubbed her Charlie. So she was grown into a way of treating men in a natural manner as good companions.

"She made eyes at me the first day," John, proudly insisted; and Charlie, again ascending the stair, at the inopportune moment, was in time to hear this last remark.

"Well!" she breathed indignantly and flopped upon the stair. Her old friend Ted had given such glowing accounts of this coming former college chum.

"Old John's a wonder," Ted had told her enthusiastically, "highest notch up in his business concern, straight, jolly, kind; and unspoiled." Ted added admiringly, "by all the attention women give him. John could take his pick wherever he goes. But does he encourage a girl to believe in a fondness for her which he does not possess? Not old John. Courteous and all that, but goes honestly on his way, until Miss Right comes along.—Then—"

"Maybe," Charlie had mischievously interrupted, "I may be that Miss Right. What an honor!"

Such a man was not worth a thought; she would, thereafter, avoid him. A decision once made Charlie Winter's invariably lived up to it.

"What," John Ainsworth impatiently asked Ted, "is the matter with your mother's guest? Miss Winters runs from me at every turn, and I admit Ted, that the more I see her with others here, the more I like that girl. Not 'heart-crushed,' you understand nor any foolishness like that, but I do want to know her better, have her talk to me as she talks to those silly loungers who drop in every evening on pretense of visiting yourself. Do I appear more boresome than they? or—what is the matter with your tormenting young friend?"

Old John's usually calm tone was sharply impatient. "Who" answered Ted wisely, "may comprehend the mind of a woman?"

It was in the wide hallway that John one evening later, learned the truth, or a part of the truth. By desperate force, he detained Charlie Winters as she was flying past him up the stair. Her small hands were claimed masterfully, and the following tumultuous and amazing conversation ensued. "You shall not run from me always," cried John, tremblingly earnest, "What have I done? Why do you dislike me? I love you, love you"; he added astonishing himself.

Charlie, snatching away her hands, paused to look back at him tauntingly. "Why there is nothing interesting about me," she innocently repeated, "Nor charming either. I am merely friendly, even when I do," Miss Charlie gave a charming demonstration, "make eyes at you." Then, she was gone: When John called on the following day, he learned that Miss Winters had left unexpectedly to visit a friend of her mother's in New York city. She had left no address, promising to write. And John Ainsworth—the heretofore staid and deliberate—hurried after. A needle in a haystack? Yes.

But John had to keep hunting. Waiting inactivity would be to him now madness. After he had registered at a New York hotel, John made his wildly hopeful, probably impossible, plan.

In disgust with himself and his hopeless reasonings, John gave up the chase. He would go to the club restaurant for luncheon; his usual haunt when business called him to New York. He had vaguely ordered luncheon when a girlish form slipped into the chair opposite his own. "Charlie!" cried John, joyously off guard. The smiling young woman did not resent that familiarity. Then John poured forth the story of his unsuccessful quest.

"I was wiser than you," said Charlie, when the story was told, "I came directly to the place where Ted said I would find you."

"Find me?" questioned John.

"Or rather let you find me," corrected Miss Charlie. Again she smiled. "You see, I had grown tired of hide and seek, myself."

John's hand captured her's beneath the table cloth. "Charlie dear," he whispered, "and I have found you then, to keep?"

"If I'm not too uninteresting," began Charlie, then relented, in a smile.

THE RING

By AGNES G. BROGAN

Copyright, 1922, Western Newspaper Union.

Nance and the tall young man came strolling down the hill path, to rest on a low garden wall. Nance sprang nimbly to her favorite seat, while the young man took a place beside her.

"It's a great view," he said, and as he tapped his boot, a ring slipped from its place on his finger, to roll glinting down the road. The young man jumped after his treasure and returned, breathing a sigh of relief.

"I must be careful," he told the girl, "and see that does not happen again; my finger's growing thinner; your fault, probably." He cast a side glance at her.

Nance leaned forward to examine the ring. Bruce Manners bent his uncovered head until his dark hair brushed hers.

"Yes," he explained, "unusual and significant. The sapphire is set like an eye in a band of enamel-edged gold. Inside is the motto, 'I see.' The ring was given to me by a wealthy capitalist, who happened to be a lifelong friend of my father. This man never made a deal, or serious venture, without first consulting the eye for its vision of success. The ring had been given to him by an East Indian merchant, who earnestly believed in its clairvoyant power."

"But," asked Nance, smiling, "how does the mystic eye make known its reading?"

Bruce gazed quizzically out across the meadows.

"In a strangely, unexpected manner," he replied, "and its directing is unmistakable."

"You," Nance asked amusedly, "have sought its advice?"

The young man nodded. "Many times."

She slipped down from the wall.

"I am going home," she declared laughingly; "you make me feel eerie." He led her, his strong brown hand beneath her arm, his admiring eyes on her rose-flushed cheeks.

Inside the home living room Nance's family greeted her. Aunt Phronsie's face wore a frown, and pale-faced Lillie Ray, after one quick glance at Nance's glowing cheeks, left the room. Even mother's smile was strained, fleeting.

"My dear," began Aunt Phronsie, "haven't you admirers enough of your own, that you must make a conquest of Lillie's hero, also?"

"Lillie Ray," mother gently reminded, "is very frail, Nance; disappointment might go hard with her."

The brown dress she wore was not as becoming as usual, Bruce Manners thought, when Nance met him later at the door.

"You said once," Nance hurriedly began, "that you would like to prove your friendship for me, by some favor. I'm asking the favor now, Bruce. Will you let me take your ring tonight? I want it to advise me."

"Certainly," the young man agreed; "but the ring sees for its owner alone, Nance-Rose. To him only it gives sign."

"Still I'd like to take it," she persisted. She looked back at him, an enigmatic smile curving her lips—"I suppose," she mocked, "this uncanny ring will one day direct you to the woman you are to marry?"

Bruce Manners spoke seriously. "I am sure," he said, "that the sapphire's eye, then, will not be more blue than her own."

Lillie Ray was in the living room playing the piano, the last log dying in the fireplace.

"These spring evenings," she complained, "are so chill. I can't walk outside. You and Bruce will walk, I suppose."

Nance hastily ended the frail girl's fears.

"No," she replied, "I'm going upstairs to write. Bruce will come in here. Lillie, I want you to do something for me. Put this ring of his on your finger for safe keeping, and when Bruce comes in give it to him. Here, you might sing a song. 'I Love You, Dear,' that's pretty. Then give him the ring."

"My! It is beautiful!" she exclaimed.

Nance sank down on the floor of her own room to rest her face against Don's loving head.

"Just about now," she murmured, "Lillie is looking up from her song into Bruce's face—she is giving him the ring—the clairvoyant ring. And Bruce will know it's a sign. Don. How could it be other than a sign of the woman he is to marry?"

When Nance could bear it no longer, she crept down the stairs. Lillie was not in the living [illegible] there poking about the dead ash[illegible] a stick. Surprised into action, Nance crossed to his side. His radiant smile greeted her; breathlessly she waited.

"Well, Nance-Rose," he said severely, "you trusted a poor messenger; the listless Lillie, tossing my ring to me, tossed it into the fire by mistake. And when I said 'damn,' she indignantly, disgustedly departed.

Weakly, remorsefully, Nance dropped into a chair. Then a sudden blue gleam shot into the air to drop flatly into her outstretched palm.

"I dislodged it that time," Bruce Manners cried excitedly; turning, he met the wondering gaze of Nance-Rose.

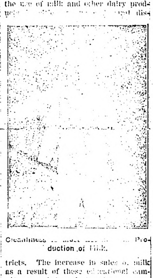
On her outstretched palm the sapphire eye twinkled up at him. Deliberately, triumphantly, Bruce Manners came to clasp Nance in his arms. "You can't beat that old ring, my dear," he said.

INCREASING SALES OF MILK

Campaigns Have Been Inaugurated in Various Sections to Boost Dairy Products.

(Prepared by the United States Department of Agriculture.)

Consumption of milk is on the increase as a result of the milk campaign of the United States Department of Agriculture and the state agricultural colleges and local agencies, inaugurated to extend and increase the use of milk and other dairy products [illegible] districts. The increase in sales of milk as a result of these educational campaigns carried on during the [illegible] year in 11 states, 15 cities [illegible] ranges from 3.5 to [illegible] average increase [illegible] The health of the children [illegible] improved while undernourishment has been reduced.



Cleanliness [illegible] Production of Milk.

Nutrition clinics have been held, and underweight, poorly fed children have improved greatly in health as a consequence of the more general and intelligent use of milk as a daily food. In Kansas City a previous survey showed a condition of [illegible] per cent undernourishment among the children, while after the milk campaign and regular instruction in health habits, a second investigation showed that malnutrition has been reduced to 15 per cent. Of late milk campaigns have been held in Madison, Wis.; Wheeling, W. Va.; Seattle, Wash.; Greenville, S. C.; Akron, O.; Warren, O.; Winston-Salem, N. C.; Springfield, Mass.; Oskaloosa, Ia.; Baltimore, Md.; Oakland county, Michigan; Cumberland county, Maryland, and Jacksonville and Duval county, Florida.

Despite disturbed industrial conditions, increases in milk consumption have been effective, and even in places of much unemployment the quantity of milk consumption has been kept up to normal. In nearly all cases the milk consumption subsequent to the milk campaigns has been greater than it ever was before.

SPACE REQUIRED BY CALVES

Individual Pens Are Good When Farmer Can Afford Them—Labor Is Expencive.

Twenty to twenty-five square feet of floor space exclusive of mangers should be provided for calves under six months old. Individual pens are good when one can afford them, but they are more costly on account of the large amount of material necessary for pen walls, space required, and labor in cleaning them than pens holding four or five calves apiece. The latter are entirely satisfactory provided the calves are stanchioned while being fed.

The

Harvester Company's

Exceptional Offer

and c[illegible]tribution to the farmers, effective February 3 to May 1, 1922

The [illegible]arvester Co, makes this special offer to apply on all new Titan 10-20 Tractors purchased by its dealers on 1922 account. Each farmer purchasing one of these Tractors for delivery on or before May 1st, next, will be given by the company absolutely free f. o. b. Chicago a 3-furrow P & O plow.

$200 CUT in price of TITAN TRACTOR

New price $700 f. o. b. Chicago

and a P & O 3 Furrow Plow Free

These are [illegible] tractors pared down to make a price, but complete with all essential equipment– [illegible], Fenders, Platform, Throttle-governor, adjustable drawbar, [illegible], brakes. [illegible] equipment, worth more than $200 are necessary on any tractor to make it [illegible] and safe, included in our price. NO EXTRAS TO BUY

INDUCE SHIPPERS TO BOX GOODS PROPERLY

Chief Aim to Decrease Big Drain on Timber Supply.

Transportation Company Also Endeavoring to Decrease Enormous Waste of Goods Due to Defective Packing.

(Prepared by the United States Department of Agriculture.)

"Perfect package month," a movement recently promoted by the American Railway Express company in an effort to induce shippers to pack goods [illegible] will receive additional impetus from scientific investigations on box and crate construction by the Forest Products laboratory, Madison, Wis., according to an announcement made by the Forest Service, United States Department of Agriculture.

In making a detailed study of boxes and crates, one of the chief objects was to eliminate waste of wood and thus decrease the drain on the timber supply. That this is highly important can be seen from the fact that nearly one-sixth of our total cut of timber goes into boxes and crates. The second chief object of the study was to diminish the enormous waste of goods in transit due to defective packing.

By the use of special machinery designed at the Forest Products laboratory, boxes can be artificially subjected to the same kind of shocks and [illegible] they receive in actual transport. From these tests it has [illegible] possible to determine the correct amount and quality of material to use, the result of defects in the wood, the adaptability of different species of wood, and the best types of box and crate construction.

The results of these investigations have recently been compiled by the Forest Service and published in book form under a co-operative arrangement with the National Association of Box Manufacturers.

In addition the book includes the standardized specifications for boxmaking tentatively adopted by the American Society for Testing Materials, and also a key to the identification of the chief wood species used in the construction of boxes and crates. It can be obtained from the Secretary of the National Association

HIS BIRTHDAY

By DOROTHY KNIGHT

©, 1922, by McClure Newspaper Syndica

The world looked bright and rosy t John Patterson. It was his thirtie birthday and his second wedding a niversary, and he had just receive a substantial increase in salary. I could hardly wait to tell Mary the goo news.

He hurried home only to find th apartment deserted. The tiny kitchenette, however, showed that everythi was in readiness for a hurried assembling of the dinner on her return.

He wandered aimlessly and forlorn around. He looked about for the not he had so often found, explaining he delay, but there was none. There wa however, a note half concealed unde some bills, which he took out and rea mechanically, until the full import of i reached him like a sharp stab. His eager happiness was changed to acute suffering. He read:

"Dearest Jim—Your letter arrived this morning and has made me gloriously happy. It has lain next to m heart all day and through the mon onous dishwashing, sweeping an dusting of my life has run the wonde ful melody of your love. It has mad me very happy, and it will make m very happy all through the years t come to know that you love me, eve though the knowledge of your lov is all I have, for I can never hav the reality. We must renounce—"

He read to the end and then with heart as heavy as lead he paced th floor.

"Why John, what's the matter? Yo look as if the bottom had dropped ou of the universe."

He was startled at her unexpecte presence. He had not heard her com in.

"Why, I guess I have a slight hea ache. Been working rather hard to day."

"You poor dear, and I bet you ar half starved, too. But I will have din ner ready in a jiffy."

She was as good as her word.

"You poor dear, you're too tire even to eat. I wish you didn't hav to work so hard. I hate to have yo slave away at the office every day ju to earn money for me to spend. I d wish I could help you. But I do try t be economical."

"You're a wonder, Mary. You're th best manager in the world."

He tried to speak naturally. H must not let Mary suspect he knew he secret until he had decided what t do.

Somehow the dinner was finishe John strangely silent, but his wife a merry and talkative as ever. If she noticed his silence, she attributed i to his being tired.

When they were comfortably settle in the living room he immediately took up his evening paper.

"Well, what day is it?"

The question cut deep.

"I don't know," he muttered, from the depths of his paper.

"Why, John Patterson, aren't you ashamed of yourself?"

No answer.

"And after I've worked so hard to get you a present that I earned all my self."

No answer.

"If that's all the interest you take I'm glad I'm no Eleanor Hallowell Abbot, and couldn't afford to buy a sedan for a present."

Still no answer.

"Well, don't you want to know what I got you?"

"Why, of course. What is it?" in a lackadaisical tone.

"Well, it's on the table beside you."

He reached out for a much beribboned package, with trembling hands and started to open it.

"Dear, I'm really afraid you're going to be sick. You look so pale."

"Nonsense. I'm all right. Well, this is just fine. That's my favorite cigar but I can't afford to smoke them every day. Oh, I have a package for you too."

He went out to his coat pocket an returned with a box of chocolates Then while he smoked, she munche chocolates.

"Don't you want to know how I earned the money?"

By a supreme effort he managed t act naturally.

"Yes, of course, and what was it you said about Eleanor Hallowell Abbot?"

"Why, she's the author of "Moll Make Believe" that you enjoyed s much."

"And what, may I ask, has she to do with my cigars?"

"Well, one day I was telling Ruth I wished I could earn some money all my own to buy you a birthday present with, and she suggested that I shoul try writing stories. I finally got five dollars from the Western Tribune."

"Well, that's fine. What for? Getting subscriptions?"

"No, for writing a love letter."

Mary may have been somewhat surprised at the strange effect of this news on John and at his great joy over her "literary success," but he never explained it.

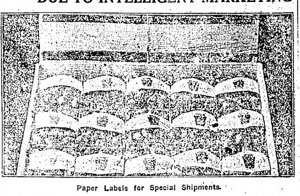
GROWTH OF STRAWBERRY INDUSTRY DUE TO INTELLIGENT MARKETING



Paper Labels for Special Shipments.

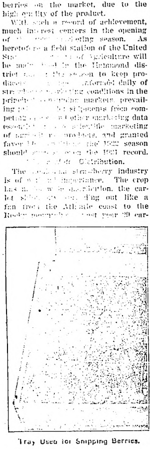
(Prepared by the United States Department of Agriculture.)

Within six years Louisiana has taken first place among the states as regards [illegible] of strawberry production. The 1921 season was the best ever known in the industry, 1,400 carloads of Louisiana berries being marketed in [illegible] cities in the United States and Canada. In Chicago the 24-pint crates brought as much as $6.50 each, and during practically the entire marketing season Louisiana strawberries sold at a higher price than any other berries on the market, due to the high quality of the product.

With such a record of achievement, much interest centers in the opening of [illegible] marketing season. As heretofore a field station of the United States [illegible] of Agriculture will be maintained in the Hammond district [illegible] the season to keep producers [illegible] informed daily of strawberry marketing conditions in the principal consuming markets, prevailing [illegible] shipments from competing [illegible] and other marketing data essential [illegible] scientific marketing of agricultural products, and granted favorable [illegible] the 1922 season should [illegible] the 1921 record.

[illegible] Distribution.

The Louisiana strawberry industry is of [illegible] importance. The crop has [illegible] wide distribution, the carlot [illegible] spreading out like a fan from the Atlantic coast to the Rocky mountains. Last year 29 carloads also went to four cities in Canada. Chicago is the principal market for the fruit, Detroit, Boston, Pittsburgh and New York ranking next in the order given. Heat, cold and distance—marketing obstacles that seemed insurmountable a few years ago—have been overcome by the growers and shippers, and with continued careful selection, grading, packing and shipping, marketing experts say that the industry will enjoy increasing prosperity.



Tray Used for Shipping Berries.

During the early years of the strawberry industry in Louisiana several varieties of berries were grown, and Chicago was the main market outlet. Today the Klondike variety is grown exclusively, and Louisiana strawberries have a wider distribution than the strawberries from any other section of the country. The quality of the fruit is dependable, and there is everywhere a demand for the berries. When picked the berries are carried to packing sheds, where practically each one is handled separately. Both the 24-pint Hallock crate and the 24-pint ventilated crate have been used in packing the fruit, although during the past few seasons there has been a considerable decrease in the use of Hallock's crates, which are known locally as "coffin" crates. Practically all growers are now using ventilated crates, as berries shipped in such containers arrive at market in sound condition and usually command a premium over the price paid for berries in non-ventilated crates.

Trains of Strawberries.

Fully 90 per cent of the marketed crop is shipped by express, the railroad company providing two or three express fruit trains daily. These trains run on a schedule of 40 miles an hour, which puts the fruit on the Chicago market before daylight the second morning. Less than carload shipments are cared for by the express company, which operates local iced cars to pick up small shipments. The growers have good transportation facilities, deliveries are prompt, and few instances are known where cars have not arrived at destination on time. Strawberry buyers from the large consuming markets establish headquarters at Hammond during the marketing season, sales being made on a cash f. o. b. shipping point basis. The fruit is inspected at shipping point and acceptance taken before the cars move. At Ponchatoula all cars are sold at public auction.

Several strawberry preserving plants in the district utilize overripe and soft stock in the preparation of fruit for the ice cream and soda fountain trade in northern cities.

Perhaps the principal reason for the prosperity enjoyed by Louisiana's berry growers is that they keep themselves closely informed upon day-to-day market conditions. The producers appreciate that "knowing the markets" enables them to meet the consumers' desires as regards quality and quantity, and that to overstock one market when another market is undersupplied is unsound from both an economic and financial viewpoint. Every day during the marketing season a daily report of conditions and prices at the principal marketing centers throughout the country is issued by the local representative of the United States Department of Agriculture. This information is obtained by trained market reporters at consuming points.

The growers are also informed as to daily carlot shipments everywhere in the United States. Thus the producers not only know the prices being paid for berries at the various consuming markets, but exactly what competition may be expected from other sections shipping strawberries at about the same time. The department also furnishes daily information regarding temperature and weather conditions, so that the necessary icing and refrigeration can be provided for the shipments.

Information for Growers.

The department's station at Hammond was opened in 1915, and was the first field station established anywhere by the United States Department of Agriculture for the issuance of market news reports. Here, in the heart of Louisiana's strawberry producing district, arrangements were first made to study methods of packing, shipping, and distributing strawberries in the United States; to keep growers informed of strawberry movements from other regions, and to inform them daily of prices and conditions in the leading consuming markets. Hammond was selected as the location for the department's first field station because of the large proportions that the Louisiana strawberry industry had attained. Louisiana then ranked fourth in commercial strawberry importance. Today the state ranks second in carlot shipments.

Red Heads, Read.

A red-headed person has about 90,000 hairs growing out of the scalp, Speaker says this at convention of New England hairdressers.

The figure seems unbelievably large. Yet it is low. Brunettes average 110,000 hairs, blondes, 140,000.

Scientists, claiming prehistoric man was as hairy as a monkey, say that thinness of hair or baldness is a sign of superior mentality. Future men all bald as eggs is the prediction.

If the scientists are right, the redheads must be a super-race.

The Desired Information.

Unpopular Actress, (taking leading part in tragedy)—Oh! where can my mother be?

Gallery Voice—She's peddling apples on Fifth avenue.

"Her Infinite Variety."

Old Bach—All woman are the same.

Benedict—That's all you know. Why even one woman isn't the same for any length of time.

Men Who Win Success.

Success is always attained by men who will work and build and have an ideal and vision. A fellow who does his own thinking and will not side-step is the man who will arrive. To achieve your ambition, be a good listener, use your eyes, study human nature, learn to think. Thought rules the world, makes men and is the seat of action. Some folks study all their life and at death have learned everything but how to think. Learning without thought is labor lost. Skill is developed in the corner. The desert sands are breed of the prophet. The mountain fastness develops the seer; out of obscurity come our Presidents; from the forests come our preachers; from the wilderness come reformers.

Could Do Without Fido.

Mildred couldn't induce Fido to come into the house. She called him over and over again; he paid no heed whatever, but unconcernedly trotted off with another dog. Mildred was deeply hurt and angrily shouted at Fido's fast-disappearing tail: "If you'd rather have that old dog for a chum than nice little me, all right! I guess I can find nicer mannered people to play with than you, anyhow!"

JANET'S REWARD

By ELIZABETH M. DUKES

©, 1922, by McClure Newspaper Syndicate.

"My heavens, Janet! Look how you waste time peeling those spuds; why don't you boil them, jackets and all?"

Janet's brown eyes flashed; then a hopeless look dragged down the corners of a normally sweet mouth.

"Oh, Dick! You never think it matters how I do things, and all my school lessons on making a home attractive are just wasted on you, for you don't care, no matter how hard I try."

"I'm no softy! Give me plenty of grub and a place to sleep, and what do I care about your fol-de-rols? Oilcloth on the table! Shine up the tin plates! Posies in a mug!"

A sneer twisted his none too pleasant expression still more, as the man swung out of the cabin.

Janet let her busy hands hang idle a moment in utter discouragement. She had pulled her chair into the doorway, where, as she peeled the potatoes, her eyes could sweep over a wide range down the green mountainside to a valley threaded with the silver cobwebs of rivers. The great peaks towered again on the farther side, blue, green and wonderful. The clouds rested on their crests and cool winds came drifting over to the lonely girl; but these brought no message of comfort today.

A happy girlhood in the valley school had been Janet's. The girls all worked for their board and she had delighted to put into practice the dainty household devices the school taught.

Was it only a year ago that the death of her quiet, hardworking father had brought her back to the cabin of the brother who refused to provide more money for "schooling taught by a pack of tom-fool old maids?"

Dick had never cared to know anything better than the squalid mountain ways. A "batch's" round of biscuits, yellow with soda, meat cooked to rags and flat-tasting canned goods did not seem to have sickened him. At least, he sauced the food Janet prepared most carefully with his sneers. The year as his housekeeper seemed like eons to the poor girl; how long had it really been since she had heard words of appreciation and courtesy?

After all, what was the use of trying any more? Why mix the biscuits according to rule, why sweep and scrub and polish the tinware until it shone like silver, why put mountain pinks in a tumbler for the center of the table? She won only mockery and scorn, even before the rough strangers who sometimes shared bed and board at their cabin.

The blue of the distant peaks seemed to swim like a blue lake through her bitter tears. There was a mournful wail in the wind—it was saying, "No use! You are doomed to become a dull-eyed old slattern before you are thirty."

The discouraged little head was still bent beneath its burden of chestnut braids when—what was that? Hoofbeats! Yes, and a strange voice.

"I'm sorry to bother you, but I can't ride farther without a glass of milk. I see you have a cow pastured here, but I'll be grateful for condensed!"

The man, hat in hand, smiled pleasantly at her as he sank down on the doorstep with a jingle of spurs.

"There's milk if you wish it," Janet replied, with a bright tinge of color concealing the tear stains; "but it is almost noon. Surely you will stop here—it's a long ride to the next cabin."

"I didn't intend to," was the laughing confession, "for I'd rather ride empty than swim in grease as at most of these shacks. But yours is a real picture place; and can it be I smell baked beans?"

"You smell my regular Saturday dinner," said Janet.

He did full justice to Janet's food symphony in brown and gold; the fluffy mashed potatoes, yellow with cream, the smoking beans topped with crisp pork, the steamed brown bread stuccoed with plump raisins, and the custard pie whose thick and golden filling quivered under a meringue light as foam and over a crust that crumbled with flaky richness.

Dick ate in silence for once; perhaps the stranger's compliments for the menu twisted his mouth a bit, but he said nothing. He did not leave until Steve Sargent, the new forest ranger, had risen reluctantly from the shining white oilcloth and started on his way. Dick even grumbled an invitation when Sargent announced he would be back that way next week.

"This is a place to ride fasting seven days to get to at last. I hope I shan't wear out my welcome, but I'm afraid I'm going to try to this summer."

"If at first you don't succeed, try, try again!" teased Janet, releasing her hand from Sargent's hearty clasp—a clasp that yet had something in it so tender and reverent that she was to dream of it happily.

"That's a mighty good fellow if the tales I've heard are O. K.," said Dick, as he swung onto his own horse. "He seemed to take quite a shine to your fancy ways, Janet. Wouldn't be a bad thing for me to stand in with him for lumber reasons."

Janet only nodded in response; her eyes were fixed on the peaks beyond. They were still swimming like a blue lake, but her tears were happy ones now.

"What if I had given up in discouragement before today?" she asked herself, as she watched that distant figure turn to wave her a parting salute with his broad ranger's hat.

ANNOUNCEMENT

Beginning Monday, April 10, the G. C. Gulrud store will offer a complete line of Staple Groceries.

From the good will with which the project has already been met we feel that a new grocery store in Goodridge will receive the hearty approval and generous patronage of a large number of people.

Our policy will be to condnct a strictly CASH business. Top prices will be paid for Butter and Eggs.

Operating on a cash basis, we shall be able to offer you an opportunity of buying groceries at prices much lower than those than those you have been accustpmed to pay elsewhere. All the goods on our shelves are bought for cash, and by taking advantage of the discounts offered by the wholesale houses for cash buying, we are in position to give our customers the benefit by marking down the prices.

We invite you to visit our store and compare our priecs with those you have been paying. Our policy will be to employ clean cut business methods in all our dealings with you, combiuing courtesy of service with quality of goods at prices you will agree are fair.

GROCERIES AND DRUGS

INJECTING SWINE IN FLANK MEANS SAVING

Use of Ham or Shoulder Often Results in Infection.

Department of Agriculture Urges Veterinarians to Avoid Possibility of Injury by Selection of Some Other Place.

(Prepared by the United States Department of Agriculture.)

Complaints from packers indicate that there are still many veterinarians and farmers who persist in immunizing hogs against cholera by making injections in the ham or shoulder, a practice that often results in infection and the formation of deep abscesses in the hams and shoulders where the serum and virus were injected. The United States Department of Agriculture has long advised against using those parts as points of injection, and the department veterinarians are instructed to avoid the possibility of such injury by selecting some other place.

The ham has been favored as a place for making the injections because they can be made more rapidly and easily at this point, but they can be made with equal success in less valuable parts, such as the flank or auxillary space, where there is loose connective tissue that readily absorbs the serum. In making an auxillary injection the front legs should be spread apart so as to stretch the superficial muscles between the legs, and the needle should be directed so as to avoid the muscles of the shoulder.

It is desirable to make the injections at a point that will make drainage easy should an abscess form. Serum should never be injected into a mass of fatty tissue, as it is not sufficiently absorptive. Although the serous membrane lining in the abdominal cavity takes up serum readily, abdominal injections are not recommended because of the danger of puncturing the internal organs with the needle or of carrying infection into the cavity.

Small pigs and shotes up to 80 pounds in weight may be held up by the hind legs, with the forefeet resting on the ground, and the injection made into the loose tissue of the flank. A pig so held is in a good position for the taking of temperature, cleansing the area of operation, and making the injection. Farmers' Bulletin 834, which has been recently reprinted, contains full information regarding hog cholera and the methods of control.

DEFECTIVE PAGE

Proud of His Dad

DAD was telling the folks at home about at home about a fight he saw down town. He said: "One fellow hit the other one with a club and nearly knocked his brains out."

The young hopeful of the family, proud of his dad, said: "They couldn't knock any brains out of your head, could they, dad?" He meant to be complimentary, but it didn't turn out just that way.

But if dad has an account at our Bank, we'll say he has some brains in his head and is probably smart enough to keep them there, too. It requires more brains to SAVE money than it does to EARN it or SPEND it.

GIVE PIGS WORM TREATMENT

Young Animals Should Be Looked After as Soon as Weaned—Clean Pasture Favored.

Pigs should always be given worm treatment immediately after weaning. If necessary give them a second dose two weeks after the first. If they are then turned on a good alfalfa, clover or rape pasture and are fed grain in addition so that they remain thrifty there is little danger of further trouble from worms. In other words keeping hogs reasonably free from worms is not a difficult thing to do, if they are looked after at the proper time.

GIVE SOY BEANS ATTENTION

Crop Should Not Be Overlooked by Progressive Farmer in Adjusting Corn Acreage.

Soy beans should not be overlooked by the progressive farmer in the readjustment of his corn acreage. They require careful attention like corn, but they will make his decreased acreage of corn worth more money. It is a high protein, high oil crop in one.

In Moderation.

Mrs. Henpeck—And you call yourself a man?

School Notes

Easter vacation will begin Friday afternoon. School will be closed all next week.

Flag was hoisted half-mast on Thursday in memory of the late Dr. Cyrus Northrop, Pres. Emeritus of our state university, who died in his home in Minneapolis on Monday.

At assembly hour on Wednesday morning two special numbers were given as follows. Song, Girl's Glee Club; A Manly Fellow, by the late Dr. Cyrus Northrup, was given very creditably by Eunice Tvedt.

The following pupils have been in attendance every day this year: Roseila Lovly, Clifton Seavey, Augusta Harms, John Andersen, Tina Gaulland, Esther Hanson, Peter Peppenhagen, Ethel Vaughen, Edith Gunderson, Jessie Leslin, Norton Gunderson, Gertrude Anderson and Emma Gilbertson. There were many more on the list of perfect attendance two weeks ago. So many have been compelled to stay out of school due to sickness.

In pursuance of the recommendation of the Grand Army of the Republic and the Department of Education, the centenary of the birth of General Ulysses S. Grant will be observed in a special program to be given at the regular assembly period, Wednesday, April 26. Following is the program:

1. Music, America, four stanzas
2. Salute to the Flag
3. A Statement of the Occasion and Purpose of the Program, B. O. Norby
4. Music, one of the civil war songs
5. Sketch of the Life of Ulysses S. Grant
6. Boyhood and Youth of Grant — Nortou Gunderson
7. Music, one of the civil war songs
8. Grant in the Civil War — Angeline Svobodny
9. Tenting on the Old Camp Ground
10. Music, Battle Hymn of the Republic
11. Grant as President — Emma Gilbertson
12. McKinley's Appreiation of Grant — Christina Bundhund
13. The American Creed
14. The Star Spangled Banner

The base ball seeson is on and the High school boys have elected the following officers for the coming season: Captain, Joseph Christianson; custodians, Stuart Ferdinandsen, Roy Olson, Daniel Payne; manager, Supt. B. O. Norby.

Arrangements have been made for securing new uniforms. The team will be out for regular practice after the Easter vacation.

Control the Sow Thistle

No half way measures will succeed in the fight against the sow thistle, according to R. S. Dunham, agronomist at the Northwest school and station, Crookston. Sow thistle does not succumb to intermittent attacks. It has as many lives as there are new plants from its rootstocks. The important facts about this plant are: First, that it is propogated both by seed and by underground root stocks; second, that it is in its weakest condition when preparing to blossom, and third, that it cannot live without leaves. Preventive measures are necessary: the plant should not be allowed to produce seed, and only crops seed free from this weed should be planted. It should be cut as near the blossoming time as can be done without danger of allowing some plants to mature seed. Since the blossoms may mature seed after they are cut, all plants should be burned immediately after cutting.

Further eradication of the weed depends upon killing its root stocks. [illegible] be killed by preventing [illegible] leaves. Without [illegible] the plant dies. For this [illegible] is essential to complete [illegible] sufficient cultivation [illegible] from forming. "The [illegible] is the only kind of fallow [illegible]

[illegible] in the fall or disking [illegible] scattered in the fall [illegible] will kill them [illegible] the land should be [illegible] depth and a black [illegible] by cultivation until [illegible] The plowing should be well [illegible] be cut by the [illegible] by the moldboard [illegible] furrow. Leave no [illegible] in the field or at the [illegible] all weeds.

[illegible] agencies of seed [illegible] be prevented [illegible] scatte[illegible] control measure [illegible] after [illegible] Chief of these [illegible] cultivation

John Hovet left Monday for Grand Forks and other Dakota points, where he will be employed during the summer.

WHITE OR BROWN EGGS PREFERRED

People in Different Cities Have Decided Preferences for One or the Other.

NO INDICATION OF QUALITY

Color of Shell Is Almost Entirely Dependent on Breed of Fowl That Laid It—New Breed Has Been Developed.

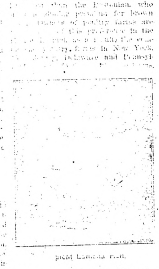
(Prepared by the United States Department of Agriculture.)

Although the color of an egg shell is no indication of the chemical composition of its content, people in different cities and in different parts of the country have rather decided preferences for either white or brown eggs. The wise producer considers the likes and dislikes of his prospective customers, even though they may be based on a mistaken notion. A brown egg is just as nutritious as a white egg, and a white one is just as full of [illegible] United [illegible] If [illegible] easy is satisfied [illegible] a little more [illegible]

[illegible]

The [illegible] is largely, or almost [illegible] dependent upon the [illegible] laid it. In general [illegible] Plymouth Rocks, Rhode Island Reds and Wyandottes [illegible] As all these [illegible] it may be [illegible] brown eggs. [illegible] in New England [illegible] a premium on the [illegible] Providence markets. Although the [illegible] of this egg is the [illegible] a white one, there is a [illegible] in the coloring. The [illegible] eggs are harder and the [illegible] through the shell is [illegible] in marking the chicks have [illegible] work getting out than [illegible] to develop in [illegible]

[illegible] white egg brings [illegible] cents a dozen at [illegible] it is probable that the New Yorker gets no more nour[illegible] out of his [illegible] than the Bostonian, who [illegible] for brown [illegible] of poultry farms are [illegible] of this preference in the [illegible] the [illegible] farms in New York, [illegible] Delaware and Pennsyl[illegible]



[illegible] Lamona Hen.

[illegible] white eggs. The white-[illegible] breeds, in addition to the Leghorns, are the Black Spanish, the Minorca and all the Mediterranean breeds. All of these breeds have white ear lobes.

White Eggs Preferred.

In Philadelphia the preference is largely for white eggs and this market draws heavily from the same territory as New York for its highest grade eggs. Chicago gets farm eggs from all parts of the Middle West that are sorted and graded by those who pack them. There is no pronounced preference in that city. The Pacific coast prefers white eggs, and all of the large poultry plants, for which California is famous, keep Leghorns.

The Asiatic fowls, meat breeds that are kept only in small numbers, have red lobes and lay good-sized, brown eggs. The red-lobe-brown-egg and the white-lobe-white-egg rule held good in all cases until the Department of Agriculture developed a new breed. This new breed, the Lamona, is large enough to satisfy the farmer, the back-yard poultryman and the packer, and still is attractive to the egg producer. One of its most striking peculiarities is that it has a red ear lobe and lays a white egg. With so many big markets preferring the white egg this breed, with the additional advantages of size, good quality of meat, yellow skin and legs, ought to be popular.

Claiming Big Bill

By HUBERT RAY

Copyright, 1922, Western Newspaper Union.

Joe and Giuseppi, which means the same thing, perched themselves fifty-seven feet above the thirty-ninth story of the Teerah building and looked down. From where they crouched they could see the whole checkerboard of the city spread out beneath them.

The parks appeared as little patches of vivid green, the houses and office buildings were as child's blocks; the cars were crawling centipedes, the pedestrians tiny dots that stained the whiteness of the intersecting streets and avenues.

Giuseppi adjusted the ropes about the plank.

"Here she goes, Joe!" he said.

Joe stepped upon the boards and held the ropes tightly, while Giuseppi began playing them out from the perch on which he stood. Joe went slowly down and down.

The cornice and architectural embellishments of the Teerah Tower began to rise upward. Two pigeons flapped away, and Joe saw two nests with little white eggs in them within the angle formed by two stone projections.

"I s'pose they do lay eggs like the sparrers," reflected Joe. "Funny I never thought of it."

"All right Joe?" came Giuseppi's voice from above.

"Let 'er go, Giuseppi," Joe called back.

Now an enormous sphere of dingy white began to raise itself to the level of Joe's vision; then there came into view a monstrous arm of steel, looking like a stunted maypole. Another appeared. All round the whitish rim appeared [illegible] of metal, disposed with varying [illegible] And suddenly the face of the [illegible] seemed to tremble as the thunderous boom of Big Bill, the Teerah clock, saluted the city below.

"Aw ri', Giuseppi," Joe called at the top of his voice.

Fastened to one side of the planks was a very long mop, a housewife's [illegible] as a healthy giant [illegible] have disported herself with on [illegible] apartment. It stood in a pail containing a mixture of [illegible] fluid. Joe raised the mop in his arms and staggered forward. The handle of the mop struck the can, which overturned, tilting the planks. Joe grasped at nothing, felt himself falling, threw out his arms, and seized the nearest steel pole in front of him.

Next instant he was clinging with both arms around Big Bill's minute-[illegible] as it made its way past the hour.

Far underneath he could see the checkerboard of the city, overhead the sun blazing in the cloudless sky. His cries were unheard; the projecting cornice [illegible] out of sight and sound from Giuseppi.

Giuseppi, seated on his ledge, was wolfing down his dinner. Joe, he knew, was safe underneath; there was no reason why he should disturb himself until Joe called to be pulled up. Having eaten, he lay back and began dreaming of a girl in Palermo.

When Joe's nerves ceased to quiver and strain at the gooseflesh that contained them, he began to view the possibilities of the situation. The swinging planks had [illegible] downward, a rope had slipped somewhere; it was impossible to regain his place there. His weight upon the minute hand did not impede its movement in the least. It was moving steadily downward. Very soon it pointed to a quarter past the hour. Joe lay extended on its broad surface, holding on for life and death.

Several times he shouted again, but without the least result.

The minute hand crept on. Joe perceived with horror that he was moving head downward. He hung poised over the city vertically, his head at the VI, his feet about the center of the clock.

He clung madly to the hand through a period of all but unconsciousness. As his senses gradually returned, he became aware that he was shifting back to the horizontal. Soon he could ease the strain upon his aching arms. The minute hand pointed to a quarter before the hour.

Then a new horror assailed him. Underneath was the shorter pole of the hour hand. Measuring the space between them with his eyes, Joe saw that inexorably as they drew together he would be caught, crushed lifeless, flung to the checkerboard below.

Desperately he began to shift his grasp, inch by inch downward, until his feet rested on the two-foot projection about the base of the hour-hand, at the center of the clock. He thought that if he could support himself on that, with only one arm extending round the minute hand, he might escape with the loss of a hand.

He closed his eyes. Already he seemed to feel the edge of the hour hand brush his wrist lightly. It was [illegible] minutes to twelve.

Suddenly a furious gust blew the tilted plank against the dial of the clock. And, poising himself on his stand, Joe leaped wildly toward the abyss—grasped the ropes, and clung to them.

"Giuseppi! Giuseppi!" he roared.

Giuseppi awoke from dreams of warm Palermo. His head appeared. "You call, Joe? You finish de job?" he shouted.

"No, I've dropped my mop," Joe shouted back. "Pull her up! I've gotta go for another, and I guess we're both out half-a-day's pay on this deal, Giuseppi."

The Squaw Man

By ANDREW R. THOMAS

Copyright, 1922, Western Newspaper Union.

It was Estelle Denton's laugh that the Squaw Man always remembered after that day when, sodden with drink, he opened his eyes to the sun to see the little party of pleasure seekers resting their horses outside the adobe hut.

"That?" [illegible] pointing to him. "Why, that [illegible] now it's our [illegible]"

The [illegible] they [illegible] the hun[illegible] Honoré's [illegible] there [illegible]

It was [illegible] them [illegible] brought [illegible] shame [illegible] Las Vegas [illegible] at the [illegible] boom [illegible] a big [illegible] too [illegible] cattle [illegible] built the [illegible] how [illegible] Cressley [illegible] origin[illegible] plenty in [illegible] though [illegible] days [illegible] made [illegible] women [illegible] least, white [illegible] did [illegible] ley had [illegible] company [illegible] panion of [illegible] of the [illegible] periah, of [illegible] had to [illegible]

Perhaps [illegible] day [illegible] had [illegible] the road [illegible] what [illegible] point of [illegible]

Yes [illegible] having [illegible] from [illegible] the [illegible] by [illegible] eaten away [illegible] of the man, and left only a shell behind.

The Squaw Man left his hut toward sundown and went up to the mountains. He could [illegible] he could think about all he could [illegible] form those [illegible] revolutions of the [illegible] up there. For here, where the big dam held the torrent, he had played a man's part once. He had cut this conduit between the old and the new river-beds; but he had not built that span of masonry that stretched from flank to flank of the Sierras. That had been the work of Holden, and Cressley had told him he had not allowed for the force of the spring freshets. If that ever gave—

The Squaw Man was always a little anxious about Holden's work. He always [illegible] his way there . . . .

He uttered a cry of dismay. Right in the center of the middle span the scour of the torrent had displaced three blocks of masonry. A stream of muddy water was pouring through. It would be the work of days to hold it.

It was streaming down to the dam below, instead of into the bed of the river. Instantly the Squaw Man saw the picture. Two hours, he estimated, would be required to flood the dam; once the level was reached the torrent would pour down the valley and sweep every vestige of Las Vegas forty miles to the Pacific.

In another moment the Squaw Man was running at full speed down the mountains. He calculated that it would take him the better part of two hours to reach Las Vegas. It had grown dark long before he reached there.

All the while he ran he listened subconsciously for the sound of the torrent that would spell death to every living soul within the valley.

The president's house stood on the bank of the stream—a spacious mansion, with broad lawns and shady trees. That would be the first to go. Then the flood would pour through the business section, widening into the outskirts . . . .

Lights, music, dancing, laughter! He broke into the crowded reception room. He elbowed aside the men in evening clothes who tried to stop him. He [illegible] that big man somewhere—on the lawn. He knocked him to the floor.

"The dam's burst; ride for the hills!" he shouted, seeing Estelle's, [illegible] and broke away.

Now [illegible] in the town, shouting, [illegible] a cavalcade of horses [illegible] The streets were filled, [illegible] Some one had telephoned [illegible] the Denton house [illegible] there [illegible] the Chinese cabins [illegible] the outskirts. Only Chinks—but he was a squaw man!

But Las Vegas was empty! Still he ran to and fro, shouting his warning. He ran from house to house, each empty, dark, abandoned. What was that roaring in his ears? Was it his heart pounding or—?

Far up the valley gleamed the white wall of the torrent. The Squaw Man sat down; he could not have run, and it was too late to run. So, quite contented, he lay back on the brink of the stream and waited.

Feet of Clay.

"The bride was so happy at first. Now I hear [illegible] that her idol has feet of clay. [illegible] what is he up to?"

"[illegible] on the carpet, I believe," answered Uncle Gil Blaa.—Judge.

Alice's Other Man

By ELLA SAUNDERS

Copyright, 1922, Western Newspaper Union.

Alice Carruthers kissed her husband at the door and watched him stride down the street toward the station. He always hurried to catch the morning train, and, as she watched, she saw him break into a run. A bitter little smile hovered an instant on her [illegible]

[illegible] and she had been as happy as [illegible] during the first year of [illegible] marriage. Then business troubles [illegible] and Jim Carruthers [illegible] forgotten the days when he [illegible] to love and cherish his little [illegible]

Alice [illegible] washed up the breakfast things, and then [illegible] in her secretary [illegible] a bundle of letters [illegible] in a [illegible] handwriting. Extracting one from its envelope she read:

Darling Alice:

Your letter has been in my breast pocket for [illegible] now, and if I have hesitated to reply, it is only because words seem so [illegible] to convey to you how much you mean to me. I love you and I love you. Is there need of anything more?

[illegible] what you have told me does not surprise me in the least. I think of you as a [illegible] bird in a cage, and longing for freedom. You are tied to a brute who assesses you as a [illegible] possession. A wife—to keep his home tidy, to minister to his comforts—[illegible] more.

Dear [illegible] if you will come with me we will begin life somewhere anew, where gradually the memory of the old hateful life will become dim. You will always be all in the world to me. Will you come?

RODERICK.

Tears filled her eyes and dripped down on the pages as she read. She took up a pen, and, selecting a sheet of paper, began her answer:

My Own Dearest:

Yes, I will come with you, to the world's end, if necessary. Today he went off to his business as usual, without a thought of me. The touch of his lips was hateful to me. Surely, surely it cannot be right that two people who are so absolutely incompatible should always be chained together.

I love you, Roderick, darling, and I shall love you with my whole heart till I die. I am yours forever. I will take the 6.10 this evening and get off at Southport. Meet me there, and then—I am ready to obey your commands and go where you will.

ALICE.

She put away the letters and, folding the one she had written, addressed an envelope, slipped it inside, and carried it to the letter-box at the corner. And all the rest of that day she moved about within the house, happy in the thought of what the evening would bring. When the afternoon was almost gone she put on her hat and made her way out of the house toward the station. Never again would she see the hateful prison that had once been a little nest for herself and Jim.

The thought that she was going to her lover made her heart beat more quickly, and a tender smile curved her lips as she pictured Roderick, in his strength, his simplicity, his goodness.

And she paced the platform of the station in a fever of impatience, waiting for the train from the city that was to bear her onward to Southport. It came hissing up to the platform at last, and among the crowd of descending passengers she saw him.

They saw each other mutually. He hurried toward her and folded her in his arms.

"Alice, dear!"

"Jim, darling!"

"Good news, Alice. That business trouble is settled now, and I'm to have Gleason's post at a thousand more a year. There'll be more leisure for us now, and more happiness for you."

"Oh, Jim, dear, I'm so glad!" She slipped her arm through his and they strolled up the hill together.

"I've been reproaching myself all day for the way I've been neglecting you of late, Alice," he said.

"Never mind, Jim. I know you were worried. You—you're sure you love me as much as ever?"

"What a question, sweetheart!" He laughed, and there was a little pause.

"Jim, dear, will you think me awfully wicked if I confess something to you?"

"Out with it!" he laughed. "I've forgiven you already, Allie."

"[illegible] but it's terrible," she cried. "You know, when—when I wasn't sure you really cared, I—I wrote myself a love letter from an imaginary man, and [illegible] to post an answer, and we—were [illegible] away together. Only, I—I knew all the time that it was you."

Trees That Tell the Soil Moisture.

An interesting possibility was brought out by Dr. Sam F. Trelease of Johns Hopkins university in his paper before the physiological section of the Botanical Society of America. He pointed out that the leaflets of the cocoanut, banana and manilla trees folded along their midribs during the hotter and drier periods of the day, or longer periods, and opened again at night, and during moisture periods—especially very soon after a fall of rain.

This was shown to be due to the swelling or shrinking of two strips of tissue along the midrib which act as hinges. These changes are very regular and have been proved to happen with a definite relation to the amount of water absorbed by the plant.

He suggested the possibility of using this phenomenon in connection with irrigation not only in crops of the trees [illegible] in crops in the vicinity of which the above trees could be grown as indicators of the water content in the soil.—Cleveland News-Leader.

FEEDING AT FARROWING TIME

Sow Should Receive Nothing But Warm Water for Twenty-four Hours After Pigs Come.

For twenty-four hours after farrowing, the sow should receive no feed, but plenty of good warm water. She should then be started on a thin slop [illegible] or ground oats, [illegible] and a little tankage, the amount to be gradually increased, taking about ten days to get her on full feed. After ten days or two weeks give the sow all the grain she will clean up twice or three times a day.

FEEDING SKIMMILK TO PIGS

Difficult to Put Exact Valuation on It as Supplemental Feed—One Excellent Rule.

It is difficult to put an exact valuation on skim milk [illegible] feed with pigs. The rule [illegible] often been laid down [illegible] To find the value of 100 pounds of skim milk when fed alone, multiply the market price of live hogs in cents a pound by five. If fed in combination with corn or barley, multiply by six.

BREEDING FOWLS FOR COLOR

Excellent Plan [illegible] Rhode Island [illegible] for Exhibition Purposes.

In breeding [illegible] for color in order to secure exhibition pullets, [illegible] with a rich, red breast, free from smut [illegible] and free from [illegible] ticking on wing bows and a [illegible] him to females with [illegible] hackles with little or [illegible] and red in undercolor of back, to produce exhibition cockerels.

Holland's Old Roads.

In Holland good brick roads over a hundred years old are common, according to a writer in the American City, and some have even passed the double century mark. The brick used were vitrified, as are paving brick today. B. E. Stevenson, in his "Spell of Holland," says: "For brick, brick, brick are everywhere—overhead and underfoot, on edge in the roadway and piled into great walls and massive towers. It would almost seem that the Dutch had dug away most of the ground beneath their feet in order to convert it into paving and building materials."

British Shipbuilders Active.

Exporting ships played a large part in the activities of England's shipyards last year, according to the Nation's Business. Thirty-eight per cent of the tonnage constructed was for foreign owners. The total construction in British yards in 1921 was 1,538,000 tons. The tonnage launched in American yards was about 1,000,000, and in German yards, 500,000. Germany's figure compares favorably with her prewar construction and included 40 vessels between 4,000 and 7,000 tons, 13 between 7,000 and 10,000, and one around 14,000 tons.

THE GOODRIDGE BANNER

VOLUME XVI, No. 9. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, APRIL 14, 1922. $1.50 PER YEAR.

Control the Sow Thistle

No half way measures will succeed in the fight against the sow thistle, according to R. S. Dunham, agronomist at the Northwest school and station, Crookston. Sow thistle does not succumb to intermittent attacks. It has as many lives as there are new plants from its rootstocks. The important facts about this plant are: First, that it is propogated both by seed and by underground root stocks; second, that it is in its weakest condition when preparing to blossom, and third, that it cannot live without leaves. Preventive measures are necessary; the plant should not be allowed to produce seed, and only crops seed free from this weed should be planted. It should be cut as near to blossoming time as can be done without danger of allowing some plants to mature seed. Since the blossoms may mature seed after they are cut, all plants should be burned immediately after cutting.

Further eradication of the weed depends upon killing its root stocks. These can only be killed by preventing them from producing leaves. Without leaves the plant must die. For that reason following is essential to complete eradication: sufficient cultivation to keep all leaves from forming. "the black fallow," is the only kind of fallow worth while.

[illegible] in the fall or discing [illegible] scattered in the fall [illegible] frost will kill them. The following spring the land should be plowed at the normal depth and a black fallow maintained by cultivation until freeze up. The plowing should be well done. All land should be cut by the [illegible] and loosened by the mouldboard including the dead furrow. Leave no [illegible] strips in the field or at the [illegible]. Cover all weeds.

There are several agencies of seed distribution that cannot be prevented [illegible] water and railroads scatter seeds. For this reason control measures must be used by the farmer after the [illegible] of the weed. Chief of these are [illegible] rotation and good cultivation.

New Settlers Association

[illegible] organized New Settlers' [illegible] held their second meeting at [illegible] Wednesday evening. [illegible] attendance was had. Several people were present from Goodridge and [illegible]. County Agent McCann [illegible] and assurance that with [illegible] at least a dozen parties will arrive from points in North Dakota and southern Minnesota to make a personal inspection of lands in this section. A number of speakers gave their ideas as [illegible] future of this part of the state. [illegible] meeting President [illegible] appointed A. J. Anderson, [illegible], Goodridge; K. O. [illegible], and E. C. Kar[illegible], as representatives of the [illegible] their respective [illegible].

[illegible] Enlarged

[illegible] of county agents held [illegible] Saturday at which ten [illegible] were represented [illegible] a number of the [illegible] Marshall and Beltrami counties [illegible] the territory covered by [illegible] and Mr. McCann will [illegible] two days each month at [illegible] the accommodation of farmers residing in that section.

[illegible] ERRORS

N. [illegible] and son Alexander autoed to [illegible] Tuesday on business.

Miss Tillie Ose completed her term of school in district No. 5 [illegible] of last week. [illegible] school in district [illegible] closes [illegible] this week.

Rev. [illegible] of Thief River Falls accompanied by Rev. [illegible] conducted religious services [illegible] the Clover Nook school house Sunday afternoon.

Gust A. Iverson and George Hovet drove to Goodridge Tuesday and attended to business matters. H. C. Iverson accompanied the boys, en route to Thief River Falls and points further down the line.

T. B. Johnson returned Friday from the Thief River vicinity where he had spent a few days attending to matters of business.

John Hovet left Monday for Grand Forks and other Dakota points, where he will be employed during the summer.

WHITE OR BROWN EGGS PREFERRED

People in Different Cities Have Decided Preferences for One or the Other.

NO INDICATION OF QUALITY

Color of Shell Is Almost Entirely Dependent on Breed of Fowl That Laid It—New Breed Has Been Developed.

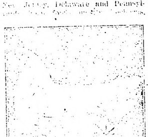
(Prepared by the United States Department of Agriculture.)

Although the color of an egg shell is no indication of the chemical composition of its content, people in different cities and in different parts of the country have rather decided preferences for either white or brown eggs. The wise producer considers the likes and dislikes of his prospective customers, even though they may be based on a mistaken notion. A brown egg is just as nutritious as a white one and a white one is just as full of food as a brown one, says the United States Department of Agriculture. If a person's color idiosyncrasy is satisfied, however, he may get a little more good out of the egg he eats.

Color Depends on Breed.

The color of an egg is largely, or almost entirely, dependent upon the breed of the bird that laid it. In general the American breeds—Plymouth Rocks, Rhode Island Reds and Wyandottes—lay brown eggs. As all these breeds have red ear lobes, it may be said that red lobes mean brown eggs. The brown egg is popular in New England and brings a premium on the Boston and Providence markets. Although the content of this egg is the same as that of a white one, there is a difference in the covering. The shells of brown eggs are harder and the skin just underneath the shell is tougher. In hatching, the chicks have a little harder work getting out than [illegible] happened to develop in shells of a lighter hue.

In New York the white egg brings a premium of 7 to 10 cents a dozen at some seasons, but it is probable that the New Yorker gets no more nourishment nor enjoyment out of his breakfast than the Bostonian, who pays a similar premium for brown eggs. Owners of poultry farms are [illegible] of this preference in the [illegible], and, as a result, the commercial poultry farms in New York, New Jersey, Delaware and Pennsylvania [illegible]



Typical Lamona Hen.

that produce white eggs. The white-egg breeds, in addition to the Leghorns, are the Black Spanish, the Minorca and all the Mediterranean breeds. All of these breeds have white ear lobes.

White Eggs Preferred.

In Philadelphia the preference is largely for white eggs and this market draws largely from the same territory as New York for its highest grade eggs. Chicago gets farm eggs from all parts of the Middle West that are sorted and graded by those who pack them. There is no pronounced preference in that city. The Pacific coast prefers white eggs, and all of the large poultry plants, for which California is famous, keep Leghorns.

The Asiatic fowls, meat breeds that are kept only in small numbers, have red lobes and lay good-sized, brown eggs. The red-lobe-brown-egg and the white-lobe-white-egg rule held good in all cases until the Department of Agriculture developed a new breed. This new breed, the Lamona, is large enough to satisfy the farmer, the back-yard poultryman and the packer, and still is attractive to the egg producer. One of its most striking peculiarities is that it has a red ear lobe and lays a white egg. With so many big markets preferring the white egg this breed, with the additional advantages of size, good quality of meat, yellow skin and legs, ought to be popular.

Cleaning Big Bill

By HUBERT RAY

Copyright, 1922, Western Newspaper Union.

Joe and Giuseppi, which means the same thing, perched themselves fifty-seven feet above the thirty-ninth story of the Teerah building and looked down. From where they crouched they could see the whole checkerboard of the city spread out beneath them.

The parks appeared as little patches of olive green, the houses and office buildings were as child's blocks; the cars were crawling centipedes, the pedestrians tiny dots that stained the whiteness of the intersecting streets and avenues.

Giuseppi adjusted the ropes about the plank.

"There she goes, Joe!" he said.

Joe stepped upon the boards and held the ropes tightly, while Giuseppi began playing them out from the perch on which he stood. Joe went slowly down and down.

The cornice and architectural embellishments of the Teerah Tower began to rise upward. Two pigeons flapped away, and Joe saw two nests with little white eggs in them within the angle formed by two stone projections.

"I s'pose they do lay eggs like the sparrers," reflected Joe. "Funny I never thought of it."

"All right Joe?" came Giuseppi's voice from above.

"Let 'er go, Giuseppi," Joe called back.

Now an enormous sphere of dingy white began to raise itself to the level of Joe's vision; then there came into view a monstrous arm of steel, looking like a stunted flagpole. Another appeared. All round the whitish rim appeared [illegible] of metal, disposed with varying [illegible]s. And suddenly the face of the [illegible] seemed to tremble as the thunderous boom of Big Bill, the Teerah clock, saluted the city below.

"Aw ri', Giuseppi," Joe called at the top of his voice.

Fastened to one side of the planks was a very long mop, a housewife's [illegible] such a one as a healthy giantess might have disported herself with in some Gargantuan apartment. It stood in a pail containing a mixture of cleaning fluid. Joe raised the mop in his arms and staggered forward. The handle of the mop struck the can, which overturned, tilting the planks. Joe grasped at nothing, felt himself falling, threw out his arms, and seized the great steel pole in front of him.

Next instant he was clinging with both arms around Big Bill's minute-hand as it made its way past the hour.

Far underneath he could see the checkerboard of the city, overhead the sun blazing in the cloudless sky. His cries were unheard; the projecting cornice cut off sight and sound from Giuseppi.

Giuseppi, seated on his ledge, was wolfing down his dinner. Joe, he knew, was safe underneath; there was no reason why he should disturb himself until Joe called to be pulled up. Having eaten, he lay back and began dreaming of a girl in Palermo.

When Joe's nerves ceased to quiver and strain at the gooseflesh that contained them, he began to view the possibilities of the situation. The swinging planks had tilted downward, a rope had slipped somewhere; it was impossible to regain his place there. His weight upon the minute hand did not impede its movement in the least. It was moving steadily downward. Very soon it pointed to a quarter past the hour. Joe lay extended on its broad surface, holding on for life and death.

Several times he shouted again, but without the least result.

The minute hand crept on. Joe perceived with horror that he was moving head downward. He hung poised over the city vertically, his head at the VI, his feet about the center of the clock.

He clung madly to the hand through a period of all but unconsciousness. As his senses gradually returned, he became aware that he was shifting back to the horizontal. Soon he could ease the strain upon his aching arms. The minute hand pointed to a quarter before the hour.

Then a new horror assailed him. Underneath was the shorter pole of the hour hand. Measuring the space between them with his eyes, Joe saw that inexorably as they drew together he would be caught, crushed lifeless, flung to the checkerboard below.

Desperately he began to shift his grasp, inch by inch downward, until his feet rested on the two-foot projection about the base of the hour-hand, at the center of the clock. He thought that if he could support himself on that, with only one arm extending round the minute hand, he might escape with the loss of a hand.

He closed his eyes. Already he seemed to feel the edge of the hour hand brush his wrist lightly. It was two minutes to twelve.

Suddenly a furious gust blew the tilted plank against the dial of the clock. And, poising himself on his stand, Joe leaped wildly toward the abyss—grasped the ropes, and clung to them.

"Giuseppi! Giuseppi!" he called.

Giuseppi awoke from dreams of warm Palermo. His head appeared. "You call, Joe? You finish de job?" he shouted.

"No, I've dropped my mop," Joe shouted back. "Pull her up! I've gota go for another, and I guess we're both out half-a-day's pay on this deal, Giuseppi."

The Squaw Man

By ANDREW R. THOMAS

Copyright, 1922, Western Newspaper Union.

It was Estelle Denton's laugh that the Squaw Man always remembered after that day when, sodden with drink, he opened his eyes to the sun to see the little party of pleasure-seekers resting their horses outside the adobe hut.

"That?" she asked, pointing to him. "Why, that used to be a man. Now it's our only [illegible]"

The [illegible] they remounted [illegible] on their way into the hulk [illegible] Honorable [illegible] they there crept a [illegible]

It was [illegible] of them [illegible] and brought [illegible] the shanty [illegible] of Las Vegas [illegible] at the [illegible] boom [illegible] a busy [illegible] too [illegible] cactus [illegible] built the big [illegible] flow of [illegible] Cressley had [illegible] original [illegible] pioneer in [illegible] though [illegible] days. [illegible] made [illegible] woman's [illegible] At least, white women.

[illegible] they did not [illegible] ley had [illegible] left the company. [illegible] companion of [illegible] of those [illegible] pariah, of whom nothing was too bad to be said.

Perhaps [illegible] the daughter of the company's president, had [illegible] the road. [illegible] went [illegible] to the point of [illegible]

Yes, [illegible] having [illegible] of the Denton [illegible] by a [illegible] young man but [illegible] the [illegible] by the fumes of the poison that had eaten away the moral [illegible] of the man, and left only a shell behind.

The Squaw Man left his hut toward sundown and went up toward the mountains. He could breathe there, he could think, above all, he could best form those never-ending resolutions of [illegible] up there. For here, where the big dam held the torrent, he had played a man's part once. He had cut this conduit between the old and the new river-beds; but he had not built that span of masonry that stretched from flank to flank of the Sierras. That had been the work of Holden, and Cressley had told him he had not allowed for the force of the spring freshets. If that ever gave—

The Squaw Man was always a little anxious about Holden's work. He always made his way there . . . .

He uttered a cry of dismay. Right in the center of the middle span the scour of the torrent had displaced three blocks of masonry. A stream of muddy water was pouring through. It would be the work of days to hold it.

It was streaming down to the dam below, instead of into the bed of the river. Instantly the Squaw Man saw the picture. Two hours, he estimated, would be required to flood the dam; once the level was reached the torrent would pour down the valley and sweep every vestige of Las Vegas forty miles to the Pacific.

In another moment the Squaw Man was running at full speed down the mountains. He calculated that it would take him the better part of two hours to reach Las Vegas. It had grown dark long before he reached there.

All the while he ran he listened subconsciously for the sound of the torrent that would spell death to every living soul within the valley.

The president's house stood on the bank of the stream—a spacious mansion, with broad lawns and shady trees. That would be the first to go. Then the flood would pour through the business section, widening into the outskirts . . . .

Lights, music, dancing, laughter! He broke into the crowded reception room. He elbowed aside the men in evening clothes who tried to stop him. He [illegible] the big man somewhere—on the lawn. He knocked him to the floor.

"The dam's burst; ride for the hills!" he shouted, seeing Estelle's [illegible] and broke away.

[illegible] in the town, shouting. [illegible] a confusion of horses and cars. The streets were filled. They knew. Some one had telephoned from the Denton house. But there were the [illegible] cabins upon the outskirts. Only Chinks—but he was a squaw man!

But Las Vegas was empty! Still he ran to and fro, shouting his warning. He ran from house to house, each empty, dark, abandoned. What was that roaring in his ears? Was it his heart pounding or—?

Far up the valley gleamed the white wall of the torrent. The Squaw Man sat down; he could not have run, and it was too late to run. So, quite contented, he lay back on the brink of the stream and waited.

Feet of Clay.

"The bride was so happy at first. Now I hear her [illegible] that her idol has feet of clay. [illegible] is he guilty?"

"Tracks mud on the carpet I believe," answered Uncle Gil Blaa.—Judge.

Alice's Other Man

By ELLA SAUNDERS

Copyright, 1922, Western Newspaper Union.

Alice Carruthers kissed her husband at the door and watched him stride down the street toward the station. He always hurried to catch the morning train, and, as she watched, she saw him break into a run. A bitter little smile hovered an instant on her lips.

Jim and she had been as happy as [illegible] during the first year of their marriage. Then business troubles had come along, and Jim Carruthers [illegible] forgotten the days when he had [illegible] to love and cherish his little bride for all [illegible] to come.

Alice turned back into the house, washed up the breakfast things, and then unlocked a drawer in her secretary. She took out a bundle of letters, [illegible] in a large masculine handwriting. Extracting one from its envelope she read:

Darling Alice:

Your letter has been in my breast pocket for days now, and if I have hesitated to reply, it is only because words seem inadequate to convey to you how much you mean to me. I love you and I love you. Is there need of anything more?

Darling, what you have told me does not surprise me in the least. I think of you as a beautiful, helpless bird in a cage, and longing for freedom. You are tied to a brute who assesses you as a commercial proposition. A wife—to keep his home tidy, to minister to his comforts—[illegible] more.

Dear, if you will come with me we will be[gin] life somewhere anew, where gradually the memories of the old hated life will become dim. You will always be all in the world to me. Will you come?

RODERICK.

Tears filled her eyes and dripped down on the pages as she read. She took up a pen, and, selecting a sheet of paper, began her answer:

My Own Dearest:

Yes, I will come with you, to the world's end, if necessary. Today he went off to his business as usual, without a thought of me. The touch of his lips was hateful to me. Surely, surely it cannot be right that two people who are so absolutely incompatible should always be chained together.

I love you, Roderick, darling, and I shall love you with my whole heart until I die. I am yours forever. I will take the 6.10 this evening and get out at Southport. Meet me there, and then—I am ready to obey your commands and go where you will.

ALICE.

She put away the letters and, folding the one she had written, addressed an envelope, slipped it inside, and carried it to the letter-box at the corner. And all the rest of that day she moved about within the house, happy in the thought of what the evening would bring. When the afternoon was almost gone she put on her hat and made her way out of the house toward the station. Never again would she see the hateful prison that had once been a little nest for herself and Jim.

The thought that she was going to her lover made her heart beat more quickly, and a tender smile curved her lips as she pictured Roderick, in his strength, his simplicity, his goodness.

And she paced the platform of the station in a fever of impatience, waiting for the train from the city that was to bear her onward to Southport. It came hissing up to the platform at last, and among the crowd of descending passengers she saw Jim.

They saw each other mutually. He hurried toward her and folded her in his arms.

"Alice, dear!"

"Jim, darling!"

"Good news, Alice. That business trouble is settled now, and I'm to have Gleason's post at a thousand more a year. There'll be more leisure for us now, and more happiness for you."

"Oh, Jim, dear, I'm so glad!" She slipped her arm through his and they started up the hill together.

"I've been reproaching myself all day for the way I've been neglecting you of late, Alice," he said.

"Never mind, Jim. I knew you were worried. You—you're sure you love me as much as ever?"

"What a question, sweetheart!" He laughed, and there was a little pause.

"Jim, dear, will you think me awfully wicked if I confess something to you?"

"Out with it!" he laughed. "I've forgiven you already, Allie."

"Ah, but it's terrible," she cried. "You know, when—when I wasn't sure you really cared, I—I wrote myself a love letter from an imaginary man, and pretended to post an answer, and we—were going to run away together. Only, I—I knew all the time that it was you."

Trees That Tell the Soil Moisture.

An interesting possibility was brought out by Dr. Sam F. Trelease of Johns Hopkins university in his paper before the physiological section of the Botanical Society of America. He pointed out that the leaflets of the cocoanut, banana and manilla trees folded along their midribs during the hotter and drier periods of the day, or longer periods, and opened again at night, and during moisture periods—especially very soon after a fall of rain.

This was shown to be due to the swelling or shrinking of two strips of tissue along the midrib which act as hinges. These changes are very regular and have been proved to happen with a definite relation to the amount of water absorbed by the plant.

He suggested the possibility of using this phenomenon in connection with irrigation not only in crops of the trees [illegible] but also in crops in the vicinity of which the above trees could be grown as indicators of the water content in the soil.—Cleveland News-Leader.

FEEDING AT FARROWING TIME

Sow Should Receive Nothing But Warm Water for Twenty-four Hours After Pigs Come.

For twenty-four hours after farrowing, the sow should receive no feed, but plenty of good warm water. She should then be started on a thin slop of bran or ground oats, ground barley and a little tankage, the amount to be gradually increased, taking about ten days to get her on full feed. FEEDING SKIMMILK TO PIGS

Difficult to Put Exact Valuation on It as Supplemental Feed—One Excellent Rule.

It is difficult to put an exact valuation on skim milk as a supplemental feed with pigs. The rule which has often been laid down is as follows: To find the value of 100 pounds of skim milk when fed alone, multiply the market price of live hogs in cents a pound by five. If fed in combination with corn or barley, multiply by six.

BREEDING FOWLS FOR COLOR

Excellent Plan Outlined for Securing Rhode Island Reds for Exhibition Purposes.

In breeding Rhode Island Reds for color in order to secure exhibition pullets, use a male with a rich, red breast, free from smutting or lacing, and free from black ticking on wing bows and a rich red in tail; mate him to females with dark rich red hackles with little or no black ticking and red in undercolor of back, to produce exhibition cockerels.

Holland's Old Roads.

In Holland good brick roads over a hundred years old are common, according to a writer in the American City, and some have even passed the double century mark. The brick used were vitrified, as are paving brick today. B. E. Stevenson, in his "Spell of Holland," says: "For brick, brick, brick are everywhere—overhead and underfoot, on edge in the roadway and piled into great walls and massive towers. It would almost seem that the Dutch had dug away most of the ground beneath their feet in order to convert it into paving and building materials."

British Shipbuilders Active.

Exporting ships played a large part in the activities of England's shipyards last year, according to the Nation's Business. Thirty-eight per cent of the tonnage constructed was for foreign owners. The total construction in British yards in 1921 was 1,538,000 tons. The tonnage launched in American yards was about 1,000,000, and in German yards, 500,000. Germany's figure compares favorably with her prewar construction, and included 40 vessels between 4,000 and 7,000 tons, 13 between 7,000 and 10,000, and one around 14,000 tons.

INTENTIONAL DUPLICATE EXPOSURE

DEFECTIVE PAGE

The

Harvester Company's Exceptional Offer

and contribution to the farmers, effective February 8 to May 1, 1922

The Harvester Co. makes this special offer to apply on all new Titan 10-20 Tractors purchased by its dealers on 1922 account. Each farmer purchasing one of these Tractors for delivery on or before May 1st, next, will be given by the company absolutely free f. o. b. Chicago a 3-furrow P & O plow.

$200 CUT in price of TITAN TRACTOR

New price $700 f. o. b. Chicago

and a P & O 3 Furrow Plow Free

These are not stripped tractors pared down to make a price, but complete with all essential equipment— Pulley, Fenders, Platform, Throttle-governor, adjustable drawbar, [illegible] lugs, brakes. This equipment would [illegible] on any tractor to make it serviceable and safe, included in our price. NO EXTRAS TO BUY.

6 TO 7 A. M., 12 TO 1, 6 TO 7 P. M.

Fees, $10 for Live Colt

ANTON JOHNSON, Highlanding

BEST DEVELOPMENT OF CALF

Feeding Should Begin Before Birth and Insufficient Amount Results in Puny Youngster.

Poorly nourished cows give birth to weak, puny calves which are hard to raise. The feeding of the calf, therefore, begins before it is born. The food elements for the development of the calf are taken into the stomach of the cow, digested, assimilated, and transmitted to the calf through the umbilical cord, the connection between the mother and the calf. It is evident that if the cow does not receive food enough to keep herself in thrifty condition and at the same time develop her calf, both she and the calf must suffer.

GETTING COWS ON PASTURE

In Many Cases Grass Is Not in Proper Condition to Be Grazed and Animals Suffer.

The temptation to get the cows on grass as early as possible in the spring is not an easy one to resist and the consequence is that many pastures are required to carry cattle before they are in proper condition to be grazed. Although milk cows will usually show gains in milk production on grass immediately after it becomes green, these gains are only temporary and unless the feeding of the regular barn rations is continued, the milk flow soon falls off and the animals lose in flesh.

RAPE GOOD SUMMER PASTURE

Takes High Rank for Furnishing Succulent Feed for Hogs or Sheep —Easily Grown.

Among the crops which can be grown for succulent pasture for hogs or sheep during the summer and fall months, rape takes high rank. It furnishes abundant food which is greatly relished by those animals; it is easily grown and can be sown most any time in the spring or early summer after there is no further danger of severe frost. It will endure severe frost in the fall and can be pastured late provided stock is kept off when it is frozen.

SELECTING TOMATOES TO PREVENT DISEASE

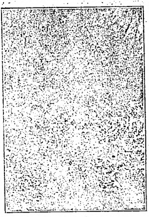
Norduke Is Highly Resistant to Wilt Ailments.

Four Other Varieties, Marvel, Norton, Columbia and Arlington, Are Also Recommended—Big Annual Loss Is Avoided.

(Prepared by the United States Department of Agriculture.)

In the course of work on the selection of tomatoes that will resist the wilt disease, which causes a large annual loss in the tomato-canning states, the United States Department of Agriculture has developed a variety called Norduke, similar to Stone, but highly resistant to wilt. Four other wilt-resistant varieties have already been produced, known as the Marvel, which is a medium early tomato selected from Merveille des Marches, bearing a heavy crop of smooth red fruit; the Norton, selected from Stone, producing a heavy yield of large, smooth, solid red fruit, which ripens slowly, and therefore ships well; and Columbia and Arlington, medium late varieties, selected from Greater Baltimore.

The Marvel is an excellent variety for forcing, for medium early trucking, and for home gardening. The Columbia, like the Arlington, which has been temporarily withdrawn for purification, because of mixtures found in the seed in 1920, is better for canning than for the table, because of its somewhat flat shape, which does not permit slicing as successfully as some of the rounded tomatoes. The Norton and the newer variety, the Norduke, are late tomatoes, excellent for canning, for home gardening, and late trucking. The Norduke shows the highest resistance to wilt of any tomato, and also some resistance to the leaf-spot disease.



Field of Staked Tomatoes.

Wilt-resistance strains of tomatoes are developed by selecting from a variety which possesses moderate resistance, individuals which show higher resistance. This resistance can be combined with other desirable qualities in other varieties by crossing. Seeds from resistant strains have been distributed through state experiment stations to canners and others for testing, and some of the varieties are now being carried in the catalogue lists of seed houses.

TOMATO-SEED CAKE AS FEED

Value as Source of Protein for Live Stock Has Been Demonstrated By Experiments.

The value of tomato-seed press cake as a source of protein feed for live stock has been demonstrated by a series of experiments recently conducted in the protein investigation laboratory of the bureau of chemistry, United States Department of Agriculture. It has been previously estimated by the department that over 2,000 tons of tomato seeds are largely wasted annually as a by-product in the manufacture of catsup and other products by the tomato pulping plants in the United States. Tomato seeds contain approximately 22 per cent of a valuable oil. The press cake which remains after expelling the oil contains about 37 per cent of protein, which chemical and nutritional experiments have shown to be of high food value. Young albino rats were fed on a diet in which tomato-seed press cake furnished the only source of protein, the diet having been made adequate in other respects by the addition of the other essential dietary factors. On this diet the rats were enabled to grow at the normal rate, showing that the proteins of the tomato seed contain all of the amino acids essential to the growth of animals. It was also found that the press cake contains sufficient amount of the water soluble, or anti-beri-beri vitamine.

The New Spirit.

"Isn't that a new hat Ethel?" "Yes, dear, mother bought it for herself, but decided it was too old for her."—Judge.

SUGGESTIONS TO AID HAY GROWER

Eliminate Loss and Trouble by Having Clear Understanding of All Terms.

CONFIRM ALL TRANSACTIONS

Quantity, Quality, Time of Shipment and Routing Should Be Made So That There Will Be No Misunderstanding.

(Prepared by the United States Department of Agriculture.)

Many of the difficulties and losses that shippers of hay encounter would be eliminated if more care were exercised when making sales to see that all terms are clear and practicable and that both seller and buyer have the same understanding of them. This can be accomplished by observing the following suggestions by the bureau of markets and crop estimates, United States Department of Agriculture:

State clearly in all offers or acceptances all necessary factors, including quality and quantity of hay, together with time of shipment, routing, rates, price and terms of payment.

Confirm all sales and purchases by letter, in which is stated all terms as understood by the seller or the buyer, as the case may be.

Upon receipt of confirmation, correct immediately any items that appear to be incorrect.

Make Terms Clear.

Too much emphasis cannot be placed upon the matter of care in stating terms when making sales or purchases. A greater part of such transactions are usually by telephone or telegraph which makes brevity necessary. A few more cents spent in telephone or telegraph charges, however, is better than several dollars lost on an unsatisfactory shipment. On the part of the shipper, therefore, when offering hay for sale, whether the offer is by wire or letter, the following should be stated:

(a) Quantity by bales, tons, or carloads. If by bales, the size should always be given, and if by tons or carloads, it is well also to state the size of bales that will be shipped, as there is a decided preference in certain sections for certain types and sizes of bales.

(b) Quality, either in descriptive terms or in the terms of state or commercial grades. When commercial grades are used it must be made certain that both buyer and seller understand what standards are being used. It is sometimes advisable to state what inspection agency is to determine the grade.

(c) The time of shipment should be specified either by naming the exact date on or before which shipment will be made, or by using the trade terms of "immediate," "quick," or "prompt," which are given the following interpretation: "Immediate" or "rush" is shipment within three calendar days, "quick" five calendar days, and "prompt" ten calendar days, Sundays and holidays excluded in each instance.

Hauling Hay to Railroad Station.

(d) The routing which can be made by the shipper, or that which is desired by the buyer, should be made in the first bid or offer, as it is an important item and, together with the rates applying, may be the determining factor in the transaction. Instead of stating the rate, the point at which the price applies may be given, such as "f. o. b. shipper's track" or "delivered buyer's station."

(e) The price should be stated clearly and it should also be made clear for what length of time the bid or offer holds good and whether or not the acceptance of either is subject to confirmation by the maker.

Send Confirmation Promptly.

When a bid or offer has been accepted and a sale consummated, whether by letter or wire, a confirmation by letter, setting forth in detail all the terms and conditions of the transaction, should be mailed by each party to the other. If, upon receipt of these confirmations, either party notes any item that is contrary to his understanding of the terms he should notify the other immediately by telegraph, so that all errors may be corrected before a shipment is made. If the hay was ready for shipment when the sale was made, however, it may not be possible for the shipper to wait for a written confirmation of the acceptance by the buyer, but he should forward a telegram to the buyer confirming the terms of his original offer and his understanding of the acceptance.

TEMPERATURE OF MILK IMPORTANT

Results of Experiments Obtained by Dairy Experts Explain Why Product Sours.

SURFACE COOLER IS FAVORED

Coldest Water Obtainable Should Be Used and Cans Set in Well Insulated Tank—Protection Needed in Shipping.

(Prepared by the United States Department of Agriculture.)

Milk of ordinary quality held at 75 degrees Fahrenheit, a temperature not uncommon in the summer, soured in 36 hours, while the same quality of milk held at 55 degrees kept sweet for 80 hours, and at 40 degrees for 180 hours. These results were obtained in an experiment carried on by the dairy division, United States Department of Agriculture, to determine the effect of temperature on the milk; and the results explain in a large measure why milk which has not been cooled on the farm—and kept cold—often is sour when it arrives at its destination.

The best and quickest way to cool milk to 50 degrees Fahrenheit is over a surface cooler. Use the coldest water available, and then set the cans of milk in a well-insulated tank filled with water below 40 degrees Fahrenheit. A 10-gallon can of milk precooled with water at 55 degrees Fahrenheit and set in a tank of ice water at 37 degrees Fahrenheit was cooled at 50 degrees in 20 minutes.

The use of a surface cooler is especially necessary when the time between milking and shipping is short. If warm milk is run over a surface cooler, and then set in a tank of water cooled with ice to 40 degrees Fahrenheit or below, it should not be difficult to cool milk to 50 degrees within an hour after it leaves the cow. Because precooling with a surface cooler is not practiced and ice is not put into the cooling tank before the milk, much milk reaches the shipping station in summer at so high a temperature that it sours on the way to the city.

On many farms the water used for cooling milk comes from the general storage tank or from a spring. The temperature of such water when it reaches the cooling tank is much higher than when it leaves the well or spring. Well or spring water that has a temperature of from 50 degrees to 55 degrees Fahrenheit frequently is warmed up to 70 degrees or 75 degrees Fahrenheit before it reaches the cooling tank.

Milk Should Be Cooled Immediately After It Is Drawn.

Even under the best conditions, milk transported during hot weather usually is several degrees warmer by the time it reaches the railroad station.

To show the importance of protecting milk in transit during hot weather, four ten-gallon cans of milk cooled to 44 degrees Fahrenheit were hauled 13 miles from a farm to the railroad station. Can No. 1 was an insulated type; No. 2 was an ordinary can covered with a one-inch felt jacket; No. 3 was covered with a half-inch felt jacket, and No. 4 was an ordinary, unprotected can. During the trip, with the air temperature at 80 degrees Fahrenheit, the milk in the insulated can rose one degree in temperature, the milk in the cans protected with jackets rose six degrees, and the milk in the unprotected can rose 20 degrees. The cans were then shipped by rail in an ordinary baggage car for more than 1,000 miles at an average air temperature of about 80 degrees Fahrenheit, to study the effect on the milk. In the unprotected can the milk had reached a temperature of 60 degrees Fahrenheit in two hours, or after it had traveled about ten miles from the farm (before reaching the railroad); the milk in the can covered with the half-inch jacket reached 60 degrees Fahrenheit only after 11¼ hours, or about 263 miles of travel; the can covered with the one-inch jacket traveled for 13 hours, or about 332 miles, before reaching 60 degrees Fahrenheit, and the milk in the insulated can did not reach 60 degrees Fahrenheit until after 25 hours, or 650 miles of travel.

WEEDS AND BUGS DESTROY CROPS

Best Time to Kill Garden Enemies Is Before They Appear in the Spring.

CULTIVATION IS GREAT AID

Cutworms, Potato Bugs, Flea Beetles and Plant Lice Are Most Troublesome Insects—Some Excellent Control Measures.

(Prepared by the United States Department of Agriculture.)

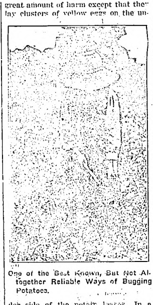
Weeds and insects are garden enemies, and the time to kill both is before they appear.

Careful stirring of the soil destroys the little weed seedings just after the seeds have sprouted. Likewise, cultivation keeps the garden in such shape that insects do not find a hiding place, and are not so liable to injure the garden crops. However, insects are almost sure to attack certain of the garden crops and it will be necessary to take precautions against them. Cutworms, potato bugs, flea beetles, and plant lice are the most troublesome garden insects. Do not give them a chance to get started.

The common cutworm does its work during the night, cutting off the plants just below the surface of the soil within a day or two after they are set in the garden. One of the best ways to prevent this injury is to surround the stem plant with a tube made of stiff paper or light cardboard, extending an inch or so below the ground and two or three inches above. These collars, or cutworm protectors, can be removed after the danger of injury is past—generally not until about 20 days after the plants are set in the ground.

When Potato Bugs Appear.

The old-fashioned Colorado potato beetles, or "hard shells," come out of the ground usually when the potatoes are about four or five inches high. These beetles themselves do not do a great amount of harm except that they lay clusters of yellow eggs on the under side of the potato leaves. In a few days these eggs hatch into soft-shell beetles or slugs as they are sometimes called. In the soft shell, or slug form the potato beetle has an enormous appetite and a colony of them will soon strip the foliage from a hill of potatoes.



One of the Best Known, But Not Altogether Reliable Ways of Bugging Potatoes.

Hand picking is perhaps the best method of getting rid of the hard-shell beetles. They may be killed by either crushing them or dropping them into boiling water. The slugs or soft-shell beetles cannot be gathered to so good advantage, but they may be poisoned by sprinkling the plants, while the dew is upon them, with a mixture consisting of a heaping teaspoonful of paris green to a pint of air-slaked lime or land plaster. The easiest method of applying the mixture is to place it in a cheese cloth or thin burlap bag and dust the plants by shaking the bag directly over them. It is not necessary to apply the poison to all the plants, but only where the bugs have made their appearance. The plants should be inspected every day or two to see that the bugs are not getting a start.

Flea Beetles Eat Holes.

Flea beetles are small insects that eat round holes similar to shot-holes in the leaves of beans, tomatoes, and a number of other garden crops. They can be poisoned with the mixture of paris green and lime referred to for potato beetles, or they can driven away by dusting the plants with fine road dust, air-slacked lime, or with very dry, powdery, sifted coal ashes.

Plant lice are more difficult to control, as they do not eat the leaves, but stick their beaks into the leaves and suck the juices. They are rather difficult to control, as they are found mainly on the under side of the leaves. One remedy is to spray with some form of tobacco extract or nicotine sulphate, using about one teaspoonful in a gallon of water in which there has previously been dissolved a one-inch cube of laundry soap. The mixture should be thoroughly stirred and applied underneath the leaves especially, using some form of sprayer or atomizer that will create a fine mist.

If the gardener finds some insect with which he is not acquainted he should write to the extension division of his state college of agriculture.

FOR LILY

By JACK LAWTON

Copyright, 1922, Western Newspaper Union

It was nearly midnight when David Barris returned to the city, and hunger made him aware of the fact that in his business excitement he had neglected dinner. So he [illegible] into his favorite hotel and seated himself at his accustomed table.

Successful in his chosen profession of law, Barris was [illegible] happy; life, even its pleasant [illegible] proved disappointing. As [illegible] had been joyously adventurous [illegible] his days were a tiresome [illegible] wondered idly how [illegible] passed him by; surely he [illegible] woman, sweet and fair [illegible] to his chop and coffee, [illegible] until he raised his eyes [illegible] was seated before him [illegible] take her order [illegible] almost impatiently [illegible]

"I came here to [illegible] this gentleman," she said. [illegible] Barris leaned forward.

"You wished to [illegible]?" he questioned grudgingly.

"Upon a matter of [illegible], yes."

The young woman [illegible] up abruptly.

"I must ask you to come with me [illegible]—to draw up a will for a dying [illegible]"

David Barris spoke dryly.

"And am I permitted to know my prospective client's name?"

"Certainly," the girl answered [illegible]. "James A. Sterling."

The lawyer's quick glance spoke astonishment. The name of James A. Sterling was of late well known to the reading public.

It had been just two years ago that the financier disowned his only son, because that young man dared seek the old man's charming secretary in marriage. And when Jack Sterling had been literally forced from his father's home, society had next been shocked to hear of the elder Sterling's own marriage to the consoled and ambitious secretary. This young personage was said to rule her aged husband's home with a high hand, to the banishment, almost, of his crippled daughter.

Lily, in her isolated room of the old mansion, became more isolated. Upon those rare occasions when her father visited her his impatience of some fancied neglect on her part was evident.

These facts, which Barris had learned at the club and read in the newspaper, flashed through his mind, as he hesitated before his uninvited table companion.

"Surely James Sterling must have formerly made a will," he said.

The young woman nodded.

"He wishes to draw a new one," she explained.

She looked back at him as he followed toward the door.

"He is taking a good deal of satisfaction," she went on, "in the thought of frustrating certain people after his funeral. If you know Mr. Sterling at all you will be aware of his eccentricities."

A coupe waited at the hotel entrance. The girl motioned the lawyer to step inside, and took her place at the wheel.

Barris leaned forward.

"Who," he asked sharply, "are you?"

"I am Helen Sterling." Her tone was even.

Barris sat back stiffly. Helen Sterling was the name of the rich old man's scheming wife.

"Here we are," called his companion.

She caught his arm in her eagerness, and smiled at him.

David Barris caught his breath. It was so, then, that she won and influenced men. A sorrow went through him, and a strange sense of loss. In the deserted hall of the mansion the girl stood, listening.

"You see," she explained to the lawyer, "I was supposed to take the nurse's place for an hour or two tonight; Mr. Sterling requested it. Then we made our plans. I have even a witness for the will, and his own reconciled son, and a physician to declare that James Sterling is in his right mind. The will must be beyond dispute."

"His son?" The thought came unpleasantly to Barris that the appealingly sweet woman at his side was inconceivably planning at her aged husband's death to marry her former lover, the joint heir.

"And what," he asked curtly, "about Lily?"

Her eyes shining, the girl turned to him.

"Why, don't you see?" she asked. "It is all for Lily that we have planned. We have to see that Lily comes into her own. Helen Sterling has an insane jealousy of the poor creature, and her influence is uncanny—"

"But you?" said the lawyer, "are Helen Sterling."

"A chance happening of the same first name," the girl told him. "I am James Sterling's niece and Lily's companion."

David Barris started resolutely up the stairs.

"Come," he said.

Willie's Joke.

"Pa, I know why our dog turns round an' round before he lies down."

"Why so, my son?"

"So he will sleep like a top."

THE SACRIFICE

By GRACE O. WEATHERBY

© 1922, by McClure Newspaper Syndicate.

There was a little breathless silence while, with fingers that shook a trifle, Anthony Pyrton slipped a gleaming diamond on the third finger of a small white hand that lay coldly passive in his.

The girl's face was deadly pale, her eyes wide and very blue, her lips compressed ever so slightly. You see, this was rather an ordeal for the gay Marion. She didn't love Anthony the least little bit! It was one of those unfortunate affairs where love is sacrificed on the altar of family protection, and yet there was a strange twist to it that seldom enters into the rich-man poor-girl stories.

Anthony wasn't the sleek, smooth gentleman that the rich man usually is. He was just a plain, homely man, with long, lanky legs that moved a trifle awkwardly, and eyes that reminded the exasperated Marion of a faithful dog she once had. What matter if he did have millions? He wasn't the type of man she could love.

These were the thoughts that finally prevailed upon the girl to give up her dream of love and to place her hand in Anthony's when he proffered the ring.

"Marion," his voice was husky with eagerness. "I know you don't love me, but, honey, I'm going to try my best to make you very happy."

And so—she was married. With mother and dad installed in the big house on the hill where there was no cold, nor hunger, nor housework, nor worry, where every whim was satisfied, every want anticipated, Marion seemed to relax.

One night, a year after they had been married, a sudden illness prevented the dinner guest from coming, and an evening at home resulted. Suddenly, very tired, Marion curled up on the wide couch before the open fireplace and fell to dreaming. Anty, finding her thus, her cheeks flushed by the flames, thought her lovely indeed.

"Honey," he pleaded, "we haven't had our honeymoon yet. Don't you think a trip to California would be nice?"

But the prospects of a trip alone with Anty did not seem to appeal to Marion, and she shook her head. "No, Anty, please. It is so cozy here, and I couldn't leave mother and dad!"

There was nothing more said, and turning presently, she found he had gone. She settled more comfortably in her cushions. It was nice to stay home once in a while.

So it went on until Judy came. The sudden death of a relative brought her from her western ranch, and as she and Marion had not seen each other for many years, she planned to stay a week at the big house. An hour after her arrival she discovered Anty sitting alone before the fire.

"Is this the famous Anthony?" Startled, he rose to his feet, stammering, but she gave him no chance to speak. "I'm Judith Wentworth, and I'm just as happy as I can be to meet you!"

Marion, coming in search of her friend, felt a queer sinking in her heart when she saw Anty respond to Judy's cheerful flattery.

The week lengthened into a month, and threatened to last longer! Marion saw very little of her friend. She walked with Anty—long hikes that brought them back rosy and tired out—riding with Anty in the park, and Judy was using Marion's own particular horse.

The climax came one terrible night when the wind howled and the snow was drifting fast. Inside the big house all was cheery. Garbed in a witching evening gown of blue and silver, she trailed her fingers aimlessly over the piano keys, longing for peace—with Anty. She rose, nervously, and wandered out into the spacious hall. The front door opened noisily and admitted a gust of cold air and snow, and Judy and Anthony! The Western girl's black eyes were dancing, her cheeks rosy. They didn't see her—they never saw her!

"Oh, isn't it just too wonderful! I hated to come in!" Anty was very attentive. Marion turned away, crying weakly, and then, drawn by an irresistible impulse she looked again, and found them close together, Judy's face buried in the man's shoulder.

A log fell, sending a shower of sparks into the air. Marion stirred, sat up. There were tears wet on her cheeks—she had been asleep, and it was all a horrible dream! There was no Judy here! She ran out into the hall looking for Anty. She hurried up the stairs, opened his door. The lamp by the table was burning, revealing Anty asleep in his arm chair, his book fallen from nerveless fingers.

She crept to his side and knelt on the floor. The man stirred and lifted his head.

"Marion! What on earth!" He was thoroughly awake now.

"Oh, Anty, I've had the awfulest dream!" She shivered and nestled closer to him. "Couldn't you possibly hold me for a while? I'm so cold—and afraid."

The wondering Anty picked her up and settled her on his knee. Her sleepy head fell on his shoulder, and for a moment they were still, he trying to fathom this new Marion, she content to be near him. Then—

"Anty!"

"What, dear?" He had not changed at all, and was still as slow as a poke.

"Do—you love me? . . . Let's go to California, tomorrow!"

Proud of His Dad

You often hear this said: "Oh, what's the difference? One hundred years from now things will be much the same for all of us."

All right. Admit it. By that time we will all surely be out of the running. But how about 10 years from now? Then what? Well, at that time the person who is saving, and carefully deposits and invests his money, will be on "Easy Street," that's all. We can't well look forward a hundred years, but the shorter period demands the attention of all thoughtful people.

CITATION FOR HEARING ON FINAL ACCOUNT AND FOR DISTRIBUTION

State of Minnesota
County of Pennington } ss In Probate Court

In the Matter of the Estate of August O. Schneider, Decedent.

The State of Minnesota, to Theressa Schneider, all persons interested in the final account and distribution of the estate of said decedent: The representative of the above named decedent having filed in this court his final account of the administration of the estate of said decedent, together with his petition praying for the adjustment and allowance of said final account and for distribution of the residue of said estate to the person thereunto entitled: Therefore YOU, and EACH OF YOU, are hereby cited and required to show cause, if any you have, before this Court at the Probate Court Rooms in the Court House in the City of Thief River Falls in the County of Pennington, State of Minnesota, on the 15th day of May, 1922, at 11 o'clock a. m. why said petition should not be granted.

WITNESS, The Judge of said Court, and the Seal of said Court, this 3rd day of April, 1922.

[SEAL] LARS BACKE, Judge of Probate.
J. M. BISHOP, Attorney for Petitioner. a14 3t

COWS FRESHENING IN FALL

Records Show Animals Produce More Milk and Butterfat and Make Best Returns.

The time of the year that a cow freshens seems to have considerable to do with the profit she returns, says the United States Department of Agriculture. An analysis of the figures obtained from many cow-testing associations shows that in most sections the cows that freshen in the fall and early winter produce the most milk and butterfat and bring in the greatest income over cost of feed.

Make Good Greens.

Turnip tops make almost as good greens as mustard. Sow the early turnips thickly and then thin out for greens.

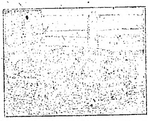
RATION NEEDED FOR GROWING BEST PIGS

Sow During Milking Period Should Be Fed Liberally.

Strong, Growthy Youngsters Must Have Supply of Bone and Muscle-Building Materials—Self-Feeder Recommended.

Liberal feeding of the sow during her milking period will pay for itself many times over in strong, growing pigs. The milking sow, as well as the milking cow, needs a ration rich in muscle and bone-building materials, the proteins and minerals because she must supply these materials to the sucking pigs.

"Compared with cow's milk, sow's milk contains about 82 per cent more protein (muscle and bone builder), 2 per cent more fat and 43 per cent more of lime and phosphorus (bone



Sow Must Furnish Rich Milk to Give Pigs Right Start.

minerals)," says the animal husbandry department at Ames. "Is it any wonder that sows get thin, even though they are well fed, when they must produce such rich milk as this? If the sow is properly fed, she will not only give the pigs the right start, but she herself will lose less weight."

One good ration recommended by the Iowa experiment station is: All the corn the sow and pigs clean up, and a slop mixture of three parts of wheat middlings to one part of 60 per dent tankage. Some lime, charcoal and salt may be allowed in addition. Self-feeding is recommended. When sows can be put on pasture, that is of course desirable, and then one-half of the slop mixture will be enough. Sudden changes in ration must be avoided. There is little danger of overfeeding during the milking period.

MILK IS QUITE NOURISHING

Usually Plentiful on Average Farm and Chickens Should Receive Full Allowance.

Milk is usually plentiful on the farm, and the chickens should receive the benefit of this. Give the growing stock a feast of milk every day or two—no matter whether it be sweet, skimmed or sour. It is also good for the old fowls, especially those in molt. But with all kinds of fowls, and especially the growing stock, care should be taken to place no more before them at a time than they will consume in just a few minutes, for otherwise it soon becomes contaminated and unfit for the fowls.

MINNESOTA HISTORICAL SOCIETY

THE GOODRIDGE BANNER

VOLUME XVI, No. 10. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA, FRIDAY, APRIL 21, 1922. $1.50

A Change In Ownership

I have sold the Tribune plant, subscription list and good will to Prof. John Nystul. Mr. Nystul has bad some experience in editorial work and will no doubt give Goodridge what she onght to have, a good paper. He is well and favorably known to most of our readers and will no doubt have the good will of the community from the start.

We bespeak for him the patrenage, both of the reading and advertising public—and don't forget the job printing.

American Legion State Convention

The Virginia Post of the American Legion already has arrangements well under way for the reception of Minnesota's ex-service men during state convention week in August. Although the event is not to be stagen for several months, the convention committee has bedn hard at work since the first of the year in getfing the stage in readiness.

For the convenience of former service men who find themselves busiest at the beginning and closing of the month, tho dates above mentioned were chosen for the convention. Large numbers are planning to be in attendance who would find it impossible to leave their duties a little later in the month.

The J. Burf Pratt Post of Virginia anticipates a mammoth 1922 convention and will spare no pains or expense in providing accommodations and a program of entertainment.

School Notes

A splendid Ulysses S. Grant program will be given next Wednesday morning at the assembly perion, which the public is invited to attend.

Baseball season is here. In order to give the boys a boost, Miss Giefer, together with the High school girls and a number of the ladies in the community volunteered to make the uniforms. To accomplish this work a regular "Sewing Bee" was hel in the Domestic ecience room on Thursday afternoon.

A large display of sewing articles, made by the girls in the domestic art classes, may be seen in the window of the Goodridge Mercantile Co's store. The exhibit is staged under the direction of Miss Giefer.

The Junior class will conduct a basket social in the school house on Tuesday, April 25 The whole school will join in the frolic. The girls will bring baskets which will be placed in a fish pond, and the boys will try their luck for the following prices: Primary and intermediate rooms 10 cents, grammar room 15 cents and the high school room 25 cents. The Juniors will serve cocoa in connection free of charge. This social event will take place from 12 to 2 o'clock and school will be dismissed at 4:30 instead of the usual hour on that day.

Don't forget to turn out to see the first baseball game of the season next Saturday, 2:30 p. m.

ERIE ERRORS

Theodore Sunsdahl, the Erie-Kratka star route mail carrier, motored down to Thief River Falls for a brief business visit Wednesday evening.

Edward Singer, the Erie merchant, accompanied by Master Hruby, autoed to Goodridge on business Friday.

Dr. Froehlich of Thief River Falls was called out to the Folkedahl home southeast of Erie, where Mr. Folkedahl was taken seriously ill again. He was taken to the Physicians' hospital

Carl P Anderson motored to Thief River Falls Thursday and attended to business matters, returning home Friday.

Masters Arnold, Henry and Melvin Hovet and Melvin Hyland called on Christian Amundson Saturday.

H. C. Iverson spent Wednesday, Thursday and Friday in Thief River Falls and Goodridge on business matters.

Salve Omlid and Aanon Gunleikson returned Friday from an extended business trip to the conuty seat. S. J. Hole had charge ef the Omlid stock the while.

Rev. Hoyum and Layman Halvorson delivered sermons in the southeast Star school house Sunday.

Christ Odegard, who recently disposed of all his property in Star, departed Friday for his future home in Wisconsin. Fare thee well,

SAVING PINE TREES FROM BLISTER RUST

Wild Currant and Gooseberry Bushes Must Be Removed.

Disease Is Rapidly Increasing in Northeastern States and Prompt Action Is Needed to Save Timber.

(Prepared by the United States Department of Agriculture.)

A delay of one year in destroying the wild currants and gooseberries as a protection against the blister rust will result in the loss of at least 11 per cent of the trees in a young white-pine plantation at North Hudson, N. Y.

This planting of white pine was made for the purpose of producing another timber crop on an area previously denuded by fire. Three-year-old trees were set out in the spring of 1919, but the wild currant and gooseberry bushes on the tract were not destroyed until 1920, a year after the planting. The removal of the currant and gooseberry bushes is necessary to save pine trees from the blister rust, because they are the only means by which this disease can spread.

Top of [illegible] White Pine Broken Off as Result of Girdling by the Blister Rust.

The pines in the plantation were examined in the fall of 1921 by agents of the United States Department of Agriculture. As a result of the trees being exposed for a single year to the blister rust on the currant and gooseberry bushes, it was found that 80 trees showed infection originating in 1919, 197 were missing and 483 showed no sign of infection. Thus 15.10 per cent of the living trees or 11.20 per cent of all the trees set out on the plat were infected by the blister rust in a single year, and will succumb sooner or later. If the bushes had been removed before the pines were set out, this loss would have been prevented.

The disease is rapidly increasing on white pines in the northeastern states, and prompt action by pine owners in destroying currant and gooseberry bushes is necessary to prevent serious damage and loss to the pine crop.

Since wild gooseberry and currant bushes are among the first plants to sprout and leaf out, they can be distinguished very readily in the early spring. This season is, therefore, most favorable for the pine wood-lot owner to find and pull them out. These bushes should be destroyed in the pine stand and around it for a distance of at least 900 feet. If the search for the bushes is conducted systematically, and if care is taken to get all the main roots, the pines will be protected from the blister rust for at least five years.

Got 'Em All Worried.

"Pa's sick in bed."

"That so? Is your mother worried?"

"I'll say so. When Pa's sick he'd worry anybody."

Ludwig Johnson has been on the sick list for a few days past but is now well on the way to full recovery.

Ludwig Johnson and Iver Iverson were guests at the Ole Tharaldson home Sunday evening.

Miss Welland of Grygla commenced teaching a two months' term of parochial school in eastern Star Mondey.

Christ Amundson visited at the L. B. Johnson home Sunday evening.

Z. J. Hole is getting everything in readiness for planting his forty on the east side of "Brown Grade" to trees.

Come Boost Be There

THERE IS PLACE ON MOST FARMS FOR TURKEYS, DUCKS OR GEESE

Hen Will Always Be the Leader Among Farm Poultry.

(Prepared by the United States Department of Agriculture.)

Farmers give much attention to various combinations and rotations of crops, endeavoring to secure an arrangement that is most profitable for each individual farm. They do the same in selecting the kinds and numbers of live stock. But not so much attention is paid to the selection of poultry to suit the peculiar conditions of farms and neighborhoods. The hen will always be the leader among farm poultry, says the United States Department of Agriculture, but she requires the aid of turkeys, guineas, geese and ducks, just as on a dairy farm the cow often requires the aid of pigs and sheep to make the farm business most profitable.

Ducks Gather Food From Streams.

Where grain fields of neighboring farms are in proximity to the barn and dooryard it would, perhaps, be better not to keep turkeys. The farm through which no streams run, and which has no large pond, would probably be better without ducks. But the circumscribed farm, on which turkeys would be a disadvantage, may be supplied with a small pool so located that ducks would be profitable, and the farm that has no streams and ponds may have large range for turkeys.

Turkeys, ranging further afield, prey upon the insects that escape the hens. From the time the poults are old enough to forage until near frost, they take the bulk of their feed from field insects, devouring millions of grasshoppers and other injurious worms that feed on crops. In regions where wooded areas are still fairly extensive mast is an important item in the diet of the turkey. When the supply of insects begins to fail the mast larder begins filling up. Feeding on acorns, chestnuts, beechnuts and the like, turkeys will go a long way toward fattening themselves for the Thanksgiving or Christmas market, and will not require much feeding of corn or other grain to finish them. Generally speaking, turkeys will require a larger feeding of grain than chickens to finish them for market, but as they utilize forms of waste that hens and their broods would not reach, the keeping of a few turkeys is good economy. The finishing period is short.

Guinea fowls use still other kinds of waste that would escape both hens and turkeys. Taking a wider range than chickens, and yet not quite so wide as turkeys, keeping largely to the thickets and weed patches, and committing fewer depredations against field and garden than either chickens or turkeys, requiring little feeding at any time, being good layers during their season of eggs that are thought by many to have a richer and finer flavor even than hen eggs, the guinea is a good fowl to keep on any farm where a serious effort is made to convert all waste into meat or eggs.

Geese, in a larger measure than chickens, or any other kind of poultry, are grazing stock, taking their living in large part from the ordinary grasses of the pastures. When the facts are taken into consideration that the demand for geese is strong, steady, and extended practically over the entire year, not confined to the holiday seasons as the demand for turkeys, that geese excel all other kinds of poultry as producers of fat, the importance of an adequate number of geese in the poultry scheme becomes apparent.

On farms where ponds or streams are available, ducks will convert into meat and eggs great quantities of water insects and various aquatic forms that would not be utilized by any other kind of poultry. Ducks, while they consume large quantities of grass and other green stuff, are more partial to animal feeds and are very energetic in patrolling the branches, creeks, and ponds as sources of feed supply.

Pigeons of Questionable Value.

The one kind of poultry of questionable economic value on farms is the pigeon. Almost exclusively a grain eater, the pigeon renders no important service as a conserver of waste, except, perhaps, in the case of shattered grain in the fields, and that in a large measure would be taken up by other poultry and by pigs. The pigeon has its place in the towns and cities, but, except in isolated instances where conditions are peculiarly favorable, its production is not often desirable on farms. The back-yard poultry keeper can hardly hope for success with turkeys, geese, ducks, or guineas, but for those who have lofts over garage, stable or coal shed the opportunity for squab growing is worth considering.

The Siren's Voice

By CHARLES E. BAXTER

Copyright, 1922, Western Newspaper Union.

Every morning at half-past five, when his wife shook him by the shoulder, Tim McCullough grunted, rolled over, sat up in bed, and then, with a mumbled curse, began to dress.

He wolfed down half-a-dozen flapjacks and two thick rashers, drained an enormous cup of coffee and set off for the mills across the flats, cursing and muttering as the siren called him to work.

McCullough had worked in the mills since he was a boy, and he had always lived in the company cottage where his wife and he had reared and sent into the world nine sturdy children.

"Get up! get up! The mill' whistle's blown!" shouted Kitty in his ear.

Tim grinned and rolled over. Kitty began pounding him.

"Get up, you hulk, you useless loomp av a man! Ye'll be fired, Tim, if ye don't hurry!"

Tim rolled over again and grinned at her from among the bedclothes. "I'm through wi' the mill," he announced briefly. "That letter that come yesterday was from the lawyer, telling me that me uncle Mick's dead and left me three thousand dollars."

"What'll ye be doin' with ut, Tim?" asked Kitty in awe, as they sat over their breakfast longer than they had ever sat before.

"I've arranged to buy th' cottage, and we'll raise pigs and fowls and garden truck," he answered.

"There goes th' siren, Tim. Ye'll be late—" Kitty began, and then realized her blunder. "I hope ut'll coom out all right," she said doubtfully.

The pig did not materialize, because a city ordinance forbade the keeping of pigs, but the chickens did. Tim was a fowl fancier. He bought Rhode Island Reds, put up his own houses, and inside of six months Kitty was selling her eggs by the dozen to all the neighbors. In fact it soon looked as if the new venture would bring in almost as much as the mills had done.

"Cock-a-doodle-do!" mimicked Tim, leaning over the fence and surveying his prize cockerel, strutting in all the glory of roosterdom. "I guess we're somewhat alike, us two, my beauty! Jest loafin' round in the sunshine, and don't care a rap for nobody nor nothing. Kitty, woman!" he shouted, "coom and look at Sullivan here and see if ye've iver seen the like. He cost me ten berries, Sullivan did. I guess that means fifty eggs a day next summer."

Kitty looked at Sullivan and sniffed. She had not been too happy since Tim left the mills. It was all very well for him to revel in his freedom, but where did she come in?

She hated the extra work of making mash for the chickens; and then, who wants an able-bodied man of sixty round the house all day, smoking his pipe and interfering?

"If ye'd stuck to the mills, Tim," she said, "I guess we'd be better off still."

Tim scratched his head. The fact was, he did not know what to do with himself most of the day. He missed the constant company of his companions, the din and clangor of the mill; life was growing stale and unprofitable.

And somehow he had not got along so well with Kitty since he had been home all day.

Suddenly an immense resolution came to him. He climbed over the fence of the chicken yard and looked cautiously about him. Nobody was in sight, except a group of busy hens at the far end of the enclosure, and—Sullivan, preening his feathers in the sunlight.

"Sullivan, come here! Cluck, cluck, cluck, Sullivan, old boy!" he called.

Sullivan, insulted at being spoken to as if he were a hen, flapped his wings contemptuously and crowed. Tim leaped at him and Sullivan sidestepped and crowed derision.

Tim chased him into a corner of the yard, through the group of startled hens, and finally cornered him as he was making a desperate effort to break through a half-inch hole in the wire fencing.

"Ah, ye beauty!" he said, picking him up in his arms and feeling his plump body.

Five minutes later Kitty screamed as Tim flung an inanimate lump upon the table.

"'Tis Sullivan, an' I've been thinking he'll make a good pot-pie for Sunday," Tim said. "And hould your tongue, woman!"

Every morning at half-past five, when his wife shakes him by the shoulder, Tim McCullough grunts, rolls over, sits up in bed, and then, with a mumbled curse, begins to dress as the siren blows.

"I was a fool to kill Sullivan!" he grumbles.

"I'm thinking I'll quit th' mill and start to raisin' chickens again next summer."

But you can't have it both ways, can you?

The Heart of a Princess

By ELLA SAUNDERS

Copyright, 1922, Western Newspaper Union.

It was all over and she was back in the palace. She had been only vaguely conscious all the time of the ceremony in the historic cathedral. She saw it now as in a picture; the galleries packed with ladies in their robes of nobility, the crowd of famous men and women in the pews.

She recalled the face of the bishop primate as he pronounced them man and wife, then there was the plain gold band when she felt on her finger with a strange sense of fear and hope in her heart.

She remembered the drive back through the crowded streets lined with soldiers, the cheers of the mob. And she had heard a woman cry as the state coach stopped for a moment.

"Isn't she sad-looking! Poor thing, they can't pick and choose like us, can they!"

She hoped the prince at her side had not heard. She had glanced at him, but he had only sat stiff in his uniform, and she had turned her head away and tried to blink back the tears.

Then had followed the state banquet. She remembered the tiny morsel of salmon on a gold plate and the bubbles in the champagne. She had hardly eaten. There had been speeches afterward. Somehow she had felt immeasurably far from her husband.

They were going away to spend the honeymoon in his castle. Even a princess wears ordinary travelling gowns instead of silk and gold. Her maid had put the dress on the bed of the room that she was leaving forever. The prince [illegible] her gown. In the next room one of her ladies said:

"I wonder if she cares."

The princess heard her and remembered distinguished kings and queens, her ancestors, and the stories about their unhappiness that had never appeared in history books. She sighed.

That was one of the limitations that went with her position. The woman in the street had expressed it very well. She had hardly met anybody; and yet she had fancied herself in love three times.

The first time was at seventeen when the heir of a neighboring country was sent over to meet her. Everybody knew why he had come and had pretended not to. She [illegible] in love with [illegible] was the first man [illegible] then asked for the hand of her elder sister. She was so glad she had never shown him by the least sign how she felt. The marriage had been unhappy; she had been so glad she had not married him.

The second was a boy who was attached to the court. They were both the same age—eighteen. He had kissed her—once in a dark part of the grand corridor. She had been thrilled and terrified; but one of the ladies had suspected, and the next day he was given a position in a distant colony. She had thought of him for weeks and then gradually forgotten him. And he was married now and had no doubt forgotten her.

And the third—for the first time the princess smiled. The third was a young and distinguished author, whose books both she and her mother liked, and they had met at the house of a duchess. It had all been arranged, and that love affair lasted ten seconds, while the author was walking toward her from the door. He was thrillingly handsome, and she thought of his last book, "Wayward Souls," and her heart began to beat. And then he stood still like a fool and called her "Your Highness," and appeared not to know what to do with his hands and feet.

Very firmly the princess put all these memories aside and went out into her reception room.

One of her ladies asked her something and she nodded in a mechanical way and stood still beside the window, waiting. Then she heard the whir of the elevator and the opening of the gate, and a man's soft step along the carpeted hall. And in that instant she knew that she was in the hands of an irretrievable destiny, and she felt numbed and unable to move hand or foot.

Then he had come to her side. They were alone and she raised her eyes to his with a look of dread and wonder in them. And he had folded her in his arms, and she lay there feeling a sudden inexplicable joy as she listened to what he was saying.

"You're sure—you're sure?" she asked.

"For all my life," he answered, and their lips met. "But, I wasn't sure either—I hardly dared to believe—"

"And it's true," said the princess, laying her head upon his shoulder just an instant; because they had never been alone together before, and they only had two minutes before going away.

ANTON JOHNSON, Highlanding

CURE DIGESTIVE DISORDERS

Value of Charcoal as Preventive of Ailments Cannot Be Over Emphasized.

The value of charcoal can scarcely be over-emphasized and it should be fed to fowls of all ages as a preventive of bowel disorders and disease. It is best to keep it before the fowls at all times, as there is no danger of their eating too much. Charcoal has a great purifying effect in absorbing noxious gases and will correct many digestive disorders.

Later Garden Planting.

Later garden vegetables require less work and less anxiety, as a rule, than early vegetables. The soil should be neither too hard to prepare nor should it be so slow to germinate and start growing the plants as early plantings.

Advantage of Clover.

When the ground in cultivated fields becomes hard and dry in the growing season we should know that the soil is calling for humus. The best humus is made by growing clover.

CALCULATE AHEAD WITH COW

Money Spent for Good Animal May Give Better Returns Than Manure Spreader Would.

Calculate ahead what you are going to get for every dollar expended. Two hundred dollars spent for good dairy cows may give larger returns on the investment than if spent for a manure spreader for which you have only a little use.

The Goodridge Banner

Entered as second-class matter July 19, 1919, at the postoffice at Goodridge, Minnesota, under the act of March 3, 1879.

Published every Friday at Goodridge, Minn.

WHEAT GROWN ON IRRIGATED FARM

Yield of Slightly Over 100 Bushels to Acre Obtained on Small Idaho Patch.

DICKLOW VARIETY WAS USED

Experiments at Aberdeen Station Show That Federation, an Australian Strain, Is Better Suited for Irrigation.

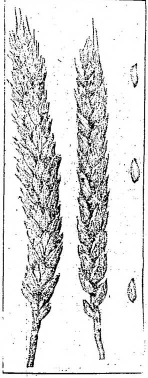
(Prepared by the United States Department of Agriculture.)

A yield of 219 bushels and 30 pounds of wheat from 2.17 acres of land in Jerome county, Idaho, in 1921, probably a record yield for spring wheat in the United States, is reported in affidavits received by the bureau of markets and crop estimates of the United States Department of Agriculture from H. S. Green, manager of the Ill-Aho farms, Jerome county, Idaho. This yield of slightly over 100 bushels of wheat to the acre was obtained from the Dicklow variety. This variety has been found to be well suited for growing under irrigation in southern Idaho, and the acreage of it in that section has increased rapidly during recent years. This is due largely to the efforts of the former superintendent of the Aberdeen, Idaho sub-station, L. C. Aicher, who has had charge of the co-operative cereal experiments conducted by the Idaho station and the United States Department of Agriculture. For the past five years Mr. Aicher has been distributing and recommending the Dicklow variety for growing under irrigation in southern Idaho.

Largest Yield of Wheat.

The largest yield of wheat per acre ever recorded by the bureau of crop estimates of the department is 117.2 bushels. The yield was produced in 1895 in Island county, Wash., on an 8-acre field. The variety of wheat sown was Red Russian, a winter wheat, locally known as Australian Club.

The 100-bushel yield of the Dicklow variety here reported is probably a record yield for spring wheat in the United States. In experiments conducted by the United States Department of Agriculture, where varieties are grown in fiftieth-acre plats, yields at the rate of more than 80 bushels per acre have sometimes been obtained. A yield of 83.3 bushels per acre was obtained in 1921 from a plat of Federation wheat at the Aberdeen, Idaho, sub-station. The Federation is an important Australian variety of wheat introduced into the United States by the Department of Agriculture in 1915.



Dicklow Wheat.

Federation Variety Favored.

Experimental results at the Aberdeen station during the past three years indicate that the Federation will be even better suited for growing under irrigation than the Dicklow, as it has, on the average, outyielded the Dicklow by 5½ bushels per acre. Federation has also proved to be a better milling and bread-making wheat than the Dicklow. Last season the Federation was grown under irrigation with marked success in several sections of Oregon, and this year it will be tried on a number of irrigated farms in southern Idaho.

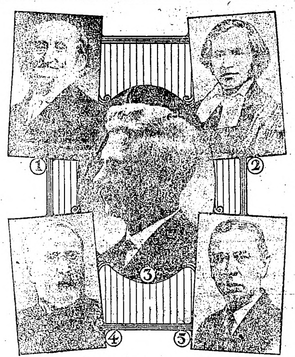
Leaders of Missouri Synod For Past Seventy-five Years



No. 1. Rev. C. F. W. Walther, D. D. (1847); No. 2. Rev. F. C. D. Wyneken, D. D. (1850); No. 3. Rev. F. Pfotenhauer, D. D. (1911-1922); No. 4. Rev. H. C. Schwan, D. D. (1873); No. 5. Prof. F. Pieper, D. D. (1899).

LUTHERAN [illegible] GREW RAPIDLY

Beginning With 12 Congregations 75 Years Ago, It Now Numbers 4,300 Pulpits.

METHODS NOT SENSATIONAL

Has Carried Gospel Into Forty-seven States and Twelve Foreign Countries by Plain Preaching—Extensive Institutional Work.

On April 26, 1847, twelve ministers of the Gospel gathered in Chicago at a meeting which was destined to mark the beginning of [illegible] most remarkable movements in the history of the Christian church in the United States, and formed what is now known as the Evangelical Lutheran Synod of Missouri, Ohio and other states, the church-body which this year celebrates its seventy-fifth anniversary.

During the three-quarters of a century which have passed since Dr. C. F. W. Walther, the venerated leader of the Saxon immigrants in Missouri, assumed the presidency of this Synod, this church body has experienced a growth that is nothing short of phenomenal. Its pastors have increased from the original twelve to 2,900; its congregations from the sixteen that were represented in Chicago on the day of organization to 3,300 with 1,000 additional preaching stations. Its membership embraces more than one million souls in all parts of the United States and Canada, and together with other Synods affiliated in the Synodical Conference it forms the largest Lutheran church body in the world.

The secret of this growth is to be found in the fact that from the very beginning this church was determined to accept the great missionary challenge that came from the unchurched masses in this country. With sacrifices almost unknown in these days, the first missionaries of this church blazed the trail for the Gospel through the West long before the railroads pushed their way across the prairies. They entered the cities and towns of the East and besides founding missions that today are large and flourishing congregations they established Christian day schools for children, where in addition to the instruction in the elementary branches, the Bible and the principles of Christianity were given prominence.

Home Missions

Since the trials and struggles of those pioneer days this home missionary effort has increased to such an extent that with the exception of South Carolina every state in the Union is represented in the home mission field of this church. From Maine, where the determined members of the first mission congregation have built a Lutheran church with their own hands, to California, where this body has for many years carried on extensive home mission work; from the frozen northlands of the Alberta and Saskatchewan, where the first Canadian Lutheran college has been erected to recruit young men for the missionary task in the great Northwest, into the very heart of Mexico, where Lutheran missionaries are now active in the cause of salvation; in the industrial and commercial centers of our country and in isolated settlements where the Gospel has never been preached before, these ambassadors of Jesus Christ are daily winning new victories for the faith "that overcometh the world."

Their testimony is heard in ten different languages in our country, in addition to the English, which is being used more extensively every year, especially in missionary work, and the German, the language of the pioneer Lutheran workers. In Yiddish it tells the Israelite of Christ as the promised Messiah; in Italian this Gospel is combating the atheism and religious indifference which is becoming so marked among the sons of Italy in this country; in Polish, Slovak, Lithuanian, Lettish, Norwegian, and Danish it brings the Gospel to those who have come from the north of Europe; it greets the Indian in his own tongue, and the unfortunate deaf mutes are happy to be under the spiritual care of men trained to bring the message of salvation in the sign language. For the past fifty years, ever since the founding of the Synodical Conference, it has carried on extensive work among the negroes of the black belt; it has established church schools where the third generation of colored Lutherans is now being trained; it has built colleges for the higher education of the young negroes in the South. At public and charitable institutions the missionaries of this church bring light to the blind, balm to the sick, and spiritual riches to the earthly poor. At its own numerous hospitals, orphanages, infants' and old folks' homes, asylums for the care of tubercular and epileptic patients, thousands are under the care of missionaries.

Foreign Missions

But the message which the Missouri Synod has proclaimed has been too powerful to be confined within the limits of this country. It has been preached for many years in Brazil and Argentina, where some sixty missionaries are working at present. Missionaries of this church have gone back to Europe, where in Germany, England, France, and Czecho-Slovakia the independent mission congregations of the Free Church of Europe have been supported for many years. Assistance has been lent to the establishment of an active Lutheran church body in Australia and New Zealand, and for the last twenty-five years this Synod has carried on mission work among the heathen, first in India, and more recently in China. Here, in countries teeming with uncounted millions of superstitious heathen, the scriptural and conservative policies of this church have been blessed with the same encouraging results as in this country. During the past year ten new missionaries and one female teacher, as well as one doctor, and three nurses, entered the mission fields in East India, where the first native pastor was ordained and many other native workers enlisted. During the same time the missionary ranks in China were reinforced by five additional missionaries, one female teacher, and several native aids. A great movement for the development of this foreign mission work seems to be under way in the Lutheran congregations of this country which promise ever greater activities for the future.

At home and abroad the missionaries of this church have preached nothing but the Gospel of Christ crucified. No revivals, no trail hitting, no proselyting has marked the steady but insistent efforts of these men. From their pulpits have resounded not the issues of the day, but the issues of eternity and the hereafter. And these missionaries have stood up for principle and have spoken with the courage of a conviction which knows neither fear nor favor. Branded as antiquated, narrow, and bigotted because of their insistent demand of a brave and open confession of Jesus Christ as the only but all-sufficient Savior of every man, woman and child who ever lived or ever will live upon the face of this earth, these men, with the help of God, are bringing an unmistakable twentieth century demonstration of the all-conquering power of Christ's Gospel.

TIME TO MARKET BERMUDA ONIONS

Much Activity in Texas Fields in Making Preparation as Season Approaches.

INCREASE SHOWN IN ACREAGE

Growers and Shippers Enthusiastic in Stating That Department of Agriculture's Service Is of Great Value.

(Prepared by the United States Department of Agriculture.)

There is great activity in the Texas onion fields these days in preparation for the rapidly approaching marketing season. The commercial acreage planted to Bermuda onions is estimated by the United States Department of Agriculture at 12,117 acres, and it is forecast that 11,522 acres will be harvested. This compares with 10,505 acres harvested in 1921.

As heretofore the Department of Agriculture will maintain a field station at Laredo to keep the growers and shippers informed of market conditions generally throughout the country. Carlot shipments, available supplies, prices, weather conditions, and the many factors that affect the marketing of onions will be reported to the growers daily.

Financial success in producing and marketing Bermuda onions is possible only when the economic relation between the northern-grown winter storage crop and the perishable Bermuda crop is taken into consideration, say federal marketing experts. The Texas crop is marketed in a period of two months, and the highest type of marketing efficiency is required. There may be a large carry-over of northern-grown storage onions; the markets for the Bermuda crop are a long distance from producing points with consequent high costs for transportation; bad weather may quickly impair the quality of the stock; the crop may be larger than the country can consume; and toward the end of the season there is competition from other early producing states.

Service of Great Value.

The results of years of study of the scientific production and marketing of onions is available to the growers, and producers and shippers are unanimous in stating that the department's service has been of great value to them. Federal market reporters located in large consuming markets, such as St. Louis, Cincinnati, Kansas City, Chicago, Pittsburgh, Philadelphia, New York, and Boston, report daily to the Laredo office local market conditions, such as supply, demand, and prices.

Cleaning and Grading Onions.

The department also has co-operative arrangements with the various railroads whereby the shippers are informed of daily carlot shipments of onions everywhere in the United States.

For marketing purposes the Texas onion-producing section is divided into three districts: The Laredo district, consisting of Webb county, the upper counties, comprising Dimmit, Frio, La Salle, and Zavalla counties; and the Gulf Coast district, embracing the territory contiguous to the St. Louis, Brownsville & Mexico and the San Antonio & Arkansas Pass railroads.

Shipments are made to every state in the Union east of the Rocky mountains, the principal markets being New York, Pennsylvania, Illinois, Missouri, Ohio, and Massachusetts. New York alone has taken in the past as much as 20 per cent of the entire carlot movement. Laredo is the shipping center for approximately one-third of the onions from the entire section, and headquarters of practically all buyers and operators are there located.

Seed From Canary Islands.

The majority of the growers obtain their seed from the Canary Islands; large quantities of seed are also obtained from California. The seed is planted by drill between August 15 and September 20, and the plants remain in the seed bed 60 to 70 days before transplanting to the field. Great care is exercised in transplanting. The ground is plowed, thoroughly disked and harrowed, the roots and tops of the plants are carefully trimmed, and only well-rooted plants are selected. In caring for the crop it is essential to keep the soil moist, and to avoid, by frequent shallow cultivations, cracking or baking. Harvesting begins around April 1 in Webb county and continues to about May 15. The harvest season in the upper counties is five to ten days later.

ENGLISH SPARROW IS ENEMY OF NEMATODES

Benefactor to Humanity at Least in One Respect.

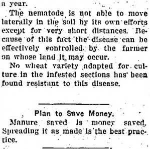
Bird Seems to Have Special Liking for Galls Formed by Parasitic Worm—Other Means for Controlling Disease.

(Prepared by the United States Department of Agriculture.)

Recent investigations conducted by the United States Department of Agriculture have shown that the English sparrow is a benefactor to humanity at least in one respect. It is able to kill nematodes parasitic on wheat.

In this nematode disease of wheat, the parasitic worm forms galls which take the place of the normal seeds. During the early development of these galls the sparrows seem to have a special liking for them. At first it was suspected that the sparrow might spread the infection in this way, but it was found that the sparrow's digestive apparatus sufficed to kill the nematode.

The nematode disease of wheat occurs in Virginia, West Virginia [illegible] North Carol[illegible]



English Sparrow Is Useful in Controlling Disease of Wheat.

emmer, and spelt. The disease becomes serious if precautions are not taken for its control. Fortunately practicable control measures are known. They necessitate (1) the use of seed free from nematode galls, (2) sowing such clean seed on nematode-free land, (3) keeping wheat or other susceptible crops off infested fields for at least one year, and (4) keeping nematode-infested straw and manure off land to be used for wheat within a year.

The nematode is not able to move laterally in the soil by its own efforts except for very short distances. Because of this fact the disease can be effectively controlled by the farmer on whose land it may occur.

No wheat variety adapted for culture in the infested sections has been found resistant to this disease.

Plan to Save Money.

Manure saved is money saved. Spreading it as made is the best practice.

Statement of the Ownership, Management, Circlation, Etc.,

Required by the Act of Congress of August 24, 1912, of Goodridge Banner, published weekly at Goodridge, Minn., for April 1, 1922.

State of Minnesota, County of Pennington, ss.

Before me, a notary public in and for the state and county aforesaid, personally appeared I. D. Convarse, who having been duly sworn according to law, deposes and says that he is the publisher of the Goodridge Banner, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse of this form, to-wit:

1. That the name and address of the publisher, editor, managing editor and business manager is I. D. Converse, Goodridge, Minn.
2. That the owner is I. D. Converse, Goodridge, Minn.
3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: Farmers State Bank, Mavie, Minn.

I. D. CONVERSE.

Sworn to and subscribed before me this 5th day of April, 1922.

| SEAL | NICGLAY BUNDHUND,

My commission expires Dec. 16, 1926.

DENTISTRY

I will be at
KNUTSON HOTEL,
Grygla, on
Jan. 12 - 17 inclusive
For four days.
Teeth Extracted Without Pain
We assure careful work
And best material.
COME EARLY.
Dr. J. H. Laney

TEACH CALF TO LEAD EARLY

Young Animals Are Easier to Handle and They Should Be Fitted With Halters.

Calves, especially those to be used in the show-ring or purebred bulls or heifers should be taught to lead when very young. They are easier to handle and much time and trouble will be saved later on.

When calves are a few months old they should be carefully fitted with halters and tied up a short time each day. This will cause them to lead very readily. Lead the calves to suckle or to water for a few days. In leading them for the first few times pull diagonally first to one side and then to the other.

Bill's Redemption

By HUBERT RAY

[illegible] Union.

"He'll be making for Pike's Crossing, boys," said the sheriff, drawing rein. "If he can jump the Limited where she slows up at the cutoff, I guess that's the last we'll hear of Bill Bateman for quite some spell."

There were four in the posse. The youngest turned as white as death.

"Pike's Cross? H—ll!" he said. "My wife's there with the kid. I reckon we'd better hustle, sheriff, if we're to make it before the Limited."

Bill Bateman had the brain of a man within the body of a gorilla. During the three years that he had served of a life sentence for manslaughter of the most brutal character, his man's brain had been working incessantly, planning to make his getaway. He knew that, once clear of the penitentiary walls, once in his primitive conception of a world, anything would be possible.

Anything to one of his enormous strength and cunning. Bill was unhampered by anything except the most rudimentary elements of a conscience. He had had only one love in life, since the day when he was flung out of home by a drunken father, after his mother's death. Somewhere back in the past he had had a wife and child. He had beaten his wife, and she had run away—with the kid. That had made him mad. After that he became the terror of the township. It was for an unprovoked and brutal killing that, through the mistaken leniency of a jury, he had received a life sentence.

His chance had come at last. There was an honor system in the penitentiary. Especially the young college-trained warden wanted to redeem Bill Bateman. Now Bill's conception of honor was the providential selection of a fool to run the pen. And his craft had served him well. He had feigned conversion and repentance. Three months after the young warden's arrival Bill had been a trusty. He was free of everything—except the pen gates. As a lifer, he could not be allowed to pass them, as the more favored prisoners could.

One night, when he was called to his cell after the other inmates had been shut up, Bill turned upon the guard, stunned him with a blow of his huge fist, and took his keys away. He rushed the men on duty, knocked them senseless, received and laughed at a pistol bullet through the hand, and opened the gates. Five minutes later, in the dark, he laughed as he heard the ringing of the alarm bells. No one could hit is trail across the desert till morning, and long before noon he could jump the Limited, which thundered past the pen daily.

The gorilla figure slouched onto the permanent way. The Limited was almost due, and there were no signs of pursuit. He drew in a long breath. Life was his again.

Then he started as he saw the tiny figure of a child sitting in the middle of the way. A little, white-clad figure, perhaps three or four years of age, waving its arms and crying. Bill grinned; but of a sudden something turned his heart to stone.

"The kid!" he mumbled.

Then reason reasserted itself. Of course this was not the kid. The kid had been bigger than that at the time he received his sentence. Somebody else's kid! And, where there was a kid there must be a cabin. That should mean a meal, money, a change of clothes—perhaps there was an unprotected woman within.

The gorilla grin distended Bill Bateman's face as he crept forward.

As the Limited thundered down the gorge the sheriff's party clapped spurs to their horses and galloped madly down the trail. It was touch and go whether they could reach the crossing in time to signal her.

They were too late. Beaten by three minutes! As they rounded the bend they saw the Limited swing into the cut and begin to slow down to take the curve. There had been stringent orders for this, on account of a wreck some years before. She slowed.

"I guess we're beat," cried the sheriff, drawing rein.

But the Limited had stopped. And, with renewed hope, the posse dashed forward and, shouting frantically, drew rein at the edge of the permanent way.

The youngest member leaped from his horse with an oath, rushed forward and snatched at a little figure between the metals, which screamed with pain.

"Daddy, my foot, my foot!"

The little foot had got caught in the point of a switch. He worked frantically to release it.

Fifty yards distant the sheriff and the rest stood round Bill Bateman's mangled body. The huge hand still clutched the fragment of a penitentiary shirt with which it had flagged the Limited—too late and not too late.

The sheriff looked up at the driver. "Don't that beat hell!" he said, and swore under his breath.

Unspoken Wisdom.

"What is your object in refusing to be interviewed on this momentous subject?"

"Because I've been thinking things over," replied Senator Sorghum.

"But you used to be very generous in giving your conclusions to the public."

"It has recently occurred to me that what a man doesn't say is not nearly so liable to get him into trouble as what he says."

Proud of His Dad

You often hear this said: "Oh, what's the difference? One hundred years from now things will be much the same tor all of us."

All right. Admit it. By that time we will all surely be out of the running. But how about 10 years from now? Then what? Well, at that time tke person who is saving, and carefully deposits and invests his money, will be on "Easy Street," that's all. We can't well look forward a hundred years, but the shorter period demands the attention of all thoughtful people.

CITATION FOR HEARING ON FINAL ACCOUNT AND FOR DISTRIBUTION

State of Minnesota } ss In Probate Court
County of Pennington }

In the Matter of the Estate of August O. Schneider, Decedent.

The State of Minnesota, to Theressa Schneider, all persons interested in the final account and distribution of the estate of said decedent: The representative of the above named decedent having filed in this fi court his nal account of the administration of the estate of said decedent, together with his petition praying for the adjustment and allowance of said final account and for distribution of the residue of said estate to the person thereunto entitled: Therefore YOU, and EACH OF YOU, are hereby cited and required to show cause, if any you have, before this Court at the Probate Court Rooms in the Court House in the City of Thief River Falls in the County of Pennington, State of Minnesota, on the 15th day of May, 1922, at 11 o'clock a. m. why said petition should not be granted.

WITNESS, The Judge of said Court, and the Seal of said Court, this 3rd day of April, 1922.

[SEAL] LARS BACKE, Judge of Probate.
J. M. BISHOP, Attorney for Petitioner. a14 3t

Blue-Hot.

The term blue-hot is in correct usage, and means blue with heat, just as red-hot means red with heat. The term "blue-hot" is applied to a body when at so high a temperature that the more refrangible rays, that is, the blue and violet, preponderate in its total radiation, so that the light it emits appears blue.

Expansion of Water.

Water expands when heated above 39 degrees Fahrenheit, the coefficient of expansion increasing as the temperature rises. The average expansion of water from 32 degrees Fahrenheit to 212 degrees Fahrenheit, is one twenty-secondth part of the volume at 32 degrees, or .0000259 of the volume for each degree.

SERUM DOES NOT ELIMINATE

Clean-Up of Hog Cholera Cannot Be Expected Through Use of This Modern Treatment.

Some persons think that the use of hog cholera serum has become so general that we are far on the way toward the elimination of the disease, but, according to the United States Department of Agriculture, a clean-up of cholera can not be expected through the use of this method. Besides, only a small percentage of the hogs in the country are treated each year and there is also almost a complete turnover of the swine population each year. Every 12 months we start with a new lot of pigs and the fight against disease must start at the beginning again.

About 500,000,000 cubic centimeters of serum are used every year, which means that, counting 50 cubic centimeters for each hog, only about 10,000,000 hogs are treated. In recent years there have been around 70,000,000 hogs in the country on January 1, according to federal crop estimators, which means many more hogs in the spring and summer. If all these hogs were treated cholera would not be eliminated. It would simply be made impotent to kill many hogs for one season and would begin to kill again the next season if serum were not used. Serum treatment, like insurance, can not be allowed to lapse.

SOWING TURNIPS TO FOLLOW VEGETABLES

Excellent Crop to Utilize Waste Spaces in Garden.

Reasonably Rich Soil Is Essential, Finely Raked and Leveled Off to Avoid Water Collecting in Little Pools.

(Prepared by the United States Department of Agriculture.)

As a crop to utilize garden space after early vegetables have been harvested, nothing is better than the turnip. Turnips should be planted in most parts of the country about July 25, but in the extreme South as late as the last of August and can be left in the ground until after several light frosts or all winter in the South. They are useful as a table vegetable and to a limited extent will supply the place of potatoes. It is the general opinion of specialists of the United States Department of Agriculture that the American public could consume many more turnips than it does.

For field sowing, turnips are usually broadcast. The particular requirement is a reasonably rich soil finely raked and leveled off to avoid water collecting in pools. The seed should be sowed sparingly. One homely rule is to take the quantity which seems sufficient and divide it in half. After the seeds have been scattered on the surface of the ground, they should be well raked in. This may be done by dragging a piece of brush over the ground. The surface should be well smoothed. It is a good plan to sow turnips just after a rain, giving them opportunity to sprout before a crust forms. After sowing they will need little attention until harvest.

Common Garden Error.

One of the common faults in gardening is making rows of plants too close together and leaving the plants too close in the row. This causes plants to suffer for moisture and the lack of plant food. Give more distance.

Not Good as Fertilizer.

Sawdust is not a good fertilizer and should not be spaded into the garden until it has rotted so that it almost disintegrates. It is a favorite breeding place for certain kinds of insects. Burn it and use the ashes.

Dressing Asparagus Bed.

Give the asparagus bed a good dressing of manure. It will hasten the appearance of the "grass" and make it more tender. The custom of salting the bed may be omitted. It does not produce any noticeable results one way or the other.

ROUSING MEETING OF NEW SETTLERS ASSOCIATION HELD

Special Train Friday From Thief River Falls Brings Body of Boosters Here and Session at High School Auditorium Is Attended by Enthusiastic Number.

HIGH SPOTS IN COMMUNITY MEET

H. W. Protzeller: "Righ now we have here all the qualities any community could desire."

Hans Anton: "There is nothing missing in this section except men. We need more men and the right kind. This is the last Great West—there is no better place to go."

Supt. I. T. Simley: "Look for the good in your neighbor and you will find it."

C. L. Hansen: "The idea that town and country do not like each other is shattered when we see a meeting of this kind."

An explanation of the purposes of the New Settlers Association, which has recently been formed in Pennington county, was the chief topic of the speakers at the meeting of the Goodridge Community club held at the school auditorium Friday evening.

The interest which has been created in the work of the Community club was evidenced by the excellent attendance at the meeting. A special car over the Minnesota Northwestern Electric railway brought a large and enthusiastic gathering from our friendly county seat town.

H. W. Protzeller, president of the New Settlers Association, delivered the principal address of the evening and discussed at length the history and purposes of the movement.

"To build up this community," said Mr. Protzeller, "we must concentrate every effort to bring in new settlers. We lack people. But before we can bring new people to settle here, we must prepare the people who are already here."

The speaker called attention to the natural resources and the excellent opportunities of the Thief River valley and deplored the existence of chronic knockers who continually find fault with the community in which they live and for whom the slogan, "If you can't boost it—beat it," was intended.

"In times of prosperity," continued Mr. Protzeller, " the people move from the country to the city, and in hard times—like the present—the trend is reversed. We can no longer depend on the rural communities of Iowa and Wisconsin for our new settlers; we must go to the industrial centers and reach the people by circumspect advertising." In order to put the personal touch into the publicity work of the Association, Mr. Protzeller urged all the people of the community to secure the literature published by the Association and send it to friends who might be interested in coming here. The speaker declared that one of the fundamental principles of the movement was to insure the prospective homeseeker a square deal by furnishing honest and accurate information about the land in this section.

"Above all," concluded Mr. Protzeller, "we want your co-operation. At the present time we have a membership of 183. In the near future we should have at least 100 members in Goodridge alone."

Hans Anton, "king of the dairy industry in Pennington county," was next introduced, and spoke reminiscently of his coming to America and his heed of Horace Greeley's injunction, "Go west, young man, go west," which finally brought him to Pennington county. He explained how he first tried grain farming and then changed to the dairy industry because he thought it more adapted to this particular section.

"I am here to stay," declared Mr. Anton. "This is the last Great West and there is no better place to go."

Peter Englestad, secretary of the Thief River Falls Co-operative Creamery association, and manager of the Goodridge creamery, explained briefly the purpose of the Thief River Falls Association in taking over the local creamery, and urged the people of the community to support this home industry. He declared that the delay in opening the local plant was due to the condition in which the machinery was found at the time when it was taken over.

Supt. I. T. Simley, of Thief River Falls, added variety to the program by administering a very short pyhsical drill. In a brief but very interesting address, he called attention to the possibilities of this section and pleaded for a more intelligent appreciation of the good things that surround us on every hand.

"Cast down your bucket where you are," declared Mr. Simley, "and let us awaken to a realization of the good things we have here."

C. L. Hansen, who has just recently launched a project to assist in financing the building of silos in Pennington county, was another speaker, and discussed the co-operation that must necessarily exist between the business men and the farmer.

"Anything that can be done to benefit the community will receive the support of the business men," Mr. Hansen declared. "The town and the country must work together. The men in town cannot prosper unless the farmer prospers."

Except for the representatives of the New Settlers Association who appeared at the invitation of the Community club, the program was exclusively made up of local talent. Among the delightful numbers was a very effective reading by Floyd Olson. A vocal trio by the Resan brothers brought much applause and the singers responded with an encore.

Miss Gladys Wilson and Vivian Thoreson gave a very pleasing piano solo and the duet by Mrs. Carl Christianson and Miss Hegland was very well received.

Supt. O. B. Norby merits considerable credit for his skillful rendition of James Whitcomb Riley's "I Won't Cry No More." Kathleen Lang presented Booker T. Washington's "The Uplifting of the Negro Race." Eunice Tvedt was eminently successful in her presentation of the late Cyrus W. Northrop's "A Manly Fellow."

Vocal solos were also given by E. J. Beithon and John Nystul. The Goodridge band, under the direction of Mr. Nystul, rendered a few selections and added zest to the program.

A large part of the credit for the success of the meeting is due the program committee consisting of Mrs. Carl Christianson, Mrs. O. Kirklie and Miss Sara Vaughan.

OKLEE HERE FOR THE FIRST GAME

Baseball Season to Formally Open Saturday Afternoon at 2:30.

The first baseball game of the 1922 season is scheduled for Saturday afternoon when Oklee comes to Goodridge to lock horns with the team representing the local schools.

This year's aggregation of baseball performers puts in an exceptionally fine appearance and from present indications it is thought they will give neighboring towns a run for the button. The club, which is under the management of Supt. B. O. Norby, is rapidly whipping into shape and are in condition for the opening fray Saturday.

Daniel Payne, pitcher for the team, is a man of ability. He started as a second baseman on last year's team and won praise for the way he covered the territory around second base. He is a senior in the local high school.

Gustav Thompson, the receiving end of the team, is a new man in the school, but from all indications he will prove an asset to the team. The battery will be composed of Payne and Thompson. The latter is a sophomore in the local high school.

Loudolph Urdahl, left fielder, is an old player in this position, having covered the same position last year. He is a speedy player and a dependable man at bat. Urdahl is a freshman.

Roy Olson, the man covering second base on the 1922 team, is a reliable player and can be depended upon. He played center field for the local nine in 1921. Olson is a senior.

Joseph Christianson, the shortstop, is a player of experience on the diamond. He is a senior.

First base is covered by Alvin Halvorson. He covered the same position last year, but was handicapped by an injured hand, which was more of a detriment than an assistance. He is a sophomore.

Third base is covered by Stuart Ferdinandsen. He was the hurler for the high school nine last year and established a local reputation for himself. He is a sophomore.

Center field is under the supervision of Bennie Mandt. He is a new man on our team, but from general appearances he will be successful in winning a permanent place on the nine.

Right field is taken care of by Herbert Nelson, a new man on the team, but one who has the carmarks of a star. Nelson is a member of the sophomore class.

Our Good Friends

The thanks of the editor is due Mrs. Tandberg and Miss Bundhund, as well as the many other kind people of Goodridge, who have so ably assisted in gathering news items and advertising matter for this issue of the Banner. Taking over the Banner, as the girls would say, has been "so sudden," that but for the help of our good friends we would be quite flustrated. And, by the way, the ladies above mentioned have volunteered their permanent assistance to the end that Goodridge may have the best newspaper in Pennington county, so we ask everyone to send to them, for the sake of convenience, every item of local news value.

DO YOU LIKE THE BANNER?

Do you like the Banner and the spirit that prompts it? Do you believe in Goodridge the way The Banner does? If so, prove it by subscribing for it. Only one dollar and fifty cents will bring it to you for one year—52 weeks, prepaid and ready to read.

CREAMERY AGAIN IS GOING STRONG

Will Operate on Full Time Basis After May 1st, Says Englestad.

The Goodridge Co-operative Creamery, now operated by the Thief River Falls Creamery Association, will be doing business on a full-time basis after May 1st, according to Peter Engelstad, secretary.

During the past two weeks the machinery of the plant has been completely overhauled under the watchful eye of John Newland, who has had charge since the Thief River men assumed control. Several additions also have been made to the equipment, and we believe it is not too much to say the local creamery will in every respect be the equal, if not the superior in point of working facilities, of any similar plant in this section of the state.

Despite unfavorable conditions last year, approximately 90,000 pounds of butterfat was handled by the Goodridge creamery, and Buttermaker Gangness, who assumes charge here on May 1st, is authority for the statement that an increase which will shove the totals up to 150,000 pounds may be looked for this year.

The farmers in this vicinity are to be gratulated upon the present arrangement, which, in the opinion of The Banner, has served to place the institution on a firmer basis than ever before, and assuring for the community a creamery as modern and up-to-date as can be found anywhere.

ED KIVLE'S HORSES "BITE THE DUST" IN SUDDEN DASH

While tied up in front of the creamery office Friday afternoon, the horses of Ed Kivle made a sudden dash for the open and a serious accident narrowly averted as they ran across the electric line's tracks west of the depot and crashed into a buggy near the Winton-Nichols Lumber company office. Although 24 dozen eggs were dumped from the wagon to the ground, only one was broken.

It is not known what frightened the horses and caused them to go on their wild spree.

BAND WILL GIVE SERIES OF CONCERTS THIS SUMMER

According to H. A. Halvorsen, the Goodridge band will give a series of open air concerts on Saturday evenings during the spring and summer months.

The band has maintained an active organization under the direction of John Nystul, with regular weekly rehearsals, for more than a year, and during that time the personnel has increased until the present membership numbers 15. This year the band has been absolutely self-supporting.

Carl Christianson has offered to give the band members a banquet after the first open air performance this spring.

J. H. HAY TO DELIVER GRADUATION ADDRESS

Prof. J. H. Hay, formerly superintendent of schools at Thief River Falls, now assistant commissioner of agriculture at St. Paul, will come to Goodridge to deliver the principle address at the graduation exercises of the local high school in June.

Tell Them About The Banner

When you buy an advertised article as a result of reading the Banner, tell the advertiser about it. That's the kind of boosting that helps us. We intend soon to start a "want ad." column in The Banner, and the way to make this feature of value is to try it and talk about it.

Chaperones are the reason so many girls get taken home on the street car.

GOOD ROADS MEN SEEK AID OF MARSHALL COUNTY BOARD

Goodridge Citizens Present Petition to Commissioners and Request Early Action on Highway Now Blocked Because of Unfinished Road in County to North.

A committee headed by A. C. Tvedt, venerable gentleman of good roads in this vicinity, Nick Bundhund, J. P. Jensen, E. S. Gaudland and Carl Christianson, as well as several other farmers and business men of this city, went to Warren Monday to place before the Marshall county commissioners the petition of 167 names requesting that the unfinished part of the state highway running between Oklee, on the Jefferson highway to the south, and connecting with Roseau on the north, be given early consideration by the board and, if possible, rushed to completion this summer.

Although the road in question two years ago was designated as a state road, more than 20 miles of it traversing the eastern part of Marshall county lies an idle quantity, blocking good roads projects generally and hemming in hundreds of persons who at the present time are battling the elements of 20 years ago.

That there is great need for the early completion of the highway is apparent, and it was for the specific purpose of gaining final approval of the Marshall county commissioners that local men were prompted to beseech them to take action this summer that would insure a final completion of the highway and set free scores of farmers now living along the uncompleted road.

There is at the present time no highway running north and south in eastern Pennington county east of Thief River Falls, and local men regard it as deplorable that the present status of road matters should continue. Travelers from the south are now compelled to take a round-about course over a distance of from 50 to 60 miles in order to get up into the Roseau country and the Lake of the Woods section of Minnesota.

There are hundreds of automobile tourists seeking these northern sections whom it is fair to assume, rather than make the long detour, go over other routes. The Jefferson highway, coming in at Oklee, affords one of the finest roads in the state and until the time arrives when a highway headed north from that village becomes a certainty—as it surely will—this section of the county, including Marshall and Roseau counties, cannot hope to benefit.

"The uncompleted highway running through eastern Marshall county," said A. C. Tvedt, "constitutes a great menace to the progress of this end of the county, to say nothing of the traffic that is at the present time being diverted from Marshall and Roseau counties. The county board of Marshall county have it in their power to alleviate this difficulty and we are going to continue our present efforts to the end that they give their sanction and final approval for the work to go forth."

While the Marshall county board gave the local men comprising the committee scant satisfaction from the standpoint of early approval or an intention of seeing to it that some plan is worked out for completing the highway this summer, some of the members intimated their desire of seeing the road pushed through. It was pointed out by them that a lack of funds is placing a ban on road expenditures so far as Marshall county is concerned, but that they would give the matter the best possible consideration. They recognized a need of it, they said, but for the reasons mentioned, hesitate to act.

The local committee returned to Goodridge in the evening and will make a report. The concensus of opinion among them appeared to be that the road will undoubtedly come within the next two years and that they will do everything in their power to bring the project about.

YOUNG MAN IN GUN ACCIDENT FRIDAY

Oscar Bjerken, 18 Years Old Is Victim of Dangerous Injury.

Oscar Bjerken, 18 years old, son of Mrs. Lars Bjerken, living on a farm 10 miles north of Goodridge, was the victim of a serious accident last week while out shooting crows with an old shotgun, which exploded and sent the firing pin crashing into the young man's eye. The injury may result in the loss of his sight.

The accident, which occurred a short distance from the farm home, rendered young Bjerken temporarily unconscious and he was taken to a Thief River Falls hospital where, it is said, he will recover, but the physicians hold slight chance for saving his eyesight.

The gun burst at the first shot fired with the result told of. Being lodged in the socket of his eye, the firing pin could not be extracted until his arrival at the Thief River Falls hospital.

It's true that you can be just as good a musician without whiskers and a long name, but nobody will listen to you.

THIEF RIVER MAN SERIOUSLY INJURED

C. T. Christenson Loses Left Arm as Result of Accident at Plummer

C. T. Christenson, of Thief River Falls, one of the oldest freight conductors on the Soo Line, was so seriously injured in a rail accident at Plummer Tuesday evening that his life was despaired of. Since last fall Mr. Christenson has been doing the work of a brakeman and it was while serving in this capacity that he met with the accident which resulted in the loss of his left arm.

He was unable yesterday to give a clear account of what happened except that he recollects releasing the air brakes just as the train pulled into a sidetrack at Plummer. He was found by the other trainmen in an unconscious condition, and from his position it was evident that several cars had passed over his arm. He was immediately taken aboard the engine and hurried to Thief River Falls, where he was rushed to the hospital. A hurried examination convinced the doctors that amputation was necessary, and the operation was performed the following morning by Dr. Mellby, of Thief River and Dr. Bratrud, of Warren.

Though badly injured about the body, it is said that Mr. Christenson will survive the shock. He is very popular among his fellow railroad men, and all are grieved and shocked by the sad occurrence.

JUNIORS GIVE BASKET SOCIAL TO RAISE FUNDS FOR BANQUET

The junior class of the local high school gave a basket social Monday at the school auditorium, and all the young ladies of the school brought baskets, for which the young men students done some spirited bidding to secure their favorite. A two-hour recess was granted at noon and the event proved highly enjoyable to all.

The funds raised by the sale of baskets will go to defray the expenses of the annual junior-senior banquet to be given in the very near future.

Remodeling Cafe.

S. Lysebakken and Mr. Kately have been busy the past few days in making a number of improvements to the interior decorations of the M. J. Stephenson cafe.

NEWEST SETTLER FROM IOWA TAKES PENNINGTON FOR HIS

J. M. McVey, of Oskaloosa, Ia., accompanied by his two sons, arrived in Goodridge via automobile Saturday afternoon and have started farming on the Brantland place, 160 acres of land lying six miles south of Goodridge. Mr. McVey has the utmost confidence in this section of the country and will engage in grain raising and dairying, believing that land values are judged more by what they produce than the vicinity in which they are located.

Mr. McVey is perhaps one of the newest of the settlers who has chosen Pennington county as his future home as a direct result of the activities of the New Settlers Association.

The youngest of the McVey boys is already enrolled as a student at the local schools.

Miss Vivian Thoreson went to Thief River Falls Wednesday, where in the evening she appeared in the recital given by the pupils of Mrs. C. O. Erickson at the high school auditorium. The particular selection played by Miss Thoreson was Koelling's Serenade.

GRANT CENTENARY PROGRAM ARRANGED AT HIGH SCHOOL

At the instigation of a proclamation issued by Gov. J. A. O. Preus for the observance of the Grant centenary, the local schools have arranged a splendid program to be given at the high school auditorium. Special music has been arranged for and songs reminiscent of Civil war days will be rendered by the pupils.

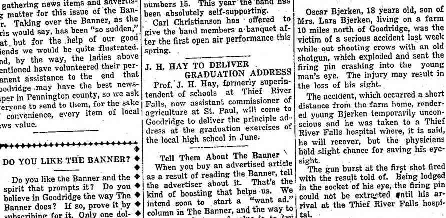
B. O. Norby will deliver an address at the exercises and Angeline Swobodny will give a talk on General U. S. Grant and Civil war days. Emma Gilbertson will speak on Grant's life during his tenure in office as president.

Christina Bundhund is to deliver the famous classic of the late President McKinley, entitled "An Appreciation of Grant." While the entire program has not been definitely announced, The Banner is authorized to say that the day will be fittingly observed at the public schools.

GREENBUSH EDITOR FILES

E. R. Umpleby, editor of the Greenbush Tribune, has filed as a candidate for the state legislature from Roseau county.

A PENNINGTON COUNTY FARM HOME



Show your faith in Pennington county by sending a copy of The Banner to your friends who contemplate a change. We will do the rest.

Good Roads Plan Passes 'Mile Post'

Hundreds Mile Post Measure Trunk Route, Improvements Intial Year

First Anniversary Bulletin Totals Betterments Made in Twelve Months

The Babcock Good Roads plan, adopted under Amendment No. 1 to pull Minnesota out of the mud, has been in effect just one year.

The state highway development program was made effective April 25, 1921, after Governor J. A. O. Preus signed the new highway legislation and re-appointed Charles M. Babcock state highway commissioner to launch the new plan he devised. John H. Mullen, chief engineer, was named first assistant commissioner and the highway executives at once began organizing and spreading road betterments, starting at the zero mark. Within 60 days nearly 1,000 patrolmen, one for each 5-mile average section, were put at work and hundreds of miles of new construction was placed under contract.

A bulletin from the state highway department contains the following summary of progress during the first 12-months period:

Grading completed on 815 and contracted for 338 additional miles, and reshaping done on 1,131 miles of the 1,499-mile total listed as graded on the 7,000-mile system when taken over from the counties.

Gravel surfacing completed on 555 miles and contracted for 626 additional miles, and re-surfacing done on 885 miles of the 1,371-mile total listed by counties as graveled at the state start.

Paving completed on 116 miles and contracted on 123 miles, compared with 112 miles of pavement on the 7,000-mile system when taken over.

Maintenance provided on 6,855 miles of designated trunk routes—well-equipped patrol service on each 5-mile average stretch augmented with special operations by big truck and tractor fleets.

Contracts awarded at low record prices which afford big savings over costs in past years and enable the department to continue progress showing in spits of reductions in available funds.

Administration facilitated by acquisition of building erected expressly for department and leased at less than half previous rental rate: administration expenses kept well below 5 per cent level.

The anniversary bulletin follows others to keep the public fully informed about road plans and progress. Maps and graphs have been issued to show how and where funds are being used and wide distribution of new construction that the largest possible number of localities may share in permanent improvement as well as general maintenance benefits. Official figures disclosed that 79 out of the 86 counties in the state received route betterments costing more than their respective totals of motor vehicle tax payments by an average ratio of $5 to $1, and that trunk routes in the other counties were either in excellent condition or listed for early permanent improvements.

Commissioner Babcock referred to two handicaps confronting the department during the first year; failure of fund revenues to reach expected totals and inability to take advantage of bargain prices offered by contractors to extend needed road improvements. He explained that the plan was based on the expectation that not less than $8,840,000 would be provided annually—$6,000,000 of motor vehicle tax money and $2,840,000 of federal aid. The first annual fund was $7,730,000, the automobile tax averaging less than $16.75 instead of $18 and producing $5,600,000, and congress having reduced the aid appropriation and cut Minnesota's apportionment to $2,130,000. The second year promises even less federal aid, pending proposals at Washington to afford only $1,420,000, and no increase is predicted in the tax revenue. For those reasons the trunk funds for the first two years will be $14,750,000 or nearly $3,000,000 less than was expected and only about a third of the total provided for use on the local or secondary roads, according to official figures.

Fund curtailments offset to some extent by lower costs on road work, highway officials express confidence that the department will succeed in continuing the showings made in the first year. In this connection Mr. Babcock again expressed regret that the state is prevented by financial limitations from enlarging its highway program to take special advantage of the low prices, concurring in the opinion of experts that road construction soon will begin to advance in cost.

The commissioner also pointed out that more than 80 cents of every trunk highway dollar has been used for grading gravel surfacing and maintenance. The mileage of new paving has been run up with reimbursement funds which can be used only in the county issuing the bonds and with the approval of the county commissioners. Many counties by furnishing bond money also obtained preference for their trunk route improvements projects.

Another important feature of the bulletin refers to the further result of Minnesota's new good roads plan in the improvement of local roads by the use of state aid and local tax money. a large part of which was used formerly on highways the state is now improving and maintaining.

PASTURE CROPS FOR HOGS

Mr. O. M. Kiser, Animal Husbandman at the Northwest Experiment Station, Crookston, has given considerable study to the problems involved in economical pork production. He states that it is generally conceded among pork producers that the proper use of suitable pasture crops for hogs decreases the cost of production. Not only is the cost decreased but the extensive use of pastures is necessary in order to obtain the maximum development of the hogs.

The raising of hogs in northwestern Minnesota is annually becoming a more important project on the average farm. The man who produces pork for the market and the purebred breeder of hogs as well, must reckon carefully the cost of production.

The practice of raising suitable pasture crops for hogs increase the number of hogs that can be raised from a given area; at the same time it is a good practice from the standpoint of general farm management since it results in a saving of labor and helps to keep the pigs in a more healthy condition.

In the raising of pasture crops for hogs, two important questions come into the minds of men interested in economical pork production. One of the questions is what crops are adaptable for this purpose and second should grain and how much, be fed to hogs on pasture? In a mimeograph bulletin printed by the Northwest Station some attempt has been made to answer these questions.

The hog is a natural grazer at all times of its life to a greater or less extent. The hogs which have had succulent food almost constantly available are the ones that are almost always invariably the most thrifty and healthy and have made their gain on a smaller amount of grain than the hog which has been confined to dry-lot feeding through a considerable portion of its life.

When it comes to a discussion of the various pasture crops for hogs, alfalfa is in a class by itself. The farmer who has plenty of alfalfa and plenty of hog-tight fences need never fear for the comforts of his hogs. There are many who do not have alfalfa, and these must depend on other pasture crops. Even the farmer with alfalfa can make use of other crops. In the spring, quick growing annuals may be sown to help out in supplying succulent feeds for the sow and pigs. A number of crops may be used among them being Dwarf Essex rape, Canadian field peas, oats or barley. Rye seeded in the fall furnishes an early spring pasture for a short period Rape seeded at the rate of five or eight pounds per acre makes a very quickly available pasture for the entire grazing period. This can be seeded early in the spring. It germinates at a low temperature and should be available for pasture by May or by the fifteenth of June at the latest.

If the hog yards are so arranged that they can be plowed each spring and seeded to some forage crop for the hogs, this will have a sweetening effect on the soil and help to keep the yards in a sanitary condition.

It is not possible to make a definite recommendation as to the amount of grain to feed, for there are a number of conditions which must be taken into consideration when making a decision regarding this part. Some of the more important factors concerning this are as follows: age and weight of the hogs; the object of feeding, namely, whether for the developing breeding animals or for the pork market; whether it is the object to full feed from birth getting them on the market as soon as possible, or whether the plan of growing first, then fatening is followed.

In the use of pasture crops it must be definitely realized that the best pasture is little more than a maintenance ration so that it is seldom profitable to force hogs to live upon forage alone unless the object is merely to maintain mature sows, not preganat or suckling pigs. For young pigs, pregnant females or sows suckling pigs, it is necessary when on pasture to feed a grain ration.

Experimental data comparing results of dry-lot feeding versus pasture crops show that the amount of grain necessary to produce a pound of gain with dry-lot feeding is from four to five pounds. It takes from three to three and a half pounds of grain to produce a pound of gain with hogs on pasture crops. In general, is can be said that forage crops will effect a saving of approximately one-third of the gain. Pasture crops can be produced more economically than grain and when used in combination with grain will produce gains more economically.

The kind of grain mixture to use may depend on the different frains that are available. For growing pigs a part of the ration should be made of a high protein feed, such as tankage. Skim milk is a valuable feed to give in addition to the regular grain. Pregnant sows and those suckling young should also be liberally supplied with protein feeds.

Charles M. Schawb says people should "smile all the time." But all of us can't be presidents of steel trusts.

You have noticed, of course, that the man who brags about his honesty has to put up collateral when he gets money from the bank the same as the rest of us.

Many of us will hardly get through paying Christmas bills before Easter arrives.

FARMERS, NOTICE

Farmers

Attention!

If you wish to erect a silo on your farm, we would be pleased to have you call on us, as we have set aside a sufficient sum to finance the purchase of fifty silos.

No Interest Charge

This money will be loaned to you for one year without interest, absolutely free of charge.

Our reason for making this offer is simply to assist in improving the farming community.

There are no restrictions on what kind of a silo you want or where you purchase your material. We are not in the silo business but are making this exceptional offer solely for the purpose of assisting the farmers to place themselves in a position to carry on dairy farming profitably.

FIRST NATIONAL BANK

—THIEF RIVER FALLS—

C. L. HANSEN, President

THIEF RIVER FALLS NEWS

(From The Tribune)

Miss Vermont Drotts of Highlanding shopped here on Friday.

Mr. and Mrs. Severt Brekke of Kratka spent Friday in the city with friends.

Mrs. M. T. McFarland and three children left Wednesday afternoon for Fisher, Minn., to visit with relatives.

Harold Olson, Pete and Ole Engelstad were business transactors at Goodridge on Wednesday.

Mrs. O. B. Gunderson left Tuesday afternoon for Moorhead, to visit a brief period with relatives.

Miss Helen Flekke left Monday evening for Hazel near which place she will be employed.

Attorney, E. M. Stanton left Thursday evening for various parts in Florida, to spend an indefinite period on business.

Miss Marie Winson left Saturday morning for Aps, Minn., having spent some time visiting with friends in this city.

Mrs. W. B. Fuller and daughter, Marjorie, and Miss Cecelia Bourque left Saturday for Fordville, to spend a week with friends.

Mrs. O. J. Herrick returned Saturday morning to her home at Warren, having spent a few days with her sister, Mrs. R. J. McGinn.

Mrs. J. Jenson and children, left for their home at Viking after spending a few days with her parents, Mr. and Mrs. William Herron, in this city.

Mrs. A. T. Aaland and daughter, Olive left Tuesday for Steiner to visit a brief period with relatives.

Miss Agnes Quinlog returned Wednesday from Viking, where she spent a few days visiting with her sister, Miss Helga, who teaches near that place.

Miss Elvira Carlson who has been employed at the Lokan's Department store, left Friday for Crookston, where she has secured a similar position.

Miss Emma Ristau returned Sunday evening from Mavie, where she spent a week's vacation at her parental home, to resume her studies at the local high school.

Miss Anna Harder returned Saturday, having spent a week's vacation at her parental home near St. Hilaire, to resume her studies at the local high school.

Carl Gutterud of Agder spent Friday in the city on business.

Mr. and Mrs. Herbert Fuller of Mavie shopped between trains in this city on Friday.

Mr. and Mrs. W. Lendobija of Kratka attended to business and shopped here on Saturday.

Conrad Swanson of St. Hilaire spent Saturday here with friends and relatives.

Claude and Walter Evenson of Silverton were business callers here on Saturday.

Earl Ernest, Oscar and Bennie Brekke of Kratka visited with friends here on Thursday.

Ira Peterson left Monday morning for Superior, Wis., where he will be employed as firemen on the Soo railroad.

Miss Emma Ristau returned Sunday evening, having spent Easter vacation with her parents, near Mavie.

Severt Hoveland returned Friday from Grygla, where he spent two days on business.

Mr. and Mrs. Jorden Adsero, left Saturday afternoon for Fargo, N. D., where they will reside.

Miss Mable Arness who has been employed at Holt for some time visited Friday with her cousin, Mrs. Archie Dahl, of this city, en route to her home at Fork, Minn.

Mr. and Mrs. Orden Olson and son, Ardell of St. Hilaire, spent Sunday with relatives in the city.

Dan Robinson of Grygla returned Wednesday, having spent several days in this city.

Mr. and Mrs. Emil Olson returned Wednesday from New London, Minn., where they have spent some time as guests of Mr. and Mrs. Evin Erickson, who are Mrs. Olson's parents.

Alex. Cloutier, Frank Mee, Albert and Edward Belland spent Sunday with friends and relatives at Red Lake Falls.

Mrs. Oscar Fellman of St. Hilaire spent Friday in the city shopping.

Mr. and Mrs. Albert Severson and children of St. Hilaire, motored here on Sunday to spend the day with relatives.

Julius Anderson arrived here Saturday from Pomerby, Wasn., to remain here indefinitely as guest of relatives.

Mrs. A. Wing arrived here Saturday from Middle River to spend a brief period with her daughters, Mrs. D. B. Bradley and Mrs. Edward Ristau of this city.

Miss Anna Rice and Miss Annis Davis returned Saturday morning to their homes at Greenbush having shopped in this city.

Albert Johnson returned this morning to his home at Bemidji, having spent a few days with his mother, Mrs. O. Quammen, who will leave Thursday for various parts in N. D., to spend an indefinite period with friends and relatives.

Ernest Zeh left Monday morning for Grand Forks to resume his studies at the university, having spent some time with his parents, Mr. and Mrs. Emil Zeh.

Leonard Hougen motored this afternoon for his home at Grand Forks, having spent a few days with friends in this city.

Miss Beulah Chamberlain returned Saturday from Yankton, S. D., where she spent Easter vacation with the parents.

L. E. Bridge of Mahnomen spent Monday in the city transacting business.

L. H. Fisher was a professional caller at Erie on Monday.

Clarence Severe of St. Hilaire transacted business in the city on Monday.

Miss Caspero Gran returned Thursday morning from Minneapolis, where she attended the De Guile college of Beauty Culture. She spent Easter Sunday with Miss Lena Robinson at Osseo, Minn.

Mr. and Mrs. Sigrud Myrom and children accompanied by Myrom's parents, Mr. and Mrs. Nels K. Anderson, motored Sunday to Holt where they spent the day with Mr. and Mrs. P. L. Anderson.

Miss Edna Ryff arrived here Friday evening from Paynesville, where she spent a week with her parents.

Ben Erickson left this morning for Henning to attend to business matters for a few days.

Leland Schuster, student at the University at Grand Forks, N. D., returned Monday afternoon, having spent Easter vacation at the home of his parents, Mr. and Mrs. C. C. Schuster, of this city.

Dr. G. W. Booren and Fred Herrick returned Monday morning from Mahnomen where they spent Saturday and Sunday fishing. They are said to have had excellent luck, bringing back several good sized specimen of brook trout.

Miss Lulu Jubb who has been employed as stenographer at the Clinic for the past three years, will this week discontinue her duties to take a nurse's training course at the Physicians hospital of this city. Miss Eleanor Rambeck bookkeeper at the Clinic will refill her position.

Kratka Township Woman Dies at Her Farm Home

Mrs. Ingeborg Syverson, widow of Tom Syverson, died Wednesday, April 15, at the family home in township of Kratka. Deceased was born in Norway and came to this country a number of years ago and was 79 years old at the date of her death. The funeral was held Friday, interment being made in Highland cemetery, Rev. Ole Sande officiating.

DIES AT BOZEMAN

Ruth Lambert Succumbs After Appendicitis Operation

Miss Ruth Lambert, who has practically made her home in this city for several years with her brother, Roy Lambert, died yesterday afternoon at Bozeman, Montana, as the result of complications resulting from an operation for appendicitis which was performed last Tuesday. The remains will be taken to Royalton, this state, and the funeral will be held upon the arrival of the mother and other relatives of the deceased.

Miss Lambert was here last July, remaining for a month, and has made regular visits here every summer. She made many warm friends in Thief River Falls, who will be shocked to hear of her untimely demise. At Bozeman she was in charge of the millinery department for Wilson & Co.

Mr. Lambert will leave tomorrow for the family home at Royalton to attend his sister's funeral.

Legion to Hold Initiation Wednesday

Elmer Eklund Post, No. 117, of the American Legion will hold a meeting tomorrow evening at the Legion club rooms under the First & Peoples bank building, when a large class of new members are to be taken into the council.

The ten-day drive for new members came to a close today and all of these will be initiated at the meeting tomorrow, and it is requested by the officers of the post that there will be a full attendance. "Every member get a member" has now been changed to "every member bring a member."

There is a committee in charge of arrangements for the initiation and there will be several addresses made. A lunch has also been arranged for and a regular business meeting will precede the ceremonies.

Crookston-Thief River Truck Line Commences

The Crookston-Thief River Falls truck express line, recently inaugurated by the Rambeck & Stone company of Crookston and Thief River Falls, made its initial trip yesterday, carrying a large amount of freight destined for the former city. One trip per day is made between the two cities, with freight and express being taken on at St. Hilaire and Red Lake Falls. A large International truck is employed and another will soon be placed in operation if business seems to warrant, say the managers of the line.

AGENCY OFFICIALS HERE

Indian Agent Cross and Nat Head Make Us a Visit

Indian Agent Cross, in charge of the Red Lake Agency, accompanied by Nat Head, forest ranger, and well known member of the Red Lake tribe, visited Thief River last Wednesday on their way home from Red Lake Falls where they were witnesses in the conservancy hearing held there last week.

Both men talked of the Red Lake road while here, expressing their interest in the project. The only survey of the proposed road now of record was made some years ago by Mr. Head, and he is of the opinion that the road when completed will be of immeasurable benefit to the Red Lake Indians.

REVIVAL MEETINGS

Envoy Walter Jeffreys is to conduct a two weeks' campaign in this city for the Salvation Army. The envoy is a very talented musician, although he has been blind since birth. These meetings are something special and you will enjoy the envoy's singing. There will be a musical one night during the two weeks. Everyone is cordially invited to the Army barracks to attend these meetings, which begin tomorrow evening at 8:15.

Capt. A. Watson, Officer in charge.

Odd Fellows Will Hold Decoration Day Services

"The 101st Anniversary of the Founding of the I. O. O. F." will be the subject of a sermon to be delivered at the Memorial day services of the local lodge on May 30 by Rev. Smith of the Methodist church. The Memorial day services will be jointly attended by both the Odd Fellows and the Rebekahs, who will meet at the Odd Fellows hall at 10:30 A. M. and march to the church in a body.

Woman's Auxiliary Serving Bi-Weekly Lunches at Club

The Woman's Auxiliary of the American Legion last Tuesday served its first public luncheon at the Commercial club rooms, and the new movement has been attended by such success that they will be a bi-weekly feature hereafter. According to Mrs. A. W. Swedenburg, president of the Auxiliary, the plan has been inaugurated as a plan for the raising of funds in order to assist in furnishing the new quarters of the Legion which have recently been acquired, as well as other activities under consideration by the auxiliary. The public is cordially invited to the luncheons, for which a small charge is made. Mrs. Roy Lambert is chairman in charge of arrangements for the luncheons.

[illegible]

Prospects for Crop [illegible] Good in County

F. L. Sorenson who farms about four miles west of Thief River Falls told a reporter for The Tribune today that farmers were pretty well along with their spring work, most of the wheat seeding being finished. Owing to the late season the wheat acreage will be greatly reduced, but there will be an increase in spring rye, barley and oats, as well as corn and potatoes.

Mr. Sorenson gives it as his opinion that spring seeding is farther advanced here than in any other section of the country.

CARL HOFFSETH GOES TO IDAHO

Carl Hoffseth, a resident of Pennington county for the past 30 years, having come here from Grand Forks, N. D., and employed in a local saw mill until it was closed down several years ago, will leave tomorrow for Coeur d' Alene, Ida., where he will enter the Lutheran Home for Aged People. This afternoon at the Trinity Lutheran church a party is being given in his honor and the venerable gentleman will be presented with various useful gifts of wearing apparel, etc.

DANCE AT GOODRIDGE

A dance will be given at the Goodridge hall Friday evening, April 28. Tickets will be 75 cents and good music is promised. Supper will be served at the Stephenson cafe. Everybody welcome.

[illegible] Moonshiners of North

We understand that the Associated Co-operative Moonshine Manufacturers' association of Graceton recently had trouble within its ranks and competition became so strong for a few days that the price of moon fell down to a dollar per quart and most everyone in the village out east got to celebrating the event. After a few days of this the producers got together again on a scale of prices.—Warroad Pioneer.

An attorney died recently at Bancroft, Ia., with a strange record. He had followed the trade of blacksmith until he had reached the age of fifty years. Then he took up the study of law, was admitted to the bar, and established a practice. He was 86 years old at the time of his death.

THE PRIZE WINNERS

Those who win the prizes in financial affairs are those who sacrifice the PRESENT for the FUTURE THINK that over carefully. Think of the rich people you know. See if there wasn't a time when they had hard sledding. Ask them about it. They will tell you. Most of them are proud of their early struggles. There is no royal road to success. Once in a while some one makes a lucky strike, but a fortune made on a gamble is likely to go the same way. Steady saving, careful investment and the support of a good bank—these things count.

THIEF RIVER FALLS - MINNESOTA

The Goodridge Banner

An Independent Legal Weekly Newspaper Published Every Friday at Goodridge, Minnesota.

S. V. ARNESON
Editor and Publisher

Entered as second-class matter at the postoffice at Goodridge, Minn.

HOW 'DE DO!

In presenting to the people of Goodridge and vicinity the first issue of The Banner under its new management, we feel that a word with reference to the change might not be amiss.

Whether a town is judged by its newspaper, or a newspaper is judged by the town in which it is published, does not matter very much so far as we are concerned. To be of any value to the community, a newspaper must primarily aim to correctly record the weekly happenings. A newspaper ceases to be of value when it becomes an organ, the mouthpiece of individuals, cliques or factions. To merit the confidence and support of its constituents it must be fearlessly honest in its comments and opinions—as ready and willing to champion the just cause of its humblest reader as it would be to further the undertakings of the biggest advertiser.

These are the specifications we hope to follow in the publication of The Banner. In a big city such newspapers are rare, but in Goodridge there exists no reason, as we view it, for cliques or factions. We are all just plain folks. mingling on equal terms, striving to do the right thing, to "live and let live," and that is exactly the kind of atmosphere we hope to make The Banner fit into.

We hope to make improvements in the equipment of The Banner in order that the newspaper may be fully representative of all that the town and country offers to present and prospective settlers.

Mr. Converse has done the best he could under the circumstances. None too robust in health, sadly handicapped by lack of proper equipment, there are few men of his advanced age who could have done better. We are sure the people of this community wish him well and trust he may enjoy a prosperous life for many years to come.

So, if you like the new Banner, tell others; if not, tell us. The Banner will be as good as Goodridge wants it to be, and while we are "getting our feet under us," come in and get acquainted.

—S. V. ARNESON, Editor.

So far Goodridge has no candidates for office, which unmistakably shows how people here prefer this town to the county seat.

Don't forget to wave The Banner to all who pass this way. You never can tell how many will be flagged this way—and stay right with us.

There are a lot of rakes doing business in Goodridge these days—we mean garden rakes and the way they are transforming ash piles and rubbish piles into neat, spik and span back yards is a sight for sore eyes.

If you can think of any way in which The Banner can help things along, don't, for Heaven's sake, keep it a deep, dark secret. Write it on one side of a piece of white paper and bring it to us for publication—and let the world know about it.

We have met a lot of fine boosters since we cast our lot in this town—both men and women. Funny, come to think of it, how "birds of a feather flock together" these days. All the good, law-abiding people are to be found in the smaller towns, while the crooks are moving en masse to Minneapolis and St. Paul.

SUPPORT THE CREAMERY.

After a complete overhauling of the machinery, the Goodridge creamery will again be churning butter next week. Since the difficulties of last fall, resulting in the temporary closing of the plant, local cream has been shipped to Thief River Falls, and it is gratifying to know that this important institution is to resume business on a full-time basis.

A creamery is the town's best advertising asset. Visitors invariably ask: "What did your creamery do last year?" The answer determines in the mind of the questioner much as to the country back of the town.

So, it is important that all the cream made in the vicinity of Goodridge should go through the Goodridge creamery. The Banner will follow next year's record closely and expects to have some mighty fine things to print from time to time in this connection.

SPRING SHOOTING

Within a few days streams, ponds, marshes and lakes will flash with the resplendant nuptial colors of teal, mallards, ruddies, pintails, canvass backs, red-heads, gadwalls, Canadian geese and all the other members of the migratory waterfowl family making their leisurely way northward to safe secluded nesting grounds.

The killing of these birds at this season of the year has been prohibited by law, and the fact that there is very little violation of the law in Minnesota is indicative of the fact that Minnesotans have learned their conservation lessons well.

In some localities, however, there are still inconvertables who sneak out at dawn or at dusk and pot a few ducks or geese. It takes twice as many birds to make a mess at this season because the birds are actually worn down to skin, bone and muscles.

It takes one mean, low-down game law bandit to make a mess of the family arrangements of every pair of migratory waterfowl routed thru your locality. If you know of one such individual in your community report him or deport him. The State Game and Fish Commissioner or the nearest game warden will be glad to get his name.—Carlos Avery in the Bull Moose.

THE FARM BUREAU.

The Banner believes much good can be accomplished through the activities of the Farm Bureau. There are so many ways in which this agency can be of service to its members, notably in the interchange of ideas and in promoting a better understanding of the problems of the farmer.

The way we look at it is this:

Whether a man believes in the program of the Farm Bureau or not, certainly no one will deny that enough good can be found in the general program to warrant the little time and attention necessary to attend the meetings. No one ever gets too old, or too smart, to learn, and we dare say no industry is more dependent upon new ideas and modern methods which will enable it to keep pace with a fast-moving world than is farming. To our way of thinking, the Farm Bureau can be made the farmers' short course in modern methods, thus showing him the short cuts to successful farming.

If you feel that you must knock, go out in the backyard and knock your block off.

This will be a great summer for hand-shaking judging by the number of filings for county office.

"Our country—if you can't boost it, beat it!" is the newest slogan of the New Settlers Association. It cuts clean, and clear to the bone.

In the language of a contemporary, the man who trades away from home is ripping shingles from his own roof. This is just as good religion in Goodridge as anywhere on earth.

Said President Harding more than 25 years ago upon taking over the Marion Star, then a small country newspaper: "We are here to stick!" Them's our sentiments, too, Warren!

By no stretch of the imagination can a man be called a good citizen who knocks either his home town or his home people. Loyalty is the finest word in the English language, and the man who is always loyal to his town and his neighbors is a pretty good fellow to tie to.

Another good way of boosting your town is to have stationery printed with your name on it, including your business and what you are here for. Put the "personal touch" to it and show outside folks you are progressive by having The Banner do your job printing.

NEW PRESS AND OTHER NEEDED EQUIPMENT SOON TO BE INSTALLED HERE

Because of the fact that the news press formerly used in printing this newspaper is considered obselete and impracticable, the new publisher has made arrangements to have this contingency overcome by securing the work done by The Tribune at Thief River Falls, which has generously permitted The Banner the free use of all its modern newspaper facilities in producing this newspaper.

The Banner will this week move into the Wold building, formerly occupied by the Gaylord Land company, and we ask the indulgence of our readers until the time when we become more comfortably located in our new quarters.

The Banner will at all times strive to produce the best in printing and to accomplish this end we are going to considerable expense in providing the necessary equipment, which already has been negotiated for and will be installed upon arrival.

GOODRIDGE BANNER SOLD

(From The Tribune)

The Goodridge Banner has been sold to S. V. Arneson, who since last October has been the associate editor of the Tribune. Mr. Converse who has guided the destinies of the Banner for several years found his duties to arduous for a man of his advanced age, and last week he sold the paper to Mr. Nystul, of the Goodridge schools, who now in turn disposes of the plant to Mr. Arneson. The result of the several negotiations is that Goodridge will now have a real newspaper—if we do say it. Mr. Arneson is a veteran of the world war and has had newspaper experience in every part of the globe. Following the war he worked for the Paris edition of the London Mail, was connected with the mechanical departments of several New York papers and he came to Thief River Falls from the Pioneer Press. That he will make the Banner representative of the thriving city on the electric line goes without saying. Like the town he has chosen for his future home, he is young, ambitious and energetic, and if the people of that community get behind him as we believe they will, he will keep the Banner waving to beat the band at the toppermost top of the Goodridge flag pole. We congratulate both Goodridge and its new editor.

SILO BUILDING HAS SUPPORT OF HANSEN

Thief River Banker Offers Interest-Free Cash to Assist Dairying.

Himself a farmer and a keen observer of farm conditions, Mr. C. L. Hansen, of the Thief River Falls First National bank, has decided to offer of the funds of the bank to farmers for the purpose of building silos in Pennington county, such money to be furnished interest-free for the period of one year.

Mr. Hansen is firmly convinced of the utility of the silo as one of the chief factors in promoting the welfare of the farmers. The building of silos is the forerunner of more and better cows—and no one knows better than Mr. Hansen that more cows spell increased deposits in his own bank as well as in the other banks of Pennington county. It will thus be seen that he is not entirely unselfish in his desire to see more silos go up, but The Banner does feel that he is entitled to a full measure of credit for giving the use of the funds of his bank free of interest for such a laudable purpose.

In the entire process it must be obvious that the farmer must prosper first. He must get something out of his venture in order to reimburse the bank. Mr. Hansen does not rely upon theorists or scientists for his knowledge of silos. He has stood shoulder to shoulder with the farmers of this section. He has prospered or failed in his efforts in exact ratio with the ups and downs of the farmers, and if he now has decided to inaugurate a campaign for more silos in Pennington county, such action must be based upon his observations. The Banner believes he is on the right track.

C. L. Hansen, banker of Thief River Falls, who believes Pennington county ought to build fifty new factories every year for turning roughage into milk and cream and money—and who is willing to back such enterprises with interest-free cash.

It has been demonstrated time and time again that feeding roughage from a silo is the most economical method of conserving the products of the farm. In a country so well adapted to the raising of corn, alfalfa and clover, not to mention other tame grasses, it follows that dairying should be the chief industry of the farmers. We say should be the chief industry. We should say it MUST be the chief industry before we can hope to reach that high state of cultivation of our vacant lands, and that uniform prosperity of our farmers which must inevitably result. Just as it is essential that we have better cows, and more of them, just so is it of equal if not greater importance, that we have the most economical system of feeding in order that there may be a minimum of wasted feed and effort.

Pennington county is now paying to farmers less than half a million dollars per year for cream. It is capable of paying TEN MILLIONS based upon our ability to produce. With this in mind Mr. Hansen would like to see fifty silos built this year and fifty more next year. He is not interested in the sale of silos. He looks upon a silo as a manufacturing enterprise. A factory for turning corn and roughage into cream and butter—and he is just smart enough to know that if he can be instrumental in starting enough of these factories to going in the vicinity of Goodridge—a lot of money will flow into the county, and he is willing to take his chances on getting his share of it.

REV. AAKER WILL MOVE FAMILY TO GOODRIDGE

Rev. Aaker, the new Norwegian Lutheran minister installed by the congregation last Sunday, left Goodridge for Beaudette, Minn., Monday, where he will make arrangements to have his family return with him, and it is expected that they will arrive here the latter part of the week. Rev. and Mrs. Aaker and family will live in the parsonage.

A Pacific coast chauffeur has filed suit against his wife, Margaret Matzenauer, famous contralto. He says his wife "is an orchid and he wild mustard," hence the two do not make a good domestic bouquet.

THE ANNUAL CROW CAMPAIGN

Crow hunts have become so popular and productive of good results that they are now annual events in the working program of the various branches of the League.

It is estimated that 20,000 of the black destroyers have paid the penalty for their bird depredations within the past two years. If the life of a game bird was saved for each crow destroyed the work was very much worth while. As a matter of fact it is estimated that each crow would have destroyed ten game birds. The killing of 20,000 crows resulted in the saving of 200,000 game birds. These figures are very conservative. Crows are a menace to game and song birds throughout the months of April, May, June and July. The number of young birds and eggs consumed by each crow is probably five times the average quoted.

The members of many clubs look forward to the annual crow shoots with as much enthusiasm as they do the opening of the game bird hunting season. Crow hunting takes them afield at a time when every lover of the world out o' doors is eager to relieve himself of the pent-up energy stored away during the long winter months.

Jim crow is a wise old bird, and his cunning and ability to anticipate danger adds zest to the sport. Many clubs are now planning their crow shoots and the League has plans for a state-wide campaign which will be outlined in the next issue of the bulletin.—The Bull Moose.

Mr. Protzeller of the Electric Line is a mighty public-spirited gentleman. By furnishing a special train for the big booster meeting last week, he placed Goodridge under many obligations to him.

The seventh annual convention of the Minnesota Game Protective League will be held at Walker June 22nd to 25th. With Senator McGarry on the program and Ed. Rogers in charge of arrangements the convention should be a hot one from start to finish.

Odin Halden, member of the state tax commission, announces his candidacy for county auditor of St. Louis county. He will resign his state position to make the county race. Halden was auditor of St. Louis county for more than twenty years and was defeated four years ago by Walter Borgen, then city clerk of Duluth. Halden is a tax expert and is considered one of the best qualified men in the state for the office of county auditor.

Thrift is absolutely necessary to provide comforts for old age, for the rainy day, for protection of family.

Jack Dempsey has answered Europe's call at last. He has sailed for France and will arrive almost four years late.

Few people ever get ahead, ever become financially independent, unless they save patiently, persistently and with a system.

Some people get so nervous over their troubles they can't sleep nights, when as a matter of fact they haven't even nibbled the crust.

Any man who can not save money is bound to be dependent on relatives or charity when he attains old age and is unable longer to earn a salary.

[illegible] as today to take stock of one's ability to save money and to devise plans for stimulating one's savings instinct—the only sure door to comfort, independence and fortune.

The prohibition enforcement bureau sends out the announcement that 8,000 law violators have been prosecuted during the past year. That means that 120 millions have so far escaped.

Citation for Hearing on Final Account and for Distribution.

STATE OF MINNESOTA, COUNTY of Pennington, ss. In Probate Court.

In the Matter of the Estate of August O. Schneider, Decedent.

The State of Minnesota to Theresa Schneider, all persons interested in the final account and distribution of the estate of said decedent. The representatives of the above-named decedent having filed in this court his final account of the administration of the estate of said decedent, together with his petition, praying for the adjustment and allowance of said final account and for distribution of the residue of said estate to the person thereunto entitled: Therefore YOU, and EACH OF YOU, are hereby cited and required to show cause, if any you have, before this Court at the Probate Court Rooms in the Court House in the City of Thief River Falls, in the County of Pennington, State of Minnesota, on the 15th day of May, 1922, at 11 o'clock A. M., why said petition should not be granted.

WITNESS, The Judge of said Court and the Seal of said Court, this 3rd day of April, 1922.

(SEAL) LARS BACKE,
Judge of Probate.

Political Announcement

(This notice to be paid for by N. J. Anderson at regular space rates.)

To the voters of Pennington county:

I am a candidate for re-election for Register of Deeds of Pennington county. During the years I have served the people of the county as Register of Deeds I have made many friends, but I am not asking support in the present campaign merely by virtue of this friendship. Rather I would have the voters consider my candidacy on a purely efficiency basis as the only proper method of electing officials to public office. In regards to fitness for the office of Register of Deeds, both as to honesty and capability, I prefer to rest my case with the people of Pennington county, whom I served in past years.

Yours respectfully,
N. J. ANDERSON.

FARMSTEAD EDITOR LIKES PENNINGTON

Noted Agricultural Writer Visits Goodridge to Get Closeup of East End.

Goodridge and eastern Pennington county was fortunate this week to be included in the itinerary of one of the best known agricultural writers of Minnesota, George W. Kelley, editor of the Northwest Farmstead, who was here Monday with a delegation from Thief River Falls. The purpose of Mr. Kelley's visit is herewith outlined in a story from the Thief River Falls Tribune.

On his trip in this vicinity, Mr. Kelley was joined by local citizens, who showed him farms and places of interest. Mr. Kelley was delighted with what he saw.

Asked by a member of the local delegation what he thought of the country in eastern Pennington and its opportunities for the man of limited means, he said:

> "Eastern Pennington county is a revelation to me... There are here opportunities for the man of small means, but I should say that there can be found nothing better for the man of large means. You have the finest kind of soil conditions, and every modern convenience to make for prosperity and happiness on the farm. Also your lands are extremely low-priced, considering their quality. Eastern Pennington county should be a formidable contender for the new settlers in the campaign now setting in."

Referring to the visit of Mr. Kelley, we quote from The Tribune:

"Geo. W. Kelley, editor of Northwest Farmstead, Minnesota's leading farm paper, is finishing today a two days visit to Pennington county for the purpose of getting a closeup of the conditions here, which will enable him to give first hand information to the thousands of readers of the Farmstead.

Mr. Kelly was induced to make the visit at the solicitation of H. W. Protzeller, president of the New Settlers association, who upon a recent visit to Minneapolis called upon the well known agricultural writer to impress upon him the advantages to be found in Pennington county, and how the New Settlers' association hoped to attract settlers to this section by taking a personal interest in their welfare and protecting them in every instance. The editor was impressed by the earnest manner in which Mr. Protzeller presented the subject, and the result is the present visit.

Mr. Kelly arrived in the city Monday morning and yesterday began a strenuous two days drive which will take him through practically every township of Pennington county, as well as portions of Marshall and Beltrami.

He started out yesterday in company with Mr. Protzeller, Olaf Ramstad, of the Citizens State bank and H. S. Dahlen, of the First and Peoples bank. In the party was also Mr. Hauske, of the Dairy and Food department, as well as an official photographer.

Yesterday the party spent the day in the vicinity of Grygla, Goodridge and made an extended drive through the Erie country, which proved an eye opener to the visitors. Today Mr. Kelly is visiting the famous dairy farms of Pennington county and is being shown several alfalfa fields—in accordance with his expressed wish.

The visit of Mr. Kelly is regarded as almost epochal in the campaign for new settlers. He is one of the best posted men in Minnesota as regards the resources of the state. No man is better equipped to off-hand give accurate information covering the various counties of the state. And yet Mr. Kelly came here under the impression that a large area of Pennington county consists of cut over timber land, covered with stumps and tangled small timber. Yesterday convinced him of his error.

Last evening about thirty business men and farmers tendered a supper to Mr. Kelly at the Evelyn, and when called upon to give his impressions received during the day, Mr. Kelly did not hesitate to express his surprise and pleasure with what he had seen. What attracted his attention more than anything else was the soil conditions.

"You have here," said he, "a fine limestone element in your soil especially suited to the culture of alfalfa, and it is an axiom that good alfalfa land is worth $100 per acre, which means that every acre of uncultivated land in Pennington county is worth that much when the facts become known." By the way, Mr. Kelly's enthusiasm along this line should be increased one hundred fold following his visit today to some of the best alfalfa fields of the county.

"It is the purpose of Mr. Kelly, as we understand it, to devote a goodly portion of an issue of the Farmstead in the near future to the story of his visit to this section. He is impressed with the possibilities to be found here, being convinced by general appearances and the statements of actual farmers who have made a success of farming. Furthermore, he is intensely interested in the work of the New Settlers' association. He believes its efforts to induce settlement on the basis of fair dealing will have far reaching results. And the very fact that a man of Mr. Kelly's standing has been attracted by the movement is the best evidence that it is founded upon the right principles and is sure to impress others as it has him.

Mr. Hauske, of the Dairy and Food department, was among those who spoke at the supper last evening. He was particularly impressed with what he saw around Erie. The beautiful farms with their modern, farm buildings and well cultivated fields he pronounced a sight for sore eyes. He saw on his travels yesterday scenes seldom met with except in much older and better settled communities. What he saw convinced Mr. Hauske that the farmer who diversifies and applies himself to his task in accordance with local conditions cannot fail.

Several local speakers, including Hans Anton and Albert Johnson, both practical farmers, were called upon at the supper last evening and all had the same story to tell. They had found here ideal conditions for diversified farming and the advantages here were manifold as compared with other localities in this and other states.

First Woman Ever Indorsed for State Post by Republicans

Miss Grace F. Kaercher.

Miss Grace F. Kaercher, Ortonville, is the first woman ever indorsed for state office by Minnesota Republicans. She was winner in a field of seven candidates for clerk of the supreme court, before the Republican convention.

She is now secretary treasurer of the Big Stone National Loan association, a member of the Minnesota Realty Dealers association and the Minnesota Editorial association. She has been chairman of the woman's Republican committee of Big Stone county for the last two years, and is a member of the women's auxiliary of the American Legion.

Miss Kaercher has had a wide and varied experience in law, real estate business, newspaper work and banking in the last 15 years, and a businesslike attitude toward all affairs has become habitual to her.

Highway Department Giving Aid to Graveled Roads of State

Minnesota trunk highway pavements, and especially those laid under the present state specifications, came through the winter and spring break-up in excellent condition, and rumors to the contrary which have been spread broadcast over the state are untrue.

Evidence of the fact is given in an editorial in The St. Cloud Journal Press written by Alvah Eastman after a personal inspection of the largest single pavement built last year on the trunk system. Reports here are that patrolmen and other maintenance forces are at work over the trunk highway system to spread restoration of normal conditions after the spring thaws.

The Journal Press said:

"There have been reports that the paving on the Jefferson Highway between Elk River and St. Cloud did not stand up well during the winter, and is filled with cracks and breaks.

"A close inspection of this highway disproves these rumors. As a matter of fact the reinforced concrete came through the winter in almost perfect condition. There is just one small break, near Elk River, where the road bed was washed out, under the paving, but this has been repaired, and it would take the most careful scrutiny to locate it. The shoulders along the paving laid last year in a few places were gullied by the heavy snow, when melting, but there was no damage to the paving, and caretakers have remedied this slight damage.

"Considering the heavy traffic, by trucks, busses and automobiles during most of the winter months, the paving shows most gratifying staying qualities. The first year is the hardest, and in the light of this experience reinforced concrete well made can be pronounced a 100 per cent success."

A bulletin this week by the state highway department states that the trunk highways generally came through in good shape, all conditions considered. Patrolmen are getting them dried and smoothed and the biggest trouble has been on some sections improved during the winter to relieve unemployment.

"The Home Stretch" a Romance of the Turf

Douglas MacLean's Latest Comedy Will Thrill Lovers of "Sport of Kings"

Members of the sporting fraternity who enthuse at the sight of a thoroughbred racehorse and who, in a period now almost gone, have thrilled at the hair-raising finish of a great metropolitan handicap, will revel in the many spectacular racing scenes which feature "The Home Stretch," Douglas MacLean's latest Paramount picture which will be presented at the Lyceum theatre. Wednesday and Thursday.

The tense moments of waiting for the start, and the murmuring shout of "They're off!" the stirring finish and the feverish excitement of the betting ring will reawaken glorious memories of the days when Belmont Park, Latonia, Saratoga Springs, Ascot and Emeryville were the worshipping shrines of the Disciples of Chance.

TIMBER WOLVES DEVOUR MAN

Killed Eleven of the Rodents Before Pack Closes In

The common impression that timber wolves will not attack human beings is not borne out by the following dispatch from Manigotogan, Man., sent out last week by the Associated Press:

"Torn to shreads by timber wolves, the remains of the body of Ben Cochrane, trapper, were found north of Fisher river on Lake Winepeg a few days ago, according to information which has just reached here.

All that remained to tell of this grim northland tragedy were the trapper's bones, pieces of clothing and a rifle with a broken stock, which was scattered over a considerable distance. The bones of 11 huge timber wolves, which were found near the spot where Cochrane had been attacked, bore testimony of the battle for life against overwhelming odds. Seven had been shot and four had been clubbed to death. Only when his rifle stock was smashed did he apparently give up the fight and the pack bore down upon him, tearing his body to shreds."

A great face is like a great home, it always has a hedge around it.

FARM BUREAU NEWS

Grain Grower Leaders Push Economy Program

Chicago.—Vigorous prosecution of their announced policy of economy and efficiency has marked the work of the new administration of the U. S. Grain Growers, elected at the recent annual convention. Rent on the Chicago offices has been reduced two-fifths. Reductions of $1075 per month in the Chicago payroll have been effected. Directors who in the past have been in charge of organization work have been relieved of their duties in that field. Several directors unselfishly are giving their full time to working out details of reorganizing the national headquarters.

Membership of Grain Growers Increasing

Membership in the U. S. Grain Growers, Inc., has been steadily advancing since the annual convention, according to reports from Chicago; the total now being more than 57,000. Nebraska has passed 10,000. More than 8,000 farmers in Indiana have joined. In Minnesota, the membership has passed 2,500.

Shortage of Young Farm Horses Indicated

Surplus of undersized unsalable farm horses, with young horses of good quality in diminishing supply; tractor to supplement rather than supplant horses on the farm.

These are important conclusions drawn from the returns of a state horse survey conducted from University farm by J. F. Kuehn, secretary-treasurer of the Minnesota Horse Breeders association co-operating with the Minnesota Livestock Breeders association in an effort to onecourage breeding.

Nine hundred replies have been received to a questionaire addressed to all county agents in Minnesota, secretaries of county fairs and agricultural societies, graduate veteinarians and leading livestock breeders.

"The reports show," says Mr. Kuehn, "that only one-third as many horses were raised last year as in 1917 that there is a decided shortage of young horses of good quality, and that most farmers now realize that the tractor will supplement rather than displace horses on the farm."

Organized Land Clearing Now on in Six Counties

Organized county-wide work in land clearing is now in progress in six northern counties, say land clearing section men of the University of Minnesota. Business men and farmers of Aitkin county joined forces on April 4 in organizing the Aitkin County Land Clearing association. Other counties which have such associations are St. Louis, Beltrami, Itasca, Cass and Crow Wing. Each county association will co-operate closely with the county farm bureau and various organizations of town business men. One of the first acts of the new Aitkin county association was the making of a financial arrangement whereby credit for purchasing dynamite can be readily obtained.

Sawtooth Beetle at Work in Seed Corn

Entomologists of the University of Minnesota are advised that the sawtooth beetle, otherwise known as the barn bug which caused much loss to owners of stored wheat and other small grain in southwestern Minnesota last fall, is working in corn which has been stored for feeding and planting.

Samples received by Dr. R. N. Chapman, specialist on stored food and grain insects, show that the beetle eats the embryo or germ of the corn kernel. Corn so attacked is valueless for planting. "The only safe way is to test all seed corn before planting," says Dr. Chapman. "Any of the common methods of testing will aid materially in getting a good stand. To plant without testing is to invite crop failure."

12 Culling Schools to Be Held for Agents

Every county agent in Minnesota is expected to attend one of the poultry culling schools which will be held in June under the direction of N. E. Chapman, poultry specialist with the university agricultural extension division. Some work on egg marketing is also to be given. The time and place for these schools have been appointed as follows:

Rochester, June 12; Mankato, June 13; Fairmont, June 14; Pipestone, June 16; Willmar, June 19; Thief River Falls, June 20; Glenwood, June 22; Moorhead, June 23; Brainerd, June 26; Virginia, June 27; North Branch, June 29; and Farmington, June 30.

It should be understood that poultry breeders everywhere will be made welcome at these demonstration schools.

Minnesota Immune From Pale Western Cutworm

The pale western cutworm cannot thrive where the rainfall is more than 15 inches annually. Minnesota therefore appears to be immune from invasion.

There are the conclusions of Dr. W. C. Cook, who resigned some time ago from the Minnesota experiment station staff to accept appointment as cutworm specialist in the division of entomology of the Montana college of agriculture. Dr. Cook has devoted a year, in Montana fields and at the Montana station, to the study of this pest.

The pale western is the most vicious of all cutworms. It works almost entirely underground. In semi-arid districts of Montana and Alberta it has caused tremendous damage to small grain crops and to other vegetation. Western North and South Dakota and some parts of Saskatchewan have also been invaded to some extent.

Silver-Lead Ledge Found on Farm in Todd County

Considerable excitement was caused in Sauk Centre Friday of last week when news was received that the Minnesota Gas and Mineral Co., had been successful in its quest for a silver-lead ledge on the Drevlow farm in Todd county, north of the village of Round Prairie.

The land is located on a high chain of hills constituting a range running southwest from the Cuyanna Range. These hills received much attention from Bob Malloy, Montant geologist last fall. An examination of the logs of a deep well drilled on the Drevlow farm several years ago, revealed a hard grey metalliferous appearing substance.

The character and nature of the county, its proximity to the Iron Range, together with the unique lay of the hills were such as to lend plausibility to the belief, that the substance found at that time was galena, silver-lead ore, and Mr. Malloy recommended that a test hole be sunk at this point.

A great deal of interest was centered in the project by many, but Malloy never seemed to doubt that the hills contained metal and the hunt for silver-lead was begun.

Contest by Farm Magazine Proves Farming Is Attractive to Women

Do farm mothers believe in farming?

Have they enough faith in farming to want their daughters to marry farmers?

They have, according to the results of a nationwide contest just concluded. A farm magazine, the Farmer's Wife, conducted the contest. More than 7,000 farm women wrote letters answering the question, "Do You Want Your Daughter to Marry a Farmer?" Ninety-four per cent of them answered "Yes!" Two of the 68 prize-winning letters were written by Minnesota women. One of them follows. Other prize winning letters will be published later. This is what Mrs. Stuart Oliver wrote from her farm home near Onamia:

"I'm going to stop a bit, dear farm women, in the midst of my work, for wee daughter is having her nap and it's a good opportunity to tell you why I wish the best of all good things for our pride and hope and joy.

"It is because I have known the happiness which coes of service, that I want my daughter to know it, too. Is there any greater joy, I wonder, than that of a hard task well done? When I have hurried with my work that I might do something extra outside, worked until I felt old and cross and tired, and the best man in all the world has said, 'I certainly couldn't farm wouthout you,' oh, how I've thrilled. It becomes a ilttle song in my heart and lightens my work for days. And even if he weren't the best man, I think I could be quite happy with the thought: 'I've earned my way today; I'm helping with the most essential job on earth; I'm working for a better future.'

"Then there's the beauty of family life on the farm. Instead of seeing my son rushing off with the fellows, my daughter going out for a good time that I'll know nothing about, and the younger children coaxing to go to the movies, we'll be spending our evening together with our music, books or mutual friends, or going to some amusement together.

"And last but not least, of the good things I desire for this daughter-o'-mine, are peace, a love of nature, and time for quiet, happy thoughts. Can they be gotten by any other class of working people as easily as by the woman on the farm? She doesn't rush to finish her work that she may spend a day bargain-hunting—a day of hurry, worry and 'me-first' thots; of spending money she shouldn't spend and gazing at things she wants and can't have. No; she may sit on the front porch a bit while she sews or mends or reads. She will see and feel and hear the beauty of the world—her world—and with an unruffled spirit she will go in and get supper for her hungry brood.

"And so, folks, I want my daughter to marry a farmer, a good man, upright, steadfast and true, with visions of the farm-life-to-be in his heart. Then, hand in hand, they can work to make their dreams come true, and hse will know the happiness I have known. I could not ask for more."

Farmers' Own Firm Will Market Eggs

Statewide Creameries Ass'n. Calls Conference on Cheaper Distribution, Better Price

The thousands of Minnesota farm women who raise chickens will be especially interested in a co-operative marketing conference taking place in St. Paul on April 28 and 29.

This conference will make plans for the co-operative marketing of eggs through the Minnesota Co-operative Creameries association, Inc. The directors of the creamery association and the nine expert field men employed in its various marketing districts, will take part in the meeting, which will be held in the old capitol

Plans will be outlined by a special committee on co-operative egg marketing, made up of Wiliam Harpel of Glencoe, John Brandt of Litchfield, Henry Arens of Jordan and C. L. McNelly of Dodge Center. N. E. Chapman, poultry specialist of the University extension service, will lead discussions.

Large consignments of eggs already are being marketed through the statewide creameries association; they are included in carload lots of butter, and shipped through to the eastern markets at carlot rates with a considerable saving. The creameries association will have the co-operation and backing of the Minnesota Farm Bureau federation and the county Farm Bureaus in egg marketing.

Oh, dear. A New York man was badly hurt in a fight over one of the new peace dollars.

Those Idaho bank robbers who got only eleven cents found that the safe wasn't what it was cracked up to be.

Private Creamery Quits Field at Sauk Centre

The private creamery concern which has been in operation at Sauk Centre for the past 15 years or more, closed its doors last Saturday. During its existence it has changed hands a number of times. Since January of last year it has been owned and operated by Kristensen Bros.

Several years ago the creamery had a fair patronage making it a profitable business. However in later years, the farmers of this community have found it more profitable to patronize their co-operative creamery, the Farmers Co-operative Creamery having over 250 patrons at present, and outlook is that butter manufactured this year will be twice the amount of 1920, or close to 500,000 pounds of butter.

"School" Called to Study Egg Marketing

A dairy products marketing school will be held at the old state capitol, St. Paul, April 28 and 29. All important phases of the business of marketing eggs and poultry products through co-operative creameries will be considered the first day. Standardization of butter will be the keynote for the second day. Co-operative shipping of eggs to eastern markets has been gaining steadily until, says N. E. Chapman, poultry specialist, Minnesota ranks fifth among the states in the quantity of eggs shipped to distant eastern markets. He does not concede that any state leads Minnesota in quality of eggs shipped.

Farm Bureau Asks Wool Freight Cut

State Federation Charges Injustice to Minnesota Farmers In Rate Classification

The Minnesota Farm Bureau federation has protested against what it declares is an unjust freight classification, injurious to Minnesota farmers. It has requested a hearing before the railroads' western classification committee, to apply for a rate reduction.

The Minnesota federation also has urged the Farm Bureau of the Dakotas, Iowa, Wisconsin, Missouri and Nebraska to join in the effort to cut rates on wool.

West of Chicago, the minimum charge for shipping wool is the rate on 24,000 pounds in a 60 ton capacity car. It is impossible the Farm Bureau maintains, to load more than 18,000 pounds of wool into such a car, so that farmers are forced to pay freight on 6,000 pounds of wool that does not exist. East of Chicago, it is understood, the minimum rate is based on 16,000 pounds. The Farm Bureau asks that this 16,000 pound minimum be applied in Minnesota, to save money for the farmers.

MINNESOTA'S CHAMPION COW

The world's record in the 305-day division for junior two-year-old heifers has just been broken by the Holstein heifer, Mankato Floa Ormsby Mercedes. She has a lead of 120 pounds of butter over the former world's record having produced 890 pounds of butter and 18,810.01 pounds of milk in 305 days, which displaces Pabst Virginia Johanna, who formerly held the world's record with 770.5 pounds of butter. She is bred to qualify in this division, which requires her to freshen within 14 months from her last calving date.

She is a daughter of Sir Pieterje Ormsby Mercedes XIV., was bred, owned and developed at the Mankato Holstein farms by Marlow & Randall at Mankato. Mankato Floa Ormsby Mercedes freshened May 11, 1921, at two years, four months and 21 days.

Ask any man who served overseas, and he will tell you they didn't hang nearly enough men over there.

Selling liquor is against the federal constitution, says George R. Koester, and drinking it is against your own.

Farmer Receives Benefit of Trade War in Tractors

The American farmer is getting his tractor at somewhere near $200 below cost as the result of the war between Henry Ford and the International Harvester company, men in touch with with the industry said today.

Despite these losses the two companies are contesting bitterly for business.

Meanwhile four or five strong companies and other weaker ones are anxiously watching the fight of the two giants of the industry.

It was formerly estimated that a farmer could operate a tractor economically if he had a 120 acre farm. Now a farmer with 80 acres can operate a tractor profitably.

The Fordson tractor combination produces 530 machines daily and is now actually producing about 800 daily. The two companies together are producing at the rate of 120,000 tractors a year and the highest yearly sales have been 100,000.

However, the Ford cut which started the tractor war has revived the business and created new demands.

To Erect Home for Aged Indians at Cass Lake

General Creel, representing commissioner of Indian affairs, Burke, of Washington, D. C., was here the first of the week looking over sites for the home for the aged Chippewas of Minnesota. General Creel in speaking to Representatives of The Times Tuesday stated that the old Indian school site on Allen's Bay had been picked for the home of the Chippewa aged. The general in continuing remarked that the place was ideal, that the tribesmen would be close enough to the town to procure anything needed, that it was in the heart of an Indian settlement, close to the river and lake and woods, where fishing could be done and bark products of the Indian craftsmen could be procured. With the capitol of the Chippewa nation at Cass Lake, the location of the home for the aged Chippewas is well located. The Indian department is interested in the welfare of the Indian and the locations have been picked with the idea of best service for the tribesmen.—Cas Lake Times.

Bouquets, in Form of Bricks Hurled in Cass Lake Office

Two bricks were hurled through the windows of The Times Sunday morning between midnight and morning. One brick was tossed through the front window and the other through the window of the press room. The object of the attack is a mystery unless it was to show the publisher that the thrower wasn't afraid of him in the dark. The police have no clue as yet.—Cass Lake Times.

Some of the men who used to try to drown their sorrows are now letting them die of thirst.

State Politics

—By—
"The County Chairman'

Next week Judge Tillman Davis of the United States District Court will hear arguments in the matter of the petition of a number of northern Minnesota mining companies for a permanent injunction restraining the state from making collections under the new occupation or iron ore tonnage tax law passed by the last legislature. The hearing was to have taken place April 10, but was postponed to April 24. A temporary injunction has already been granted. About all who seem interested outside of the Iron country where the tonnage tax question is a vital one are the state's legal representatives and a few tonnage tax bugs. Although involving millions of dollars and effecting a leading industry, not to mention one of the most prosperous sections of the state, no one apparently is on the tip toe of expectancy regarding the outcome. The state's legal department is approaching the ordeal calmly and without any outward appearances of fear, though some hazzard the opinion that the department is notoverly in love with the task assigned it. Not since the Great Northern-Norther Pacific-Burlington merger suit of a decade ago in which the state was the aggressor has Minnesota figured in a more important piece of litigation than that involved in the federal court hearing set for the 24th. Politics mainly and the activities of a competiting railroad indirectly were the basis of the merger suit, but in the case of the validity of the tonnage tax act a real taxing problem is on trial with the industries peculiar to the north conutry very much up in the air pending its settlement. It is a taxing proposition in its entirety and the findings should set at rest a controversy of nearly thirty years standing, but they likely will not. The supreme court will be the tribunal of last resort. However, the state will not lose anything in the meantime. The mining companies are still meeting their tax obligations as of old.

* * *

To many members of the legislature and others concerned in a political way the transfer of the tonnage tax controversy or as it is now known, a tax on the occupation of mining iron ore, to the Federal courts is of considerable relief. As stated, for better than a decade the tonnage tax question has been a bi-annual legislative infliction and for the past six sessions has so cluttered the legislative files and debates that other needed legislation has suffered in consequence. The unfortunate feature of the whole thing is that Minnesota's immense iron deposits are located in one end of the state and the supposed affluence of those engaged in the development of mining, not to mention the glaring extravagence of some of the northern Minnesota towns has not been lost on those politically ambitious and living elsewhere and they have been slow to make the most of it. There has been too much politics and too little sane consideration of the subject. Answering that propaganda has worked up into a supposed popular demand the Republican party in convention assembled two years ago went on record for a tonnage tax and it was made a part of the party platform. An occupation tax of doubtful value followed and Governor Preus, hoping that it would end the controversy for all time, affixed his signature and the bill became a law. In order to cinch its infliction and make the way clear for the next legislature should the act fail in the courts a constitutioual amendment permitting a tax on the occupation of iron ore was enacted and this amendment the voters will pass upon next fall. Showing the persistency of the few eager to continue the controversy the last Republican state convention was all but invaded by several anxious to have the convention endorse the constitutional amendment mentioned, but they failed to get by. The proposition is now before the courts and it is roped that it will end there. The mining companies rely mainly on the interference of the law with inter state commerce and expect to make their point stick. On the other hand the state legal department contends that the law is a proper excise of the state's taxing powers and likewise expects to win.

* * *

Just thirteen years ago this month, or to be exact, April 30, 1909, Governor John A. Johnson of revered memory gave his official veto to the first real tonnage tax bill ever passed by a Minnesota legislature. True the industry in its infancy operated under a law by wihch the state exacted one cent for every ton of ore mined, but it was in lieu of all other taxes and assessments and did not long survive. It was held to be unconstitutional and was repealed and the present ad valorem basis of taxation substituted. Iron ore pays on a basis of fifty per cent of its true and full value while other classes of property are as low as twenty-five per cent. The new infliction now before the courts is additional. Reading Governor Johnson's veto message one is considerably impressed by its prophetic features. "A more or less uncertain and illy digested experiment;" "not fully understood even by its advocated;" "engenders sectionalism;" "intensly feared by the section of the state to which it specifically applis;" "violates the fundamental principle of taxation, that of equality;" "strikes a severe blow at the development and prosperity of the section effected;" "plunges the whole subject into a sea of political and sectional feeling;" "no urgent and vital need for it" and so on runs the message. Governor Johnson's contention was that the subject was one for mature and lengthy investigation and consideration by the state tax commission and that the additional revenue desired could be secured through other and tried taxation methods. The next veto of a tonnage tax act was by Governor J. A. Burnquist at the special legislative session of 1919. It was a net profits affair and his point that it was double taxation and therefore unconstitutional. As history runs every session of the legislature since 1907 has had its tonnage tax bill. The present law is an occupation tax pure and simple and is so held by the state legal department. Some contend that if the law sticks that it will ultimately mean the extension of the occupational tax idea to other lines of industrial and professional endeavor. However, the present law is specific in the matter of mining alone and so is the contemplated constitutional amendment. At any rate it lays the foundation; there can be no doubt about that.

* * *

Because of withdrawals the leaders of the Farmer-Labor party plan to meet this week and make a number of changes in the ticket named at the recent Nonpartisan League convention. George Segal who was indorsed by the league for a place on the supreme court may be named as a candidate for attorney general instead. It is proposed to name W. A. Anderson of Minneapolis for the supreme court.

* * *

Any one figuring on a lengthy pre-primary campaign as far as the state Republican forces are concerned is due to be disappointed. Governor Preus is reported to be strong for a short and snappy campaign appeal. He expects a vigorous fall campaign.

* * *

May 10 is the last day for filling for a state office. The primary election will be June 17.

* * *

Walther Anderson of Roseau county has filed for the Democratic nomination for governor. He has always been listed as an active Republican.

Mr. De Valera is through, whether he knows it or not.

Attempt to Correct Wheat Grades Imposed By Government a Failure

"The grain farmers of the northwest have lost another round in their fight 'for just and reasonable grain grades,'" says Chairman O. P. B. Jacobson, of the Minnesota Railroad and Warehouse commission, in discussing the modifications in the federal garin standards announced by Henry C. Wallace, Secretary of Agriculture. The changes will afford no substantial relief. The farmers' requests have been virtually ignored and no real benefit has been conferred. This will be a keen disappointment in view of the fact that the farmers of the northwest were assured by President Harding in his address at the Minnesota state fair in 1920 that he would do all in his power to assist the grain producers. In the matter of spring wheat grades Secretary Wallace appears to have been governed mainly by the wishes of the millers and European buyers, rather than by the requests of the farmers. Secretary Wallace has stated publicly that only a few farmers' organizations and state officials in the northwest have asked for any changes and that the millers and buyers are satisfied with the present federal standards.

It is useless to go into any details at this time because the battle has been lost for the time being. The farmers, however, will now prepare for another campaign, which probably will center about the efforts to pass the Steenerson bill in congress. Throuh this measure, if it becomes a tain justice in the grain inspection.

The members of the Minnesota legislature and the state press generally have been very loyal to the farmers and have supported their efforts to obtain modifications of the present arbitrary and technical federal rules. The city members have supported all measures of this kind in a wholehearted manner, for they have realized that the terminal markets, like Duluth and Minneapolis, are largely dependent upon the prosperity and success of the farmers of the northwest, which, of course, includes not only Minnesota, but North and South Dakota and eastern Montana.

State officials who have taken a hand in this fight have been criticised by the millers and their friends as "playing cheap politics," but the critics have kept silent over the political activities of the millers' lobby in Washington, which has had such eminent success. We will play some more.

The fight will continue and I hope to be able to take an active hand therein until some substantial concession has been obtained, the farmers have won their rights and the tremendous losses sustained annually by the grain growers of the northwest through unfair grain rules, have been checked.

University Farm Pig Wins Grand Championship

A Duroc Jersey pig, bred and raised at University farm, St. Paul, was grand champion barrow at the southwestern exposition and fat stock show at Forth Worth, Texas, March 5 to 12, according to E. F. Ferrin, professor of animal husbandry at the University of Minnesota. Sold to the Oklahoma Agricultural and Mechanical college at the international livestock show last winter at the weight of 350 pounds, the pig weighed 540 pounds at the Texas show when it was sold to a packing plant for 18 cents a pound. The barrow was born April 1, 1920.

Judge Dismisses Charge Against Former Mayor

The trial of George Matakovich, formerly president of the yillage council of Keewatin, Minn., was halted abruptly last Monday when, on motion of defendant's attorneys, the indictment was dismissed by Judge W. S. McClenahan.

The indictment was so drawn that it was required, on the part of the state, to show that Matakovich had presented his bill of fraudulent items to the village council, and that this bill had been paid. The village records, kept at that time by Byron T. Jones, then village clerk, were not complete. They showed that a motion had been made to pass the bill, but did not show whether or not the bill was ever paid, or that the motion had carried.

This technicality was seized upon by the defendant's attorneys, and R. A. McQuat, who was assisting Austin & Austin in the defense, argued for dismissal of the indictment. After much deliberation, the judge agreed that the issue could not be tried under that indictment, owing to the condition of the village books, and dismissed it. This does not end the action against Matakovich, however, and it is understood that further developments may be expected.

RULES OF WAR

We have been wondering how many people have taken seriously the discussions at the arms conference at Washington over the proposed rules for the conduct of future wars.

General Sherman said that "War is hell," and he was right. All rules are discarded when two nations go to war, and nobody expects anything else.

A nation goes to war to win. The army leaders who do not do their best to win are traitors. And a general is not going to let any rule stand in his way of winning a victory.

The attempt to frame rules for the conduct of future wars is all poppycock, designed to deceive the people and the delegates to the arms conference understood this quite well.

What we want to know is, whether the people understand it as they should.

Big Profits for Potato Growers

You can still make big profits from your potatoes even with lower prices per bushel—not only on account of cheaper seed but by cutting down labor expenses, saving time, and planting just as accurately as by hand. This can easily be done by using a

HOOVER
VISIBLE POTATO PLANTER

After you have adjusted the Hoover for the depth and spacing desired, the picking and dropping mechanism plants the desired number of seeds in each hill and spaces the hills properly without any effort on your part. The dropping mechanism is in full view—any failure to drop properly can be instantly detected and quickly remedied.

If you wish to plant two rows at a time, we can furnish the Hoover Visible Two-Row Planter for that purpose.

Either one of these planters can be equipped with the fertilizer attachment, which can be put in place without any rebuilding or changes on the frame of the planter. When so equipped, these planters will put fertilizer either above or below the seed, whichever is desired. From 200 to 3400 pounds per acre can be handled.

There are many other good features on this planter that we would like to show you, such as the channel steel frame —unusually durablo; spring-pressure furrow openers and adjustable disc coverers regulated by one lever; and coulter attachment, when desired, to cut trash.

Be sure to see us the next time you come to town. Call early so that this season's potato crop may get the advantage of our machines.

And remember, we can also furnish potato cutters and diggers.

SCHOOL EXHIBIT ATTRACTIVE SHOW

Many Review Handiwork of Local Grade and High School Pupils.

The girls' sewing class of the Goodridge Consolidated schools have on display at the Goodridge Mercantile company a number of exhibits, representative of the domestic arts classes of the local schools, and the public is invited to inspect them.

The work this year is in charge of Miss Teresa Giefer and practically all articles of wearing apparel and art needle work is included in the display. Great credit is due the instructor for the quality and excellence of the work as perhaps no school in northern Minnesota outside of the larger centers can boast of a higher grade of workmanship.

The patchwork on display is the work of the girls of the lower grades and the garments of the first and second year students of the high school. Each pupil has been assigned a particular duty and produced the finished product. Following are a list of the garments and the pupils who have made them:

Petticoat, nightgown and combination suit, Florence Johnson; dress and petticoat, Vivian Thoreson; dress, petticoat and combination suit, Luella Urdahl; dress, petticoat and combination suit, Gertrude Anderson; dress, petticoat and combination suit, Emma Gilbertson; dress, petticoat and combination suit, Kathleen Lang; nightgown, Frances Hincik; nightgown, Angeline Swobodny; nightgown, Cora McEnelly; dress, Edith Schie; nightgown, Alice Coan; dress and petticoat, Myrtle Iverson; dress and nightgown, Inga Nelson; dress and nightgown, Esther Ranken; towel, scarf, nightgown and patchwork, Clarice Anderson; patchwork, Edith Gunderson; patchwork, Jessie Leslin; patchwork, Agnes Johnson; patchwork, Eunice Thoreson; night gown and petticoat, Ethel Vaughan; nightgown, combination suit and patchwork, Hattie Bundhund; nightgown, Josie Hagen.

Ole Helle returned to Thief River Falls Monday evening to take up his school studies after a week's vacation.

"Devoted to the Agricultural Interests of the Finest Dairy Section of Minnesota."

VOLUME XVI. NO. 12. MAY 5, 1922. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA $1.50 PER YEAR.

MINNESOTA HISTORICAL SOCIETY

CARLOS AVERY, GAME AND FISH COMMISSIONER, VISITS

Is Guest of H. W. Protzeller, Manager of Electric Line, and Shows Great Interest in Activity and Industry of Eastern Pennington County.

Carlos Avery, state game and fish commissioner visited Goodridge last Thursday afternoon, a guest of H. W. Protzeller, manager of the electric line, and was greatly pleased with what he saw en route here from Thief River Falls and Goodridge in general.

Mr. Avery, who makes the rounds of the state each year in the interests of game and fish preservation, has great confidence in the agricultural and dairying possibilities of northern Minnesota. He believes that the time is not far distant when this section of the state will surely find its niche and when prosperity will be here to stay.

"There is no reason why Pennington county will not eventually show the same measure of prosperity that southern Minnesota has enjoyed. It must be remembered that every section of the United States is at this time going through the reconstruction period, and nothern Minnesota is no exception to the rule. All you folks need up here is one good crop and the welfare of your country is assured.

"I notice that farmers around here are as well advanced with their spring work as they are in the southern part of the state. You have been blessed with a goodly amount of moisture and in my journeys throughout the state, I have never had the satisfaction of seeing rye fields that look any better than in this section."

On his journey over from Thief River Falls, Mr. Avery had the pleasure of seeing a number of grouse and prairie chickens flying away from the tracks as the electric car passed. He is an authority on all kinds of bird life and could tell at a glance the character of every kind of bird. Mr. Avery was pleased with the amount of game he saw and said that he could not see any material decrease in the number of game birds, as is reported in certain circles.

Mr. Avery is intensely interested in the proposition of purchasing the Thief and Mud lake bottoms from the present owners and re-establishing them as a breeding ground for wild water fowl. Upon his return to Thief River Falls from Goodridge in the evening, he spoke before the Sportsmen's club at the Evelyn hotel. In part we quote from The Tribune:

"The commissioner stated in his talk that a bill pending in Congress at the present time provides for the issuance of federal game licenses at $1 each. If the bill becomes a law approximately two million dollars will be realized from the sale of licenses, which cover only the shooting of migratory fowl. The bill provides for the use of 60 per cent of such funds for the preservation and porpagation of game and game birds, and 40 per cent of the money may be used in the purchase of breeding grounds for migratory fowl and game reserves.

"According to Mr. Avery, the bill has the backing of every Sportsman's club in the nation and has a fair chance of passage. In the event of its passage, an effort will be made to interest the commission empowered to act for the nation in the purchase of the Mud lake and Thief lake bottoms, these two lake beds being considered among hunters everywhere as the most desirable breeding grounds to be found in the United States. Mr. Avery has given the matter careful attention and has been instrumental in giving the matter widespread publicity.

"A supper was tendered Mr. Avery at the Evelyn by members of the local branch of the state league. Following the supper Mr. H. W. Protzeller, president of the league, called the meeting to order, and called upon Lester Lawrence, secretary, who explained in detail what had ben accomplished and put under way by the league. He was followed by Mr. Avery who very entertainingly quoted from the statistics of his department showing the value of the state's game and fish resources. He stated that game and fish worth $11,000,000 were annually taken from the lakes and woods of northern Minnesota, and he pleaded for a healthy public sentiment in support of the protection and propagation of game and fish."

Dance Well Attended

The dance held here Friday evening was fairly well attended, more than two dozen couples tripping the fantastic until after midnight. A three-piece orchestra furnished music for the occasion.

OKLEE TASTES OF DEFEAT FROM LOCALS

Large Crowd Saturday Witnesses High Team Defeat Visitors 31 to 4

The baseball game between the Oklee high school team and the local high team played on the Goodridge diamond Saturday afternoon, ended in a colossal defeat for the visitors when they went down to utter defeat before the onslaughts of local sluggers by a score of 31 to 4.

The Goodridge tribe lost no time in getting into action. The very first inning saw them trotting scores across the plate and they kept it up throughout the entire contest, and from the outset the mastery of the situation was never in doubt.

The visitors opened with a badly crippled team, several of their mainstays being declared by H. E. Race, principal of the Oklee high school and in charge of maneuvering for the visitors, as being ineligible because of failure to attend school, hence he disqualified them. Race sent in raw material to fill the gapping holes in his lineup and finished the game thusly. The youngsters gave what they had, which was all to little in the face of the terrific offense put up by the local men.

Perhaps one of the contributing causes of the large score run up by the locals may be attributed to the intense desire of Oklee's pitcher, Theodore Torgorson, to rattle his pitched balls across the plate after trip hammer fashion. He worked so fast that he had the men behind him flustered and highly bewildered, which had the effect of placing the Oklee boys on such a keen edge that they were unable to get their feet under them to combat the wicked swats of local sluggers. Race cautioned his pitcher several times, but he seemed determined to go on, with the resultant bad effect of having, himself and his men trimmed up so unmercifully. Payne had his little catcher, Orin Mellby, fairly groggy from overwork and many passed balls resulted with telling effect on the final outcome.

Daniel Payne pitched a splendid game for the home team and was master of the situation from the outset. He gave his men pelnty of time to breathe and he went through the nine innings like a "King" Cole. He had excellent support at the receiving end with Gust Thompson, whose pegging to the bases was one of the features of the game, and few of the visitors were accredited with a "steal".

Goodridge basemen and fielders gobbled up every thing that came their way and few errors were made, while on the other hand, the visitors made some glaring ones that bordered almost on solid bone. Their fielding was ragged and their throwing to bases invariably amounted to an overthrow and runs scored against them.

After the close of the game, the visitors were banqueted at the domestic science room of the local high school. Several of the high school girls prepared the eats and served the athletes in grand style.

A loyal crowd of spectators were out to see the contest and the home team was lustily cheered until the time arrived when the locals had victory safely tucked away, when the student body apparently held themselves in reserve content to allow the "windmill" win the game.

Following is the lineup of the two teams:

Goodridge—Roy Olson, 2b; Gust Thompson, catcher; Joseph Christianson, ss; Bennie Mandt, cf; Stuart Ferdinandsen, 3b; Alvin Halvorson, 1b; Ludolph Urdahl, lf; Daniel Payne, pitcher; Herbert Nelson, rf.

Oklee—Orin Mellby, catcher; William Torgerson, ss; Carl Serhol, 1b; Theodore Torgerson, pitcher; Leonard Deymonaz, 3b; Ben Sordahl, cf; Leonal Hovland, 2b; Oscar Rolland, lf; Orlo Soland, rf. Raymond Lindquist substituted for Soland at rf, and Hince for Deymonaz at 3b.

Honest Newspaper Building

"MAKE THE BANNER YOUR NEWSPAPER"

Without the expensive undertaking of putting on a prize campaign for new subscribers—unsatisfactory from various standpoints—The Banner is, by sincere effort and by producing a good newspaper, attempting to secure several hundred new subscribers for this periodical. At the present time we are sending out a number of sample copies to residents who The Banner hopes to secure as steady readers; $1.50 will turn the trick for you for a year and materially assist us in producing the kind of newspaper you want, the kind Goodridge deserves and the kind the town and community will get. Perhaps you are one of the many who has received the last two copies of The Banner, and if you are, we want to get your opinion. Tell us how we may improve it to the mutual benefit of eastern Pennington county. Show us the way—we'll follow. And if you want The Banner to come to you regularly, drop us a card and tell The Banner man about it. And remember, if you have a good idea, spring it! Spring it through the columns of The Banner and enlighten the rest of us. Write it up on one side of the paper and sign your name, send it in to The Banner and we'll do the rest.

HELP PUT THE BANNER OVER!

CATTLE BREEDERS BUY BLOODED BULL

Guernsey Animal is Purchased By C. A. Leedberg and John Ellingson

C. A. Leedberg and John Ellingson this week closed a deal whereby they become the owner of a registered Guernsey bull, which already has arrived in Goodridge.

It is thought that the two mentioned dairymen are among the first to place blooded foundation stock at the head of their herds this spring and their new acquisition has created a great deal of favorable comment on every hand. The two men already have a considerable number of well-bred dairy cattle but in an endeavor to enhance the value of them they are sparing no expense in bringing it about.

It is expected that as soon as farmers hereabouts are through with their spring work that they will avail themselves of the opportunity recently offered by the Holstein Breeders' association of Pennington county which provides that farmers desirous of improving their herds may do so by trading in their scrub stock on a blooded sire, with various banks of the county handling the balance of the deal. It is known that there are many of these blooded animals scattered throughout the county and the desire of their owners to place them among dairymen worrying along without a sire is considered a most progressive move.

The breeders have also signified their intention of forming breeders' associations in the various localities wishing such an organization and this may be accomplished by getting in touch with the secretary of the Pennington County Breeders' association.

GUN ACCIDENT VICTIM SHOWING IMPROVEMENT

Oscar Bjerken, 18 years old, son of Mrs. Bjerken, living on a farm ten miles north of Goodridge, who a little more than a week ago met with a serious accident when out shooting crows, by having an old shotgun he was using, explode and the firing pin crashing into the socket of his eye, is showing steady improvement at a Thief River Falls hospital.

While the injury is an extremely painful one and will cause the loss of sight in the injured member, the young man has been pronounced by hospital attendants as out of danger. As a result of the accident the young man was rendered unconscious for several hours and for a time his life was despaired of.

SEEDING IS WELL UNDER WAY; FARMERS ARE BUSY

Seeding in the Goodridge section of Pennington county is well under way and is not going to be completed too late, according to men who are conversant with agricultural conditions hereabouts. The generous amount of moisture this spring has given the seed a good start, and it is not thought the season will prove late.

Rye fields are looking particularly well. The planting of potatoes is under way and many farmers are putting in from several up to 30 acres of these. It is reported that some Thief River Falls men are contemplating the planting of 80 acres of potatoes in one patch.

Pretty soon we'll have to speak in one language and think in another.

CREAMERY DIRECTORS MEET SATURDAY EVE

Pass on Bills and Other Business Matters Brot Before Them

The Goodridge Co-operative Creamery association directors held a meeting Saturday evening in the offices of the creamery and various routine matters disposed of, such as the passing of bills, accounts, etc.

The directors, consisting of Stuart McLeod, L. S. Poppenhagen, Morgan Vaughan, Albert Arntz and Andrew Feragen, are anticipating a prosperous year for the local association, and there are a number of things pointing to it, chief of which is the ideal market the local creamery affords marketers of dairy products.

Last year more than 90,000 pounds of butterfat was handled by the association, however this year with added equipment and a number of other up-to-date facilities, it is believed the record for last year will be doubled and perhaps trebled.

The local creamery started on a full-time basis, this week, according to Peter Englestad of the Thief River Falls creamery, and the new buttermaker, Mr. Gangness has arrived from Thief River Falls and taken up his residency over the Wold building, and will devote his entire time to his new duties.

KATHLEEN LANG IS NAMED VALEDICTORIAN OF CLASS

Miss Kathleen Lang, with a percentage of 91.6 in her studies at the Goodridge high school, was this week honored by the school faculty by being named the valedictorian of the class. Christina Bundhund, with a percentage of 87.6, is salutatorian. Both of the young ladies have gone through the entire four years of high school in Goodridge and have the added distinction of being members of the first class graduated.

Roy Olson is graded with a percentage of 87.2 and Daniel Payne has 84.2. Joseph Christianson has a percentage of 84.

Esther Ronken wins high honors in the eighth grade with a percentage of 91.1 and at the graduation exercises to be held at the close of the school year will deliver a valedictory address.

As announced in last week's issue of The Banner, John H. Hay, former superintendent of schools at Thief River Falls, will come to Goodridge to deliver the main address at the exercises to be held in June.

HIGH SCHOOL STUDENT DIES OF BLOOD POISONING TODAY

Miss Ella Johnson, daughter of John Johnson Jr., of Radium died at a Thief River Falls hospital yesterday of blood poisoning. About three weeks ago a small sore was caused by the rubbing of one of her shoes and this developed a case of blood poisoning. Miss Johnson was operated on Tuesday in an effort to stay the infection, but death intervened. At the time of going to press, The Banner is unable to learn of the funeral arrangements other than that it will be held in Thief River Falls tomorrow or Saturday.

But, no doubt, there are chaperones who listen in all tongues.

When a fellow calls you names, remember that only yourself can make them true.

LOCAL MEN AGITATE ROAD IN MARSHALL

Goodridge Roads Committee Continue Efforts for North-South Highway

While the much-desired highway running north and south through Marshall county, which would connect the Jefferson highway at Oklee with the state road at Roseau, is still in the embryo state, the Goodridge committee which last week waited upon the Marshall county board in the matter of securing their early approval of the uncompelted highway, is still active and hopes within the near future to again meet with the Marshall county body.

The committee consisting of A. C. Tvedt, Nick Bundlund, J. P. Jensen, E. S. Gaudland and Carl Christianson are bending every effort in bringing about the necessary outlet for eastern Pennington county, a need so paramount to good roads and good roads building generally that it is not believed that the commissioners of our neighbor to the north can long overlook. The contingency of withholding their approval for the project to get under way.

Around Goodridge and in all other sections of Minnesota, highway improvements are being started under the second year program of the Babcock plan on truck routes and by county and town officials on the so-called local roads.

Charles M. Babcock, state highway commissioner, has placed under contract for construction this season 626 miles of gravel-surfacing, 123 miles of paving and 336 miles of permanent grading on the trunk system, including county reimbursement projects carrying state department approval, also many new bridges, miles of guard-rails, tiling and minor improvements. This work, engineers estimate, will employ about 5,000 men through the construction season.

Local highway authorities over the state, having available double the amount of money that is provided for state operations, will carry on work taking approximately 10,000 additional men, it is estimated. So that approximately 15,000 men, hundreds of teams, scores of construction outfits made up of big steam shovels and other machinery, will be engaged this year in the big undertaking to pull Minnesota out of the mud.

The first week in May has been looked forward to by road contractors in which to start construction operations, following weeks of preparation made possible by early lettings of contracts. Many road-building outfits are on the move and payrolls are longer. Forced by sharp competition to bid low for work, the contractors are planning to push work to early completion to avoid possible losses, according to reports to the highway department.

Patrolmen and other maintenance forces have been out on the trunk routes since April 1 in many instances to speed the draining and drying of the roads and drag them smooth after the spring thaws. The regular amount is set aside for maintenance work this year, although trunk highway revenues are less than expected and highway officials give assurance that results in this department will be fully up to those of the first year.

GIRLS ORGANIZE BASEBALL TEAM

Goodridge Maidens Take Up Arduous Pastime In Real Earnest

"Atta girl, Peggy, atta pitchin' real baseball, I say!"

The famous Boston Bloomer,s who a few years back established a great reputation as a ladies' baseball organization, at which time they defeated some of the fastest semi-pro teams in the United States and Canada, promises to be outdone right here in Goodridge.

Some of the athletically-inclined young women of Goodridge this week have completed the organization of a real ladies' baseball team and practice is now under way. Many of the girls have had former experience on the diamond and need no introduction to baseball as a sport, as a pastime or as a mode of recreation. The Banner is informed by the young women in charge of the team that for the past two or three years the girls of this vicinity has been represented by some kind of a nine.

The lineup has been announced, which will find Agnes Vaughan on the receiving end catching the bullet-like curves of Maggie Johnson, who will do the Stanley Coveleske stunt for the girls. The latter is known as a pitcher and local fans are expecting great things from her in this connection. Miss Johnson has flung the kinks from her pitching arm and is rarin' to go.

First base will be covered by Violet Josephson, and Susie Lenvick will place a curb on all "stealing" of the second sack. Lillie Erickson will be third basewoman, with Mabel Tweeton backing up everything at shortstop. Three of the best-looking girls in Goodridge will be placed out in the field to chase the murderous swats from opposing batswomen, but being fleet of foot and precise judges of fly balls, it is not believed that their future opponents will be attended with any great mount of luck by attempting to emulate "Baby" Ruth on local ballfields this season. The fielders will be Soren Tanem in center and Carrie Urdahl in right. Gladys Wilson will stretch her arms for any thing falling in the left garden.

The first practice game will be held Thursday evening on the local diamond, when it is expected that the captainess will place her athletes in their proper places. The girls contemplate doing a lot of practicing with swinging the war club as they fully realize the necessity of being able to hit the ball—the only way to earn scores.

The Banner is given to understand that challenges will go forth to every ladies' baseball team in this section of the state and that they will shy at none of them, for they believe they have as good a nine as any of the towns hereabouts.

It is also understood that the married ladies of Goodridge are shortly to organize, and if this be true, local fans will be assured of plenty of baseball this year, with the high school boys and perhaps a local city team being in the field in addition to the ladies' clubs. In fact the girls' team already is in the field with a challenge to the wedded ladies, the game to take place as soon as the latter are prepared for battle—or sooner.

GRAND FORKS MEN BUY LAND BETWEEN GOORIDGE-GRYGLA

The Sandberg Bros. Land company of Grygla this week closed a deal whereby they dispose of 160 acres of agricultural land near Grygla. The buyers are farmers from near Grand Forks and it is thought that they will soon move their farming machinery over to commence tilling their new acquisition. It is not known what the sale price per acre amounted to.

LOCAL BUSINESS PLACES ARE APPLYING PAINTING BRUSHES

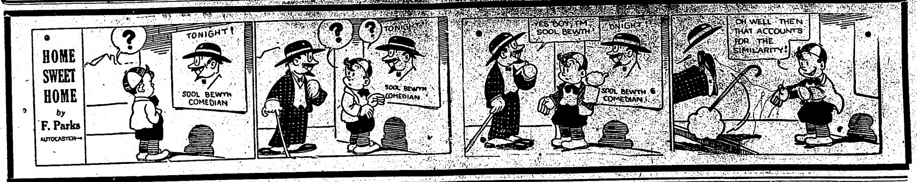
H. Christianson & Son and the Gulrud grocery are this week repainting their places of business and as a result the buildings are showing an improved appearance. George Wold also is busy repainting the new home of The Banner. Several local business institutions already have completed their jobs of painting this spring.

ASK BIDS FOR RED LAKE ROAD

The board of county commissioners of Beltrami county at a meeting held on Wednesday of this week, adopted a resolution asking for bids on the first construction work on the new Red Lake road which connects with the east and west road south of Goodridge.

It is understood that the first construction work will cover the ten miles from the narrows to the ridge. When completed the road will mean much to Goodridge inasmuch as it will give us a fine gravelled road to the east country and Red Lakes.

You Should Make The Banner a Weekly Visitor---$1.50 a Year---Worth It!



Fifty Ex-Service Men Swear Allegiance to Tenets of Patriotic Society

Elmer Eklund Post No. 117, of the American Legion, last Wednesday evening at their club rooms under the First and Peoples State bank initiated one of the largest classes in the history of the local post when about fifty ex-service men of Thief River Falls and vicinity joined the ranks of the fast-growing local post and at the command of the installing officer, L. H. Lawrence, "fell in line for life." after intently listening to the solemn and impressive charges as espoused by the master of ceremonies.

The initiation took the form of jolly get-together of local ex-service men and more than two hundred members of the post were in attendance to participate in the affair. The successful ten-day drive for members came to a close the evening before and all the candidates were on hand to await their initiation.

A member of the Veterans' Bureau, Mr. Berry of Minneapolis, was present and gave an address on the work of the Bureau. Mr. Berry spoke at some length on the financing and building of the large hospital soon to be constructed at Rochester, Minn., where ex-service men will be admitted for treatment free of charge unless the man in question is financially able to pay for the service. All the various posts of the state are concentrating their efforts in an endeavor to bring about the early completion of the project and they are receiving every consideration from the National War Risk Insurance and Veterans' Bureau at Washington, D. C.

T. P. Anderson, county auditor of Pennington county, made a few brief remarks to the ex-service men, and told of the constructive efforts of the local post. He pledged all the assistance at his command in making the local body one of the strongest in the state and praised the high purpose of the American Legion as a whole.

After the installation of the new members, those present retired to the Commercial club rooms where a banquet was served. Its quality is best evidenced from the fact that few of the ex-service men failed of their opportunity to line up for "seconds," which were there in a generous amount.

Proceedings Involve Bridge and Culvert on Road West of St. Hilaire

Injunction proceedings were instituted last week by the Minneapolis Bridge company, of which Isak Helseth of this city is vice president, against the board of county commissioners, asking a permanent restraining order preventing said board from awarding a bridge and culvert contract to the Thief River Construction company.

The contract involves a bridge and culvert west of St. Hilaire on road No. 68. Bids were opened at a session of the board held on April 20th. The Minneapolis Bridge company put in a bid covering both jobs, the bridge at $2,700 and the culvert at $850. The Thief River Construction company offered to build the bridge for $2,689 and the culvert for $1,000. Taking the two bids together, the Minneapolis Bridge company is low by $139.

Both bids cover additions and reductions, and in awarding the contract to the Thief River Construction company, the board claims to have acted for the best interests of the county by securing advantages in such additions and reductions.

The whole matter will come up in district court tomorrow before Judge Andrew Grindeland, who opened a special term of court yesterday. H. O. Chommie is attorney for the Minneapolis Bridge company, while the county attorney, Theo. Quale, will appear for the board of cunty commissioners.

The complaint, aside from charging the county board with ignoring the low bid, charges that R. McGinn, Thief River Falls member of the board, has an interest in the contract, it being alleged that the Farmers & Merchants State bank has advanced money to the Thief River Construction company. Belcher & McAdams are the active members of the latter firm.

Just think! Lots of folks went blind before the modern style of dresses came in.

Show to Be Held at Bank in October—No Strings on the Proposition

Believing it can render special service best by giving its encouragement to potato and corn culture in this vicinity, the Citizens State bank has decided to hold a corn show in October and for the purpose of creating interest among growers, will give cash prizes of $100, to be equally divided betwen the growers of corn and potatoes.

The first prize will be $15 in each division; second, $10; third, $7; fourth, $5; fifth, $3 and ten $1.00 prizes.

All of Pennington and the southern tier of townships of Marshall, bordering on Pennington, are included in the territory which may compete for the prizes. Last year Pennington county received special recognition as a potato raising county, its product being featured in big advertisements by Twin City stores dealing in potatoes. The show to be held by the bank should stimulate interest in this industry.

The dates of the show are October 5, 6 and 7th. See the announcement of the bank in another column as to the general terms.

It is announced that there are no special terms or requirements covering the contests. The exhibit of the amateur will receive the same attention accorded the more experienced growers. Prizes will be awarded the best ears of corn and experts will judge in both divisions, so all may be assured that absolute fairness will govern the contest. The exhibits will be on display at the bank, and such as are awarded prizes will be retained by the bank.

When spring don't get here on time we have that much longer anticipation.

Attempt To Show That Aged Man was Influenced By Housekeeper

Judge Grindeland opened a special term of court in this city today, most of the day being taken up with motions by attorneys in pending cases. The Peterson will case will come on for hearing at tomorrow's session.

It will be remembered that C. H. Peterson, an old settler of Sanders township, who died at the local hospital last September as the result of an accident sustained when he was thrown from a plow, bequeathed his personal property to a woman housekeeper. The will was contested in probate court, but Judge Backe admitted the will and an appeal was then taken by the heirs. Besides the personal property, which consists largely of notes and bank stock, there is valuable real estate consisting of the homestead of deceased in Sanders township.

G. Howard Smith is attorney for the housekeeper, while Chas. Boughton of Red Lake Falls, appears for the contesting heirs.

Political Announcement

(This notice to be paid for by N. J. Anderson at regular space rates.)

To the voters of Pennington county:

I am a candidate for re-election for Register of Deeds of Pennington county. During the years I have served the people of the county as Register of Deeds I have made many friends, but I am not asking support in the present campaign merely by virtue of this friendship. Rather I would have the voters consider my candidacy on a purely efficiency basis as the only proper method of electing officials to public office. In regards to fitness for the office of Register of Deeds, both as to honesty and capability, I prefer to rest my case with the people of Pennington county, whom I served in past years.

Yours respectfully,
N. J. ANDERSON.

"Who said Kellogg's Corn Flakes? Oh, goody, Jane, bet we're going to have KELLOGG'S for our supper, 'nen we won't dream!"

Leave it to the kiddies to pick Kellogg's Corn Flakes—

they are never tough or leathery!

Put a bowl of KELLOGG'S Corn Flakes and a bowl of imitations in front of any youngster! Then see KELLOGG'S disappear! Try the experiment yourself!

It's great to know the difference in corn flakes—the difference between the genuine and the "just-as-goods"! Kellogg's have a wonderful flavor that would win your favor by itself—but when you know that Kellogg all-the-time crispness! Well—they just make you glad! Kellogg's are never tough or leathery or hard to eat!

Kellogg's will snap-up kiddie appetites something wonderful! And, our word for it—let the littlest have their fill—just like Daddy must have his!

You'll never know how delicious corn flakes can be until you eat KELLOGG'S! You will know the KELLOGG package because it is RED and GREEN! Look for it!

Big Profits for Potato Growers

You can still make big profits from your potatoes even with lower prices per bushel—not only on account of cheaper seed but by cutting down labor expenses, saving time, and planting just as accurately as by hand. This can easily be done by using a

HOOVER
VISIBLE POTATO PLANTER

After you have adjusted the Hoover for the depth and spacing desired, the picking and dropping mechanism plants the desired number of seeds in each hill and spaces the hills properly without any effort on your part. The dropping mechanism is in full view—any failure to drop properly can be instantly detected and quickly remedied.

If you wish to plant two rows at a time, we can furnish the Hoover Visible Two-Row Planter for that purpose.

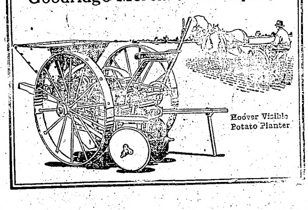
Either one of these planters can be equipped with the fertilizer attachment, which can be put in place without any rebuilding or changes on the frame of the planter. When so equipped, these planters will put fertilizer either above or below the seed, whichever is desired. From 200 to 3400 pounds per acre can be handled.

There are many other good features on this planter that we would like to show you, such as the channel steel frame—unusually durable; spring-pressure furrow openers and adjustable disc coverers regulated by one lever; and coulter attachment, when desired, to cut trash.

Be sure to see us the next time you come to town. Call early so that this season's potato crop may get the advantage of our machines.

And remember, we can also furnish potato cutters and diggers.

Goodridge Mercantile Company



Smith Files Against Quale

Three More Candidates for County Commissioner Appear in 1st and 3d

Candidates for County Office Show Activity as Closing Day Comes

G. Howard Smith, well known local attorney and secretary of the Merchants' association, last week entered his name as a candidate for county attorney against Theo. Quale, who has also filed as a candidate for re-election. Mr. Smith has been active in Legion matters and no doubt counts on his friends among the service men to put him over. The present county attorney, Mr. Quale, is a seasoned campaigner and a 'spirited contest may be looked for when the fall campaign opens. Unless other filings appear there will be no primary contest.

J. V. Patton, of Sanders township, filed last week as a candidate for commissioner in the 3 district. Other filings were H. I. Finstad, Highlanding, and Frank Race, Reiner, for county commissioner, in the 1st district.

G. Halvorson filed last week as a candidate for judge in the 14th judicial district. J. M. Bishop, of this city, who has been urged to get into the judgeship fight, has made no definite announcement of his intentions.

The last day for filing for the primary campaign is May 27th.

New Organization Based on Economy and Efficiency Solicitors Work

U. S. Grain Grower organization work in Minnesota was renewed on a greatly enlarged basis May 1. The plan. designed by the new administration will promote efficiency and economy in all departments, as all persons are now on a merit basis.

All old contracts with field men have been cancelled and a new one put into effect. The new agreement provides that solicitors shall be assigned to a given territory and that they are to be held responsible for the work in that section. The men will be paid according to the results they obtain.

Twenty men will be at work in Minnesota before the week ends, with the avowed purpose of obtaining 10,000 members before the harvest.

"Expansion of organization work at this time," says J. S. Jones, state organizer, "is in keeping with what we have had in mind all winter. The new administration has given us a permanent plan upon which the work will be carried forward with vigor."

During the winter months, nearly 2,600 farmers in the state signed U. S. Grain Grower contracts and arrangements for handling the grain of these farmers have been completed at 56 shipping points. No organization work has been done around many places where elevator agreements have been obtained, and for the present, solicitors will work in territory where preliminary steps have been taken.

RHODA MAN INJURED

Oscar Nesland of Rhoda, while shingling a church steeple there last Tuesday, April 27, lost his balance and fell on the scaffolding, where he hung for a few moments before falling to the ground, a distance of approximately 40 feet, striking on his head. Nesland is 41 years old and it is understood that he is in a critical condition.

BEMIDJI GOLFERS ACTIVE

Expect to Realize $2500 From Use of Links in 1922

According to the Bemidji Pioneer the golf club of that city took in $1700 from outside players last year, and expects to do better this year. The Pioneer says:

"The Bemidji Country club is making a number of improvements at the golf grounds at the head of Lake Bemidji this season. Fred Goughnour, one of the new members, is rolling the course, using his ten-ton tractor to pull the big steel roller. The whole course has been top-dressed with black dirt and all re-seeded so that when the season opens, May 1, there will not be a better nine-hole course in the state.

"Wednesday morning a crew of five men started to work clearing and brushing for the new nine-hole course in the 60 acres recently acquired, adjoining the present course, so that when this is completed, the club will have a full 18-hole course. It is not contemplated to complete the new nine holes this season, but work will be done only as the income warrants.

"About ten new members have joined this year and, as yet, the membership committee has not commenced their work, and when they do, the membership will be over 100. Last year's income from out-of-town players was over $1,700, and it is expected that it will be over $2,500 this season.

"Willard Crummy of Minneapolis has been re-engaged as professional instructor for the season, and he and Mrs. Crummy will be here April 29th. A new cottage for them to live in is being erected on the golf course.

"Gust Stahl is again in charge as greens-keeper and has his crew getting the course in shape, and a number are playing though the season has been cold and backward."

HEALTH ON WHEELS

Public Health Made Interesting Through Movies and Popular Demonstrations

A couple of attractive young women have started a tour of the state in a small automobile under the auspices of thee state public health department. They will visit Thief River Falls some time during the summer, the date to be announced later. This is the information submitted to The Tribune by the secretary of the association:

"Moving pictures on health, brought to remote rural communities, as well as villages and towns, are made possible by the manufacture of electricity by a special generator on the touring car of the nurses who will go out under the auspices of the Minnesota Public Health association and the County Public Health associations to carry the message of health to the far corners of the state.

To teach the people in plain, simple and understandable terms, the Minnesota Public Health association has equipped two nurses with outfits and is sending them into the state to demonstrate the advantages of taking disease in hand in its early stages. The people should know that in Minnesota 94 per cent of the cases of tuberculosis which have been given sanitarium care in the early stage of the disease, have been arrested.

A life-size washable doll, baby's bathtub, milk bottles, pots, kettles, pans, an assortment of clothing, and scales for weighing, a portable stove for preparing food and sterilizing utensils will comprise part of the equipment for demonstrating a cheaply and easily made improvised outfit for the proper care of the baby.

Wherever possible the nurses will begin nutritional classes to be taken up and continued by Woman's clubs or Parent-Teacher organizations.

Breeders to Hold Sale of Guernseys

Red River Valley Association to Sell 30 Blooded Animals in June

The Red River Valley Guernsey Breeders' association will early in June place on sale at the fair grounds more than 30 head of blooded guernseys, which are at the present time scattered throughout the Red River Valley and which the association is desirous of seeing placed in the hands of dairymen desirious of improving their herds.

The guernsey breed of cattle has long since been a proven breed for this section of the country and hundreds of such cattle are at the present time composing the foundation stock of some of the most successful cattle breeders.

The breders' association is ready and willing to place the animals among dairymen generally and stands ready to assist them in every possible way in the matter of terms, etc.

Deffinite dates for the sale have not yet been announced by officers of the association.

BOARD ELECTS DR. MILAN

Succeeds Miss Knudson as Sanatorium Superintendent

At a meeting of the Sanitorium commission held last week in this city Dr. M. George Milan was elected superintendent to succeed Miss Karen Knudson, who has tendered her resignation to take effect May 15th. Miss Knudson, former county nurse, has been connected with the Sanitorium since its opening, and her decision to leave is greatly regrettd by the commission members. It is reported that she will leave for the Pacific coast for a well-earned vacation, after which she contemplates establishing a hospital in company with her sister.

Dr. Milan is the director of the institution and his new duties will only serve to keep him extremely busy. The board could think of no one more experienced or better qualified to take up the administrative work, and the selection of Dr. Milan meets with the approval of all who have followed his splendid record in his chosen field.

Ownership of St. Hilaire Lots Led to Filing of New Yorker's Will

The will of Alonzo Barton Hepburn, disposing of more than $7,000,000 worth of property, was filed this week with Judge Lars Backe for probate in Pennington county. Hepburn, a rich New Yorker, who died recently, was the owner of several lots in the village of St. Hilaire, which led to the filing of the will in this county. In addition to the St. Hilaire lots the estate owns considerable stock in the First National Bank of Minneapolis, the total value of the Minnesota property being fixed at $58,000.

How Mr. Hepburn came into the possession of the St. Hilaire lots does not appear from the will, but presumably he was interested in one or more of the big lumber companies which formerly operated saw mills in that city.

The Hepburn estate is being handled by a firm of New York attorneys, Gifford, Hobbs & Beard, No. 60, Broadway.

Opinion of Farmers Will Have Great Weight in Determining Question

The Minnesota Farm Bureau federation, which last year polled the largest number of farmer votes in the American Farm Bureau's referendum on proposed federal legislation, is taking another referendum.

It has asked the presidents, secretaries and state directors of all county farm bureaus to express their opinion about a bill recently introduced in congress to amend the new federal act regulating packers and stockyards. The bill has been drawn up to prevent the abolition of public weighing of livestock at the South St. [illegible]

Under the state law, weighing of livestock has been done by the state commission, and commission companies have been bonded to protect the shippers. An amendment to the federal law now has been introduced in congress to guarantee the continuance of this supervision by the state government, and hearings on the amendment have been scheduled.

The state farm bureau has asked the elected officials of the county farm bureaus to ascertain the opinion of their members as quickly as possible, and report to their state organization. The result of this referendum will be laid before congress when hearings on the proposed amendment begin.

RANDOM THOUGHTS

And then, the butcher's wurst may be his best.

* * *

Even the "old salt" sometimes gets pretty fresh.

* * *

Chances are that the old "rip" sowed a lot of "tares".

* * *

Most of the gardens are up, thanks to the dogs and chickens.

* * *

Even a general may not object to a little private information.

* * *

Most mountains are so shy they are satisfied with a few peaks.

* * *

The charity that begins at home too seldom gets over the threshold.

* * *

A popular man is one who manages to keep his troubles to himself.

* * *

When a person worries, it brings a smile to the face of the undertaker.

* * *

The man with the level head doesn't have much trouble in getting round.

* * *

Somehow or other, "hush" money always seems to make a loud noise.

* * *

No man has an excuse to be so busy that he can't find time to be friendly.

* * *

Speaking about works of fiction, have you read the Congressional Record lately?

* * *

Our favorite pest today is the guy who insists on telling you a sure cure for that cold.

* * *

Easy Street is mostly inhabited by people who relied more upon push than they did upon pull.

* * *

The acrobat is one fellow who does [illegible] a tumble to himself.

* * *

A lot of men who deplore crime keep right on trying to look like the fellows in the clothing ads.

* * *

The sweet young thing tihnks it a wonderful car because it ran ten miles with the engine "missing."

* * *

A lot of men who say they have no faith keep right on buying hair restorers from bald-headed barbers.

[illegible]

* * *

And we want to say again that the back of the other fellow's note is a poor place on which to practice penmanship.

* * *

This is the time of the year when the average kid would rather be a good, nifty left-handed pitcher than to be President.

Direct from our Factories

A Ranger bicycle for you—the best bicycle ever built—at a much lower cost than even cheap imitations. Dealing direct with the factory, you save the main selling expenses that increase the price but give no real value to ordinary bicycles. ALL you pay for in a Ranger is real quality, best material and skilled workmanship. That's why you can own the famous Ranger, the aristocrat of bicycles for less money than an ordinary bicycle costs.

MEAD Ranger BICYCLES

44 Styles-Sizes & Colors

Ranger bicycles afford a choice for every taste and pocket book, Camel-Backs, Roadsters, Racers, Juveniles, Arch-Frames; Girls' and Ladies' models too. You can't equal the bicycles or the prices anywhere. For a generation we have devoted all our time to manufacturing bicycles. The enthusiastic "good will" earned by satisfactory service to over a million riders in all parts of the world is our best guaranty of service and value to you.

12 Months to Pay

You can secure possession and use of your Ranger at once and pay for it in twelve small monthly payments. Our thousands of cash customers buy at very low Factory-to-Rider prices. The Easy Payment prices are only slightly more to cover added clerical work. Because you are dealing direct with the Makers both Cash and Easy Payment Prices are naturally lower than you can obtain on other bicycles.

We send Ranger bicycles all over the country by fast prepaid express, so there will be no delay in receiving the Ranger you select from the big, free catalog we will send you. Safe delivery in perfect condition absolutely guaranteed.

Big Free Catalog

Over a million customers in all parts of the world save money buying their bicycles and accessories direct by mail from our big Chicago factories. The beautiful Ranger Catalog (printed in six colors) shows all models in full colors and the small boy or girl can make selection and order, just as easily as the grown man or woman.

Tires lamps, horns, front or rear wheels, and bicycle equipment of all kinds are also illustrated and described in the catalog. We save you big money on tires and bicycle sundries. Use the coupon today and get this magnificent free catalog of Rangers and valuable information with Factory Cash Prices and Easy Payment terms.

Send No Money

Simply use the coupon or on a postal write today for the big free illustrated Ranger Catalog and Special Factory Prices and Easy Payment plan. You run no risk as we allow 30 days free trial (actual riding test) on all Rangers ordered by mail. If not satisfied in every way, send it back and the trial will not cost you a cent.

LARGE DELEGATION ATTENDS BALL GAME STAGED AT OKLEE

A large delegation of local baseball fans and followers of the local high school team accompanied their heroes to Oklee Wednesday afternoon to see the local contingent "put the bee" on their rivals to the south. The Oklee team has undergone a complete overhauling since their trouncing at the hands of local baseballers last Saturday afternoon on the home diamond, and put up a stiffer brand of opposition to the offense of Goodridge.

According to the local team manager, Middle River will be the next opponents, the game to be played here in the near future. Thief River Falls has been challenged for a game, but owing to the fact that the county seat high school team is so far unorganized, it is not believed that a contest will be staged this year. Therefore, Goodridge is looking to some of the other smaller outlying towns for games.

MRS. THEODORE TANDBERG IS REPRESENTATIVE OF BANNER

Mrs. Theodore Tandberg, during the absence of the editor, will be in charge of The Banner office, she having entered upon her new duties this week. Mrs. Tandberg is well-known to the citizens of Goodridge and surrounding territory, and this newspaper feels itself fortunte in securing her services. She will have charge of business and news-writing, advertising, job printing, etc., and until the time when the news press and other needed equipment is installed, Mrs. Tandberg's authority will be law around The Banner office.

This newspaper is now comfortably located in its new quarters in the Wold building and The Banner intends to make out of them the finest newspaper home of any periodical in this section of the state published in towns the size of Goodridge.

The public demands new faces, but if you're smart you can give them the same ones done over.

FORMER BANNER PUBLISHER TO REMAIN IN GOODRIDGE

I. D. Converse, former publisher of The Banner, will remain in Goodridge for the present, according to intentions expressed to the new Banner man. Mr. Converse's health has been somewhat poor of late and it is for the purpose of somewhat regaining this that he will spend still some time here. Mr. Conserve has not definitely decided whether he will again enter into business, and may go to Grygla or Red Lake Falls to take up some sort of office work. He declares that he will not again re-enter the newspaper field, considering that the duties involved are too strenuous for a man of his years.

Citation for Hearing on Petition to Sell, Mortgage or Lease Land

Estate of Christian Christianson.
State of Minnesota, County of Pennington—ss. In Probate Court.
In the matter of the estate of Christian Christjanson.

The State of Minnesota, to Carl J. Christianson, Gladys C. Christianson, Alice J. Christianson, Orville M. Christianson, Merrit H. Christianson and Mae K. Christianson, all persons interested in the mortgaging of certain lands belonging to said estate. The petition of Olive C. Christianson as representative of the above named estate, being duly filed in this court representing that it is necessary and for the best interest of said estate and of all interested therein that certain lands of said estate described therein be mortgaged and praying that a license to be granted to mortgage the same.

Now, Therefore, You and each of you, are hereby cited and required to show cause, if any you have, before this court, at the Probate Court rooms, in the Court House in Thief River Falls, County of Pennington, State of Minnesota, on the 27th day of May, 1922, at 10 o'clock A. M., why the prayer of said petition should not be granted.

Witness, The Judge of said court, and the seal of said court, this 28th day of April, 1922.

LARS BAKKE,
Judge of Probate Court.
(Court Seal). M-5-19

MORTGAGE FORECLOSURE SALE

Notice is hereby given that default has been made in the conditions of a certain mortgage containing power of sale, executed by Tollef Loyland and Tina Loyland, his wife, mortgagors, to First State Bank of Thief River Falls, a corporation under the laws of the State of Minnesota, mortgagee, dated the 20th day of January, 1917, and duly recorded in the office of the Register of Deeds in and for Pennington County, Minnesota, on the 25th day of January, 1917, at 1:45 o'clock P. M., in Book 54 of Mortgages at page 297, which said mortgage was thereafter and on the 31st day of January, 1917, for a valuable consideration and by an instrument in writing, dated on that day, duly executed and acknowledged by said First State Bank of Thief River Falls, sold, assigned and transferred to Edwin White, which said written assignment was thereafter and on the 21st day of February, 1917, at 1:00 o'clock P. M. of that day duly recorded in the office of the Register of Deeds in and for Pennington County, Minnesota, in Book 56 of Mortgages on page 352 thereof, which said mortgage was thereafter and on the 4th day of May, 1917, for a valuable consideration and by an instrument in writing, dated on that day, duly executed and acknowledged by Edwin White sold, assigned and transferred to Gertrude M. Harlow by said Edwin White, which said written assignment was thereafter and on the 10th day of May, 1917, at 1:00 o'clock in the P. M. of that day duly recorded in the office of the Register of Deeds in and for Pennington County, Minnesota, in Book 56 of Mortgages on page 385 thereof, and at the time of this notice there is claimed to be due and is actually due on the said mortgage, according to the terms thereof, the total sum of Two Thousand and Thirty-one and 08-100 ($2,031.08) Dollars, on the note secured by said mortgage, consisting of the principal sum of Two Thousand ($2,000.00) dollars, and interest thereon amounting to the sum of Thirty-one and 08-100 ($31.08) dollars, which said default has continued to date by virtue of the failure and neglect of said mortgagors to pay said sums, although demand has been made therefore, and no action or proceeding having been instituted at law or other-wise to recover the debt or any part thereof secured by the said mortgage.

NOW, Therefore, Notice is hereby given that by virtue of the power of sale contained in the said mortgage and of the statute made and provided the said mortgage will be foreclosed by a sale of the mortgaged premises therein described at public auction, to the highest bidder for cash, at the main front door of the Court House in the City of Thief River Falls, Pennington County, Minnesota, on Monday, June 26th, 1922, at 10:00 o'clock A. M. of that day, to satisfy the amount that shall then be due on the said mortgage with interest thereon from the date hereof and the costs and expenses of such sale and the sum of Seventy-five ($75.00) dollars Attorneys' fees as stipulated in said mortgage in case of foreclosure.

The premises described in the said mortgage and so to be sold is all that tract or parcel of land lying and being in the County of Pennington and State of Minnesota, described as follows, to-wit; The Northeast (NE¼) Quarter of Section Sixteen (16) Township One Hundred Fifty-three (153) North, of Range Thirty-nine (39) West of the Fifth Principal Meridian, containing one hundred sixty (160) acres, more or less, according to the United States Government Survey thereof.

Dated at Thief River Falls, Minn., this 3rd day of May, 1922.

GERTRUDE M. HARLOW,
Assignee of Assignee of Mortgagee.
G. HOWARD SMITH,
Attorney for Assignee,
Thief River Falls, Minnesota.
May 9-16-23-30 June 6-13.

How to Do so is the Question —Commission Named to Study Proposition

Obligations of foreign governments to the United States, refunding of which will be undertaken by the commission, just authorized by congress, total, including as follows:

And now the big Krupp gun factory in Germany, has gone to making typewriters. Wars of the future may be more peaceful.

AUTO BURNS

W. H. [illegible] had the misfortune to lose his fine Franklin automobile last week, when the machine mysteriously caught fire under the hood and burned to a crisp as he stood helpless to check the flames. He was out at the old Jorgen Eide place and had the engine pretty well heated up through grinding over a tough piece of road. A small leak in the gas tank added to the fury of the flames and the machine, including every part of the top and frame, was entirely consumed. He had recently overhauled the car and had installed a new storage battery, and having only a small amount of insurance, he sustained quite a loss.

STATE AUDITOR BELIEVES IN ADVERTISING IN THE BANNER

R. P. Chase, state auditor of Minnesota, believes in The Banner as an advertising medium and, in a letter to the editor tells in what way his land advertisements have brought returns ten-fold to the state over the methods formerly used. Says Mr. Chase:

"It may interest you to know that as a result of our little advertising campaign in country newspapers, we have about twice the number of inquiries received in former years. With best regards, I remain, yours truly, R. P. Chase, state auditor.

ARBOR DAY OBSERVED

Pupils of the Goodridge consolidated school observed Arbor day last Friday by putting in several hours during the afternoon on putting the school grounds in order and as a result the campus presented a neat and healthy appearance. Several trees were planted by the students in observance of the day.

NEW RED LAKE FALLS EDITOR

Editor and Mrs. Christie, of Red Lake Falls, are the proud parents of a baby son who arrived yesterday at the Crookston hospital. We extend our congratulations to Bro. Christie.

Star Specialty Shop, Box 95, Erie, Minn. tf

For Sale.

Light wagon and 3-section iron drag for sale; both good as new and at a reasonable price. Inquire at Banner office. tf

SAYS JOHN P. MEDBURY

Times are changing; chaperones are coming back into style. There is a great demand for deaf, dumb and blind ones.

* * *

If you do have to have an escort when you take your girl to the theatre, buy one of the seats in the gallery.

* * *

The girl had to be home by eleven. but the chaperone could stay out till one.

* * *

But most chaperones are homely and this is the only way they get a chance to go out.

* * *

If you go to supper the escort has to go along with you. She doesn't eat any more than your girl; it only seems like it.

* * *

You can't even propose to your girl alone. One cross-eyed guy proposed to his girl and the chaperone accepted him.

* * *

He proposed where he was looking, but he didn't look where he was proposing.

* * *

One mother even hired a mind-reading chaperone for her daughter. It's getting so that a fellow can't even keep his thoughts to himself.

COMMUNITY CLUB TO MEET FRIDAY EVENING, MAY 12

The Goodridge Community club will hold its monthly meeting Friday, May 12th, at which time prominent speakers will be heard and a special musical program given. The band will also render a few selections and, under the direction of John Nystul, this week will hold several rehearsals.

The program committee is hard at work providing entertainment features for the meeting and it is hoped that The Banner will next week be privileged to print the complete details, program, etc.

GOODRIDGE BUILDERS ATTENTION!

If you are contemplating building this spring ocnsult us for your metal and gravel roofing and roof recoating. We install drain pipes and do all kinds of sheet metal work.

METAL ROOFING AND CORNICE MFG. CO.

Thief River Falls, Minn.

Highlanding Breakers

A. Ellingson and son, Clarence, were transacting business in Thief River Falss last Saturday.

o—o—o

Miss Agnes Johnson spent Friday and Saturday in Goodridge with her sister, Maggie. While there she attended the dance, also the ball game.

o—o—o

The debate held in Highlanding last Saturday evening was well attended and those who were present report a good program.

o—o—o

Messrs. Edwin Nelson, Herman Kjos, and Oliver Howard attended the ball game in Goodridge last Saturday. The boys report the game as a very good one, which was won by Goodridge.

o—o—o

The Ladies' Aid held at Mrs. A. Ellingson's last Thursday was very well attended.

o—o—o

Johnnie Nelson was in Highlanding Sunday. We were all glad to see "Jack" out again. He has been detained in bed for the past four months.

o—o—o

Mr. and Mrs. Pete Larson and son, Alexander, of Erie, were guests at the Anton Johnson home last Sunday.

o—o—o

Mrs. W. H. Crompton has been seriously ill for the few past days, but is improving very rapidly.

o—o—o

Mr. and Mrs. Gilbertson and family of Goodridge, were in Highlanding Sunday.

o—o—o

A party of young folks including Misses Agnes and Maggie Johnosn, Lauretta Cousins and Miss Quiste, Messrs. Otto and Harry Cousins, Stephen Jacobson, and Ned Seversrud, enjoyed a motor boat ride on the Red River last Sunday.

o—o—o

Miss Maggie Johnson of Goodridge, spent Sunday at her home in Highlanding.

o—o—o

Mrs. Cousins was a guest at Mrs. Henry Hilan's last Sunday.

TENNIS COURTS IN ORDER

Local men who have interested themselves in placing the tennis courts in order for play this summer have completed the job and they are now ready to receive the players. Many already have availed themselves of the opportunity of swinging the racket.

YOUNG FOLKS PICNIC

A party consisting of Mrs. Breen, Miss Ruby Jensen, Miss Gladys Wilson, Harvey Ferdinandson and E. J. Bothne drove to Lindstrom's grove Friday evening, where they enjoyed a picnic. They returned to Goodridge in the evening.

SHE'S EXCUSED

According to the Baudette Region, a farmers wife near that place gave seven reasons why she could not serve on a jury—and she is expecting the eighth. 'Nuff sed.

When you get mad, count one hundred, and by the time you get through you may be mad enough to do some thing about it.

The best way out of it is do your courting in a boiler factory and then everybody for himself.

The best thing about free verse is that you don't have to read it unless you want to.

When spring don't get here on time we have that much longer anticipation.

FARM BUREAU NEWS

Corn Planting Time Near; Some Ready Hints

Corn planting time is close at hand. The ten-year average yield in Minnesota, 1911 to 1920 inclusive, was 34.7 bushels per acre. Farm crops department men of the university say that greatly increased yields can be obtained by putting the seedbed in the best possible condition, by planting the right seed and by seeing that all the work connected with the crop is well done at the right time.

Germination Test Important

Even though the seed ears were selected with great care and were housed through the winter in accordance with improved practices, steps should be taken to make certain that the germinating power is satisfactory. "A preliminary test of kernels from ears located in different parts of the storage quarters is always advisable before shelling," says A. C. Arny, in charge of the farm crops section at University farm. "If this test indicates that the germinating power is doubtful, or that some rot and mold are present, an individual ear test is necessary. This test will often reveal diseased ears which might otherwise be used for seed purposes."

Modified Rag Doll Germinator

Use of the modified rag doll germinator, more or less familiar to corn growers of Minnesota, is a simple and efficient method of testing individual ears for germinating power and disease infection at the same time, says Mr. Arny. Rules for making and using a rag doll can be obtained on application to the farm crops division, University farm, St. Paul. Kernels that have been injured by frost, lack of care or faulty storage will either be slow in germinating or will not sprout at all. Ordinarily, weak or slow germination of the kernels should prompt discard of the ears just as quickly as entire failure to grow.

Deep Plowing; Early Disking

Deep plowing and early spring disking are important essentials for higher yields. "Generally the heavier the soil the deeper it should be plowed," says Professor Arny. "Plowing from six to eight inches deep almost doubles the loosened area in which the roots of the young corn plant may spread out easily. The depth of plowing should be increased gradually, so that no large amount of raw soil is brought to the surface in any one year. Fields plowed for corn in the fall should be disked thoroughly in the spring. Subsequent harrowings or disking will keep down the weeds. While preparing the soil, all the striped and gray gophers in the vicinity should be poisoned."

Professor Arny points out that the benefits of careful preliminary work will be lost in part unless a good stand of plants is secured. Proper grading of the seed and adjustment of the planter will aid materially in securing even stands. It is highly desirable to plant as soon as the soil is warm and the weather is favorable. Too deep planting must be guarded against.

Recommended Varieties

Seed corn varieties recommended for Minnesota are:

Southern Section--Silver King, Murdock, Rustler, Minnesota No. 13.

Central Section—Minnesota No. 13, Rustler.

Northern Section—Minnesota No. 23, Northwestern Dent, Minnesota No. 13 (early strains), various flint corns.

25 Cars of Butter Moving Every Week

Consolidated Shipping Plan Saving Thousands of Dollars for Co-operative Creameries

St. Paul, May 2.—Twenty-five carloads of Minnesota co-operative creamery butter are going to eastern markets every week, under the consolidated marketing plan put into operation by the Minnesota Co-operative Creameries association, Inc.

"Average net savings to the creameries, in freight rates, have amounted to more than 50 cents on every hundred pounds shipped in carlots during the last three months," the association announced today. "On 25 carloads a week, that saving means a saving of $3,750 every seven days to the creameries that have been organized for carlot marketing."

After paying all dues to the state association, these creameries would still have a net saving, over all expenses of consolidated marketing, amounting to $1,275 every week, the association pointed out. The saving is brought about by obtaining lower freight rates on carload lots.

"One co-operative creamery," the association announced, "has made a net saving of $304,37 cents on eight shipments of butter marketed under the association plan. Its dues for that period would amount to only $184.29. In eight weeks, the state agency saved that one creamery, above all costs, $120.08. This is only an average saving; many other creameries are showing even better results.

Minnesota Horticulturist Puts Out Garden Number

Rather strange as it may seem to some, the July or garden-making number of the Minnesota Horticulturist, R. S. Mackintosh editor, was issued and circulated in April. This was done, says Mr. Mackintosh, to stimulate gardening on farms and back lots. The July number consists of 30 pages or more, all crammed with condensed information for growing vegetables.

Juniors to Have Own State Fair Building

A building all their own. This is what club boys and girls will have at the state fair next September. T. A. Erickson of University farm, their state leader, announces that the fair managers have assigned the building formerly used for exhibits of bee and honey to the junior club workers. The building is centrally located and contains about 9,000 square feet of floor space. Needless to say it will be a leading center of attraction for state fair visitors. The interior will be rearranged so that the various features of junior extension work can be presented to the best advantage.

Spring Short Course Offered Beekeepers

Theoretical instruction given during farmers' and homemakers' week at University farm in the science of beekeeping is to be reinforced by a short course which will emphasize practical phases of the industry. This short course is to be held at University farm May 23 to 26. Francis Jager, chief of the division of bee culture of the university, and members of his staff, assisted by Charles D. Blaker, Minnesota state bee inspector, will be the instructors in charge.

The courses within the course have been so arranged that special work will be offered beginners and advanced apiarists. Forenoon sessions will be for all classes of beekeepers. Practical work in the laboratory and bee yard will be provided every afternoon. Bee management, foul brood diseases, making hives and frames, methods of prevention of swarming, and the handling of colonies for the production of extracted and comb honey will be features.

Progressive beekeepers cannot afford to miss this great course. Coming as it does in the spring it offers outstanding opportunities for study and demonstration. Anyone interested in beekeeping may attend by paying the registration fee of $2.

One-Acre Contest for Marquis Wheat Raisers

A. D. Haedecke of University farm announces that the Minnesota Crop Improvement association, of which he is secretary, will conduct a contest for the best acre of marquis wheat raised in Minnesota. Cash prizes amounting to $150 and offered by the Spring Wheat Crop Improvement association, with headquarters in Minneapolis, will be awarded. Entries may be made any time up to July 1. For rules, regulations and conditions, write to Mr. Haedecke at University farm, St. Paul.

Two New Bulletins for the Fruit Growers

Minnesota fruit growers should order two new bulletins just issued by the agricultural extension division of the state university. Special Bulletin No. 56, by W. H. Alderman and Wilson McGrath of the division of horticulture, is entitled "Methods and Uses of Grafting and Budding," and special Bulletin No. 57, prepared by Burgess Nightingale and R. S. Mackintosh, university horticulturists, hears the title, "Pruning the Apple." A postcard request to the office of publications, University farm, St. Paul, will bring these bulletins to your door by the next mail.

KRATKA PEOPLE CELEBRATE

Young Peoples' Society Gives Community Picnic Sunday

Several people from Thief River Falls attended a community picnic given last Sunday at Albert Hanson's place in Kratka by the Young Peoples Society of the Telemarken congregation of that town.

A fine program of singing and music enlivened the occasion and a delicious lunch was served by the committee. It is reported that a very large crowd attended the picnic. Among them were County Treasurer Gullingsrud and wife of this city.

Liquor drinking is steadily decreasing. Few people can stand the kind of stuff the bootleggers are selling now.

The stand that some of our congressmen took on the bonus question may handicap them in their race next summer.

Citation for Hearing on Final Account and for Distribution.

STATE OF MINNESOTA, COUNTY of Pennington, ss. In Probate Court.

In the Matter of the Estate of August O. Schneider, Decedent.

The State of Minnesota to Theresa Schneider, all persons interested in the final account and distribution of the estate of said decedent. GOODRIDGE DIAMOND

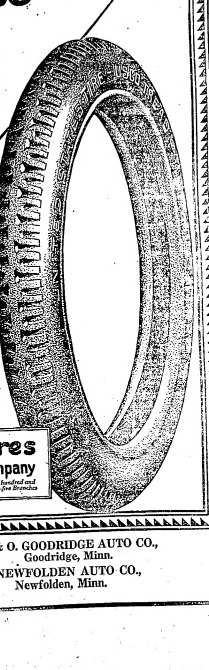
Come Out and Holler for Goodridge!



First to establish the $10.90 price—"Usco"

THE makers of U. S. Tires made this announcement last November—

"Hereafter the price of the 30x3½ 'Usco' is $10.90."

The lowest price ever quoted on a tire of *quality reputation* and *standard performance.*

* * *

And now, with the opening of Spring, there seem to be quite a number of "New and Special tires" coming into the market in the $10.90 price range.

Perhaps you are wondering just what there *can* be either "new" or "special" about these tires.

It can't be the $10.90 price—"Usco" established *that* five months ago.

Nor *quality* reputation and *standard* performance—for it takes more than one full season for any new tire to *demonstrate* where it stands in quality and value

* * *

With so many tires rushing into this $10.90 price field (now that the season promises business from the American car-owner), it is worth remembering that "Usco" showed its good *faith* by announcing this price *last fall.*

The same intent to serve that has made "Usco" a *standard value* for years.

The "Usco" Tire was never better than it is today—with its established quality, its time-tested performance, *and its price closely figured in tune with the times.*

$10.90 and even better than the price

Columbia Dry Batteries work better and last longer
—for ignition on the Ford while starting
—for gas engines
—for tractors
—for bells and buzzers
—for thermostats
—for dry battery lighting outfits in closet, cellar, garret, barn, woodshed, etc.

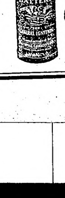
Save your back!

Put a Columbia "Hot Shot" Ignition Battery under the front seat of your Ford, and *use its current for sure-fire ignition while starting.* Full ignition power instantly, regardless of weather. The Columbia "Hot Shot" No. 1461 *fits* under the front seat—put it there today.

The world's most famous dry battery. Used where group of individual cells is needed. Fahnestock Spring Clip Binding Posts at no extra charge

Columbia Dry Batteries for all purposes are sold by electricians, auto supply shops and garages, hardware and general stores, and implement dealers. Insist upon Columbia.

Columbia Dry Batteries —they last longer



Minnesota Senator Obtains Increase to $500.000.00 to Eradicate Barberry

Washington, D. C., Apr. 20.—A victory for the wheat growers was won in the senate today by Senator Frank B. Kellogg of Minnesota, when he obtained an increase to $500,000 in the agricultural appropriation bill for the fund to eradicate the barberry bush in the war on black rust.

Senator Kellogg, who never speaks unless he is thoroughly informed upon his subject, made one of his customary vigorous and able fights in the senate for a bill which is of great benefit to the northwest in general, and the farmers in particular.

Over the protests of the appropriations committee, the senate, after listening to a speech by Senator Kellogg, voted 37 to 16, to raise the fund from $200,000 to $500,000. The senate committee already had added $52,800 to the sum provided in the measure as it passed the house.

Spring Wheat Imperiled

In his speech, Senator Kellogg warned that the spring wheat industry will be wiped out in a few years if effective war is not made against the barberry bush.

Chairman McNary, Senator Lenroot of Wisconsin, and other opponents of the increase, admitted the ravages arising from the barberry bush, but insisted the states should provide funds for eradication. They contended the states have not done their share. Senator Kellogg met this argument by saying the people only recently had become fully aware of the danger of the barberry bush. In the future state legislatures of the northwest will spend fully as much money as the federal government is asked to provide, he said.

Money for Education

Senator Kellogg explained that the federal fund is to be used for educational purposes, not to employ men to dig up the barberry bush.

"Within the last year there was organized in Minnesota, the governor of Minnesota being the president of it, an organization of ten states, comprising the principal wheat-raising states where the ravages of black rust are the worst," Senator Kellogg said. "They are awake to the subject. The legislatures of these states are not now in session and will not be in session until the winter of 1923. In my state, the legislature made an appropriation a year ago of $20,000, but finding that insufficient, the people there have raised money by private subscription and I guarantee that whatever money the federal government may devote to this purpose will be more than matched in Minnesota, and I believe it will be matched in every state becaues the organization to which I have reference is now awake to the subject.

"Because the states have not done all they could, although now awake to the conditions, are we to sit back and say we will do nothing except appropriate $200,000 to destroy the ravages of a disease which threatens the greatest single farming industry in the country? I am told by men who are not alarmists that wheat raising will cease in those states in a few years if the barberry is not eradicated.

Not State Question Only

"Furthermore, this is not purely a state question. It is true, as the senator from Wisconsin says, that it is not entirely useless to eradicate the barberry bush in one state if they are growing in another, because the spread of rust, of course, would not be so great from one state to another. It is true that the barberry cannot be eradicated in the great territory reaching from Pennsylvania in the east to the Rocky Mountains in the west and north of the Ohio river and Kansas and Oklahoma unless there is federal co-operation. The seeds are taken by birds and scattered from state to state, and the spores or rust germs or whatever you call them, are blown, according to the testimony, fifty, seventy-five, or 100 miles, and when attached to grasses and wheat. if the weather conditions are proper they multiply with astonishing rapidity and are again distributed. We have known fields of wheat in less than a week to be entirely ruined.

"I think the states of Wisconsin and Minnesota, and the state of North Dakota took hold of this subject as early and as energetically as any of the states. I do not think it was really appreciated among the people generally, the appalling calamity that confronted the wheat-raising communities within the last two years."

Senator McNary interrupted to read into the record testimony indicating that the disease had been known by American scientists for many years. Senator Ladd of North Dakota was asked to confirm this information. He replied that the scientists of this country had known for ten years where the trouble lay, "but the investigations had not been made to any great extent."

Chairman McNary declared that the French had known for three hundred years of the close association of the barberry bush and black rust.

Kellogg Makes Reply

"But it is only within a very few years that it has been appreciated by the people, the state authorities, the legislatures, that the eradication of the barberry bush was necessary if we are going to raise wheat," Senator Kellogg responded. "Now, there are no legislatures that meet until 1923, I believe, at least in any of the western states where the barberry is found, and I do not believe that we, facing this calamity, should hesitate for a moment to give all the aid possible in the campaign to eradicate the barberry bush, which this testimony shows can be done in a very short time if the appropriation is sufficient, but that it will last from ten to fifteen years, if we appropriate merely at the rate of $150,000 to $200,000 a year."

PIONEER IS DEAD OF HEART FAILURE

Haldor Erickson Suddenly Stricken at Carl Olson Farm Near Holt

Haldor Erickson, 71 years old, a resident of Thief River Falls and vicinity for the past 18 years, died suddenly last Thursday afternoon of heart failure.

Haldor Erickson was born at Waldor, Norway, and came to this country at the age of 17 years. He settled on a farm in Pope county and lived there until 18 years ago when he came to this section. In 1842 he married Karen Hoffas. He lived on a farm west of this city until three years ago, when he moved to Thief River Falls and, with his family, made his home on Tindolph avenue South.

Mr. Erickson left his home last Monday apparently in vigorous health, with the intention of assisting Carl Olson for a few days with his farm work near Holt, where Thursday he was suddenly stricken with heart failure and death resulted.

Mr. Erickson is survived by his wife and eight children, as follows: Axel Erickson, Lignite, N. D.; Ed. Erickson, Charleston, N. D.; Mrs. J. Nelson, Coteau, N. D.; Mrs. Elmer Froshaug Milly, Sask., Canada; Mrs. R. Bird, Kolwood, Mont.; Mrs. William Parbst, of this city; Thaya and Henry Erickson, also of this city. A sister, Mrs. Anna Helgeson, makes her home in Minneapolis, and one brother, Erick Erickson, lives at Fargo.

The funeral services are held this afternoon at 2 o'clock from the Trinity Lutheran church, interment to be made in Greenwood cemetery.

She Wants Her Girl to Marry a Farmer

The Farm Home is the Safeguard of Family Life, Says Woman Who Won Prize

The farm home is the stronghold of real family life. That is what Mrs. Minnie Ellingson Topping of Bloomington Ferry, Minn., wrote in reply to the question: "Would You Want Your Daughter to Marry a Farmer?" Her letter was one of two letters from Minnesota farm women to win prizes in a nationwide contest.

"There is a special reason why I would like to have my daughter marry a farmer," Mrs. Topping wrote from her farm home. "I wish to have her surrounded with interests that will emphasize the best qualities of her soul and make use of the highest capacities for which she, as a woman, is fitted.

"The country is an ideal setting for family life. One of our big newspapers had recently this headline: "Will the Family Stand?" The very hope of America today is in the family. Anything that disrupts it makes for anarchy.

"Romance plays a good part in young life. Last winter I went with a neighbor on a milk route. Crossroads being drifted, teams met the truck, with their cans of milk. These teams were often driven by boys, khaki-clad and fur-clad from head to foot. They have had their thrills at first hand. Young princes of the farms that they were, they might have been envied by any city boy.

"The boys and girls who go with their father to the barn these early spring mornings are introduced to nature's secrets through the new calf, lamb or colt that has taken up its abode over night. Sex lessons are taught right, because naturally.

"My daughter, having been reared with close attention to the fact that water and heat in the home are necessary to health. would be expected to embody these conveniences in the plans she makes for her home, with her farmer-husband, and to insist that sanitation and convenience be the rule in the house as well as in the barn. From childhood, my daughter has had a small amount of money to control, and by this has learned the value of money. I would expect her to formulate some system of finance with her husband that would bring her a share of the earnings of the farm; it may be a budget system, a side line—like chickens, milk or garden—or a direct share of the farm's output. It must be something, recognizing her partnership in the enterprise, and adequate to maintain her independence and self respect.

"She should be logical enough to meet emergencies in a sensible manner; if this meant the climbing of a windmill, or hitching up a fractious team or other outside work, I should expect her to do it efficiently. In her devotion to husband and home, she would not forget that she is a social being, functioning for community betterment through the mediums of healthful amusements, mental alertness and spiritual uplift.

"Believing that the country is the very best place for putting into practice the ideals that have developed with her character, for furthering principles of industry, and the intelligent administration of homely but worthy tasks, for fostering a love for simple things, and for loving service to her own and others. I would be very glad to have my daughter marry a farmer."

KELLY WAS PLEASED

Geo. W. Kelly, editor of the Northwest Farmstead, in a letter to the editor of The Banner, speaking of his visit to Penington county last week, has this to say:

"I am very happy to tell you that I was greatly impressed with the opportunities for the farmer in the country I saw, and am firmly convinced that there is a very bright future ahead of your section of the state:

I think all that is necessary is to let folks know the wonderful advantages you have at present, and you will soon fill your county full of first class farmers."

THE ELASTIC DOLLAR

The "ordinary expenses" of the national government for the last six months of 1921 were nearly $700,000,000 less than for the corresponding six months of the year before.

This is due partly to economy, partly to lower prices. Uncle Sam can buy a lot more with a taxpayer's dollar now than he could 12 months back.

And $1 paid in income tax in 1922 is heavier taxation than $1 paid in 1921, because of the increased buying power of the dollar.

The esteemed dollar has the elasticity of rubber.

When men yearn to sell you a bunch of stock guaranteed to pay eighty per cent, you wonder if human unselfishness has suddenly become perfect.

HOW ADVERTISING PAYS

Another striking illustration of the value of advertising has been brought to light in Thief River Falls. Mrs. Andrew Bottelson, 807 East Bridge street, last fall lost an Eastern Star pin, which was highly valued as a keepsake, and inserted an advertisement in these columns offering a liberal reward for its recovery. Yesterday a little East Side miss found the missing piece of jewelry, bright and shiny as the day it came from the jeweler, and, remembering the advertisement appearing in The Tribune, returned the article to its owner.

A man who for years has enjoyed the reputation of being the "dirtiest man in Mower county," has had the reputation shattered, temporally at least. He fell ill, but when the doctors and nurses at a hospital where he was taken, insisted that he be scrubbed, he resisted strenuously. It was necessary to overpower the man to get him into the bath tub, and he had to be held while being scrubbed, which process was very thorough. The man has always had an aversion to water, except for drinking, according to his relatives, who expressed surprise at the difference in his appearance after he had been "treated."

—Winnebago Enterprise.

MORE COWS IN BELTRAMI

The Baudette Region states that 100 high grade dairy cows will be furnished the farmers of Northern Beltrami county through the medium of Baudette banks. The animals will be purchased in southern Minnesota by H. C. Lende, farm agent, who will superintend their distribution. The plan adopted is along the same lines pursued by the First and Peoples of this city. It is gratifying to note that northern Minnesota communities are realizing more and more the need for cows as a means for placing the country on its feet.

A good many jokes have been made about the income tax, but to the man who has to pay it, it is a serious matter.

A New Jersey hen laid a four-ounce egg and you just ought to have heard that old rooster crow.

Now that the submarine has been regulated, how about an international conference to consider the automobile peril?

Judge Landis is probably wondering why Hill H. Hays didn't hold on to his cabinet position and take the movie job, too.

How does any one know that Love will not cure the world? It has never been given a chance yet.

Good times have a peculiar hankering for the fellow who burns up his muscle on a worthy job.

GRONNA INCURABLE

Former United States Senator Sent Home to Die From Rochester Institution

Rochester, Minn., April 28.—Former United States Senator A. J. Gronna, suffering from cancer of the stomach, cannot recover, it was learned from physicians here today.

Dismissed by St. Mary's hospital as incurable, the former solon left last night for his home at Lakota, N. D., after being given communion by a local minister.

He was operated upon and was told by Mayo Bros. that an attempt to remove the cancerous growth would mean death. The growth is malignant and progressive. Gronna was given to understand that the end may be expected any time within a period of months.

Faith is merely betting that good things happen more than once.

Automobile Bus Line Between Thief River Falls and Crookston

For the accommodation of travelers between Thief River Falls and Crookston, an automobile bus line has been established between the two cities. The new transportation company expects to make two round trips daily except Sunday. A time table is published in an advertisement in another column of this newspaper, which indicates that the bus will take in St. Hilaire, Red Lake Falls and Gentilly en route. The new bus, which is a seven-passenger Buick, equipped with baggage facilities, will leave the Evelyn and Brumund hotels here, and Crookston headquarters will be at the Palace and Crookston hotels. The car will stop to take on passengers any place along the route upon signal. The fare between here and Crookston will be $1.75 and the trip will be made in two hours and 15 minutes.

It's Time to Overhaul Your Ford

Make your "flivver" fit for the road by having the carbon scraped out, grind out the valves and tighten up the loose nuts. It'll perhaps have a hard summer and you cannot afford to waste time with a faulty car.

HELP GOODRIDGE—HELP YOURSELF

Goodridge citizens in general have one common concern, and that is in seeing to it that we make of this town the very best with the facilities which are available.

But in doing so we shall need the co-operation of every man, woman and child making this town their home. The nature of this co-operation is simple and plain, and may be set down as a duty rather than an effort.

Sell all you can and buy all you can at home. Every dollar that is sent or carried away from town makes it that much poorer. If you have the means invest in something that will give somebody employment. Always cheer on the man who goes in for improvement. Do not kick against a proposed improvement simply because it is not at your door. A town that is improving, is also spreading out. If a rich man starts a project encourage him. If a poor man starts, help him. Do not be afraid to thrust your hand down in your pocket to help out a public enterprise. More towns have been killed by such refusals than in any other way. The citizens of any prosperous town are always public spirited and united. Stand together. Work together for the interest of the whole town, always stand ready to do you part. Don't spend your time grumbling and prophesying failures, but help to make every enterprise a success. Every man owes something to the community for his own success, be it great or small. Be energetic, be enterprising and your example will be imitated.

Help yourself by helping Goodridge.

Two is company, but a chaperone makes it a corporation.

SPRING IT

If you have a new idea, spring it. This country has become great because its citizens have had the brains to produce ideas and the courage to work them out to fruition.

But don't expect to revolutionize the world with one blast. The world is older than we are. It will be here after we are gone, and other brains will be producing ideas that are a hundred times better than ours.

Every big thing has a little beginning. Because the idea is good it grows and thrives and expands until it becomes great and of lasting benefit to many people.

It may be so with your idea, but it will not be so as long as you keep it bottled up.

Spring it.

The man who knows himself knows what others think of him.

If you think you're getting a pretty raw deal, remember Lazarus. He never complained.

The European allies are still allied together because each is afraid to break away. It is a wonderful state of harmony that does not exist.

Judging from the way Goodridge swatted the ball against Oklee last Saturday afternoon, The Banner would serve notice on the directors of the newly-formed Red River Valley Baseball league to make a wide berth for local talent.

Some children disobey their parents and get away with it by smiling sweetly. The parents think it is cute. As the years take them nearer to maturity they disobey with impunity and snarl at any attempt at correction. That isn't so cute. They end as they start, and the start is up to the parents.

Though it be of the humblest, the home that is clean and tidy and tasty is attractive. Wealth may add gorgeousness, but it can not supply taste, or tact, or happiness alone. It is the mind and the heart that make or unmake the home. All else is but incidental and of little avail. There are many worse than yours.

LET'S CLEAN UP THE TOWN

It is indeed gratifying to see the manner in which Goodridge people go at the business of making this town a clean place to live. Garden rakes have worn blisters on their hands and their knuckles are generously smeared with paint and, taken altogether, it would not be surprising to The Banner to see Goodridge as white inside as it appears from the road one mile south of town—the "white city" of eastern Pennington county.

We often express our disapproval of "nosey" people, and justly so. But there are times when a little "nosiness" on the part of every citizen would be of benefit to this town.

Right now is one of those times.

We are in favor of everybody getting out and nosing around town and joining in a general cleanup. The town needs it, and what the town needs we need.

People who are scrupulous in keeping their hands and faces and bodies clean should be just as careful to keep their surroundings in like condition.

This town is not the dirtiest place on earth, and neither is it the cleanest. It is betwixt and between, a condition which admits of improvement.

If the rest of the good people in this town are willing and ready to join the editor in a cleanup campaign it will be done. The official pencil pusher of this paper is not a Samson in strength, but he will go his limit if others will keep the pace with him.

No lagging on the side lines—no standing and bossing—no palming off sick until the job is done—no shirking of any kind—make it a case of everybody work, including father.

Let's make a glorious day of it. Close every business and professional house in town. Make it so unanimous it will be a scramble to get in on the deal.

Then, when the fun is all over, we can go home and clean ourselves up and feel mighty proud of the good work we have done.

Who's game? Or is everybody game?

Knud Wefald of Hawley, former representative in the legislature from Clay county, has filed for congress in this district. He has filed as a farmer-labor candidate and inasmuch as he has affiliated with the Non-partisan league, he no doubt counts on the members of that organization to support him in the election. While a member of the House, Mr. Wefald was the author of several poems and was the bosom friend and chum of Henrik Shipstead.

Judging by the numerous filings for sheriff in several counties of the state would naturally lead one to believe that there are all kinds of law enforcement men out of office.

The Dawson Sentinel a few weeks ago printed that good old American poem "Over the Hill to the Poorhouse." It's fine of the Sentinel to thus furnish such splendid reading, but why rub it in.

YOUR PASTOR

How much do you help your pastor? We don't mean how much do you pay on his salary, but how much of an assistant are you to him in his unusual. and rather unprofitable job? Understand, this is not a church editorial further than we would like to impress every church attendant in Sleepy Eye with this point: The church is a recognized element of strength in every community. No one would want to live in a town that had no churches or have his children reared under such circumstances. We all agree on that point, so here is the next point: You believe in maximum effort in everything—you strive to attain it in your business and you like to see it in your town. Well, admitting that, your church and all the churches demand of you an unbiased support. You really cannot be classed as a citizen of the highest type until you help the pastor with your spirit as well as your money and attendance.—Sleepy Eye Herald-Dispatch.

Though he has accomplished nothing that we know of to entitle him to the slightest rcognition at home or abroad, Jack Dempsey, heavyweight champion, has been received in England and France like a conquering hero. He happened to lick a dissipated, overfat cowboy, winning the championship by the merest fluke, except for his being just an ordinary cheap slacker of decidedly inferior intelligence. How do the wise men of the press explain the public clamor for such heroes?

A statement by the late James J. Hill is at present being given wide publicity. He said that it would not be long before wheat would be selling at $5 per bushel. The market at present seems to be bearing him out.

Somewhere the sun is always shining. If in the heart, the clouds do not obscure its radiant rays. But if only in the heavens, the clouds envelope the the heart and keep it in impenetrable gloom. Let the sunshine in and the clouds will quickly depart.

Frank Day says Joe Tumulty was the most conceited ass of the last administration. "When thieves fall out, etc."

IN GOOD HANDS

((Thief River Falls Times)

S. V. Arneson, city editor of The Tribune during the past six months, has purchased the Goodridge Banner from I. D. Converse and is getting out the first issue under his editorial leadership this week. Mr. Arneson will add considerable in the way of equipment, including a new press, and the people of the thriving village in the eastern end of the county will be given something they have never had—a high grade newspaper. Mr. Arneson is a young man who has worked in every department of the newspaper business and possesses both the energy and ability to make a go of the venture. The business men of Goodridge have promised to get behind him with all the patronage at their disposal and Mr. Arneson takes charge with everything in his favor. The Times wishes him abundant success.

The appointment by President Harding of Martin Widsten, of Warroad, to be registrar of the land office at Crookston will meet with general favor. Mr. Widsten deserves this slight recognition for his efficient party services and he is especially well qualified for the place. In the last issue of the Warroad Pioneer, Mr. Widsten announces his retirement from the county board of Roseau county, a place he has filled for some years in a most creditable manner.

CARR BUYS NEWSPAPER

Editor Carr, of Middle River, who recently leased his plant to Mr. Hickok, of Chokio, has again entered the newspaper game, having closed a deal last week for the White Rock, South Dakota Journal. Mr. Carr, who was a Thief River Falls visitor Saturday, announces that he will assume editorial charge of the Journal about June 1st. The gentleman has the ability to make the Journal all that the enterprising business men of White Rock want it to be.

An automobile which can run 300 miles on a gallon of fuel costing 5½ cents is claimed to be the invention of H. H. Elmer, of a New York steel company. For the sake of a long suffering public which has been at the mercy of John D. Rockefeller since the automobile came into general use, we hope the reported invention will materialize. It can't come any too soon to suit us. but there need be no great hurry about planning benefits for the oil magnates just yet.

Sam Gordon has been re-elected state printer by the state Printing commission consisting of Secretary of State Mike Holm, Auditor Chase and Treasurer Rines. The action will be especially pleasing to country printers, since Mr. Gordon has maintained a policy of fairness to the boys from the country which resulted in the passage by the state editorial association of a resolution endorsing him for re-appointment. The members of the commission did the right thing.

Candidates for office find themselves in a devil of a fix this year for issues upon which to go before the public. The liquor issue used to be a regular standby, and the man who could correctly guage the temper of his constituents upon this subject, usually won. The tonnage tax issue served very well in some parts of the state. Now that is absent as a factor in the flim-flamming process. Woman's suffrage has been disposed of. In the absence of something better, the liquor issue may come back in the form of a demand for light wines and beer. The man who uses it as an issue may wish he was dead when the intelligent voters get to asking him questions.

Archie Vernon, Past Commander of the American Legion, has filed as a candidate for justice of the supreme court against Judge Quinn. Mr. Vernon is a former newspaper man and is now practicing law at Little Falls. He served one term as chief clerk of the house. It is expected he will receive general support from the service men of the state with whom he is extremely popular. Justice Quinn, who has been in poor health, has filed for re-election and was endorsed by the recent Repubilcan convention.

What looks like a modern miracle in surgery was attained by New York doctors when they performed an operation transferring the pupils of a dying man to the eyes of a youth who had been blind for four years, thus retoring the young man's eyesight. In this day and age facts may truly be said to be stranger than fiction.

A howitzer used by American forces in the Revolutionary war and the war of 1812 was destroyed at the Fort Ridgely State Park on the Minnesota river, when unknown persons set off a heavy charge of powder in the old gun last week. C. H. Hopkins, park commissioner, announced that although the relic was blown into many pieces by the explosion, it will be put together again and replaced on its former base.

Don't pass judgment on your neighbor. Consider the fact that all people in the world are more or less equal. There is food for thought in the following short rhyme written by the late Joaquin Miller: "In men whom men condemn as ill, I find so much of goodness still; in men whom men account divine, I find so much of sin and blot, I hesitate to draw the line between the two, where God has not."

A DUTY OF CITIZENSHIP

One of the outstanding duties of good citizenship is an unwritten obligation to do everything possible to advance the best interests of the community where one lives.

This is a matter for the many, not for the few, because it is only by the earnest co-operation of the multitude that any community may attain its highest place and station.

Too often, this fact is overlooked and sadly neglected. There are too many who are so busily engrossed with their own little affairs and pet projects that they fail to see this outstanding duty of citizenship. There is too much selfishness in the world. There are too many of those who place their own little activities above the general welfare. This fact never should be lost sight of; the more a community prospers, the more an individual will prosper. Therefore, it resolves itself into rather a selfish proposition after all.

Most weddings are written up as quiet affairs, but if we are to judge from the latest in woman's raiment, there will be some noisy ones this summer.

MINNESOTA HISTORICAL SOCIETY

JUNIORS AND SENIORS BANQUET THURSDAY

Affair Attended By Students, Faculty and Local Citizens

The Junior-Senior banquet was given Tuesday evening in the manual training room of the Goodridge school. The room was prettily decorated in the class colors, maroon and gold, by the juniors. Streamers and shaded lights was the arrangement, which was very effective. Three tables were set. They were decorated with vases of green vines, crystal candle sticks holding red candles, nut baskets made by the juniors, in maroon and gold. Place cards were used to usher the guests to their places.

A very delicious two-course lunch was prepared and served by the cooking classes under the able direction of Miss Giefer. Between courses the senior class sang "It isn't any trouble to S-m-i-l-e." Roy Olson president of the senior class, gave a toast in a very able manner, and turned the affairs of the senior class over to the junior class. Eunice Tvedt president of the junior class responded in a manner which showed much ability and training along the lines of oratory. She introduced Mr. Norby as toastmaster for the evening.

Each member of the junior class gave a short toast, some in the form of advice to the seniors, and others expressed the aims of the present junior class for the year 1923. Carl Christiansen and Nick Bundhund spoke in behalf of the school board, and their remarks were directed along the line of the progress the school has made during the past four years, giving a great deal of credit to the efforts Mr. Norby has put forth during his stay here.

Mrs. Booren and Miss Vaughn responded in a very fitting manner in the way of advice to the senior class. Mrs. Theodore Tandberg and Miss Ida Tandberg were also called on for a response. Theodore Tandberg gave a short talk expressing his views on the value of a high school education in the business world. John Nystul was introduced with an appropriate story and he was up at once with a comeback equally as strong, and vouched for the abilities of the seniors and juniors who have formed a neuclues of the high school present year.

I. T. Simley superintendent of the Thief River Falls schools delivered a very fine address, giving advice to the seniors as they go out on the various walks of life, and telling of his experience as a student and at the head of school work.

A rising vot of thanks was given to Miss Giefer, Mrs. McDonald and the cooking class for the lovely banquet which they served.

This banquet was an important affair to Goodridge people on account of it being the first class graduating from the Goodridge school. It will be a memorable event in the minds of the seniors, juniors, members of the school board of education, the faculty and others present.

Mr. and Mrs. I. T. Simley of Thief River Falls and Miss Ida Tandberg were the out-of-town guests.

McVEY BOYS NARROWLY AVERT SERIOUS AUTOMOBILE MISHAP

The two sons of J. M. McVey, who recently moved here from Iowa and is farming south of town, experienced what may have developed into a serious accident late Thursday afternoon when their automobile lost a wheel and nearly ran into a ditch several feet in depth.

The young men had left Goodridge for home in their Ford speedster and while going along the road at a moderate rate of speed when two and one-half miles southeast of Goodridge, one of the front wheels came off and the car swerved toward the ditch.

The older of the McVey boys was driving and had perfect control of the little car. He stopped it just when the front wheels were on the brink of the ditch bank and held it there.

After a couple of hours of tugging, the young men extricated their car and outside of a slight scare are none the worse off. It is not believed that the car was damaged to any great extent.

Reiner Farmers' Club Picnic

The Reiner Farmers' club will give a picnic Sunday P. M., May 21st at the Torgerson school house, five miles east of Goodridge. Speakers have been secured and a good program is promised. Lunch will be served. A cordial invitation to attend is extended to all.

GOODRIDGE MAN FILES FOR JUDGE

George M. Wilson, Farmer-Lawyer, Announces His Candidacy

George M. Wilson, who for the past two years has been engaged in agricultural work on a farm eight miles northeast of Goodridge, yesterday filed for district judge of the Fourteenth judicial district against Judge Andrew Grindeland, the incumbent.

Although Mr. Wilson's announcement was expected among a few of his most intimate friends, his filing yesterday came as a complete surprise to many. It was whispered early in the campaign that Mr. Wilson was considering the proposition o flinging his hat into the ring, but nothing definite was heard from him until the announcement of his filing.

Mr. Wilson, who came to eastern Marshall county in September, 1920, has since been engaged in agricultural pursuits on his 1,400-acre farm north of this city. Of this amount of land he has broken up and seeded about 400 acres and expects to till still a greater acreage this year and next. So far he has not paid much attention to raising livestock, there being but a few head now on his farm.

Mr. Wilson was born near Bloomington, Ill., July 5, 1872, and studied law at the Bloomington School of Law. He later took a post-graduate course in the profession at the Chicago Law School, after which he practiced in Chicago for more than 25 years, or until he took up his home in northern Minnesota.

He has been a farmer, however, all his life and has taken a keen interest in agricultural problems even during the time he spent as a lawyer in Chicago. Mr. Wilson incidentally took to the undeveloped sections of the Northwest rather than pay the king's ransome necessary to the ownership of land in Iowa or Illinois.

In an interview with The Banner editor yesterday, Mr. Wilson expressed his unqualified belief in the future of this section of the Northwest and declared that everything considered he could think of no other place in the entire country that holds better possibilities for the agriculturist and dairyman than this section.

"It is at the request of friends and farmers residing in northwastern Minnesota and southeastern Marshall county that I concluded to get into the race for judge," said Mr. Wilson yesterday. "I have heard a great deal of opposition to the administration of the incumbent and I believe that I can successfully administer the high duties of the office.

MANY PERSONS VENTURE OUT TO HEAR LOCAL BAND

The band concert Saturday evening was well attended. There were a good many people in from the country as well as most of the Goodridge citizens. The band gave a fine concert on the street and also played a few selections in Stephenson's confectionery store, where they were served a lunch.

A great deal of credit is due John Nystul, director of the band, for the time and effort he has put forth this year in getting the band in such fine shape. It is unusual for a village the size of Goodridge to be represented by such a splendid musical organization.

Merchants Paint Up.

Many of the merchants have been changing the outer appearance of their business places by applying a coat of fresh paint. It makes one think of spring housecleaning. Mr. Wold, owner of The Banner office, is not a bit behind the times, as he is dolling this building up and making it look like new.

Confectionery Store Redecorated.

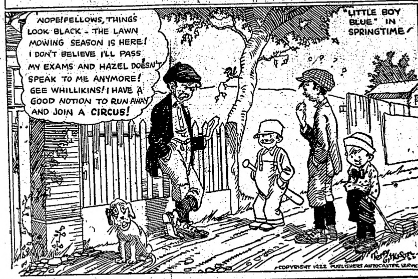
Melvin Stephenson has painted and redecorated the interior of his confectionery store. It looks like a regular place now and is very inviting to those who feel inclined to drop in for a cup of coffee or a cool sundae.

To Lecture On Temperance

Rev. K. E. Peterson, representative of the Minnesota Anti-Saloon league, will speak at the Norwegian Lutheran church on Sunday evening, May 14th, at 7:30. Services will be in English. Rev. Peterson is a well known speaker and will be able to bring with him an up-to-date presentation of the temperance situation.

You must admit that the present Mexican government seems to be getting along very well without official recognition from us.

Kids is Kids



NOPE! FELLOWS, THINGS LOOK BLACK - THE LAWN MOWING SEASON IS HERE! I DON'T BELIEVE I'LL PASS MY EXAMS AND HAZEL DOESN'T SPEAK TO ME ANYMORE! GEE WHILLIKINS! I HAVE A GOOD NOTION TO RUN AWAY AND JOIN A CIRCUS!
"LITTLE BOY BLUE" IN SPRINGTIME

LEGION WILL HOLD SALE OF POPPIES

Offer Artificial Flowers for Decoration Day at Very Nominal Cost

The Legion will have on sale on Monday, May 29th, a large number of poppies for decoration day. Last year the supply of poppies ordered by the Legion proved inadequate, but this year arrangements have been made to have plenty on hand. The proceeds will go to a fund for decorating overseas graves. The prices will be 10 cents for the small size and 25 cents for the larger ones.

The poppies are to be artificial and are made by disabled soldiers in the different army hospitals. The Legion will also make arrangements to decorate the graves of ex-soldiers in this community with wreaths, and they plan to place a bronze marker on each grave.

Goodridge members of the Legion have under way plans for a Memorial day program, at which time it is expected that a speaker will be present and appropriate music and exercises. When details in this connection are completed The Banner will print the program.

A. DORN, SALESMAN, SHIFTS FROM SWIFT PACKING GOODS

A. Dorn of Thief River Falls, formerly salesman for Swift & Co., was a Goodirdge visitor Thursday. Mr. Dorn now represents the Manchester Biscuit company. What is Swift & Co's. loss is the gain of the Manchester Biscuit company. They are getting the real stuff. Mr. Dorn is a first class salesman and an all around good fellow.

Merchant Sues Catholic Priest on Slander Charge

It is reported that Ignacy Zakrewеski, prince merchant and landman at Florian, an inland point located east of Stephen, has sued the priest of the Catholic church at that point for slander. He claims that the priest who is a late one from Russia has ordered all members of the Florian church to cease buying from Ignacy, and as his sales were often the best in the country, now dwindled to almost nothing, hence the suit which will be heard in the next term of court.

LADIES' AID AUCTION SALE

The Ladies' Aid society of the Lutheran church will hold an auction sale at the church May 17th, at 7:30 o'clock in the evening. Articles which have been made by the various members of the Aid society will be sold at auction; also the four quilts on which chances have been sold will be given out. Lunch will also be served. Everybody should be sure to be present; you may be the lucky one and get at least one of the quilts.

J. M. BISHOP ANNOUNCES CANDIDACY FOR JUDGESHIP

J. M. Bishop, Thief River Falls lawyer and former judge, yesterday filed papers with the secretary of state and has announced his candidacy for judge of the district court against Andrew Grindeland, the incumbent.

The filing of Mr. Bishop has been expected for some time among those familiar with county and district politics and it is thought by many that he will prove a serious contender for the nomination. He has spent his entire lifetime in the legal profession and is considered entirely familiar with the duties devolving upon the high office. He has made his home in Thief River Falls for a number of years and possesses a wide acquaintance among the people generally.

SHOWERS COMMENCING FRIDAY EVENING BOON

The rain showers commencing Friday evening and continuing up to Tuesday night have greatly assisted crops, grass and gardens. The fields for miles around Goodridge never looked better. Goodridge citizens who have their gardens planted are just in time, and those who have not are hustling around getting same done. Everyone wants to be the first to get fresh greens from their own garden.

Miss Urdahl Bridesmaid.

Miss Della Urdahl went to Thief River Falls Saturday to act as bridesmaid the same evening for Miss Carrie Prestobak, who was married to P. E. Bergh of St. Hilaire. Miss Urdahl returned to Goodridge on Sunday by auto.

It is claimed that there are nearly 2,000,000 unemployed persons in this country, not counting those on the government payroll.

Community Club Meeting Is Postponed One Week

On account of the inclement weather prevailing throughout this section of the country and because of the resultant bad roads, etc., the Community club meeting to be held in Goodridge tomorrow evening (Friday) has been postponed one week, and will be held Friday evening, May 19, at which time the committee in charge of arrangements plan to have well-known speakers address the local body. A musical program and a number of other events will be included, announcement of which will be made in next week's issue of The Banner.

NOTED LECTURER TO SPEAK AT TRINITY

Sec'ty. of Lutheran Brotherhood of Minnesota to Address Church Body

John L. Sundean, secretary of the Lutheran Brotherhood of Minnesota, noted lecturer, lawyer, rally leader and organizer, will come to Thief River Falls Saturday and will speak before the Augustana church conference to be held at Squaw Point Saturday afternoon.

Mr. Sundean will also speak at the Trinity Lutheran church Saturday evening and will endeavor to organize a Men's club as a regular feature of the church's religious work. Rev. T. E. Sweger, the pastor, has written to various Lutheran denominations in nearby cities to come to Thief River Falls on Saturday in order to have an opportunity of hearing Mr. Sundean, and it is expected that a large number will avail themselves of the opportunity.

Gunnar B. Bjornson of the Icelandic Synod, editor of the Minnesota Mascot and former president of the Minnesota Editorial association and chairman of the Republican state central committee of Minnesota, has this to say of Mr. Sundean's ability as a lecturer and speaker:

"If your son had heard Mr. Sundean's lecture on Martin Luther for an hour and a quarter, and he went directly to another church to hear the lecture again; if substantial Lutherans who heard the lecture told you it made them better Lutherans; if men you knew, who are not Lutherans, nor even Scandinavians, but who heard Mr. Sundean and drove twenty miles to hear him again, declared that it made them feel like they ought to be Lutherans; if your pastor heard this lecture three different times, and said to you what my pastor has said about it; if you yourself had heard the lecture at Minneota, Cottonwood, Clarkfield, Canby, and Mankato, and enjoyed hearing it the fifth time more than the first,—then you would realize why I urge the Lutherans who have a chance to hear this original and forceful lecture to see to it that the auditoriums in which Mr. Sundean speaks are packed, and don't say, after the lecture, that you wish everybody had been there to hear it, like young and old have said, in some towns,—but get the people out."

UNITED STATES CLAIM AGENT IS VISITOR IN GOODRIDGE

George Reed, representative of the United States Veterans' bureau of the Fargo division was in Goodridge on Thursday and while here interviewed a number of ex-service men relative to their claims against the government, and promised to assist them in every way that he could.

Mr. Reed advised all ex-soldiers and sailors who have dropped their war risk insurance to reinstate at the earliest time as he considers it the cheapest and best form of insurance available.

FARMER-LABOR ENDORSE BARNETT FOR CONGRESS

James Barnett of Thief River Falls was endorsed for congressman from the Ninth congressional district by the Farmer-Laborites at a district conference held last week at the city council chambers.

An effort will be made to secure Mr. Barnett's approval of the endorsement and to secure his filing.

Forty-five delegates gathered for the district conference. Only district politics were discussed.

GOODRIDGE MATRONS DEFEAT GIRLS' CLUB

Manhandle Local Maidens and Handily Thrust Defeat Upon Them

The long looked for and much heralded encounter between the Goodridge Matrons and the local Girls' baseball teams became a part of history Thursday evening, when the two teams clashed on the local diamond, and the former defeated their younger sisters, 7 to 5.

A goodly number of spectators, evenly divided in respect to sympathies, witnessed the game. Although the ardor of the rooters was temporarily blanketed by the difficulty of transposing masculine terms and epithets to feminine players, the sidelines can in no wise be chided for lack of verbiage.

Mrs. Morgan Vaughan held sway on the mound for the Matrons and Mrs. George Josephson was the agile and unerring recipient of the spheroid as it whizzed and whirled in undulating curves over the plate with projectile like rapidity and carrying in its wake dire casualties in the batting lists of the Maids.

Mrs. Jay Payne hugged first base and proved a veritable mountain of impassability on the occasions when a play was staged in that quarter. With Mrs. Ole Kirklie on second, Mrs. Joe McCabe holding down short-stop and Mrs. Anton Lien on third the Matrons presented a formidable infield and were well supported in the outfield where Mrs. Geo. Johnson, Mrs. Melvin Stephenson and Mrs. Chas. Breen had intrenched themselves right, left and center respectively.

The fight was furious from the outset and after a few minutes of play Mrs. Payne scored a clean hit and sent the ball directly over center field. With a two bag lead and with Mrs. Kirklie up to bat, third base was a cinch and nothing could prevent a tally when Mrs. Anton Lien banged a grounder which, unintercepted, came to its quietus on the very outskirts of center field. Before outs were called, Mrs. Kirklie tucked away another score and the Maids came in.

Agnes Vaughan, the close propinquity of whose family tree to that of the opposing pitcher showed that she was indeed "a chip of the old block," proved herself a twirler of no mean ability. Maggie Johnson conducted herself very creditably behind the plate and was the chief point-getter for the Maids.

The young ladies rallied in the third inning when Maggie Johnson scored a two base hit, stole third and came home on an overthrow. In the fifth, Susie Lindwick started a potential merry go round by scoring a three bagger. Gladys Wilson singled and advanced to second when Myrtle Iverson sacrificed. Miss Tanem made a safe hit and the young ladies added two more scores.

At the end of the seventh the score-keepers tally showed a count of seven to five with the Matrons on the long end. One more inning resulted in no score on either side and the game was called because of darkness.

The prowess of the Matrons in the realm of baseball came as a surprise to local fans. Previous to the game the Maids team had received considerable publicity and their defeat upsets the dope of local prognosticators and puts a new wrinkle in the baseball situation.

According to announcements, a second game will be scheduled in the not very distant future.

Following is the line-up:

Matrons—Mrs. Jay Payne, 1b; Mrs. O. Kirklie, 2b; Mrs. Anton Lien, 3b; Mrs. Morgan Vaughan, p; Mrs. Geo. Josephson, c; Mrs. M. Stephenson, rf; Mrs. Chas. Breen, cf; Mrs. O. Kirklie, lf.

Maids—Violet Josephson, 1b; Susie Lindwick, 2b; Gladys Wilson, 3b; Agnes Vaughan, p; Maggie Johnson, c; Seren Tanem, rf; Maybelle Tveeton, cf; Greta Gulrud, lf.

CREAMERY CHURNS BUTTER FIRST TIME THIS SEASON

Last Friday the local creamery did their first churning since they reopened. They are now ready for business in earnest, and will churn here instead of shipping the cream to Thief River Falls as they have been doing. With the co-operation of the people of Goodridge as well as those of the country, they will be able to make it a paying proposition.

Some conversationalists give promise of "drying up" about the same time that the Pacific ocean does.

Sons of Norway Ask Building Bids

Sealed Proposals to Be Received for Structure to Be Erected Here

Plans and Specifications Are Prepared by Architect Carl Nelson

The board of directors of the Sons of Norway this week advertised for bids for the building of the organization's home to be erected in Thief River Falls this summer on the site just east of the Soo Line depot.

The sealed proposals will be received up to Wednesday, May 31, at the office of the president of the building corporation, H. S. Dahlen, at which time they will be considered by the members of the committee in charge of the erection of the structure.

The plans and specifications for the building have been prepared by Carl Nelson, architect, of Mahnomen, Minn. A certified check of five per cent of the amount of the bid must accompany each proposal in order to insure the signing of the contract and furnishing of the bond. The successful bidder must execute the contract and furnish the usual contractor's bond within ten days after the award of the contract has been made.

It is also specified that the successful bidder must agree to complete the building within ninety days after the date of awarding the contract, and the board of directors reserve the right to reject any or all the bids received.

The regular meeting of the Sons of Norway is to be held Thursday evening, at which time it is expected that the board will lay before the body the details connected with the construction of the new home. There will also be several initiations into the order—Tribune, Thief River Falls

Revolting Crime is Committed at Conway

Earl Moore, who has been working around Conway for the better part of the past year, is in the county jail charged with a most revolting crime. Moore, who is 25 years of age, is charged with having criminally assaulted Mildred, the six-year-old daughter of Mr. and Mrs. Joseph Swella, of Conway, and communicated to the child a loathsome disease. The crime is alleged to have been committed on April 8th.

The baby girl did not realize the gravity of the offense committed against her and did not complain to her parents. A few days after Mrs. Swella, while bathing her little daughter, discovered that the child was suffering from some ailment and took her to a physician who at once told the parents of the nature of the disease. Investigation was commenced and on Saturday Moore was arrested and taken before Justice John V. Stary, at Conway. After the evidence had been presented Moore who was not represented by an attorney, did not go on the witness stand and the Justice bound him over to the district court under $2,500 bonds. He was unable to procure bail and was lodged in the county jail.—Walsh County Record.

HOORAY!

(From Bemidji Sentinel)

A road from Thief River Falls to Red Lake is now assured as the result of action taken by the county board this week in ordering an immediate survey from the territory known as the sand ridge to the point on the west side of the lake. The county does this work and the money will be refunded to the county by the state. There will be about $10,000 available for this work and construction will begin as soon as possible.

Young Girl Breaks Bone In Fall From Farm Gate

The ten-year-old daughter of Casper Weiner, farmer living near Thief River Falls, while swinging on a gate on the farm Sunday afternoon, lost her balance and fell to the ground breaking her left arm near the shoulder blade. Dr. L. F. Fisher attended the young girl, who is now recovering.

The head barber will hand us a bill of fare to order from.

Now that they deliver nothing but water to the rooms, the hotels have less calls for water.

If we are the posterity that our forefathers prayed for, what sort of folks do you suppose our posterity will be?

What the country needs is another administration that will promise a full dinner pail and deliver the goods.

Prominent Speakers Will Address Local Labor Men

E. G. Hall, president of the Minnesota State Federation of Labor, in a communication to G. H. Huseby, secretary of the Local Federation of Union Men, has accepted an invitation to address the labor body of Thief River Falls on Friday evening, May 12, at the Princess theater, the meeting to open at 7:45 P. M.

Mr. Hall will be accompanied by Louis Smith, organizer of the Boot and Shoe Workers, one of the best-known speakers on labor topics in the country who, it is expected, will deliver the main address.

In Mr. Hall's letter to Mr. Huseby, the state president states that it is highly probable that Paul J. Smith of the American Federation of Labor, will also be present.

RED LAKE FALLS

(From The Gazette)

One of the prettiest of the spring weddings took place Wednesday morning at 9 o'clock at St. Mary's Catholic church in this city when Miss Helen Josephine Hagl, of Lake Pleasant, became the bride of Frank Loeffler, one of the prominent young farmers of Lake Pleasant. The ceremony was performed by the Rev. Fr. Henry Pelger. The bride wore a navy blue suit and hat to match, and carried a bouquet of white and pink carnations. She was attended by her sister, Miss Laura Hagl. The best man was John Loeffler, brother of the groom A wedding dinner was served at the home of the groom's brother and brides' sister, Mr. and Mrs. Joseph Loeffler of Terrebonne. The newlyweds will make their home on his farm six miles south of this city.

Mrs. Jacob Schehr of Lake Pleasant was married Monday noon at the home of her son-in-law and daughter, Mr. and Mrs. Gust Miller, to George Watkins of Chicago. The ceremony was performed by the Rev. Dr. W. H. Evans, pastor of the Presbyterian church. The bride was attended by her granddaughter, Miss Eleanor Miller and the groom by Adam Schehr, son of the bride. A wedding dinner was served at the Schehr home to the immediate relatives and the newlyweds charivaried by their friends. The groom has a farm near Radium, Marshall county but the couple will make their home on the Schehr farm in Lake Pleasant.

Harold Zaiser has accepted a position as buttermaker at the local creamery and has already commenced his work.

Miss Rebecca Hunt returned home Tuesday from a visit at the home of her brother, E. F. Hunt at Thief River Falls.

A little son arrived Wednesday morning at the home of Mr. and Mrs. Clayton Walker of Gervais.

A son was born to Mr. and Mrs. George W. Christie at St. Vincent's hospital at Crookston Monday morning.

Leo Steinert informs the Gazette today that he is contemplating a trip to his old boyhood home in Germany this summer and would like to have a companion to make the trip with. He expects to leave here about the middle of June.

He lived here till eight years ago when he moved to Green Bay to make his home.

Mrs. Tennis Lemieux suffered a stroke of paralysis at her home in this city Sunday evening and her condition is very serious. Her right side is entirely paralyzed and she is unable to speak. While her condition is serious her many friends hope that she may again regain her health.

Mrs. J. C. Benoit and Miss Corinda Nash received the sad news recently that their uncle. Joseph Corbeil of Green Bay, Wis., had died April 28th of old age. Mr. Corbeil was 89 years, and 8 mos. old at the time of his death. He was born in Montreal, Canada, and came to this country in 1883, settling on a farm in Lambert town. He lived on the farm till 1902 when he sold his land and moved to Red Lake Falls.

To Farm on Extensive Scale in West Canada

What is said to be one of the largest shipments of farming tools by a single individual from the States to western Canada, arrived in Winnipeg one day last week.

The outfit belongs to H. W. Simms, of Grand Forks and is estimated to be worth $75,000, and the shipment required 14 cars to transport it to Canada where Mr. Simms will farm on an extensive plan.

It is his intention to seed several thousand acres of flax and the outfits he operates large enough to seed from 160 to 190 acres each day.

Citation for Hearing on Petition to Sell, Mortgage or Lease Land

Estate of Christian Christianson.

State of Minnesota, County of Pennington—ss. In Probate Court.

In the matter of the estate of Christian Christianson.

The State of Minnesota, to Carl J. Christianson, Gladys C. Christianson, Alice J. Christianson, , Orville M. Christianson, Merrit H. Christianson and Mae K. Christianson, all persons interested in the mortgaging of certain lands belonging to said estate. The petition of Olive C. Christianson as representative of the above named estate, being duly filed in this court representing that it is necessary and for the best interest of said estate and of all interested therein that certain lands of said estate described therein be mortgaged and praying that a license to be granted to mortgage the same.

Now, Therefore, You and each of you, are hereby cited and required to show cause, if any you have, before this court, at the Probate Court rooms, in the Court House in Thief River Falls, County of Pennington, State of Minnesota, on the 27th day of May, 1922, at 10 o'clock A. M., why the prayer of said petition should not be granted.

Witness, The Judge of said court, and the seal of said court, this 28th day of April, 1922.

LARS BAKKE,
Judge of Probate Court.
(Court Seal). M-5-19

MORTGAGE FORECLOSURE SALE

Notice is hereby given that default has been made in the conditions of a certain mortgage containing power of sale, executed by Tollef Loyland and Tina Loyland, his wife, mortgagors, to First State Bank of Thief River Falls, a corporation under the laws of the State of Minnesota, mortgagee, dated the 20th day of January, 1917, and duly recorded in the office of the Register of Deeds in and for Pennington County, Minnesota, on the 25th day of January, 1917, at 1:45 o'clock P. M., in Book 54 of Mortgages at page 297, which said mortgage was thereafter and on the 31st day of January, 1917, for a valuable consideration and by an instrument in writing, dated on that day, duly executed and acknowledged by said First State Bank of Thief River Falls, sold, assigned and transferred to Edwin White, which said written assignment was thereafter and on the 21st day of February, 1917, at 1:00 o'clock P. M. of that day duly recorded in the office of the Register of Deeds in and for Pennington County, Minnesota, in Book 56 of Mortgages on page 352 thereof, which said mortgage was thereafter and on the 4th day of May, 1917, for a valuable consideration and by an instrument in writing, dated on that day, duly executed and acknowledged by Edwin White sold, assigned and transferred to Gertrude M. Harlow by said Edwin White, which said written assignment was thereafter and on the 10th day of May, 1917, at 1:00 o'clock in the P. M. of that day duly recorded in the office of the Register of Deeds in and for Pennington County, Minnesota, in Book 56 of Mortgages on page 385 thereof, and at the time of this notice there is claimed to be due and is actually due on the said mortgage, according to the terms thereof, the total sum of Two Thousand and Thirty-one and 08-100 ($2,031.08) Dollars, on the note secured by said mortgage, consisting of the principal sum of Two Thousand ($2,000.00) dollars, and interest thereon amounting to the sum of Thirty-one and 08-100 ($31.08) dollars, which said default has continued to date by virtue of the failure and neglect of said mortgagors to pay said sums, although demand has been made therefore, and no action or proceeding having been instituted at law or other-wise to recover the debt or any part thereof secured by the said mortgage.

NOW, Therefore, Notice is hereby given that by virtue of the power of sale contained in the said mortgage and of the statute made and provided the said mortgage will be foreclosed by a sale of the mortgaged premises therein described at public auction, to the highest bidder for cash, at the main front door of the Court House in the City of Thief River Falls, Pennington County, Minnesota, on Monday, June 26th, 1922, at 10:00 o'clock A. M. of that day, to satisfy the amount that shall then be due on the said mortgage with interest thereon from the date hereof and the costs and expenses of such sale and the sum of Seventy-five ($75.00) dollars Attorneys' fees as stipulated in said mortgage in case of foreclosure.

The premises described in the said mortgage and so to be sold is all that tract or parcel of land lying and being in the County of Pennington and State of Minnesota, described as follows, to-wit; The Northeast (NE¼) Quarter of Section Sixteen (16) Township One Hundred Fifty-three (153) North, of Range Thirty-nine (39) West of the Fifth Principal Meridian, containing one hundred sixty (160) acres, more or less, according to the United States Government Survey thereof.

Dated at Thief River Falls, Minn., this 3rd day of May, 1922.

GERTRUDE M. HARLOW,
Assignee of Assignee of Mortgagee.
G. HOWARD SMITH,
Attorney for Assignee,
Thief River Falls, Minnesota.

Every Potato Means Additional Profit

When the price per bushel you receive for your potatoes is low, good profits can still be made by saving time and labor and by getting every potato in the field. It costs you no more to harvest completely and you get the extra dollars for your increased crop, if you use a

HOOVER
POTATO DIGGER

The Hoover Potato Digger digs up all the potatoes in the field and piles them in neat rows where they can be handled with minimum labor. This digger has proved to be an especially good investment to all potato-growers who have used it.

The shovel is of best quality high-carbon crucible steel and shaped so as to gather the potatoes with the least possible loss. No danger of cutting the potatoes to the extent that a plow or hoe does. Stone guards can be used in stony ground. You can raise and lower the shovel while the machine is in motion. All adjustments are made from the seat by convenient levers.

The vine-separating rear rack has a backward and forward motion that sifts out all dirt and deposits the potatoes in a compact row on clean ground directly at the rear of the machine, while the vines and trash are deposited at one side.

Four roller bearings and wide tires on the wheels assure light draft.

Patented Double-Action Front Truck permits the digger to be turned in a very short space.

Solid steel frame, strong main sides of Bessemer steel, beams of best quality charcoal malleable castings, and steel chains and hardened steel sprockets that greatly resist wear.

Don't fail to see the Hoover Potato Digger before you harvest your potato crop; its use means greater profits. Also ask us about Hoover Engine Drive Potato Diggers—two-horse machines under all conditions, and any other potato tools you require.

Goodridge Mercantile Company

Hoover Potato Digger

Smokers Cause of Many Fires

20 Per Cent of Forest Destruction Laid to Burning Cigarettes. Etc.

Waste From These Sources Amounts to More Than $18,000,000 a Year

Twenty per cent of all the forest fires started by men in the National Forests of the West during 1921, were caused by careless tobacco smokers, according to figures compiled by the Forest Service, United States Department of Agriculture. In California, Arizona, and New Mexico one out of every four forest fires due to human agencies was started by burning cigarettes, cigars, matches, or pipeheels carelessly thrown aside by smokers while in the woods. In other parts of the west the percentage of smokers' fires ranged from 12 to 18 per cent. The total number of forest fires on the western national forests during the past season was 5,131, of which number 1,444 were caused by lighting, 732 by smokers, and 2,955 by other human agencies.

A Serious Fire Hazard

Careless smokers, foresters point out, are responsible for one of the most serious fire hazards in the country, because they fail to take proper precautions with burning tobacco and matches. The preventable fire waste of all kinds from these causes averages more than $18,000,000 a year, according to figures published by the National Board of Fire Underwriters. The "tailor-made" cigarette is the principal offender in the woods, where a glowing "snipe" thoughtlessly thrown down on the forest floor may cost the public thousands of dollars for fire fighting, to say nothing of the value of timber destroyed, the desolation of science beauty spots, and the harm done to waterflow and wild life.

Disastrous results from smoking in the woods are most to be feared when the inflammable material that is nearly everywhere present becomes very dry. In the west this condition is generally chronic throughout the summer. The increasing popularity of the national forests, which were visited last year by more than 5,250,000 motorists, tourists, and sportsmen, makes the prevention and control of smokers' fires more and more difficult. To lessen the fire risk, and to set a good example, the forest rangers and other field officers of the forest service have very generally pledged themselves not to smoke in the woods in regions and seasons of danger.

Co-operation Sought

Repeated efforts have been made by the forest service, the National Board of Fire Underwriters, and other organizations to enlist the co-operation of tobacco manufactures and packers in educating smokers to be careful with burning tobacco. Some of these organizations hold that since the hazard of fire is inseparable from the use of smoking tobacco, a moral obligation rests on manufacturers or packers of tobacco to enclose fire-warning slips with their products. Resolutions embodying this sentiment have been passed by the national convention of Insurance commissioners, the Fire Marshals' Association of North America, the International Association of Fire Engineers, and the Railway Fire Protection association.

In Canada, tobacco manufacturers are now enclosing little red fire-warning slips in their cigarette packages. Similar slips featuring care with fire in the home and in the forest are also inserted in match boxes by one of the largest match companies and in cartridge packages by a number of the leading small arms and ammunition manufacturers of the United States.

Civil Service Exams. to Be Given Again

Thomas H. Chittick, local secretary of the United States civil service commission, has announced that examinations will be held at the postoffice May 10 and 24 to fill certain positions, there being a shortage of candidates for a trained nurse in the public health service and under the veterans' bureau.

The civil service commission invites special attention to the fact that in examinations held recently in Thief River Falls, Minn., and other cities throughout the United States for junior engineer, bureau of standards, fish culturist, bureau of fisheries, assistant agricultural economist and junior agricultural economist (marketing) in the bureau of markets and crop estimates, department of agriculture, applicants were not secured in the number desired, and that these examinations will be held again. The fish examination will be held on May 10; the others will be held on May 24.

Persons interested in these or other examinations should apply to the secretary of the U. S. civil service board at the local post office for detailed information and application blanks.

VISIT OF REV. JOHNSTON

Rev. Thomas E. Johnston, of Bisbee, N. D., visited his son, L. R. Johnston, of this city, several days last week, returning to his home on Friday. Mr. Johnston, who has charge of the Presbyterian church at Bisbee, was closely associated with the early settlement of the state of North Dakota, and in his reminiscent moods, related some extremely interesting stories of the pioneer days.

It is claimed that there are nearly 2,000,000 unemployed persons in this country, not counting those on the government payroll.

Bass Season to Open June 15; Limit is 15

The fishing season for any variety of trout, except lake trout, opened Saturday, April 15. The season for pike, pickerel, perch, sunfish, muskellunge, catfish, bullheads, crappies and any other variety of fish except bass starts May 15. The bass season will not open until June 15. The Minnesota game laws make it unlawful to fish with more than one line; to fish within fifty feet of any fishway; to buy or sell black bass, trout or muskellunge; to take fish in nets except under licensed privilege; to spear pickerel from March 1 to May 15; to spear pickerel with the aid of artificial lights; to deposit sawdust or refuse in waters where fish abound; to sell fish caught in waters lying within a county having a population of 200,000 or over; to take fish in any manner than by angling with hook and line, except that pickerel, suckers, redhorse, buffalo-fish, whitefish, sturgeon, dogfish, eel-pout, garfish, carp, sheephead and bullheads may be speared during the open season provided therefor. The sale of fish is allowed during open season except that the sale of brook trout, lake trout, salmon, muskellunge and bass is prohibited. Sale of pike, except from waters opened by the commissioner is unlawful. Sale of other fish is prohibited at discretion of commissioner. The size of fish allowed is also an important matter. Pike and pickerel, fourteen inches in length; lake trout or salmon, and whitefish, sixteen inches in length; black bass, nine inches; trout (except lake trout), seven inches; rock sturgeon and spoonbill, fifteen pounds, dressed; shovelnose sturgeon, one pound dressed; sandpike or saugers, ten inches; rock bass, six inches; sunfish, five inches, muskellunge, thirty inches; fish to be measured from tip of the snout to fork of the tail.

The daily limit of all varieties of game fish except bass and perch is 25 in one day; only 15 bass may be taken in a day, and only 25 of all varieties of fish except perch.

Farm Wage Goes Up to $35.75 a Month

The county farm bureau offices have received from the state farm bureau federation the results of the monthly farm labor survey conducted by the state organization. It shows the demand for farm help is normal in the majority of counties, and that farm wages have risen during the last 30 days. The average wage now being paid, the reports from county farm bureaus show, is $1.58 a day for general work, or $35.75 a month for laborers agreeing to stay on the job for eight months. A month ago, the farm bureau survey showed the daily wage averaged $1.37, and the monthly wage $34.

Wool Men Again Voting to Pool

The statewide wool pooling plan is making progress, according to reports to the county farm bureau. Wool producers in Aitkin county were the first to met to consider new marketing contracts submitted to county farm bureaus and wool growers' associations through the state farm bureau federation. The Aitkin county growers voted unanimously to pool. They reported that buyers were offering 17 and 18 cents a pound, while on the same day, Sherburne county woolmen received of a net return of 25½ cents a pound for wool marketed through the pool established by the Wabasha county farm bureau.

The south has the negro problem, and the Pacific coast, while the people who live in some other sections are a problem unto themselves.

Red Lake Falls Secures Plant

Big Fibre Plant to Cost $130,000 Under Course of Construction

Plant to Employ 105 Men Expected to Increase Population by 300

The Red Lake Falls Gazette very appropriately uses the blackest headlines in the office in an announcement last week to the effect that a big fibre plant has been secured for that city. The big plant, which is already under course of construction, is being erected by the Fibre Products Co., a Minneapolis corporation, engaged in the manufacture of flax products from tow, commonly used in upholstering, insulation and building felt board.

According to the Gazette, Red Lake Falls was selected as the best site for the industry after several other cities had been considered. The big engine formerly used in a sawmill in this city, has been purchased and is being moved to Red Lake Falls. A committee of the Red Lake Falls Commercial club, consisting of J. A. Duffy, E. G. Buse and L. E. Healy, was chiefly instrumental in securing the big industry for that city.

Other countries may have their rulers, but the only one that the American people believe in is about twelve inches long.

Speaking about crimes, what has become of the fellow who used to wear a red necktie with a checked suit and yellow shoes?

A NEW MELBY POEM

In a recently issued book of poems by Rev. Gustav Melby, appears the following verse on Norway among the author's "Runic Rhymes:"

Not Ashamed of Norway

We are not ashamed of our heritage
Of blood, of faith, and of tongue,
Of the land of our birth, and its Sage-page,
And the songs which its bards have sung.

We are not ashamed wherever we go,
To own where our cradle stood,
But prowdly proclaim, that the world may know.
Our lineage of Viking-blood.

We are not ashamed of the faith which glowed
In the hearts of our honest sires,
Of the stream of life which in quiet flowed
From their shrines, 'neath the altar-fires.

We are not ashamed of the tongue they spoke
When they uttered their heart's desire
In accents strong which severed a yoke,
When Wergeland strung his lyre.

We are not ashamed of the noble cult
Whose genius gladdenes the race,
Whose lore of scald-craft the wise consult
As guide on the upward ways.

We are not ashamed of the dreamy things,
And the gleams from the land of Thor,
Which gave to the mind its needed wings
To lift itself and to soar.

Ashamed of Norway! let him be ashamed
Who fails to utter his praise!
And let him not be 'mongst her true heirs named
In his nor his children's days!

Yet, let on America's altar-stair
Our heritage find a place,
That Norway's children may have a share
In making a better race.

—GUSTAV MELBY,

U. S. Boys Who Served Nation Get Preference

Under a ruling of the United States civil service commission today, citizens of the United States who served in the forces of the Allies during the World War will be given preference in appointments to civil service positions. Heretofore, the preference has extended only to those who served in the American forces, to their widows, and to their wives under certain conditions.

In authorizing this extension of the preference, the civil service commission states that consideration is given to the fact that service in the forces of the Allies was in a common cause, and for a considerable time under a common commander-in-chief; that is, after March 29, 1918, when Marshal Foch was placed in command of all the allied forces.

Don't criticise Mr. Will H. Hays too severely. You would probably go into the movies, too, if they would offer you $150,000 a year.

A supreme tempter for appetites of big and little folks

"Lis'sen, you Herbie, you let go of those Kellogg's Corn Flakes or you'll be late for school—and I won't wait for you another minute!"

Put it right up to Kellogg's Corn Flakes to do a master job sharpening breakfast appetites! And, they'll repeat at lunch and supper—for Kellogg's are irresistible in goodness! Kellogg's win every one because their flavor is delicious and because their crunchy crispness is unfailing! You'll prove that!

Such a cereal you never ate before! You'll say Kellogg's are a revelation—and they will be, in particular, to any one who has eaten imitation corn flakes! Kellogg's are as distinctive in flavor as they are in crispness. And, Kellogg's are never tough or leathery! Start eating Kellogg's Corn Flakes tomorrow morning! You can't afford to miss such happiness as Kellogg's hand out to young and old alike!

Can You Solve the Presidents Puzzle

Brush up on your history, folks. Solve the very latest Presidents Puzzle. You can do it if you try.

In the picture above you will find the names of ten presidents. The letters of their names have been re-arranged. If you can straighten them out to spell correctly the names of ten presidents you have solved the puzzle. For instance, the first one is Warren Harding.

If you can solve the puzzle, you can win $1,000 which we are offering together with a number of other valuable prizes to help boost The St. Paul Daily News.

To help refresh your memory I am naming a partial list of all the presidents—James Buchanan, Woodrow Wilson, Rutherford B. Hayes, Warren G. Harding, Andrew Jackson, George Washington, Benjamin Harrison, Abraham Lincoln, James Monroe, Grover Cleveland, Chester A. Arthur, Thomas Jefferson, James Madison, Millard Fillmore, William H. Harrison.

185 Points Wins First Prize

If you can correctly rearrange the ten presidents' names you will receive 100 points [illegible] $1,000, 10 points for each correct name. [illegible] 60 additional points by [illegible] by proving that you have shown a copy of The St. Paul Daily News to one of your friends. [illegible] give you 160 points in all. The final 25 points will be awarded by the Three Judges of the puzzle (who are in no way connected with The St. Paul Daily News) to the person who sends in the largest correct list of words made up from the letters in the name of the first president—Warren Harding. But DO NOT send in your list of words now. Send the answer to the puzzle first and we will tell you how to get up your list of words.

The winning answer, or the one earning 185 points will receive $1,000 in cash. The answer receiving 184 points will receive the Second Prize. There are 25 prizes in all, and in case of a tie each tying contestant will receive identical prizes.

Costs Nothing to Try
$1000 Just for You

Remember, folks, you don't have to spend any of your own money to win. No, sirree! Not one penny—and you won't be asked to subscribe to The St. Paul Daily News. All we want you to do is to help us introduce The St. Paul Daily News to your friends. That's simple, isn't it? It's going to be easy for you to win.

Opportunity with a great big "O" is looking your way. Send in your answer to the puzzle and we'll tell you how to win the $1,000 that's waiting just for you. Only 185 points wins First Prize. You can get them. [illegible] Start now and send in your [illegible] the ten presidents' names on a sheet of paper and send it in. Then we will tell you how to get the list of words made up from the letters of the first president's name.

Address All Answers to W. O. MILLER, THE ST. PAUL DAILY NEWS, ST. PAUL, MINN.

EDITORIAL

LET'S TRY IT HERE

There is no more need of eastern Pennington county lamenting its stringent times than there is for any other section of the country to do so. We are attended by the same measure of prosperity enjoyed by other communities.

Some of us are in debt—but so are they in Iowa, Pennsylvania and California.

Some of us owe money to the stores and banks—but so do folks living in Paducah, Oskaloosa and Oshkosh.

We're eating three squares a day, have a best suit for Sunday and our children are able to go to school every day in the month—well fed, well-clothed and well off.

News from Portland says that the governor of Oregon has issued a proclamation designating the week of May 15 to 21 as "Prosperity Week" and asking the people of that state to observe it as such. This is an endorsement of the efforts of the Portland lodge of Elks to arouse the people of the United States to the necessity of one big concerted move to bring back prosperity to the nation. There is great significance in this movement. While some may pass it off as merely another one of the "weeks" with which we have been showered during recent years, this movement is far and above that category and is a step in which the entire nation could profitably join.

We have been repeatedly told by those who know that the big thing that is holding back prosperity now is simply the state of mind of the public. We have let ourselves be driven into a state of fear and hesitation that is hindering our return to normal times. We have our life, our health, our land, our factories and materials with which to produce and what we need now is a determination to forget the bogey of "hard times" and take renewed confidence coupled with stronger efforts.

The money that has been withdrawn from circulation needs to be brought out of its hiding and put to work. Money hidden away is doing no good, not even drawing interest. We need to take confidence, buy what we need, work with our utmost vigor and drown the wails of the calamity howler with the waves of prosperity.

Oregon's example is a good one and worthy of emulation by all parts of the country and it is one which other fraternal and civic organizations can assist very materially in putting across in good shape.

There is much in the state of mind.

LET THE PEOPLE KNOW.

The official publication of county and village proceedings is a duty officials owe their constituency and the voters that placed them in office.

Taxpayers have no other way in which to find out the doings of the men they have placed in office or what their money is spent for—and why.

The cost is trivial compared to the benefits derived. Folks do not desire to depend upon hearsay and second-hand information. They want to know—and have a right to. They want to see the figures in print and we are willing to pay for the privilege.

It is most emphatically not a question of living up to the letter of the law, but one of obeying the law, which reads:

> "The doings and official acts of public servants shall be printed in the official newspaper of the state, county or city they serve."

That's plain enough!

Merle Birmingham filed yesterday for the democratic nomination for governor. And who the deuce is Birmingham?

Politics are warming up in good shape in Pennington county, and The Banner is glad that they are. Without aspirants for county and state office, this would sure be a droll old world to live in.

BASE FLATTERY!
(Duluth Herald)

S. V. Arneson, who has been associate editor of the Thief River Falls Tribune with his brother, J. S., has bought the Goodridge Banner. Either as newspaper men or public officials the Arneson boys always score and Goodridge can look forward to having the best newspaper the town is capable of supporting.

HERE'S HOPING.
(Strathcona Star)

S. V. Arneson, until recently associate editor of the Thief River Falls Tribune, has bought the Goodridge Banner from Editor Converse and is making a real paper out of it—a paper which the citizens of Goodridge may be justly proud, and to which that hustling little burg on the electric line is entitled. Here is wishing The Banner and its new editor all kinds of success!

A WOMAN KICKS OVER THE TRACES

Congressman Volstead is about as popular with some folks as a dose of strychnine. To others he is an angel without wings.

One of the former is Miss Elizabeth Marbury, Democratic national committee woman from New York state. She wants to debate with somebody—either sex—who will defend the Volstead prohibition enforcement law against her onslaughts of verbal denunciation.

The Banner had always thought that woman was unalterably opposed to booze in all forms, but we see we're wrong. Here comes a lady who is willing to scrap for beer and light wines against all comers, some of them internationally known.

She has hurled a challenge to debate Lady Astor, Commander Evangeline Booth of the Salvation Army, William Jennings Bryan, the Rev. Roach Straton, pastor of Calvary Baptist church of this city.

> "I will take them singly or at once—that's how sure I am that the Volstead act is indefensable," said Miss Marbury.

As for the remark attributed to Lady Astor that prohibition was "an excellent law for the poor man," she had this to say:

> "I hardly think Lady Astor sufficiently familiar with the needs of the man in the street in America. She is speaking from an English viewpoint. I am too good a Democrat to want any law in this country which spells privilege for the man with the fat purse."

When better newspapers are built The Banner will have a hand in it.

There is much in the state of mind. The present scramble for office indicates it.

Takehoma Banner. You will enjoy it, the wife will enjoy it and the kids will read every word and enjoy it. It's the greatest newspaper bargain in 17 states.

A good way to kill off a knocking windbag is to encourage him to talk himself to death. It's the most painless method we can think of right now.

Lady Astor says that "one sex cannot govern alone." You tell 'em, they can't, Lady. We know some men who have made the poorest governors you ever saw.

Oh Lord, we pray thee: Make this a banner year for the farmer, the business man and the laborer—and whatever you do, oh Lord, don't forget The Banner.

If you have anything good to say say about The Banner, say it by subscribing to this community journal. You want to take a good paper—and that's what The Banner aims to be.

We have no great cause for worry over here in Goodridge when it is remembered that we are in the running the same as everybody else. The fellow who is always preparing for the worst seldom gets the best.

You wouldn't think of borrowing your neighbor's horses to till your fields. Yet there are many who don't bat an eye when it comes to reading the other fellow's newspaper. Moral: Get one of your own.

Speeders are becoming less numerous as the fines become increasingly severe. When jail sentences are the only alternative for murdering folks with an automobile, the speeder will be one of the slowest devils in the world.

The motorist who would murder you because you happen to be in his way on the public highway is no better than the murderer who wants to kill you for the plunk or two you've got in your pants' pockets.

As a nation, says the Greenbush Tribune, we are spending more money for gasoline than for food, more for cigars than for necessary clothing, more for movie tickets than for house rent. And we are spending more time complaining about hard times than thinking about ways to improve them.

Thief River Falls labor men are planning a big mass meeting to be held there this week. The body of workers will be addressed by prominent speakers, nationally known and authorities on all industrial matters. The labor council at the county seat is showing that element of progress in industrial matters that is bound to win out.

The recent announcement of Henry Ford instituting the five-day week in his automobile factory at a minimum wage of $6 per eight-hour day for his 60,000 employes is considered a most radical move in the industrial world. In direct contrast is the practice of the big steel industry compelling their empolyes to work seven 12-hour days a week, paying no attention to a minimum wage, whatsoever. Will some of the nation's industrial wizards please explain how Mr. Ford gets away with it—and why the steel industry is such a heck of a lot different?

NUMEROUS FILINGS FOR COUNTY BERTHS

Three Incumbents, Sheriff, Treasurer and Auditor, File for Re-election

Eight filings for county office were made during the past week and there being still more than two weeks leeway for intended office-seekers to get into the race, it is believed there will be a number of others.

W. J. LaBree, incumbent, has filed for re-election as sheriff. Mr. LaBree already has opposition for the office. John Gullingsrud, incumbent, has also filed for re-election, as has T. P. Anderson for auditor.

A. W. Hanson, commissioner from the first district, had two filings made against him this week in Elov Aakre and H. I. Finstad. J. R. Larson and Osmond Mandt have filed as candidates for commissioner from the fifth district.

There are already four candidates for the office of commissioner from the first district, Frank Race having entered his name as a candidate a week ago.

Thief River Falls Banks to Close Saturday Noon

The four Thief River Falls banking institutions this week have agreed to the Saturday afternoon closing arrangement and commencing on Saturday, May 20, and until Saturday, September 2, they will close at 12 o'clock noon on each Saturday inclusive of the foregoing dates.

The banks this year will close one hour earlier than as the custom last year, which was at 1 o'clock. The cashiers of Farmers & Merchants State bank, the First & Peoples State bank, the First National bank and the Citizens State bank have all signed the agreement.

The Polk County Leader says a bottle of milk fell out of a second story window of a Crookston business block one day last week, greatly endangering the lives of passersby, and wants an ordinance to prohibit the placing of bottles on window ledges. It is interesting to know that some of the people of Crookston still use milk for drinking purposes.

ST. HILAIRE

Herman Adams, a former St. Hilaire resident and who now resides in St. Paul, came last week to renew acquaintances, greet old friends, and look after matters in connection with the C. H. Peterson estate in which Mrs. Adams is one of the heirs, Mr. Adams noted there was considerable change in St. Hilaire since he left fourteen years ago.

After finishing his business here, he left for home yesterday.

Adolph Satterberg was over at Grand Forks last Thursday to attend a meeting of agents of the International Harvester Co. A big banquet was tendered the agents at close of the business session.

S. Amble came Friday from Grand Forks to spend the week-end and look after his interests here. He has leased his residence here. He has Water Street to Mr. and Mrs. A. J. Thorvick who will occupy it this year.

H. F. Hanson is acting as manager at the Farmers elevator during the absence of Ed. Roy. The latter may decide not to continue with the work owing to ill health.

After completing a term of school near Caribou, Miss Tessie King returned home Friday evening to spend the summer.

Miss Gladys Olsen returned Saturday from Radium where she completed teaching a term of school. Monday she commenced teaching an unexpired term of five weeks at the Felix Grandbois school south of town.

County Treasurer John Gullingsrud and family, autoed down from Thief River Tuesday evening to call on friends in the village.

Miss Calra Gullingsrud of Thief River, is substituting for Miss Mildred Peterson in the local school while the latter is visiting at Carlton college at Northfield.

Church Notice

Sunday, May 14th: German services at Esplee at 10:00 A. M. English services at Thorhult at 3:00 P. M. and in Grygla at 8:00 P. M.—H. Lutz, pastor.

The Grove City Times, a newspaper established more than thirty years ago, has suspended publication. The mortality rate among county newspapers has been high during the past few years. With prices of labor and material staying at the peak, only those which receive the most generous support from the communities in which they are published will be able to survive.—Dawson Sentinel.

Chas. E. Cruzan went to Thief River Falls last Friday after his car, which had been stored there since he left last fall. He made the return trip of 300 miles in sixteen hours' running time without a mishap, and reports the roads as being in good shape.—Elk River Star-News.

When an angler and a golf player get into a lying match all other competition is barred.

W. J. LaBREE, Auctioneer. **NICK BUNDHUND, Clerk.**

FARM BUREAU NEWS

Creameries to Open Own Office In East

Patrons of more than 300 co-operative Minnesota creameries will have a personal representative on the New York market within a short time.

The Minnesota Co-operative creameries association, Inc., has decided to open its first eastern office in New York immediately. Other offices will be opened in Philadelphia and Chicago later. The purpose of the eastern offices will be to protect the interests of the Minnesota co-operative creameries in every possible way, by checking up on deliveries, on freight recharges, butter scores and prices received, and by helping to establish Minnesota co-operative creamery butter as a nationally recognized product of the highest quality.

Eventually the association plans to put this butter on the market under a distinctive brand. With this object in view, it is arranging for a series of district conferences throughout the state, at which creamery officers, operators, and buttermakers will meet to discuss the best methods of manufacturing and handling butter to get the highest possible prices.

Meetings are tentatively scheduled for Winthrop on May 18, Preston on June 6, and Wadena, Thief River Falls, Ada, Mankato, Glenwood, Sauk Center, and St. James or Fairmont at later dates.

The creameries association also has decided to begin active work in egg marketing. Eggs will be graded to command the best prices, and will be shipped in the same cars with butter marketed through the association, to take advantage of the lower freight rates on carload lots.

The creameries association will have the full support of the Minnesota farm bureau federation and county farm bureaus in standardization of butter and in the marketing of eggs.

Short Course In Land Clearing Offered By "U"

A regular university short course in land clearing and farm development will be held June 14 to June 24 inclusive, provided not less than 20 students register for the work. Headquarters will be established near Duluth and will be in charge of M. J. Thompson, superintendent of the northeast experiment station near that city. The days will be spent in clearing land under the varying but typical conditions that prevail in the north country. The evenings will be devoted to lectures, pictures and conferences. Board and lodging will cost around $1 a day; an incidental fee of $5 will be charged to cover the cost of explosives used. Persons interested in taking this work should write to Dr. A. V. Storm, director of short courses, or Prof. William Boss, division of agricultural engineering, University farm, St. Paul.

U Land Clearing Train Will Visit 7 Counties

The University of Minnesota co-operating with various local interests, with the railroads, manufacturers of explosives and land reclamation machinery, and with the state forestry department will operate a land clearing train, having a crew of 15 to 20 men, the last half of the month of May. Ten all-day county-wide land clearing celebrations will be held in seven northern Minnesota counties, the first at Brainerd on May 20, the others following in this order: Aitkin, May 16; Remer, May 18; Walker, May 20; Tenstrike, May 22; Little Fork, May 24; Duluth (Jackson community), May 25; Cohasset, May 26; Hill City, May 27; and Virginia, May 30. The celebrations will mark the formal opening of the year's land clearing activities in the counties of Crow Wing, Aitkin, Cass, Beltrami, Koochiching, Itasca and St. Louis.

Supplementing the work of this land clearing expedition the university already has a somewhat similar one operating on motor trucks and now giving demonstrations of picric acid shooting in northern Minnesota counties. The motor expedition started in southern Aitkin county, April 25, and has dates scheduled up to and including June 9. About one-half dozen demonstrations have been or will be given in each county, including Aitkin, Itasca, Cass, Crow Wing, Todd, Wadena, Hubbard, Koochiching, northern Beltrami, Clearwater and others.

Will Your Girl Be a Farm Wife?

Farmer's Wife Tells Why She Wants Her Daughter to Follow Her Footsteps

Would you want your daughter to marry a farmer?

"That depends on the farmer," replied one of the 8,000 farm women who took part in a national contest conducted by The Farmer's Wife. The woman who made that reply was Mrs. Cola L. Fountain of Jefferson county, New York; her letter won third prize. This is what she wrote:

"Would I want my daughter to marry a farmer?

That depends on the farmer. I would wish him to have health, ambition, broadmindedness and vital religion.

"Country life needs the assistance of far-seing men and women. Each community must have a percentage of unselfish, helpful farmers and their wives who are willing to build up the weak places in their community at personal sacrifice.

"Farm life has its disadvantages; so has city life. Because the rural school neds attention, the county church needs aid, and the spirit of neighborliness and co-operation is weak in many communities, the country offers a wide field for tireless, tactful service, which will result in a corresponding development of the individuals engaged therein.

"Farm and home bureaus, backed by the United States Department of Agriculture, are doing a wonderful work but they will not reach their limit unless the farmers and their wives grasp the opportunities they offer and fit them to their needs.

"One's words go far in a rural community and one's influence counts. There are dangers threatening the very foundations of American farm life and in order to decrease them, farmers must put forth sound, sane and well-balanced efforts. They must read, think and act.

"Country life is sometimes narrow but it never has to be. A mind filled with large interests is never narrow and the country furnishes those interests today.

"Many city conveniences can be installed in farm homes. I have never had any of these myself. I should be delighted if my daughter's home could have them but I hope she has been so reared as to realize that her truest happiness does not depend upon conveniences, but that the soul-satisfying life is the one whose days are fileld with well-directed eoffrts.

"If she can marry a farmer with whom she can join heart and effort to make her corner of the community an uplifting example of the bedrock of American yeomanry, if she and her husband can be relied upon to push forward every measure that will help to break the plaster cast in which the 'backbone of the nation' is at present largely encased, then both her father and I shall bid her God-speed."

Some things may be "too good to be true" but nothing is too true to be good.

Farmers May Have Seed Inspected By Station

Growers who desire to have fields inspected should make application to R. S. Dunham, secretary, Red River Valley Crops and Soils association, northwest experiment station, Crookston. Arrangements will be made to have an inspector visit the farm some time before harvest to make the field inspection. The inspector makes a report on the condition of the crop, its purity, the freedom from weeds and diseases. If everything is found satisfactory, a final bin inspection is recommended. After threshing the grower sends in a sample of the grain and applies for bin inspection. If the sample is satisfactory, arrangements are made to inspect the seed in the bin. Finally, if the seed meets the standard requirements the inspector recommends that a certificate be issued for it. Tags are furnished to the grower, to be used by him as his guarantee to purchasers of his seed. The name and address of the grower and list of his certified seed is published in the annual seed lists of the state crop improvement association and the Red River Valley organization, and these lists are widely circulated among prospective purchasers of seed.

The cost to the grower for field inspection is three dollars, without regard to the number of acres in the field inspected. The fee for final inspection of seed in the bin is two dollars. These fees are intended to cover necessary traveling expenses of the inspector. To insure inspection service for all growers applying for it, applications should be sent in as early as possible, preferably before June 1, as schedules for field inspections are arranged soon after that time.

New Livestock Specialist Engaged By University

Kenneth F. Warner of Washington D. C., has accepted appointment, effective June 1, as a livestock specialist with the agricultural extension division of the University of Minnesota. Mr. Warner will come to the university with high recommendations. Dean W. C. Coffey of the agricultural department of the university says: "I consider Mr. Warner one of the very outstanding men in livestock extension in this country." Mr. Warner was graduated from the Nebraska college of Agriculture, and was a post graduate student of the University of Minnesota where he won a master's degree. He was for three years in extension work with the University of Nebraska, and later was connected with the agricultural research section of Armour & Co., Chicago.

The last issue of the Frazee Press has a flattering mention of the community work of C. L. Hansen, of this city, copying from The Banner the article on silos, in which Mr. Hansen offers to provide funds interest-free for one year for the construction of silos.

The Press calls the movement most commendable and advocates similar action by Becker county bankers.

FREE-$1,855 in Cash
You Can Win

A Word Contest without a Catch in It

OPEN to everybody—and everyone has an equal chance at the big prizes—$500, $375, $250, $175, $125, $100, etc. Here's an easy, enjoyable way to win some real vacation money, enough to take a long trip.

See how many words you can make out of the letters in the three words—

"Nash's Delicious Coffee"

(For instance: Ah, Nice, Delicious, Clean, Coffee, etc.)

Send in your list today—you may win a big prize. Someone will win it. You have the same chance. Try your skill now. If your list is the largest, and conforms with the rules printed below, you will be awarded first prize. If your list is second largest, you will get second prize, and so on.

Costs Nothing to Try

You do not have to pay anything or sell anything or buy anything to enter this contest, or to win a prize.

But if you send one complete label from a can of Nash's Delicious Coffee and the judges decide your list is the nearest correct list—the first prize will be $100 in place of $20.00.

If you send THREE complete "Nash's Delicious Coffee" labels with your list, you will receive a still larger prize. See schedule of prizes below. We make this special inducement because we want you to get acquainted with

Nash's DELICIOUS Coffee

WE BELIEVE that if you try it once, you will never be satisfied with any other kind.

It's the last word in coffee blending—a *perfected* blend based on exhaustive studies and research. It is so blended and roasted that it neutralizes hard or alkaline water and brings through the true coffee flavor. Whether you use hard or soft water, it makes a delicious, smooth, satisfying and refreshing cup of coffee.

Mountain plantation coffees are bought at premium prices for this special blend because of their better flavor, body and richness of sap. Only a few of the thousands of offerings of coffee beans made to us pass our exacting tests and meet our strict requirements.

Always the same. By constant care in buying our raw coffee beans, and by making careful tests throughout every process of its manufacture, we always maintain the same perfected blend—the same high standard in every batch that goes out of our factory. Nash's Delicious Coffee is the same today as a month ago, and will be the same a year hence, always delicious.

Air cleaned. Chaff and coffee dust are removed by air suction during the process of steel cutting in our special machines—leaving a clean clear-cut coffee. The result is a crystal-clear cup of coffee, free from all stale and bitter flavors, free from "coffee mud."

"Hot Roasted" Freshness. Nash's Delicious Coffee is shipped on the same day as roasted and cut—or not later than the following morning. We roast only enough each day to fill orders on hand.

Packed in moisture-proof, hermetically-sealed "Napacans"—which protect its crispy freshness and pleasing flavor from dampness—dampness being one of the greatest enemies of coffee flavor.

Sold by grocers in one and three pound containers. Whether you enter the contest or not, you will be well rewarded if this advertisement induces you to try Nash's Delicious Coffee.

RULES OF CONTEST

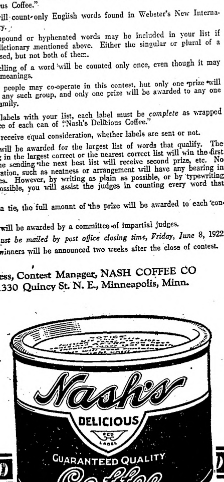
1. This contest is open to any man, woman, boy or girl in America, except employees of The Nash Coffee Co. and their relatives. There is no entrance fee of any kind.
2. Use only one side of the paper on which you write your list. Write your list of words in alphabetical order and number them. Write your full name and address in the upper right hand corner of each sheet.
3. In any one word, do not use any letter oftener than it appears in the words "Nash's Delicious Coffee."
4. The judges will count only English words found in Webster's New International Dictionary.
5. Obsolete, compound or hyphenated words may be included in your list if found in the dictionary mentioned above. Either the singular or plural of a word may be used, but not both of them.
6. The same spelling of a word will be counted only once, even though it may have different meanings.
7. Two or more people may co-operate in this contest, but only one prize will be awarded to any such group, and only one prize will be awarded to any one household or family.
8. If you send labels with your list, each label must be *complete* as wrapped around the face of each can of "Nash's Delicious Coffee."
9. All lists will receive equal consideration, whether labels are sent or not.
10. The prizes will be awarded for the largest list of words that qualify. The person sending in the largest correct or the nearest correct list will win the first prize. The one sending the next best list will receive second prize, etc. No other consideration, such as neatness or arrangement will have any bearing in awarding prizes. However, by writing as plain as possible, or by typewriting your list if possible, you will assist the judges in counting every word that qualifies.
11. In case of a tie, the full amount of the prize will be awarded to each contestant tied.
12. The prizes will be awarded by a committee of impartial judges.
13. *All lists must be mailed by post office closing time, Friday, June 8, 1922.*
14. The prize winners will be announced two weeks after the close of contest.

Address, Contest Manager, NASH COFFEE CO
1330 Quincy St. N. E., Minneapolis, Minn.

LIST OF PRIZES WINNING ANSWERS WILL RECEIVE PRIZES AS FOLLOWS:

	If No Labels Are Sent In	If 1 Label Is Sent In	If 3 Labels Are Sent In
1st Prize	$20.00	$100.00	$500.00
2nd Prize	10.00	75.00	375.00
3rd Prize	5.00	50.00	250.00
4th Prize	5.00	40.00	175.00
5th Prize	5.00	30.00	125.00
6th Prize	2.50	25.00	100.00
7th Prize	2.50	20.00	80.00
8th Prize	2.50	15.00	60.00
9th Prize	2.00	15.00	40.00
10th to 15th Prizes	2.00	10.00	25.00
	$66.50	$430.00	$1,855.00

Do It Now! *Send in Your List at once*—qualify for the big cash prizes by enclosing the labels with your list.



THIEF RIVER FALLS NEWS

(From The Tribune)

Minton Anderson of Middle River was a business caller here Monday.

Miss Sophie Johnson spent Sunday with friends at Red Lake Falls.

Carl Hwidsten of Stephen, Minn., spent Sunday with friends in the city.

Mr. and Mrs. D. E. Simonson of Roseau, autoed here Monday to spend the day shopping.

Olaf Larson of Bronson, arrived Thursday to spend a few days with relatives.

Miss Corah Hanson left this morning for Chicago, to visit indefinitely with friends and relatives.

Lawrence Borgen motored Sunday to Red Lake Falls, where he spent the day with friends.

Miss Esther Axelson of Holt visited over the week-end with friends in the city.

Mr. and Mrs. A. D. Lonson of Thorhult arrived here Monday morning to spend a few days with friends.

Nels Johnson will leave this evening for Minneapolis, to remain indefinitely with relatives.

Miss Bernice and Miss Gladys Nelson who have been guests of relatives for a few days returned Saturday evening to their home at Detroit.

Dr. Jennie M. Eastman and brother, Arthur Carlson, Miss Caspera and Victor Gran motored Thursday to Warren, where they spent the day visiting with friends.

Cyril Sapero, manager of the Sapero company in this city, returned [illegible]sday morning from the twin [illegible] where he spent a few days at[illegible]g to business affairs.

[illegible] Effie Christianson returned to [illegible] city Friday morning, having spent [illegible] few days as guest of her parents, [illegible] and Mrs. Christianson, at Fer[illegible], Minn.

A. Peterson of Esplee spent Monday in the city attending to business affairs.

Miss Inga Berg arrived in the city Wednesday from Minneapolis, to spend a period of two weeks visiting her mother, Mrs. Johanna Nyhus, and other relatives.

Mr. and Mrs. Perry Gay of Red Lake Falls, spent Monday in the city visiting with friends and shopping.

Born, to Mr. and Mrs. Ole Homme 111 4th street West, Saturday, May 6, a son.

L. Miller of Wylie spent Monday in the city attending to business matters.

Mrs. E. R. Nelson and daughter, Miss Helen of Dorothy, Minn., spent Saturday in the city shopping.

Miss Alice Anderson of Thorhult spent Sunday with friends in the city.

Hjalmer Hostvedt and Ed. Ritsau of this city left Wednesday evening for Duluth, where they will be employed for the Minneapolis Bridge company.

Mr. and Mrs. H. O. Loken and daughters, Ruth and Marrien, Mr. and Mrs. R. H. Ross and son, Richard, motored Sunday to Red Lake Falls to spent the day among friends.

Mr. and Mrs. Ole Ihle and family autoed Sunday to Newfolden where they spent the day with Mr. Ihle's parents, Mr. and Mrs. Lars Ihle.

Christian Engelstad and Olaf Olson who reside near Hazel autoed to the city Sunday and spent the evening among friends.

Edward Holmgren arrived here Wednesday from Enderlin, N. D., to visit indefinitely with his parents, Mr. and Mrs. John Holmgren.

Miss Gladys Maland returned Sunday evening, having spent the week-end with her parents, Mr. and Mrs. O. Maland, near St. Hilaire.

Mr. and Mrs. C. T. Swanson and son, George, of St. Hilaire, motored here on Friday and spent the day shopping.

Mrs. N. K. Harries returned Thursday morning from Grand Forks where she spent a short period visiting with relatives.

Miss Evelyn Weggie and Miss Tillie Knutson left Tuesday for Holt, where they will spend a week at their parental home.

Miss Agnes Anderson and Miss Lillie Lonson of Viking visited for a few days in the city with friends and returned Tuesday afternoon.

Miss Belle Blair returned Monday from Alexandria, Minn., where she has been teaching school, to remain in this city indefinitely.

Gust Geske of St. Hilaire attended to business here on Monday.

Mr. and Mrs. O. K. Olsen and son, Ardell of St. Hilaire, spent Tuesday evening in the city visiting relatives.

Mrs. Marie Hoveland returned Tuesday from Grygla, where she spent two weeks with friends.

Mrs. S. Williams left Friday morning for Warroad, to attend the funeral services of John Stein.

E. D. Norts and V. L. Johnson of Adams, N. D., were business transactors in the city on Saturday.

Mr. and Mrs. P. Thune and daughter, Inga, motored here Friday from Hazel, and spent the day shopping.

Mr. and Mrs. H. O. Wiken of Hazel motored here Friday and spent the day visiting with friends.

Miss Harriet Howard of Hillsboro, N. D., spent Friday in the city shopping.

Mrs. Theodore Thompson of Holt, returned home Friday, having spent the day shopping.

Gunder Sanem of Silverton spent Friday in the city transacting business.

Mr. and Mrs. Enoch Sundberg of St. Hilaire spent Friday here among friends.

Miss Alpha Bishop returned Saturday from Erskine, where she spent a few days on business.

Hjalmer Hostvedt motored to Germantown Tuesday and spent the evening with friends.

Miss Alice Solem left Thursday afternoon for her home at Holt, having visited for a few days with friends here.

D. W. Bertinson of Pelican Rapids, Minn., spent Sunday and Monday with relatives in the city.

Miss Helen Flekke who is employed at Hazel spent the week-end at the Carl Anderson home in this city.

Mr. and Mrs. E. T. Larson and children, Dorothy and William, of Lankin, N. D., were guests over Sunday with relatives in the city.

Miss Elizabeth Nacham, Miss Margaret and Jack Paine of Erskine autoed to this city Sunday to spend the day at the home of Mr. and Mrs. E. O. Erickson.

Ed. J. Rustad, Andrew Steen, and Edward Iverson motored Saturday to Fargo, N. D., where they visited over Sunday among friends.

Miss Freida Ristau who is employed at the East Side store spent Tuesday evening with her parents, Mr. and Mrs. A. Ristau near Germantown.

Arthur Loken arrived in the city Saturday morning from Minneapolis, to spend a few days with his brothers, H. O. and George Loken.

Mr. and Mrs. Ole Johnson left Monday morning for Lincoln, N. D., where they were called owing to the serious illness of their grandchild.

Miss Esther Sundahl will arrive here tomorrow to remain indefinitely with her parents, Mr. and Mrs. S. K. Sundahl, having completed a term of school at Thorbult.

Mrs. Thomas Seipert visited over Sunday with friends in the city, en route from her home at Redwood Falls to Minneapolis, where she will remain indefinitely with relatives.

Soy Bean Profitable For Silage, Says Agent

P. W. Huntemer, county agent of Stearns county, recently prepared the following article on soy beans, which may be of local interest, and is given publication for what it is worth:

"Extended trials in soy bean culture carried on on several farms in Stearns county during the past three years have proven conclusively that this leguminous forage plant can be grown successfully and at a profit to the farmer when used with corn for sileage, corn for hogging-off, or alone for catch hay crop. The early varieties, especially the Wisconsin Black and Chestnut, have proven the most satisfactory. These two varieties will mature seed at about the same time required for our early types of dent corn.

When early soy beans are planted with corn for silage, about one-third as much bean sed as corn should be used. Mix the soy bean and corn in the planter box in the proportion: two parts of corn to one of soy beans. This corn and soy bean mixture should be stirred up occasionally in the planter boxes, otherwise the bean seed will work to the bottom and the last corn drawn from the planter boxes will contain comparatively few beans. When soy beans are planted with corn intended for sileage, some trouble is experienced in cultivating the corn and soy bean mixture. However, when the increased feeding value of the corn and soy bean sileage mixture is taken into consideration, the minor trouble experienced in cultivation can be easily overlooked. An acre of soy beans, when planted in rows the same as corn, will normally produce as much protein as is contained in a ton of cottonseed or linseed meal. Grown in rows with corn they will not produce quite as heavy a crop as when sown in drills by themselves. Soy beans alone do not make an entirely satisfactory sileage. However, some growers make a practice of planting the beans alone in rows, cutting at the same time as sileage corn, and working the soy beans and corn together through the ensileage cutter.

Undoubtedly one of the most profitable uses which can be made of soy beans is for hog pastures. The beans can be planted with drill corn intended for hogging-off. At the time the corn is beginning to dent the soy beans should be well podded. A fe wpounds of rape seed per acre could also be sown with corn and soy bean mixtures just previous to the last cultivation which should be about the middle of July. About August 15th in a normal season the corn should be dented and it could be used for a hog pasture from this date until in the fall. One of the most important food requirements for growing pigs is protein, which can be produced most economically by growing soy beans with corn. The soy bean is almost equal in protein content to some of our best concentrates, such as linseed and oilmeal. Hogs turned into a corn and soy bean pasture will eat clean the soy bean seed pod and the entire bean plant. Extended experiments at various state experiment stations have shown that the practice of hogging off corn is advisable and the value of the hogging-off practice can be materially increased by including a rich protein feed, such as the soy bean.

Soy beans make valuable hay when properly cured and all farm animals eat it with a great relish. The crop possesses high feeding value, about equal to alfalfa. When intended for hay the soy beans may be planted later than for sed. Good hay crops have been secured from beans planted after June 15th and in several instances as late as July 15th. When it is planted for hay, the rows should be spaced closer together than when planting is made for sileage or hogging-off. Cut the hay when the pods are full grown before the plant begins to drop its leaves. The crop may be cut with an ordinary mower. Cut the beans early in the morning after the dew is off or late in the afternoon. If cut in the morning they may be allowed to wilt until late in the afternoon of the same day and then put up in small cocks. This bunching is often done by hand but a horse rake may be used when the hay is nicely wilted but not dry. Do not put the hay up in unprotected stacks. If necessary to stack, cover the tops and sides with canvas or use some other hay crop in topping out stacks.

If you don't believe that the world is improving, we call your attention to the fact that derby hats are mighty scarce these days.

Political Announcement

(This notice to be paid for by N. J. [illegible] at regular space rates.)

To the voters of Pennington county:

I am a candidate for re-election for Register of Deeds of Pennington county. During the years I have served the people of the county as Register of Deeds I have made many friends, but I am not asking support in the present campaign merely by virtue of this friendship. Rather I would have the voters consider my candidacy on a purely efficiency basis as the only proper method of electing officials to public office. In regards to fitness for the office of Register of Deeds, both as to honesty and capability, I prefer to rest my case with the people of Pennington county, whom I served in past years.

Yours respectfully,
N. J. ANDERSON.

Highlanding Breakers

Miss Ella Cousin was a guest at Henry Hyland's the latter part of the week.

* * *

Miss Maggie Johnson of Goodridge spent the week-end at her home in Highlanding.

* * *

Mrs. Agnes Newton of Thief River Falls, finished up a very successful term of school last Friday, May 5th. A picnic was held which was well attended and a delicious lunch was served.

* * *

The dance at Highlanding Saturday night was well attended, and a good time was reported by all. It was given under the auspices of the Highland baseball team.

* * *

Miss Lenora and Miss Mabelle Klementson were guests at the Anton Johnson home last Saturday.

* * *

Mrs. Anton Johnson was a guest at the home of Mrs. W. H. Crompton last Sunday.

* * *

An interesting ball game was played at Highlanding last Sunday. The first team vs. the school team. Both sides played remarkably well.

So don't be surprised if you see an electric sign out in front of a tonsorial parlor which reads: "High Class Vaudeville and Haircuts."

It's not at all unlikely that the big circuits might add a few barber shops to their string of theatres.

For Sale.

Light wagon and 3-section iron drag for sale; both good as new and at a reasonable price. Inquire at Banner office. tf

For Sale.

One Fordson tractor, good as new. One 14-inch John Deere gang, with tractor hitch. One 16-32 double disc tractor harrow. One 16-inch Brush breaker. Inquire of Theo. Gilbertson, Goodridge, Minn. tf

POTATOES FOR SALE

Twenty-five bushels of Early Ohio potatoes for sale by A. Firmrit, on Rowberg farm near Highlanding. These potatoes are for sale at a reasonable price and the first man applying gets them. 11-tf

Seed for Sale.

At Hanson & Barzen Milling company elevator. Red top, 21 cents per pound. Alsy Clover, 23 cents per lb. Med. Red Clover, 24 cents per lb. tf

VOLUME XVI. NO. 14. MAY 19, 1922. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA $1.50 PER YEAR

Minnesota Historical Society

ELMER ADAMS, FORMER SENATOR, HAS FAITH IN PENNINGTON LAND

"A Silo on Every Section and a Dairy Cow on Every Quarter Will Bring Prosperity to This Country in Same Way as It Has to Us,"

Says Well-Known Banker

WHAT ADAMS THINKS:

"Build a silo on every section and plant a cow on every quarter of land and you will have a crop that grows 12 months in the year."

"With feed in the silo and cows on the farm, you'll have no cause for worry. Your land will be better off, you will be better off, your wife and children will be better off, the community will be better off."

"Otter Tail county hadn't been properly introduced to Presperity before she formally meet up with the dairy cow—and I take it that you won't up here."

"Silos and dairy cows make the cream checks bigger and the farm an enjoyable place to be near."

Elmer Adams, of Fergus Falls, president of the Northwestern Building association, and Robert Hannah, secretary of the same institution, were in Goodridge Wednesday afternoon looking after the business interests of the company. The two gentlemen make semi-annual trips into all the territory covered by the company they represent, investing loan values and all the details connected therewith.

The Northwestern Building association, one of the largest in Minnesota, is doing business in 19 counties of the state and has at the present time $419,600 loaned out on business, residential and other property scattered throughout Aitkin, Becker, Beltrami, Clay, Crow Wing, Douglas, Grant, Hubbard, Itasca, Koochiching, Mahnomen, Norman, Otter Tail, Pennington, Pope, Stevens, Todd, Wadena and Wilkin counties.

The association Mr. Adams represents has at the present time approximately $85,000 loaned out on Pennington county real estate, which he considers to be as stable as any the company owns. Mr. Adams has undying faith in the future of this section of the state and says that when the farmers hereabouts are in a position to go into the dairy business on a more extensive scale, their future will be assured. Steady revenue, according to Mr. Adams, is a direct result of keeping dairy cows, and Pennington county is well adapted for it.

Mr. Adams, who is one of the best-informed men in Minnesota because of his various activities in banking, politics and newspaper publishing, knows "every inch of ground" in the Red River valley. He is most emphatically not a man who is over-optimistic simply because it pays to be. Rather he sizes up a situation for what it really is. He calls a spade a spade every time and if he don't like a thing, he won't mince words, but talks straight from the shoulder," as it were.

In an interview with the editor of this newspaper yesterday, Mr. Adams spoke at quite some length on the prospects for northern Minnesota. He deplored the vast amount of rain that has fallen here during the past two weeks and the effect that it may have upon crop conditions.

"It is but another argument for the silo and the dairy cow," said Mr. Adams, "and until the time comes that you folks up here have a silo on every section and a dairy cow on at least every quarter of land, you are going to be subject to the same trials over and over again. I know because I have been through the mill."

The Banner man asked Mr. Adams what he meant by having "gone through the mill."

In answer, he said:

"You know, down in my home county, Otter Tail, we never really enjoyed a healthy prosperity until about ten years ago. A few of our farmers had something, that is true, but not all of them, by any means. Now we are the biggest dairy county in Minnesota, the largest creamery in the state is located there and the neat little city of Fergus Falls has been built up largely because its citizens and the farmers living in that vicinity were far-seeing. Right now there is on an average of one silo to the square mile and we are building them right along. Silos, you know, don't leak, and it takes mighty deep water to drowned out a cow. It simply can't be done, that's all, and you can't drive prosperity from a community that is founded upon such solid and substantial footing."

Mr. Adams is an old co-worker of W. J. Murphy, the late millionaire publisher of the Minneapolis Tribune, and 25 years ago both were news gatherers on a Grand Forks newspaper, which later passed out of existence or was consumed by the Grand Forks Herald.

"Mr. Murphy 'scooped me' at the time of the Larimore, N. D., fire about that time and I never got over it. In fact it so agitated me, I left Grand Forks and went to Fergus Falls and established the Journal, and you know the rest of the story."

The Banner editor admitted that he knew the rest of the story because he had heard and knew intimately of Elmer Adams' Journal since the time he was knee high to a grasshopper, how Adams had built up an influential and prosperous newspaper out of what up to that time was a mere shell, without editorial policy and minus head or tail. He made out of it in a comparatively few years one of the best-known dailies outside of the twin cities and Duluth. The Journal made enough money to enable its publisher to go into the banking business and the state senate and later into the Northwestern Building association. Contrary to custom, however, the Journal didn't make Mr. Adams—he made the Journal. By strict attention to business and fearless newspaper publishing, he made the Journal "felt," until at the present time it thoroughly covers the field and is known as one of the best advertising mediums in the state. It is one of the real institutions of Fergus Falls and growing every day. Although Mr. Adams is not actively engaged in newspaper work at the present time, it receives a large part of his attention, particularly when a political opponent appears on the horizon.

Mr. Adams has served in the Minnesota senate for several terms. Ole Sageng, who this year was a candidate at the primaries for the post held by Congressman Halvor Steenerson, now represents the district in the senate and so far as The Banner editor is able to ascertain, the two gentlemen are a unit so far as the welfare of their constituency is concerned.

While in Goodridge, Mr. Adams called at The Banner office and asked that this newspaper be placed on his exchange list. The country weekly is regarded by him as a community barometer and he didn't feel that he could very well get along without The Banner making its weekly call. And so this newspaper will go forth to Mr. Adams as per his request.

"You are getting out a cracker-jack of a newspaper over here, Arneson, and I hope you make a go of it. In fact, I believe you've got the best little newspaper I've ever seen in a town the size of this. When I get to the stage where I feel that I want to permanently retire from the newspaper game, I guess I'll have you come down and take charge of the Daily Journal."

Several years ago Mr. Adams was in charge of the census taking in this section of the state. He is a marvel at figures and off-hand can give the size and population of almost every city and county in northern Minnesota.

He is also a strong booster for water power development and is interested in the activities of the Otter Tail Power company at Fergus Falls, where a fall of 175 feet has been developed and the company furnishes power over 700 miles of high line to about 20 cities in the Fergus Falls section of the state and extending into South Dakota. Their lines run south to within six miles of Willmar and within the same distance of Alexandria. The company is now considering extending their lines up along the Soo Line to Mahnomen. and in the event they do, the concern will be classed as among one of the largest in the country.

Mr. Adams hates waste and the wastage of water power is no exception. He is a second edition of "Teddy" Roosevelt when it comes to conservation of natural resources and the harnessing of water power. Drainage is another of his pet hobbies and he would rather see a ditch every other mile than witness hundreds of acres under water and the drowning out of all vegetation.

"Do you regard Goodridge and Pennington county as a good liability in the matter of loaning money to those in need of it for building purposes, etc., Mr. Adams?" was asked.

"Our company has at the present time a good many thousand dollars loaned out to business men and plain citizens and we stand ready to place more of it. You'll hit your stride up here yet and when you do you're going to make them all take notice. I guess I know a good bet pretty well when I see it—and Pennington county is no gamble at all," concluded Mr. Adams.

Mr. Adams likes questions and he soaks up information like a sponge does water. He seeks knowledge from the cracks and crevices and there are few people indeed who do not impress him in one way or another.

One day while Mr. Adams was sitting in his newspaper office at Fergus Falls, an advance agent for Barnum and Bailey's circus happened in to make arrangements for the advertising of the show. Adams learns something from most folks, but he regards the circus man as the very essence of activity and action, as you shall shortly see, and he takes added learning from their method of doing business.

After all the arrangements for the advertising had been made, the day for the show to appear being on a Saturday, Mr. Adams suggested that Fergus Falls would be an ideal place for the circus performance to spend Sunday, there being many beautiful lakes and resorts in the locality and fishing, hunting, etc., was good.

"Nix," blurted the advance agent. "We never vacation till the big top is up in the next town."

Mr. Adams saw the point at once. A circus isn't out to enjoy vacations, but to put on a show six days in the week. They never take chances on any day but the present. If the roads are good, the railroads running and the elephants able to shuffle along, the circus gets to the next town before any contingency can block their progress thereto, vacations notwithstanding. A circus man may gamble his money, but he absolutely will not do so on the weather and train connections. So the circus moved to the next town and Mr. Adams took increased learning.

Most folks don't like to give fakers and canvassers of various kinds any of their time, but not so with Mr. Adams. He listens to their stories and is glad to have the opportunity.

"You know book agents, canvassers, advertising fakers, etc., are, to my mind, the wisest people in the world, and unless I am very busy, I generally bid them step into my office to see if I can't learn something. They are not necessarily crooked, as most of us believe, the only thing being that they are such close students of human nature and they have the utmost confidence in themselves—if they haven't in their wares. Few of them are lazy, you'll notice. We simply think they're fresh because of their active manner and for that reason we sometimes misunderstand them. The fact of the matter is, a lot of them have real bargains to offer but we fail to take advantage of it because of our prejudice.

Mr. Adams is a firm believer in advertising, not only as a newspaper man, politician and banker, but as a plain business man. The Journal carries eight to ten and 12 pages a day, 60 per cent of which is paid space.

"If a merchant doesn't believe in advertising, he doesn't believe in doing too much business. Some time when one of your casual advertisers puts in an ad, make a deliberate mistake in it and then watch him howl. If in his advertisement he offers six bars of soap for 25 cents, cause it to read six bars of soap for 15 cents, the customers will convince him whether or not advertising pays. A merchant ordinarily can't force trade, but he can by advertising."

The Banner editor thanked Mr. Adams for all the fine things he had said about Goodridge and eastern Pennington county and invited him to spend a few days with him chicken hunting here this fall.

"Thanks, very much, if I have the time I'll do it, and bring Mr. Hannah along with me," said Mr. Adams. "And, in the meantime, if you happen to get down in my section of the state soon, don't forget me. Keep up the good work around here and things will come out fine, I am sure."

JOHN NYSTUL ACCEPTS MIDDLE RIVER PLACE

Popular Principal of Local Schools to Enter Upon New Duties

John Nystul, who for the past two terms has been principal of the Goodridge consilidated schools, last week accepted an offer of the Middle River school board and this fall will enter upon new duties in that thriving little city in the capacity of superintendent.

Mr. Nystul left for Middle River Friday and during the afternoon visited the schools there. In the evening he met with the school board and listened to a proposition offered him whereby he would become superintendent of schools there, which was accepted. He will begin his new duties August 1.

Mr. Nystul, who is still a young man, during his stay in Goodridge has made numerable friends among faculty, student body and the citizenry in general. He has not only busied himself and took an active interest in all school affairs, but his hand has been seen from time to time in the civic betterment and improvement of the village in general. Several weeks ago he purchased The Banner—no one really knows why—and later turned it over to the present publisher. Nystul has since taken a great interest in the welfare of this newspaper, for which the publisher is duly thankful.

The excellent work of Mr. Nystul has not went unnoticed in either Goodridge or other cities in villages of this section of the country as is evidenced by the Middle River board securing his services for next year. Supt. I. T. Simley of the Thief River Falls schools is another of the admirers of the young instructor and, in a statement to The Banner editor a few days ago, Mr. Simley expressed a strong desire of having Mr. Nystul come to Thief River Falls.

The school at Middle River is a state grade school and employs the services of seven teachers besides the principal. It is considered by instructors as one of the most progressive institutions of learning in northern Minnesota for a village the size of Goodridge and The Banner editor congratulates Middle River upon their choice for superintendent.

While Goodridge in general regrets his departure from our midst, we hope to see him often. Nystul's father and mother living in the vicinity of this city. The gain of Middle River is the distinct loss of Goodridge and The Banner feels that the place to be left by Mr. Nystul at the end of this term will be difficult to fulfill.

Harold Gunderson Home for Visit With Parents

Harold Gunderson is home for a visit after having spent about nine months at a naval hospital at Ft. Lyon, Colorado. Mr. Gunderson states that he feels much better after his stay at that place, and that he is well satisfied with the treatment he received at that hospital. He states the climate there is very hot at this time of the year, the evenings especially are very uncomfortable, which accounts for his visit north at this time. After a short visit with his parents, Mr. Gunderson plans to go to some other hospital in the state of Minnesota.

Oklee Comes to Test Mettle of Goodridge Ball Team Saturday

The baseball game which was scheduled for last week and postponed on account of bad weather and roads, will be played this coming Saturday, at 2:00 o'clock on the local diamond. Oklee will have a new battery with Joe Dymonog at the mound. Ted Torgerson will be behind the plate. The Goodridge boys have been practicing between showers preparing for the battle, and the local fans can expect a good game.

Mrs. Bishop Entertains

Mrs. J. M. Bishop of Thief River Falls entertained a number of her friends from Goodridge at a dinner party, in honor of Mrs. Stephen Noble on Tuesday evening.

Those present were Mrs. Noble who is the guest of Mr. and Mrs. Payne, and Mr. and Mrs. J. Payne. Later in the evening the guests and host attended services at the Presbyterian church. They returned to Goodridge the same evening.

Henry Svare Post Will Observe Memorial Day

At a special meeting this week of the Henry Svare Post of the American Legion, definite arrangements were made for the observance of Memorial day. A splendid program has been arranged for consisting of a Memorial day address, and special musical selections.

Immediately after the program it is planned to visit the cemetery at Torgerson, Erie and Germantown at which places the graves of the World War veterans will be decorated with the proper ceremony.

An attempt will be made to induce all car owners in the community to accompany the Legion men to the various cemetries where respects will be paid to the departed.

The opening program will be given on Main street, and will commence promptly at 10 o'clock.

SCHOOL INSPECTOR VISITS GOODRIDGE

J. E. Lunn of State Educational Dept. Makes Recommendations

J. E. Lunn, state high school inspector, drove to Goodridge Friday and in the afternoon visited the various departments of the local schools. Mr. Lunn expressed himself as well pleased with what he saw and the administration of local school officials.

In the evening, Mr. Lunn met with the board of education and at the meeting made several recommendations with regard to increasing class room facilities. He also made other suggestions pertaining to the high school department, which, it is expected, will be carried out by the board.

The recommendations for improvement made by the state inspector may be carried out with comparatively little expense to the school district and the latter will realize approximately $1,200 to $1,400 in the event the board sees fit to go through with them, and in addition will receive high school department state aid.

Mrs. P. O. Tvedt Shows Art Work of Lottie Elg

Mrs. P. O. Tvedt has in her home quite a number of articles in hand painting done by Miss Lotty Elg, daughter of C. O. Elg of Erie. Anyone wishing anything in the way of hand painted luncheon sanitas sets, pictures, vases, or novelties will please call on Mrs. Tvedt. If she doesn't happen to have the desired article, orders can be placed.

Many of Miss Elg's friends and acquaintances will remember that her health has been poorly for some time, and she was compelled to give up her work in the business world and go west. Since going west her health is very much improved, and she is now doing hand painting for a living until she is again able to do work that requires more strength and energy. Her many friends here will be pleased to learn that her health is so much improved.

Baccalaureate Sermon to Be Delivered by Sweger

Rev. Sweger, pastor of Trinity Lutheran church of Thief River Falls, will deliver the baccalaureate service to the Goodridge classes of the local school at the Lutheran church Sunday afternoon, May 28, at 3 o'clock.

There will be special music by the church choir. The baccalaureate service occupies a prominent part in the Goodridge exercises owing to the fact that this is the first graduating class from the high school here. It will be the first event of its kind in this community. A large attendance is desired and a cordial invitation is extended to all.

BUNDHUND FILES FOR TREASURER

Well-Known Banker and Mayor of Goodridge to Make Active Campaign

Nick Bundhund, mayor of Goodridge and cashier of the Farmers State bank of this village, with which he has been connected since 1912, Saturday formally filed for the office of treasurer of Pennington county against John Gullingsrud, the incumbent.

While the candidacy of Mr. Bundhund has been expected for some time by a number of his closest friends, it was not until about ten days ago that he decided definitely to enter the race, Mr. Bundhund being undecided as to whether or not he could spare the time to devote to putting up an active campaign for the place. He has a wide acquaintance throughout the county and is the possessor of a wide circle of friends among farmers and business men generally.

Mr. Bundhund, who is 56 years old, has been a resident of northern Minnesota since 1896, at which time he first settled in Marshall county, homesteading land in the county to the north. He was actively engaged in farming pursuits for eight years when he moved to Germantown and entered the banking business. He later came to what is now Goodridge, which was not Goodridge at all at that time, the townsite not having yet been laid out. He opened the Farmers State bank, with which he has since been connected and which is considered one of the best-known banking institutions in eastern Pennington county.

During his residency here, Mr. Bundhund, essentially a business man, has taken an active interest in school and civic affairs and has been connected in an official capacity with the local schools during the entire time. He was elected mayor of Goodridge more than two years and was reelected in the same capacity at the village election held several weeks ago. His administration is considered among the citizenry in general as one of the most efficient in the history of the village.

"It is at the solicitation of my friends that I have decided to enter the campaign for treasurer," Mr. Bundhund told The Banner editor yesterday, "and if elected to that important office I shall give it the attention it deserves. I have been a resident of this section of the country for more than 25 years and I consider that I am well informed as to its needs. Now that I am in the race, it is my intention to make an active and thorough campaign to win the office.

The candidacy of Mr. Bundhund is the only one so far having filed for county office from Goodridge. George Wilson, a farmer living eight miles northeast of this village, last week filed papers with the secretary of state announcing his candidacy for district judge against Andrew Grindeland, the incumbent. Mr. Wilson has also announced his intention of putting up a strong campaign for the post now held by the Warren judge.

It is expected that the political announcements of the two local candidates will appear in next week's issue of The Banner.

Goodridge Couple United In Wedlock By Rev. Lutz

Selmer Dahl and Hilda Jorgenson, both of Goodridge, were united in marriage at the German Lutheran parsonage at 3 o'clock P. M. on Wednesday, May 17. The ceremony was performed by Rev. H. Lutz in the presence of a few intimate friends of the bridal couple.

The newly-weeded couple left in the afternoon to return to their future home and will live on a farm near Goodridge. Their many friends joins with The Banner in wishing them success and happiness.

COMMUNITY CLUB MEETS TONIGHT AT SCHOOL

The Community club meeting will be held in the schoolhouse tonight (Friday evening). A big crowd is looked for and a good program is in store for all who attend. The program committee is busy and are attempting to secure out-of-town speakers, as well as arranging for other entertaining numbers in the way of music and other stunts. Everybody come and enjoy a pleasant evening.

—COMMITTEE.

AMERICAN LEGION
US
LEGION

THE GOPHER PRESS

Every member of The American Legion of Minnesota should be proud to live in a state where the press is so solidly American, so willing to co-operate with the veterans, so intensely interested in what Legionaires are trying to do, so ready to help them. The American Legion of Minnesota is strong and powerful. Why? Largely because, in Minnesota, Legion news gets publicity. According to Lemuel Bolles, Legion National Adjutant, no state in the nation is so generous in this respect. Gopher editors have no axes to grind other than to serve their communities. And they know that helping the local Legion post is one of the best ways of helping the community.

The newspaper editors of Minnesota wield a tremendous influence for good—or evil. They have chosen to back the forces of good, of patriotism, of Americanism. They have helped make Minnesota one of the most truly American states in the Union. In isolated cases, in a minority of states, editors may be controlled by certain interests opposed to the principles for which Legionaires stand. These interests crack the whip and the editors jump.

Nothing like that in Minnesota. Look over our state newspapers. See at their helm a set of thinking, patriotic, four-square men, not one of whom could be bought away from what he believes to be in the best interests of his country and his community. Practically all were sound and sane during the war. They served then. They are serving now. Hats off, Gopher Legion Gang, to the press of Minnesota, the best press of the best state in the nation. And better still, show the appreciation of the Gopher Gang by standing four-square back of your home town newspaper. It's editor has helped you. Help him—Now!

Boost for Minnesota

Business conditions in Minnesota are improving. More jobs are to be had. Corn; bees and pork are going up. Crime is decreasing. Unrest is diminishing. Spring is here. Isn't it a grand and glorious feeling to know that Legionaires of Minnesota can honestly believe their organization has had a big part in bringing about this resutl? When National Commander MacNider launched his Legion nationwide campaign to get jobs for unemployed buddies, Minnesota Legionaires were ready with an almost perfect chain of Legion employment agencies which have done their bit in bringing Minnesota employers into touch with veterans out of work. Minnesota is rapidly recovering from post-war depression. Minnesotans are sturdy, self-reliant and resourceful people. And the American Legion of Minnesota is a body of sturdy, self-reliant and resourceful veterans who are for their home state first and forever. Boost for Minnesota, Gopher Gang. It's the best state in America. Let's go!

Do you know what The American Legion is? And what it stands for and hopes to accomplish? In a general way, the answer is contained in the following extract from the Radiophone Address of Dr. Arthur A. Van Dyke, Minnesota Legion Commander, broadcasted from the St. Paul Pioneer Press wireless station at 8:00 P. M. Thursday, April 25th, to the hundreds of radio receiving sets in the northwest:

"Greater love had no man than this—that he lay down his life for his friend." Within this simple sentence lies the expression of a great ideal, expressed with such simple dignity as to be almost scared. Think of a man who, filled with ambition, goes about his daily work, fired with determination to succeed, strong with the inspiration of success, every fibre of his body throbbing with youth and health, his heart pulsing with the joy of life. And then the great moment comes, the opportunity to give all, even life, the moment of decision—and he is gone; dead, that his friend might live.

Love of country goes hand in hand with love of comrades. The same loyalty and unselfishness which prompts a man to die for his comrades, rouses within him the pure spirit of patriotism which prompts him to give up his life for his flag. With that pure spirit, more than sixty thousand Americans gave up their lives for Old Glory in the great war. And with the same pure spirit more than sixty thousand of their comrades, although not required to pay the supreme sacrifice, left upon the far-off fields of France their dearest possessions—health, limbs, sanity, the strength and vigor which every human being prizes more than life.

For months since the great war ended, one by one, the bodies of our beloved dead have ben returned to the homeland. And now our government announces the return of the last battalion of our dear ones—all that remains of these splendid Americans who sailed away four years ago to lay their all upon the altar of humanity. Now they are resting peacefully in our cemeteries; the last rites pronounced, the last words of praise and sorrow spoken. And on May 30th, with tenderness and loving recollection, upon each grave will be placed the tribute of their comrades of the Legion upon Memorial Day. So too, beyond the seas in far-off lands, where lie forever the remains of twenty thousand other Americans who gave their all, above each grave upon Memorial day, men of the Legion will stand with bowed heads and pay them honor.

The American Legion, banded together to honor the dead and help the living, can do no more worthy work than this. Each of us living now will pass into the Great Beyond as time rolls on. When we are gone, our resting places will be remembered and beautified by the comrades we leave behind. And how much more shall we be deserving of that remembrance and reverence if we help now to keep green the graves of our comrades at home and in strange lands, for from their loved ones and the America they died to save. It means more to America than anyone can comprehend for us to honor the dead, to live over the days when men offered their lives for their country and comrades.

Great, indeed, is that love which prompts a man to offer all for his flag or his friend. And still greater love has he who lives, and living serves his country and his friends. Who sacrifices himself for his fellows, who gives unselfishly of his time, of his money, of his health, that his fellowman be bettered. Who gives of himself, knowing that it is more noble to give than to receive. Who gives openhandedly of those things which are his, knowing no reward except that which comes to him who does good deeds. Upon this ideal of unselfish service, America's veterans of the great war have founded The American Legion, an organization dedicated to service, service to God, service to country, service to community and state, service to less fortunate comrades: unselfish service, asking nothing but that the ideals for which America fought be not trampled by unthinking feet.

To have honorably and actively served America in the army, navy, marine or nurse corps is the only key to Legion membership. Within the Legion there is no rank, no politics, no religion, no color line or financial standing. Thus, the American Legion is as representative as America itself. Its membershap is the Nation's greatest bulwork against bigotry. It will cleanse politics, help capital and labor understand each other, overcome race prejudice. It is the nation's strongest safeguard against radicalism, a mighty influence for world peace, and at the same time an impregnable defense against foreign invasion. And back of the Legion is its Auxiliary, enrolling within its ranks the millions of mothers, wives, sisters and daughters of the men who served—noble women who themselves served unselfishly in wartime and are just as patriotically serving now. Together, these two great bodies, the men of the Legion who served, and the women of the Legion Auxiliary who stood behind them, go forward, the destiny of the nation safe within their keeping.

Science of Chemistry Is Applied to Manufacturing

Science progressed from its original field in the industrial world until its thoughts now guide the manufacturing of all food products from yeast cakes to plum pudding.

This identical chemical science now governs the manufacturing of all high standard food products such as evaporated milk, condensed milk, canned fruits, cheese, and most all other food products but coffee until Nash's Delicious Coffee was introduced, and received with instant favor among coffee drinkers who marveled at its superior rich flavor,—the coffee flavor they had always hoped for and expected to find some day.

It is a matter of record that in many sections of the United States water is generally alkaline in nature, or in other words "hard water" which gives to a brew of coffee, a thick bitter and somewhat stale flavor, if the alkali, lime, or iron in the water is not neutralized and the water thereby made soft.

By applying the thoughts of chemistry to the selection, blending, and roasting the Nash's Delicious Coffee, growths were discovered which contained natural saps and flavor effective in softening or neutralizing hard water, so that by using Nash's blend you can now make and enjoy the true pure rich flavor of coffee as nature intended it to be, and as it is enjoyed in localities where soft water is a matter of natural supply.

This is but a brief review of the art and science of chemistry as now applied to the proper production and service of roasted coffee and modern food products.

Nash's Delicious Coffee by reason of modern coffee science is different from all others and will be welcomed by discriminating people as the solution of their coffee problems.

A KODAK ON THE HIGHWAY

Those who speak the language of humanity never stutter.

* * *

The man who wants to trade an encyclopedia for a baby carriage knows that he will have scant use for words any more.

* * *

Times haven't changed much since the beginning. Women are still doing the work, and men the boasting.

* * *

Even its enemies admit that prohibition has tended to prevent banquets; and what a blessing that is.

* * *

Looking over the Palm Beach pictures, one wonders how the birds can stand it to go South for the winter.

* * *

When a fellow tells his girl his heart is all on fire for her, if she is wise she prefers to know whether he is good at lighting the furnace.

* * *

It may not be easy to know a lot about religion, but it's easy to feel a lot about it, and that is the important thing.

* * *

"Times ain't what they used to be," says the old rememberer. Nope, they ain't. They're a whole lot better.

* * *

John D. Rockefeller's church uses an adding machine. John himself, however, has been most successful as a subtracter.

* * *

As the grass everywhere turns green, most of us fade imperceptibly into the common landscape.

* * *

Scientists say the world is now 1,700,000,000 years old. Holds its age well, doesn't it?

* * *

Now that it's getting warm the women who wore open neck dresses all winter will begin to wrap furs around them.

Most folks can carry cold cash without wearing gloves.

Next to inducing a balky cow to give up her treasure on a hot night and having mosquitoes playfully bite their initials in your neck as you guide the white fluid into a tin pail, we beleve that gardening is just about the most melancholy outdoor sport ever devised by a nut on work.

A smart model seen this week was fashioned of lavender-colored satin, with a tam-o-shanter crown somewhat high in front and a narrow brim rolling back from the face.

Money may talk, but there are few who understand the language.

She Wants Her Girl to Marry a Farmer

The Farm Home is the Safeguard of Family Life, Says Woman Who Won Prize

The farm home is the stronghold of real family life. That is what Mrs. Minnie Ellingson Topping of Bloomington Ferry, Minn., wrote in reply to the question: "Would You Want Your Daughter to Marry a Farmer?" Her letter was one of two letters from Minnesota farm women to win prizes in a nationwide contest.

"There is a special reason why I would like to have my daughter marry a farmer," Mrs. Topping wrote from her farm home. "I wish to have her surrounded with interests that will emphasize the best qualities of her soul and make use of the highest capacities for which she, as a woman, is fitted.

"The country is an ideal setting for family life. One of our big newspapers had recently this headline: "Will the Family Stand?" The very hope of America today is in the family. Anything that disrupts it makes for anarchy.

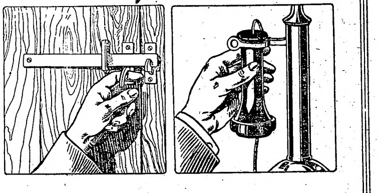
"Romance plays a good part in young life. Last winter I went with a neighbor on a milk route. Crossroads being drifted, teams met the truck, with their cans of milk. These teams were often driven by boys, khaki-clad and fur-clad from head to foot. They have had their thrills at first hand. Young princes of the farms that they were, they might have been envied by any city boy.

"The boys and girls who go with their father to the barn these early spring mornings are introduced to nature's secrets through the new calf, lamb or colt that has taken up its abode over night. Sex lessons are taught right, because naturally.

"My daughter, having been reared with close attention to the fact that water and heat in the home are necessary to health, would be expected to embody these conveniences in the plans she makes for her home, with her farmer-husband, and to insist that sanitation and convenience be the rule in the house as well as in the barn. From childhood, my daughter has had a small amount of money to control, and by this has learned the value of money. I would expect her to formulate some system of finance with her husband that would bring her a share of the earnings of the farm; it may be a budget system, a side line—like chickens, milk or garden—or a direct share of the farm's output. It must be something, recognizing her partnership in the enterprise, and adequate to maintain her independence and self respect.

"She should be logical enough to meet emergencies in a sensible manner; if this meant the climbing of a windmill, or hitching up a fractious team or other outside work, I should expect her to do it efficiently. In her devotion to husband and home, she would not forget that she is a social being, functioning for community betterment through the mediums of healthful amusements, mental alertness and spiritual uplift.

"Believing that the country is the very best place for putting into practice the ideals that have developed with her character, for furthering principles of industry, and the intelligent administration of homely but worthy tasks, for fostering a love for simple things, and for loving service to her own and others, I would be very glad to have my daughter marry a farmer."



To Every Door
—Everywhere

Lift the latch on your telephone door, and at once you step over the threshold of distance and greet your friend or business associate, wherever he may be.

How simple and easy it is!

And yet how effective and businesslike!

By using the long distance telephone you may save an expensive and tiresome trip. You may save the inconvenience of traveling. You may avoid unnecessary waits, delays, and possible disappointment. You may conserve valuable time that will mean success in a social plan or business transaction.

Whenever you want to reach anyone, anywhere, any time, the long distance telephone is the best and quickest way.

Soil Conditions Ideal — Big Increase in Potato Acreage In 1922

In spite of the heavy rains of last week, at which time two storms of considerable magnitude developed and some damage done in Pennington county and northwestern Minnesota are viewed with high hope. The soil conditions are ideal and the warm weather of the past couple of days has placed the ground in the best possible condition. In fact, a large part if the seed is out of the ground and all potato planting about done.

Planting of small grains came about a week to ten days late, owing to the lateness of the season, but considering the wonderful start they received when once in the ground, it is not believed that growers have been placed at a disadvantage on account of it. A survey of crop conditions throughout the county indicates that at least 75 to 80 per cent of all palnting has been done. Rye is looking especially good this year and unless some extremely unseasonable weather develops thus summer, a good yield will be assured. The same may be said of all early wheat and a trip through the country will demonstrate the truth of this.

The rain did some damage to the west of Thief River Falls and perhaps drowned out several acres in the low spots here and there. However, where large pools of water had collected it appeared that it occurred in the undeveloped sections and land not seeded into crop. To the north of the city the same conditions prevail but in other sections the rain did not fall in such torrents as visited this city and St. Hilaire, where the rain came as a veritable cloudburst and inundated parts of the village. A heavy wind which accompanied the rain blew down several smaller buildings there, but no serious damage done otherwise.

Soil conditions throughout northern Minnesota are called ideal this spring and all seed has been given the start it neded. The heavy rains did not do the damage they would have had the weather continued mild after the rainfall. Cool weather set in and allowed the fields to drain off the excess water thereby eliminating baking of the soil and preventing killing of the seed. Perhaps 15 per cent of the fields in this vicinity were flooded at one time, but better drainage has practically eliminated the danger of total loss in this respect.

Famous Veterinarians Coming to "U" Farm

What will undoubtedly be the biggest and most significant meeting of veterinary scientists the northwest has ever known will be held at University farm, St. Paul, July 12, 13 and 14, the dates selected for the summer meeting of the Minnesota State Veterinary Medical association and a short course having the support of the University of Minnesota.

Dr. W. L. Boyd of University farm is president of the association, and Dr. C. P. Fitch, chief of the university's division of veterinary medicine, is secretary-treasurer of the state organization.

Some of the most noted teachers, investigators and scientists known in the field of veterinary medicine have accepted places on the program. In this splendid galaxy of speakers will be Dr. H. S. Murphy, professor of veterinary anatomy, Iowa State college; Dr. J. N. Frost, teacher of surgery, New York state veterinary college, Cornell university; Dr. B. H. Ransom, of world wide reputation as a parasitologist, United States Department of Agriculture; Dr. O. V. Brumley, veterinary college, Ohio State university; Dr. L. A. Merillat, editor of Veterinary Medicine, Chicago; Dr. H. Lothe of Waukesha, Wis., widely celebrated as a practitioner; Dr. E. A. Cahill of Zionsville, Ind., who is to speak on diseases of swine, and Dr. L. Van Es of the University of Nebraska who will speak on diseases of poultry.

Budworm Killing Pine In Northern Minnesota

The budworm, working in northern Minnesota, has already destroyed a large amount of balsam and spruce, and the end is not yet, according to S. A. Graham, an entomologist of the University of Minnesota.

The budworm is the larva of a small grayish moth which feeds on the new growth of balsam and spruce, and therefore a menace to the pulp and papermaking industries of the country. Dr. Graham says the budworm and the secondary insects which follow it have already caused losses ranging from 50 to 100 per cent of the balsam and spruce in the counties of Lake and Cook.

University scientists and employees will undertake to determine the extent of the infestation and what can be done to control it. A few years ago Dr. Graham, on the invitation of the dominion vogemrneK,etaoshrdluu the dominion government, made an intensive study of pine districts in Canada which were being ravaged by the budworm. Losses sustained by the lumber interests of that country have been almost incalculable.

GARDENING

Gardening is an ancient and honorable pastime.

Many men make a garden to save money, and others make money to save gardening.

They say that gardening reduces the cost of living, but we think it makes life not worth the living.

There may be a lot of fun in teasing along a slow tomato, or in chasing the potato bugs over into the next township—but our sense of humor doesn't run that way.

Still this isn't any worse than asking for a shampoo en casserole.

SAYS DAME FASHION

New York, April 18.—The next spring suit of serge, whipcord or twill finally has made its appearance on the avenue and is setting up furious competition with the tweeds which have been popular for a month.

Navy, of course, is the favorite color. There are two styles which have the endorsement of Old Lady Fashion herself.

Odds and ends of black satin braid usually trim these coats. Fanciful designs are outlined across back and hems and sleeves. One such was a complete spider-web over the back, with smaller spider-webs on cuffs and pocket flaps.

There is a single fastening at the throat, and this somtimes is a cord of the material which ties in a little bow.

Most youthful and becoming to slender figures is that which shows a circular line coat, of hip length, with Buster Brown collar and three-quarter length bell-shapped sleeves.

A popular fancy fastens the pockets at the very edge of the coat and allows the pouches to extend below the hem line.

The other model presents a coat well below hip length on straight, slender lines, with Tuxedo collar falling quite to the waist and ending in a double-button fastening. Sleeves of this coat are very narrow. Seams are outlined by braid.

Tweed suits make up m brilliant colorings all that is lacking in the more dressy serges and twills.

Somewhat severe sports lines characterize these suits, although the later showings run to circular coats. Such trimming as is indicated expresses itself in rows of stitchings. Scarves of Roman stripes lend additional look of gayety.

Wherever crowds are in this city of crowded places there will be dashes of rose, Copenhagen, orange, golden brown, lavender and periwinkle. It hardly seems possible that rough, losely woven materials such as tweed and homespun can be accomplished in such bright shades.

Sports coats appear in the same colorings and general design.

Many collars are merely scarves with fringed edges. One end is crossed over the front and thrown back carelessly on the shoulder.

Hats are running riot as to shape, trimming and shade.

The red which blazed everywhere a few weeks ago is giving place somewhat to quite as brilliant lavender, gold, green and blue. These are worked out in sports omdels of taffeta and are banked with flowers of all descriptions which climb against crowns and fall over the edges of brims.

Violet-colored satin grapes lay across the front and dropped in in delicious looking bunches over the sides.

State Road Paving Takes Only Tenth

Paving is taking about ten cents of each 1921 and 1922 state trunk highway dollar, more than 80 per cent of the fund under the Babcock Good Roads law being used for maintenance, gravelling, grading, bridges and similar work to distribute early benefits widely on the 7,000-mile system.

The foregoing showing is made on official figures in a state highway bulletin this week outlining methods authorized by the legislature for financing the trunk highway program. The paving summary lists 294 miles of which 58,65 miles is by the state and paid for direct from trunk funds, and the remainder or 235 miles is by counties acting under refundment and reimbursement laws.

Charles M. Babcock, state highway commissioner, points out that the state is building but one mile of hardsurfacing while four miles are laid by counties controlling funds which must be spent within their boundaries and subject only to state specifications and supervision.

The state paving at an average of $28,787 a mile cost $1,688,383 or about one-tenth of the total trunk fund revenue of $16,170,000 for the 2-year period. The biggest project is that of 25 miles of concrete at $630,554 on T. H. No. 1 between Northfield and Wescott, only recently started.

Fourteen counties have filed claims for $3,717,518 of refundments for 116 miles of paving at an average of $32,058 and nearly all have been charged to the trunk highway fund, the bulletin shows. Sherburne county claims total $520,227; Watonwan, $518,780; Hennepin, $346,488; Ramsey, $338,605; Dakota, $276,738; Stevens, $252,135; Chisago, $243,332, and Kandiyohi county, $237,413.

Reimbursement projects in seven counties aggregate $3,673,811 for 119 miles at $30,859 average. St. Louis county leads with $1,737,377; Itasca, $843,291; Benton, $559,474; Morrison, $336,089 and scattered jobs make up the balance under the special legislative provisions.

FREE-$1,855 in Cash
You Can Win

A Word Contest without a Catch in It

OPEN to everybody—and everyone has an equal chance at the big prizes—$500, $375, $250, $175, $125, $100, etc. Here's an easy, enjoyable way to win some real vacation money, enough to take a long trip.

See how many words you can make out of the letters in the three words—

"Nash's Delicious Coffee"

(For instance: Ah, Nice, Delicious, Clean, Coffee, etc.)

Send in your list today—you may win a big prize. Someone will win it. You have the same chance. Try your skill now. If your list is the largest, and conforms with the rules printed below, you will be awarded first prize. If your list is second largest, you will get second prize, and so on.

Costs Nothing to Try

You do not have to pay anything or sell anything or buy anything to enter this contest, or to win a prize.

But if you send one complete label from a can of Nash's Delicious Coffee and the judges decide your list is the nearest correct list—the first prize will be $100 in place of $20.00. If you send THREE complete "Nash's Delicious Coffee" labels with your list, you will receive a still larger prize. See schedule of prizes below. We make this special inducement because we want you to get acquainted with

DELICIOUS Nash's Coffee

WE BELIEVE that if you try it once, you will never be satisfied with any other kind.

It's the last word in coffee blending—a *perfected* blend based on exhaustive studies and research. It is so blended and roasted that it neutralizes hard or alkaline water and brings through the true coffee flavor. Whether you use hard or soft water, it makes a delicious, smooth, satisfying and refreshing cup of coffee.

Mountain plantation coffees are bought at premium prices for this special blend because of their better flavor, body and richness of sap. Only a few of the thousands of offerings of coffee beans made to us pass our exacting tests and meet our strict requirements.

Always the same. By constant care in buying our raw coffee beans, and by making careful tests throughout every process of its manufacture, we always maintain the same perfected blend—the same high standard in every batch that goes out of our factory. Nash's Delicious Coffee is the same today as a month ago, and will be the same a year hence, always delicious.

Air cleaned. Chaff and coffee dust are removed by air suction during the process of steel cutting in our special machines—leaving a clean clear-cut coffee. The result is a crystal-clear cup of coffee, free from all stale and bitter flavors, free from "coffee mud."

"Hot Roasted" Freshness. Nash's Delicious Coffee is shipped on the same day as roasted and cut—or not later than the following morning. We roast only enough each day to fill orders on hand.

Packed in moisture-proof, hermetically-sealed "Napacans"—which protect its crispy freshness and pleasing flavor from dampness—dampness being one of the greatest enemies of coffee flavor.

Sold by grocers in one and three pound containers. Whether you enter the contest or not, you will be well rewarded if this advertisement induces you to try Nash's Delicious Coffee.

LIST OF PRIZES WINNING ANSWERS WILL RECEIVE PRIZES AS FOLLOWS:

	If No Labels Are Sent In		If 1 Label Is Sent In		If 3 Labels Are Sent In
1st Prize	$20.00		$100.00		$500.00
2nd Prize	10.00		75.00		375.00
3rd Prize	5.00		50.00		250.00
4th Prize	5.00		40.00		175.00
5th Prize	5.00		30.00		125.00
6th Prize	2.50		25.00		100.00
7th Prize	2.50		20.00		80.00
8th Prize	2.50		15.00		60.00
9th Prize	2.00		15.00		40.00
10th to 15th Prizes	2.00	10th to 15th Prizes	10.00	10th to 15th Prizes	25.00
	$66.50		$430.00		$1,855.00

Do It Now! *Send in Your List at once*—qualify for the big cash prizes by enclosing the labels with your list.

RULES OF CONTEST

1. This contest is open to any man, woman, boy or girl in America, except employees of The Nash Coffee Co. and their relatives. There is no entrance fee of any kind.
2. Use only one side of the paper on which you write your list. Write your list of words in alphabetical order and number them. Write your full name and address in the upper right hand corner of each sheet.
3. In any one word, do not use any letter oftener than it appears in the words "Nash's Delicious Coffee."
4. The judges will count only English words found in Webster's New International Dictionary.
5. Obsolete, compound or hyphenated words may be included in your list if found in the dictionary mentioned above. Either the singular or plural of a word may be used, but not both of them.
6. The same spelling of a word will be counted only once, even though it may have different meanings.
7. Two or more people may co-operate in this contest, but only one prize will be awarded to any such group, and only one prize will be awarded to any one household or family.
8. If you send labels with your list, each label must be *complete* as wrapped around the face of each can of "Nash's Delicious Coffee."
9. All lists will receive equal consideration, whether labels are sent or not.
10. The prizes will be awarded for the largest list of words that qualify. The person sending in the largest correct or the nearest correct list will win the first prize. The one sending the next best list will receive second prize, etc. No other consideration, such as neatness or arrangement will have any bearing in awarding prizes. However, by writing as plain as possible, or by typewriting your list if possible, you will assist the judges in counting every word that qualifies.
11. In case of a tie, the full amount of the prize will be awarded to each contestant tied.
12. The prizes will be awarded by a committee of impartial judges.
13. *All lists must be mailed by post office closing time, Friday, June 8, 1922.*
14. The prize winners will be announced two weeks after the close of contest.

EDITORIAL

MAIN STREET—SANE STREET

Goodridge cannot hope to attain its place in the sun so long as this city permits of the deplorable and unsightly appearance of its streets to continue.

The recent rains have worked havoc with the main avenues of traffic in this little city of ours, and The Banner feels that something ought to be done to remedy the matter. Water lies in the streets inches deep and it is with great difficulty that automobiles and horse-drawn vehicles are able to move at all.

The first thing we know somebody is going to get struck right in the middle of the street and we will have to call out our reserves to extricate them. It has happened before and there is a strong liklihood that it will again.

There is both embarrassment and humiliation in that sort of a situation and it should not be tolerated any longer than necessity permits. As far as The Banner is able to understand, Goodridge is well able to take care of its own streets and make them passable in the ordinary sense, which they most emphatically are not at the present time.

We do not know what it would cost to have the streets gravelled, but it is fairly certain that it could be done at a nominal cost and at one the taxpayers would not feel to any great extent. Putting a grader to work on them may help some, but to make them really substantial they require at least a coat or two of gravel.

We've got to fill up the ruts with something other than mud if we want visitors to come here the second time. Hence the gravel.

Most folks steer clear of a mud hole and it is indeed deplorable that we should have such a multitude of them right here in this fair little city of ours. We have no moral right to agitate for good roads, better roads and more of them, living, as we do in the proverbial glass house.

If there is any good reason why the streets of Goodridge should remain as they are, The Banner should like to hear of it. Hard times may account for the lack of a great many things so far as civic betterment is concerned, but we cannot afford to allow folks to give us a wide birth simply because our streets come almost to the point of preventing them from driving into town to pay us a visit. That's the poorest kind of economy, in the humble opinion of this newspaper, and, as a matter of fact, is not economy at all.

DENIED A LIVING WAGE

Figures recently presented leave no basis for the supposition that clergymen in great part are startlingly underpaid, in a time of high living costs, because church attendance has fallen off and church membership decreased. It is shown that church membership has increased by more than 4,000,000 during the last five years. There are now 46.000,000 church members in the United States, of whom 24,000,000 are Protestants. and they include the rich and moderately well off as well as the poor. Ministers could be paid as well as any other class now serving the public, yet in the year 1916 the 170,000 active Protestant clergymen in this country were paid an average of $735 a year or $14.13 a week, on which they struggled to maintain families usually of a good average size. The actual situation is said to be in great part even worse than those figures indicate, for if the salaries of clergymen in the cities and a few "popular" pastors elsewhere were omitted from the reckoning, the majority would be found receiving a much smaller average salary than even $735.

Writing in the Ladies' Home Journal, Charles H. Sheldon tells a tragic story of how in many churches the pittance given the minister is supplimented in ways that deeply humiliate him and his family, and of the hard necessity compelling sensitive families to accept cast-off clothing and what not. No wonder the number of candidates for the ministry is decreasing and many pastorates are vacant. In very many churches the minister can manage to live in even limited comfort only by remaining a bachelor.

Referring to the material progress made by Philadelphia's large negro population, including a theatre, a savings bank, insurance companies, etc., the Record of that city says: "There still remains for the colored voter, male and female, the achievement of political independence. It should be a humiliating fact for the more intelligent members of the race that the negro elector is looked upon by the Republican bosses as being little better than a chattel who is expected to vote as he is ordered and to whose wants only the most trifling recognition is given. Voting thus as a bloc, with little comprehension of the issues at stake, the colored population becomes at times a real menace to the welfare of the city and state."

The goldenrod has been dethroned and the dandelion has been crowned as the national flower, according to a Pennsylvania observer, who names Mr. Volstead as the king-making Warwick in this instance. If any one doubts, says the authority quoted, let him go into the rural districts and note the wide and even "tender interest" in the dandelion. "Natives are not only admiring it, but they are actually gathering it and taking it home in great quantities. They are bathing it in warm water, feeding it with sugar and treating it with kindness hitherto unheard of."

The surprising news comes from Washington that provisions of the tariff bill, as revised by the senate finance committee, include a delegation of authority to the president to increase rates of duty named in the bill by as much as 50 per cent, to change classifications, to substitute an American for a foreign valuation at will as a basis of calculating customs taxes and to declare embargoes when he thinks there are unfair methods of competition in the import trade. It is objected that if the president can take over the taxing power of congress to this unprecedented extent, he can also change income-tax or any other rates at will.

The charge that the Wilson administration was responsible for intervention in both San Domingo and Haiti is as incorrect as it is pointless. The Roosevelt administration intervened in San Domingo, and the Harding administration is continuing and defending the occupation of both San Domingo and Haiti.

In the first four months of 1922 there were 1200 fewer marriages in Chicago than in the corresponding period in 1921 and 2000 fewer than in the corresponding period of 1920. Presumably the high costs are fostering the bachelor habit.

Tomorrow must be at least as good as today, since it has to-day's accumulated treasure.

When you flim-flam some other fellow you teach him a bad trick which some day he may work on you.

Every Potato Means
Additional Profit

When the price per bushel you receive for your potatoes is low, good profits can still be made by saving time and labor and by getting every potato in the field. It costs you no more to harvest completely and you get the extra dollars for your increased crop, if you use a

HOOVER
POTATO DIGGER

The Hoover Potato Digger digs up all the potatoes in the field and piles them in neat rows where they can be handled with minimum labor. This digger has proved to be an especially good investment to all potato-growers who have used it.

The shovel is of best quality high-carbon crucible steel and shaped so as to gather the potatoes with the least possible loss. No danger of cutting the potatoes to the extent that a plow or hoe does. Stone guards can be used in stony ground. You can raise and lower the shovel while the machine is in motion. All adjustments are made from the seat by convenient levers.

The vine-separating rear rack has a backward and forward motion that sifts out all dirt and deposits the potatoes in a compact row on clean ground directly at the rear of the machine, while the vines and trash are deposited at one side.

Four roller bearings and wide tires on the wheels assure light draft.

Patented Double-Action Front Truck permits the digger to be turned in a very short space.

Solid steel frame, strong main sides of Bessemer steel, beams of best quality charcoal malleable castings, and steel chains and hardened steel sprockets that greatly resist wear.

Don't fail to see the Hoover Potato Digger before you harvest your potato crop; its use means greater profits. Also ask us about Hoover Engine Drive Potato Diggers—two-horse machines under all conditions, and any other potato tools you require.

Bad Weather Raises Havoc With Baseball This Week

Among other things, baseball has felt the bad weather as strongly as anything else.

The heavy rains and bad roads has put a crimp in two ball games this week, possibly three. A game between the married men of Goodridge and the high school team was scheduled for Tuesday night, Oklee was scheduled to play a return game with the local high school team on Wednesday, and it is possible that the Matrons of Goodridge would have given the young girls another merry chase had weather conditions been favorable.

These games will be called as soon as weather conditions moderate and will be announced in The Banner later.

School Notes

The following is a civic creed given at high school assembly by the third and fourth grades:

Children's Civic Crede

I am a Citizen of Goodridge, Minnesota, and of the United States.

I will help to make my town a clean, healthful and beautiful place to live in.

I will help to make my state better by obeying its laws and by helping others to obey them.

I will be a good American, and will always love my country and my country's flag.

I will try to learn to make an honest living so that I may be happy myself and helpful to others.

I will always try to be fair in play and true in work.

I will try to be kind to every living thing—the poor—the weak, the old, and especially the dumb animals.

I pledge these services to my village, my state and my country.

Citation for Hearing on Petition to Sell, Mortgage or Lease Land

Estate of Christian Christianson.
State of Minnesota, County of Pennington—ss. In Probate Court.
In the matter of the estate of Christian Christianson.

The State of Minnesota, to Carl J. Christianson, Gladys C. Christianson, Alice J. Christianson, Orville M. Christianson, Merrit H. Christianson and Mae K. Christianson, all persons interested in the mortgaging of certain lands belonging to said estate. The petition of Olive C. Christianson as representative of the above named estate, being duly filed in this court representing that it is necessary and for the best interest of said estate and of all interested therein that certain lands of said estate described therein be mortgaged and praying that a license to be granted to mortgage the same.

Now, Therefore, You and each of you, are hereby cited and required to show cause, if any you have, before this court, at the Probate Court rooms, in the Court House in Thief River Falls, County of Pennington, State of Minnesota, on the 27th day of May, 1922, at 10 o'clock A. M., why the prayer of said petition should not be granted.

Witness, The Judge of said court, and the seal of said court, this 28th day of April, 1922.

LARS BAKKE,
Judge of Probate Court.
(Court Seal). M-5-19

MORTGAGE FORECLOSURE SALE

Notice is hereby given that default has been made in the conditions of a certain mortgage containing power of sale, executed by Tollef Loyland and Tina Loyland, his wife, mortgagors, to First State Bank of Thief River Falls, a corporation under the laws of the State of Minnesota, mortgagee, dated the 20th day of January, 1917, and duly recorded in the office of the Register of Deeds in and for Pennington County, Minnesota, on the 25th day of January, 1917, at 1:45 o'clock P. M., in Book 54 of Mortgages at page 297, which said mortgage was thereafter and on the 31st day of January, 1917, for a valuable consideration and by an instrument in writing, dated on that day, duly executed and acknowledged by said First State Bank of Thief River Falls, sold, assigned and transferred to Edwin White, which said written assignment was thereafter and on the 21st day of February, 1917, at 1:00 o'clock P. M. of that day duly recorded in the office of the Register of Deeds in and for Pennington County, Minnesota, in Book 56 of Mortgages on page 352 thereof, which said mortgage was thereafter and on the 4th day of May, 1917, for a valuable consideration and by an instrument in writing, dated on that day, duly executed and acknowledged by Edwin White sold, assigned and transferred to Gertrude M. Harlow by said Edwin White, which said written assignment was thereafter and on the 10th day of May, 1917, at 1:00 o'clock in the P. M. of that day duly recorded in the office of the Register of Deeds in and for Pennington County, Minnesota, in Book 56 of Mortgages on page 385 thereof, and at the time of this notice there is claimed to be due and is actually due on the said mortgage, according to the terms thereof, the total sum of Two Thousand and Thirty-one and 08-100 ($2,031.08) Dollars, on the note secured by said mortgage, consisting of the principal sum of Two Thousand ($2,000.00) dollars, and interest thereon amounting to the sum of Thirty-one and 08-100 ($31.08) dollars, which said default has continued to date by virtue of the failure and neglect of said mortgagors to pay said sums, although demand has been made therefore, and no action or proceeding having been instituted at law or other-wise to recover the debt or any part thereof secured by the said mortgage.

NOW, Therefore, Notice is hereby given that by virtue of the power of sale contained in the said mortgage and of the statute made and provided the said mortgage will be foreclosed by a sale of the mortgaged premises therein described at public auction, to the highest bidder for cash, at the main front door of the Court House in the City of Thief River Falls, Pennington County, Minnesota, on Monday, June 26th, 1922, at 10:00 o'clock A. M. of that day, to satisfy the amount that shall then be due on the said mortgage with interest thereon from the date hereof and the costs and expenses of such sale and the sum of Seventy-five ($75.00) dollars Attorneys' fees as stipulated in said mortgage in case of foreclosure.

The premises described in the said mortgage and so to be sold is all that tract or parcel of land lying and being in the County of Pennington and State of Minnesota, described as follows, to-wit; The Northeast (NE¼) Quarter of Section Sixteen (16) Township One Hundred Fifty-three (153) North, of Range Thirty-nine (39) West of the Fifth Principal Meridian, containing one hundred sixty (160) acres, more or less, according to the United States Government Survey thereof.

Dated at Thief River Falls, Minn., this 3rd day of May, 1922.

WILL YOUR GIRL WED A FARMER?

Farming Never Offers "Insult of Ease," Says Mother

The discipline of farming, and the education it gives in the elemental things of life are turning out a race of forceful, broadminded, self reliant men and women. It is worth while.

That was what one farm mother wrote in answer to the question, "Would You Want Your Daughter to Marry a Farmer?"

She wrote as if to her own daughter:

"Dear Mary—Your letter saying that there is nothing that you want so much as a chance at farm life with David, makes us very happy.

"Life's values are not measured by such standards as ease of living, fashionable clothes and carefully tended hands. Service makes living beautiful. There is no reason why a farm woman should neglect her personal appearance. Your splendid health and David's, with your fine ideals for home and community life, would make you shine anywhere.

"Both of you love to work and are especially adapted to country living. Your tastes are domestic. Your love for animals and gardening will make you in sympathy with David's ventures in crops and cows. You delight to see the sun rise!

"Both of you understand that it is the discipline of the farm, the instance of its duties, the certainties of its penalties and the great fact that you are working with Nature in the things that make the world go, that make the farmer a broad, self-reliant, forceful individual. Strength is refreshed daily because he is dealing with the elemental facts of life.

"Do not be disturbed because you cannot start with all the labor-savers. Things were shabby when we began. Half the fun of having 'things' is in working intelligently for them.

This letter was written by Mrs. Annette C. Dimock, a Vermont farmer's wife.

Auto Tax Agents Ready For Drive

State-Wide Campaign Against Unlicensed Motor Vehicle Owners to Take Force of 150

Nearly $500,000 of overdue motor vehicle taxes and penalties will accrue to the state trunk highway fund, state officials predicted this week, depending on the effectiveness of the drive on slackers everywhere in the state.

"Nine out of ten motor vehicle owners have paid the tax without unnecessary delay or complaint, and now the others are without excuse and must pay their portions," said Charles M. Babcock, state highway commissioner, in personal charge of the campaign. "It is only common fairness and the law will be enforced."

Official stars and instructions are being sent to members of the state highway department in all sections of the state. They are instructed to make special work of the prosecution of auto tax delinquents during the first ten days or two weeks and then to continue the campaign in connection with their regular duties until the last unlicensed car has been registered and its owner fined.

Courts will be urged to impose fines and also jail sentences to be suspended on condition that the offender presents a registration certificate within a reasonable time. The inspectors will take the owners or operators of unlicensed cars directly to court in the majority of cases, it was announced, but in special cases costs may be increased by legal formalities.

The attorney general's office has advised that county attorneys and city attorneys will assist the inspectors in every way possible.

The inspectors will make no collections, and applications for licenses must be made through the regular channels to the secretary of state.

HEAT KILLS 257 HOGS ON FARMS IN ONE DAY

Warnings to livestock shippers are being sent out from South St. Paul, cautioning stockmen to use all possible care in handling and loading, to prevent heavy death losses aboard the stock trains during hot weather.

The latest warning was issued after 257 dead hogs and 13 head of calves were taken from the cars arriving for last Wednesday's market. In one car there were 33 dead hogs; in another there were 19.

Stockmen estimated that the death loss to farmers on that one day amounted to more than $6,000. The heavy loss recalled a similar one last year, wehn on May 23, stock trains arriving at South St. Paul brought 303 dead hogs.

Political Announcement

(This notice to be paid for by N. J. Anderson at regular space rates.)

To the voters of Pennington county:

I am a candidate for re-election for Register of Deeds of Pennington county. During the years I have served the people of the county as Register of Deeds I have made many friends, but I am not asking support in the present campaign merely by virtue of this friendship. Rather I would have the voters consider my candidacy on a purely efficiency basis as the only proper method of electing officials to public office. In regards to fitness for the office of Register of Deeds, both as to honesty and capability, I prefer to rest my case with the people of Pennington county, whom I served in past years.

Yours respectfully,
N. J. ANDERSON.

Political Announcement

(This space to be paid for by E. A. Mostue at regular rates).

For Superintendent of Schools

To the voters of Pennington county:

The undersigned begs leave to announce his candidacy for the office of Superintendent of Schools for Pennington county.

I respectfully solicit the support of the voting citizenery, at the primary election, June 19th.

If nominated and elected, my aim, as ever, shall be efficiency and economy in the administration of our rural schools.

Yours respectfully,
E. A. MOSTUE,

Minnesota Leads In Federal Roads

Mileage Completed Under Rigid Federal Requirements Tops Other States

Minnesota leads every other state in the union in completed mileage of federal aid roads, according to a bulletin issued this week by the government bureau of public roads at Washington. The official publication shows also that Minnesota is building roads at prices well under the low averages in other states.

States leading in total federal aid roads completed are: Minnesota, 1,093 miles; Texas, 919 miles; Wisconsin, 657 miles; Illinois, 489 miles; Ohio, 465 miles; and Arkansas, 401 miles. Minnesota is one of 22 states which will have no federal aid available for new contracts after July 1, unless congress votes a new appropriation by that time.

Charles M. Babcock, state highway commissioner, said that Minnesota was enabled by its new highway development program to win first place on the government list. Although using less money than many other states, he added, the highway department is striving to get maximum results for the funds provided. The total of 11,017 miles of federal aid roads completed in the United States shows a gain of 8,016 miles during the last 12-months period.

The average cost of the many types included was $17,120 a mile. Grading and draining included, the national average cost of concrete paving was $29,000 a mile and gravel roads $9,150 a mile, compared with recent surfaced roads. The government bureau report confirms the prediction of a lower level of prices for road construction of which Minnesota is now taking advantage as fund limitations will allow.

Give a man three square meals a day and he will do very little shouting against the government.

The privates are forced to believe in a general rule.

GIVES NEWSPAPERS GOOD ROADS CREDIT

State Comr. Declares Co-operation of State Press Invaluable Aid

"The Tribune is extending good roads in its field—continuing an invaluable contribution to the Minnesota good roads movement begun before the Amendment No. 1 campaign in which it took an important part. And this is but one public service of many given by the newspapers of the state."

The statement was made by Charles M. Babcock, state highway commissioner. He had just received an official report that following announcement in this and other parts of a drive against auto tax slackers receipts in the license department had suddenly doubled and were averaging $12,500 a day.

"Here is an added demonstration of the force of newspaper publicity and advertising," continued Mr. Babcock. "During the war it exerted a strong influence on the use of our savings and in many other directions, even to what we ate. Now it is collecting delinquent taxes for the state and at the same time saving newspaper readers more penalties and costs. The state can compensate the newspapers for their contribution to the good roads movement continued now in keeping highway plans and progress before the public and maintaining its interest in better roads."

Also, the highway commissioner, by way of keeping faith with newspapers announcing the auto tax slacker campaign, said that 141st inspector was assigned to the work. All have instructions that ample warning has been given and prosecutions must be the order now, as was given out to the press.

Dependent Mainly Upon Good Roads

Adequate Highways Essential, Particularly to Farmers, Congressional Inquiry Committee Decides

Highway transportation, held of first importance to the farmer because all he produces and uses must be transported over roads, was the subject of special recommendations to congress by the National Agricultural conference called by H. C. Wallace, secretary of agriculture, at the instance of President Harding.

"Country highways are the farmer's first and principal transportation means of marketing their products." was the finding. "They are the arteries of the economic and social system of the country. On their condition rests the amount of the transportation charge that must be added to the gross cost of farm products, and the more fully they are developed, the less that weather conditions are allowed to clog the flow of traffic, the greater will be the health of the body politic and the added profusion of enjoyments and privileges to the common people.

"The loss from bad roads should be reduced to a minimum, not only to enlarge the farmer's market, but to shorten the time and reduce the spread of price between the farmer and the consumer.

"The farmer should be able to haul to market twice as much, twice as often, as he has been able to do in the past. If the farmer is to be put in position to help influence the price of his products by not dumping them on the market for fear of unseasonable weather, he must control the condition of the roads to his markets. Without proper road conditions 'orderly marketing' can never be accomplished. Rapid growth of traffic over the highways has been so greatly intensified during the past few years that this method of transportation needs earnest and careful consideration."

The conference adds a proposed program to extend road betterments and commends much of the work already undertaken by highway officials in the more progressive states.

The candidate who promises to mak "sweeping" reforms never seems able to find a broom after he is elected.

The proper way to kill a tape-worm is by the yard.

A soft answer may also save a lot of disfigurement.

What has become of the old fashioned girl who used to help Ma "do" the dishes?

U. to Feature Newest Methods of Beekeeping

The next short course at University farm is scheduled for May 23 to 26 for beekeepers of the state. Francis Jäger, chief of the university's division of the bee culture, says the most approved method of handling bees and all the new things in the industry will be presented in the practical course of work that has been arranged.

"We can promise the beekeepers several new things of first importance in the business of keeping," says Professor Jager. "We will give all our efforts to make this course so interesting and profitable that bee men who attend will be eager to enroll in future short courses."

Special work will be offered both beginners and advanced apiarists. The forenoon sessions will be for all classes of beekeepers. Practical work in the laboratory and bee yard will be provided every afternoon. All the problems centering around bee management, foul brood diseases, building hives and frames, swarming and how to prevent it, and the handling of colonies for the production of extracted and comb honey will be given thorough consideration. The registration fee for the course is $2.

"Crispy an' crunchy an' all-the-time-crackly! An' never tough or leathery! Gee, what would happen if Kellogg's got all eated up before tomorrow!"

You certainly realize the difference in Corn Flakes when you eat Kellogg's

From the instant you open the generous sized package till they're tucked away in great and tiny "bread-baskets," Kellogg's Corn Flakes are a delight! You can't even look at those big sunny-brown flakes, all joyously flavored, crisp and crunchy, without getting hungry! Kellogg's are never leathery or tough or hard to eat—they're just wonderful!

Such a spread for big and little boys and girls—the sweetheart of fine white corn kernels deliciously flavored and deliciously toasted in Kellogg's own way! You can't imagine anything more joyous to eat at any hour.

Kellogg's Corn Flakes are childhood's ideal food! Kiddies can eat as much as they can carry! Every mouthful makes for health, for sleepy-time-stomachs!

Don't just ask for "corn flakes"! You say KELLOGG'S—the original kind in the RED and GREEN package!

Kellogg's TOASTED CORN FLAKES

Gunder and Thomas Senum of Silverton autoed here Saturday.

Skirts are straight, longer and narrow.

How Creamery Has Helped the Farmer

Co-operative creameries paid an average price during 1921 of from 7 to 10 cents more than was paid by crea mstations, according to A. J. McGuire, dairy extension specialist of University farm.

"It is estimated that farmers of Minnesota received $20 a year more per cow for the last five years because they have 600 co-operative creameries in the state than they would have received had there been no such creameries," says Mr. McGuire.

"As a matter of fact, the poorest co-operative creameries pay as well as the best cream stations. Three conditions are necessary to make a co-operative creamery of the first class, namely, a sufficient amount of business, good business management and good cream."

THE ITCH

During the last three years there has been a great increase in the number of cases of the "Itch" sometimes called the "Seven Years Itch", and properly tremed scabies.

A little bug called the itch mite causes the disease. The cite burrows down under the skin and causes an accute itching which is worse at night. Most of the sore that appears on the body are due to the infection caused by scratching. The parts of the body where the skin is thinnest, including those in front of the armpits, on or around the nipples, the lower half of the buttocks, the elbow and knee regions, between the fingers and toes, are those that chiefly are attacked.

The malady is exceedingly infectious and those persons having it should be isolated until cured, which is easy if properly carried out. Use a salve containing four parts of washed sulphur and 100 parts of white vaseline. The patient sh u'd take a hot bath at night, scrubbing well with soft brush and plenty of soap for about 20 minutes. Then dry thoroughly and rub the salve from the neck to the heels and from shoulders to finger tips. Next put on a union-suit to sleep in. Wear it all the next day and take it off at night, and without bathing rub in the salve again. Keep this up for four rubs, and on the fifth morning take a bath and put on clean underwear. For a month after treatment all soiled underwear and bed linen of the patient must be boiled for half an hour before being thrown into the family wash. If this is not done the disease will recur in the family. Use talcum powder or corn starch to relieve itching following the cure, but do not take more than four rubs. If the salve is used too much sulphur eczema may set in which is harder to cure than the itch.

A bald man would make a poor king, for then there would be no heir apparent.

Can You Solve the Presidents Puzzle

Brush up on your history, folks. Solve the very latest Presidents Puzzle. You can do it if you try.

In the picture above you will find the names of ten presidents. The letters of their names have been re-arranged. If you can straighten them out to spell correctly the names of ten presidents you have solved the puzzle. For instance, the first one is Warren Harding.

If you can solve the puzzle, you can win $1,000 which we are offering together with a number of other valuable prizes to help boost The St. Paul Daily News.

To help refresh your memory I am naming a partial list of all the presidents—James Buchanan, Woodrow Wilson, Rutherford B. Hayes, Warren G. Harding, Andrew Jackson, George Washington, Benjamin Harrison, Abraham Lincoln, James Monroe, Grover Cleveland, Chester A. Arthur, Thomas Jefferson, James Madison, Millard Fillmore, William H. Harrison.

185 Points Wins First Prize

If you can correctly rearrange the ten presidents' names you will receive 100 points toward winning the $1,000. 10 points for each correct name. You will earn 60 additional points by qualifying your answers that is by proving that you have shown a copy of The St. Paul Daily News to one of your friends. This will give you 160 points in all. The final 25 points will be awarded by the Three Judges of the puzzle (who are in no way connected with The St. Paul Daily News) to the person who sends in the largest correct list of words made up from the letters in the name of the first president—Warren Harding. But DO NOT send in your list of words now. Send the answer to the puzzle first and we will tell you how to get up your list of words.

The winning answer, or the one earning 185 points will receive $1,000 in cash. The answer receiving 184 points will receive the Second Prize. There are 25 prizes in all, and in case of a tie each tying contestant will receive identical prizes.

Costs Nothing to Try
$1000 Just for You

Remember, folks, you don't have to spend any of your own money to win. No, sirree! Not one penny—and you won't be asked to subscribe to The St. Paul Daily News. All we want you to do is to help us introduce The St. Paul Daily News to your friends.

That's simple, isn't it? It's going to be easy for you to win.

Opportunity with a great big "O" is looking your way. Send in your answer to the puzzle and we'll tell you how to win the $1,000 that's waiting just for you. Only 185 points wins First Prize. You can get them.

It's easy to get points. Start now and send in your answer. List correctly the ten presidents' names on a piece of paper and send it in. Then we will tell you how to get the list of words made up from the letters of the first president's name.

Address All Answers to W. O. MILLER, THE ST. PAUL DAILY NEWS, ST. PAUL, MINN.

DRUGS AND GROCERIES

THE PRIZE WINNERS

Those who win the prizes in financial affairs are those who sacrifice the PRESENT for the FUTURE THINK that over carefully. Think of the rich people you know. See if there wasn't a time when they had hard sledding. Ask them about it. They will tell you. Most of them are proud of their early struggles. There is no royal road to success. Once in a while some one makes a lucky strike, but a fortune made on a gamble is likely to go the same way. Steady saving, careful investment and the support of a good bank—these things count.

LADIES' AUCTION SALE NETS THE SOCIETY $95

Norge's Independence Day Program Given Prior to the Sale

The Ladies' Aid auction sale held at the Lutheran church Wednesday evening turned out to be a great success and netted the society $95.

A 17th of May program was given before the opening of the sale and John Nystul, in a brief address, explained the significance of the day, and suggested that it would not be amiss to sing the Norwegian national anthem, "Ja Ve Elsker Dette Landet." Then the audience joined in singing "America." Immediately following the program Mr. Nystul took charge of the auction sale and acted as auctioneer. He created enthusiasm and enlivened spirited bidding at the start and as a result the handsome articles were sold at top prices. Among the fortunate purchasers may be mentioned Sarah Vaughn, Miss Aakre, George Wold and Ray Resan, each of whom carried home a pieced crazy quilt, on which chances had previously been sold.

After the sale a delicious lunch was served by the Ladies' Aid. The proceeds are to be used for the completion of the church basement.

Norwegian Independence Day Is Observed Here

Norway's Independence day was observed at the regular assembly period at the local school Wednesday morning, May 17.

In a brief address to the students Superintendent Norby explained the significance of the day and its importance in history. A pantomine was given by Tina Gaudland who appeared in a Norwegian national costume. A special faculty quartette composed of Miss Gegland, Mrs. Breen, Mr. Norby and Mr. Nystul sang by the students served to make an enjoyable program.

Mrs. Stephen Noble, Mrs. M. G. Thoreson, Mrs. Anton Lien, Mrs. S. Tanem and Mrs. L. Poppenhagen were among the visitors at the program.

Local High School Team to Meet Thief River Club

The Thief River Falls high school baseball team will meet the local boys on the Goodridge diamond a week from Saturday. The Thief River Falls team is made up largely of freshmen, but coach Stenhoff boasts of a team of no mean ability. The game will be called at 1:30 sharp.

This is the first time the Goodridge nine has been pitted against Thief River Falls and the local boys are looking forward to the match with considerable anticipation.

P. O. Tvedt Trades Cars.

The latter part of last week P. O. Tvedt traded his Maxwell touring car to John A. Harris of Grygla for his Ford sedan. Mr. Tvedt doesn't need to worry about the weather any more; he can tour in rain or shine.

Entertain for Mrs. Burleson

Mrs. H. Christianson delightfully entertained at a luncheon Thursday afternoon in honor of Mrs. Burleson who is the guest of her sister, Mrs. Martin Olson. Those present were Mrs. Burleson, Mrs. Martin Olson and Mrs. Gulrud.

Political Announcement

(To be paid for by the candidate at regular space rates.)

To the Voters of Pennington County:

I wish to announce that I am a candidate for the office of Superintendent of Schools of Pennington county. I was graduated from the State Teachers' college at Moorhead in 1914. I am 30 years of age and I have had ten years' of actual experience as a teacher in elementary and semi-graded rural schools. I served approximately one year in the United States army, nine months overseas. I have filed as a candidate for this office because I believe that I can give the people of the county real service and an efficient administration. I shall appreciate your vote and support at the primary election to be held on June 19.

Very respectfully,
O. R. SANDE,
Town of North.

Mrs. Gulrud was hostess to Mr. and Mrs. H. Christianson and Mrs. Martin Olson on Sunday at a luncheon.

Birthday Surprise

A number of friends very pleasantly surprised Stewart McLeod on Tuesday evening, the occasion being his birthday. The evening was spent in conversation, music and games; at 11:30 a very delicious lunch was served. The most attractive feature of this part of the evening was a large white birthday cake with twelve candles on it. The guests presented Mr. McLeod with a fountain pen, as a token of friendship. Those present were Mr. and Mrs. V. C. McLeod, Mr. and Mrs. Elmer Peterson, Mr. and Mrs. R. H. McDonald, Mr. and Mrs. Theo. Tandberg, B. O. Norby, John Nystul and Miss Teresa Giefer.

POLITICAL ANNOUNCEMENT

Inserted in behalf of the candidate whose name appears in this advertisement, for which the sum of $10 is to be paid.

Good Paint!

WE GIVE PAINT SERVICE

To get satisfactory paint and varnish results, you must do two things:

1—Select the right paint or varnish for the particular job.

2—See that it is properly applied.

Whatever your paint plans are—no matter how large or how small—drop in and let's talk them over together.

NO OBLIGATION—That's Our Business.
HICKORY PAINT GIVES RESULTS.

COMMUNITY CLUB MEETING FRIDAY EVENING IS ENTHUSIASTIC AFFAIR

Well-Known Speakers Address Large Attendance of Farmers and Citizens—Splendid Program Given By Local and Outside Talent.

The Community club meeting, postponed from a week ago, was held last Friday evening at the school auditorium, at which time visitors from far and near were in attendance to further the cause of community spirit and to enjoy the program prepared by the committee in charge of arrangements.

The interest which has been created in the work of the Community club was evidenced by the excellent attendance at the meeting. Weather conditions were ideal and cars came fram far and near. Several cars came in from Thief River Falls. Among the Thief River visitors were Mr. and Mrs. Daniel Shaw, Mr. and Mrs. H. O. Chommie, Mrs. F. H. Herrick, Miss C. Gran and Mrs. J. Gran, Joseph Cloutier and Lawrence Eklund. Mr. Cloutier and Mr. Eklund accompanied by Mrs. Gran formed a very important part of the program. Mr. Eklund rendered two very beautiful violin solos, also accompanied Mr. Cloutier in a vocal number. Mr. Cloutier sang two very beautiful solos, and sang the third accompanied by the piano and violin. These numbers were very high class, and greatly appreciated and enjoyed by the large audience.

J. McCann of the farm bureau gave a short talk. His remarks were along lines of interest to the farmers. He advised them to stay by their farms and go into dairying, and build silos instead of trying to farm too much land and raise small grains. After a few brief remarks Mr. McCann introduced Mr. Chommie who also gave a very short talk.

Owing to the fact that the hour was getting late, Mr. Chommie went over the history of Goodridge somewhat and dwelt on the rapid growth of this little village. The only regret of the program committee is that Mr. Chommie did not have more time to talk. Among the delightful numbers on the program was Miss Vaughn who gave the history of Goodridge, which was very interesting, especially to those who have resided here several years.

Little Margaret Bundhund, who has the honor of being the first baby born in the village of Goodridge gave a recitation. The city band rendered two very pleasing numbers. Harry McDonald gave a reading entitled "Little Tillie Olson Ban Gued Enuf for Me" which was well received.

The Lutheran choir sang one song, and a dialogue, "Interviewing Servant Girls," was given by a number of the high school girls, which added to the enjoyment of the evening.

A sheet stunt was put on by two boys and two girls. A sheet was hung on a wire and children's clothing pinned on same, and holes cut in the sheet. Those taking part were made up to appear as children and they put their heads through these holes and sang songs and recited little verses in a childish manner.

Community singing was led by Christine Bundhund, Miss Bundhund did her part well, and the singing went off with a great deal of pep and spirit.

The next meeting will be Friday. June 9th, and will be the last of the season. Those acting on the next program committee are Thelma Gilbertson chairman, Miss Gladys Wilson and Miss Della Urdahl.

The program committee wishes to thank the management of the light plant for running the lights a little longer than usual in order that they might finish the program.

The Flag of Our Country

How to Respect It

The American Flag, the emblem of our country, is the third oldest national flag in the world. It is known as "Old Glory," "The Stars and Stripes," "The Star Spangled Banner," and "The Red, White and Blue." By whatever name we describe it, it represents liberty—and liberty means obedience to our laws.

The Flag contains thirteen stripes, alternate red and white, representing the 13 original states; and a star for each state of the Union. The Field of the Flag is the stripes, and the Union is the blue and the stars. The colors of the Flag are red, representing valor; white representing purity, truth and home; blue representing loyalty, sincerity and justice; and its stars representing the federal union.

The arrangement of the stars on the Flag is regulated by law and executive order. An executive order, issued October 26, 1912, provided for 49 stars arranged in six horizontal rows of eight stars each. Starting in the upper left-hand corner and reading each row from left to right, gives the star of each state in the order of state's ratification of the Constitution and admission to the Union. The star representing Minnesota is the eighth star of the fourth row, the 32d state to ratify the Constitution and become part of the United States.

The dimensions of the Flag are fixed by an executive order issued May 26th, 1916. The length should be just 1.9 times its height. The Union, or part of the Flag on which the stars appear, should be seven stripes high and its length .76 of the height of the flag. The stars are five-pointed, with one point directly upward. When a new state is admitted the star is not added to the flag until the Fourth of July next succeeding the date of admission. The Constitution is the basis of all law, and the Flag is its symbol. Always respect it.

How to Respect the Flag

The Flag should be raised at sunrise and lowered at sunset. It may be raised at other times but should never be left out overnight, except when it is under the fire of an enemy. On Memorial Day the Flag should be displayed at half-staff from sunrise until noon, and at the peak from noon until sunset.

In raising the Flag to half-staff or half-mast, it should always be run to the peak and then lowered one breadth of the Flag. In retiring it, it should first be run back to the peak, then retired. It should never be allowed to touch the ground.

When the "Star Spangled Banner" is played or sung, stand and remain standing at attention in silence until it is finished. When the flag is passing on parade or in review, if you are walking, halt; if sitting, rise, stand at attention, and uncover.

The Flag should never be worn as the whole or part of a costume. As a badge it should be worn over the left breast. In decorating, the Flag should never be festooned or draped. Always hung flat. If hung so stripes are horizontal, the Union should be in the left upper corner. If hung perpendicularly, the Union should be in the right upper corner.

When the national flag and another flag fly from the same pole there should be double halyards, one for each flag. The flag should never be placed below a person sitting. It should never be used in such a way that it might become soiled. When carried in parade or when crossed with other flags, The Stars And Stripes should always be at the right, the place of honor.

When the Flag is used in unveiling a statue or monument, it should never be allowed to fall to the ground but should be carried aloft to wave out, forming a distinctive feature during the remainder of the ceremony. When the Flag is placed over a bier or casket the blue field should be at the head. If used as an altar covering the Union should be at the right as you face the altar, and nothing should be placed on the Flag except the Holy Bible. The Flag should never be reversed except in case of distress at sea.

Ladies' Aid Social

The Ladies' Aid will give a social in the old school house, on Wednesday, May 31st. The ladies will serve ice cream, cake and coffee and extend a cordial invitation to all.

SCHOOL BUS HAS NEAR ACCIDENT

Approach to Bridge Washed Out During Heavy Rains of Week

Osmund Urdahl, driver of one of the school busses, nearly had what might have been a very serious accident the first part of last week. While driving to school with two children in the bus as he was about to approach the bridge just north of the Stein farm on ditch No. 18.

Mr. Urdahl states that the approach looked perfectly safe, but with the great amount of rain, the water had washed the dirt away from the end of the bridge and left a thin crust on top which looked perfectly safe. As Mr. Urdahl attempted to drive over the bridge the rear wheels of the bus went down, which somewhat shook up the passengers. The bus was delayed one hour, and it was necessary to call a team to pull them out.

Mr. Urdahl made a request to have the washout filled in, and was informed later that this had been done, and that it was perfectly safe to again travel that route. When he approached the bridge in the evening, same had been filled in with loose mud, which had been piled considerably higher than the highway and the bridge, it looked soft, but Mr. Urdahl thought it safe enough, but when the rear wheels of the bus were about to pass over it, the bus went down into the hole with such force that it threw the passengers in a heap on the floor in the middle of the bus. The children were so frightened that they screamed and cried, but fortunately none were injured either time. This should be a lesson to road and bridge authorities, and bad places should be repaired at once, and repaired in a way that is safe for any kind of vehicle. It is only a miracle that some of the children in the bus were not hurt.

MRS. STILMAN NOBLE LEAVES SATURDAY FOR ASHBY, MINN.

Mrs. Stilman Noble, who has been the guest of her sister-in-law, Mrs. J. Payne, for the past week, left Saturday by automobile for Thief River Falls, where she took the Great Northern passenger for Ashby, Minn., where she spent Sunday. Mrs. Noble has been on an extended trip and en route to Goodridge, she visited a number of cities and resorts, among them the following: Los Angeles, Calif.; Long Beach, Calif.; Lynwood, Calif.; Orange, Calif.; Riverside, Calif.; Ontario, Calif.; Glendale, Calif.; Pasadena, Calif.; San Francisco. Calif.; Albany, Ore.; Salem, Ore.; Portland, Ore.; The Dalles, Ore.; Astoria, Ore.; Sea Side, Ore.; Tacoma, Wash.; Seattle, Wash.; Wenatchee, Wash.; Spokane, Wash.; Inverness, Mont.; Grand Forks, N. D.; Goodridge, Minn.

E. K. Aasen of the Oen Mercantile Co., of Thief River Falls was in Goodridge Wednesday attending to business matters.

POPULAR YOUNG COUPLE WEDDED

Miss Ruby Jensen Becomes Bride of E. J. Beithon on Saturday

Miss Ruby Jensen, daughter of J. P. Jensen, cashier of the Goodridge State bank, Saturday was married at Grand Forks to E. J. Beithon who for the past year has been connected with the Goodridge Consolidated schools.

The wedding took place at the home of O. T. Ellestad of the North Dakota city at 4 o'clock P. M., the ceremony being performed by Rev., Henry of the Methodist Episcopal church of Grand Forks, in the presence of Sylvia Helmsky and Ed. Deverell, of the same city.

The newlyweds returned to Goodridge on Sunday by automobile. After the close of the present school year, they plan to visit relatives in southern Minnesota and Brookings, S. D., and this fall both Mr. and Mrs. Beithon will attend the University of Minnesota.

The Banner joins with the many friends of the young couple in wishing them success and happiness.

Mrs. V. C. McLeod entertained at dinner Wednesday evening in honor of Miss Teresa Giefer who is about to finish her year's work with the Goodridge school.

REINER CLUB HAS PICNIC ON SUNDAY

Stewart McLeod Speaks to Members on Timely and Urgent Topic

The annual picnic of the Reiner club was held last Sunday on the Aakre farm in Reiner township, with a very large attendance. Coffee, ice cream and lunch was served from a stand free of charge.

The Goodridge State bank furnished a splendid program. Superintendent Gunderson was one of the speakers of the day. His remarks were along lines of education, Dr. H. W. Froehlich and H. O. Chommie of Thief River Falls were on the program for short talks, but for some unknown reason failed to appear, which cut the program somewhat short.

Stewart McLeod delivered an excellent address and spoke to the club members, in particular, encouraging them in club work, complimenting them in the fine crowd, also advising them to improve their herds in such a way that their cows will be keeping them instead of them keeping the cows. Mr. McLeod also talked on boys and girls club work. If boys and girls get interested in pets and animals while young and learn to be kind to them, it will help them through life, and later in life if they should get a worthwhile herd they will understand them, and know how to take care of them. Kindness is just as essential to dumb beasts as it is to human beings.

A boy's chorus sang a number of songs. This chorus should be complemented as it was one of the best numbers on the program. Last but not least the Moylan baseball team played the Highlanding team. This match proved to be a very spirited game and resulted in a score of 10 to 7 in favor of the Moylan team.

McDONALD'S REPAIR HOME

R. H. McDonald's are giving their home a good going over both inside and out. They have had the plaster which was badly cracked and loosened by the flood a few years ago, repaired, have had all the walls and woodwork gone over and tinted on the first floor, and now have a man painting the outside of the house.

TOWNSHIP OF REINER BUYS TWO NEW ROAD GRATERS

The Township of Reiner has just invested in two new road graters, to be used for road patrol. The graders are here and all ready for business. E. Aakre and Martin Moen will operate these two machines.

Accepts Position

Friends of Harvey Ferdinandson will be interested to know that he has accepted a position as shipping clerk with the Hormel Packing company of Austin, Minn. For several years Mr. Ferdinandson has been employed by the Minnesota Electric Railway company, and recently resigned his position with them.

DECORATION DAY PROGRAM READY

Rev. J. B. Smith of Thief River Falls to Deliver Address

The Memorial day program will be given under the auspices of the American Legion, and arrangements for this program have been completed. A speaker's stand will be erected in the village park. The program will start at 10:30 sharp. Rev. J. B. Smith of the M. E. church of Thief River Falls will deliver the Memorial address. Special music will be furnished by the Goodridge band.

All car owners are requested to be ready to accompany the Legion boys to Torgerson, Erie and Germantown, where short services will be held at the respective cemeteries and markers will be placed on the graves of the World War Vets who gave their lives for their country. The names of these boys are Henry Svare, Alfred Dahlen, Carl Vake, and Andrew Rosette.

Poppies which have been ordered by the American Legion will be on sale Monday, May 29th. The small size will sell for 15 cents and the larger ones for 25 cents. Don't fail to buy one. These poppies are made by the disabled soldiers in the various hospitals throughout the state, and in buying them you are helping a good cause.

BREEDER DISPOSES OF BLOODED SIRE

Stewart McLeod Sells Descendant of Prize Animal at Wright, Minn.

Stewart McLeod, one of the champions of better cattle in eastern Pennington county, Monday sold to Halvor Henderson, cattle breeder of Wright, Minn., a five-months-old sire. The animal was shipped to the new owner this week.

The sire sold by Mr. McLeod has an aristocratic family back of him and the little fellow's sire stood first at the North Dakota State fair last year and his grand sire having taken first prize at the National Dairyman's show. The new owner is to be congratulated upon securing such splendid foundation stock for his herd. The price paid by Mr. Henderson is not known.

Goodridge is fast becoming a Guernsey center and the farmers in the vicinity of Goodridge who are making efforts to improve their herds should be complimented and congratulated on their good work. Dairying, and the right kind of dairying, is the only thing that will bring northern Minnesota to the front. It is gratifying to know that so many farmers have already been convinced of that fact. There are now twelve pure bred sires in this community, and as many or more very high grade sires. This record alone proves quite conclusively that Goodridge and vicinity are on the right road to success.

ALBERT QUAM, FORMERLY OF GOODRIDGE, DIES WEDNESDAY

Albert Quam, who formerly resided with his mother near Goodridge, died May 17th, in Minneapolis at the State hospital. The cause of his demise was not known. He was the son of Mrs. Quam near Torgerson, and leaves to mourn his loss a mother and six brothers and sisters. The father died about two years ago of cancer.

Funeral services were held at the home at 2:00 o'clock and from the church at 3 o'clock.

Albert Quam was sixteen years old, and prior to the time he was confined to his bed did a good deal toward the support of his mother.

BACCALAUREATE SERVICE AT THE LUTHERAN CHURCH

The baccalaureate service will be held next Sunday afternoon in the Lutheran church. The baccalaureate sermon will be delivered by Rev. Sweger of Thief River Falls. The Lutheran choir will sing two songs. Plans are under way for a number of outside musical numbers, but nothing definite has been secured up to the present time.

L. P. Poppenhagen was a Thief River Falls visitor Wednesday.

OKLEE BUNCHES HITS AND WINS

Heavy Slugging in Saturday Game Responsible for Local Defeat

THIEF RIVER FALLS HERE FOR GAME ON SATURDAY

The Thief River Falls high school baseball team will play the Goodridge high school team on the local diamond Saturday afternoon at 8 o'clock. It is not known what kind of a nine the Thief River high has developed this year inasmuch as they have not played any games so far this season.

The heavy-hitting Oklee high school team appeared in Goodridge again on Saturday afternoon and won 12 to 4 via the bat route alone. Goodridge probably played the best game, but it was conclusively proven that this alone will not win a ball game.

The Oklee team had been entirely made over from that which appeared here three weeks ago, when several of the Oklee players were "holdouts" or barred from the game because of non-attendance at school, according to Oklee's manager. Apparently the players in question had had ample time to rest up, for they handily clouted out hit after hit, much to the disaster of the Goodridge high team.

One of the features of the game was the splendid fielding of the local boys. Although the Goodridge pitcher was hit freely, his support cannot in any way be held responsible and few of the local men were accredited with errors.

Oklee, on the other hand, exhibited considerable ragged work in the field and what hits were made by the local team generally were bunched. For example in the first inning, the first string hitters pounded in three scores and it appeared as though the high school team was going to put the game on ice, but the scoring seemed to stop right there. Gust Thompson, Joe Christianson and Bennie Mandt each scored a run in the first. Goodridge made another run in the third. Following is the batting order for the two teams:

Goodridge--Roy Olson, Gust Thompson, Joe Christianson, Bennie, Mandt, Ludolph Urdahl, Stuart Ferdandson, Herbert Nelson, Daniel Payne and Alvin Halvorson.

Oklee—William Torgerson, Arthur Deymonaz, Ted Torgerson, Joe Deymonaz, Orin Melby, Ben Sordahl, Oscar Rolland, Carl Lerohl and Leonard Rolland.

Bert Walker of Thief River Falls was in Goodridge Wednesday attending to business.

Famous Tree Moves To Sacred Ground

AUTOCASTER

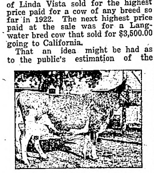
If Daniel Webster, famous American statesman, should return to Washington looking for the shade tree under which he rested at his home there, he might be surprised to find it growing healthfully in another part of town. The tree, as shown in the picture, has been moved over to the Lincoln Memorial Grounds for preservation and given prominent place.

Bring Your Job Printing to The Banner!

Minnesota Cow Brings Top Price

Progeny of Winning Guernseys Among Offerings at June Sale This City

It is not often the east has to take second place to Minnesota in the sale price of Guernseys, but this was the case when on May 11th Guernseys consigned from all over the United States, and especially from the east, met at Wheaton, Illinois to be sold under the hammer. The splendid cow Jean Duluth Coronet, by May King of Linda Vista sold for the highest price paid for a cow of any breed so far in 1922. The next highest price paid at the sale was for a Langwater bred cow that sold for $3,500.00 going to California.



Jean Duluth Coronet, World's Champion Guernsey, bred, owned and developed in Minnesota.

That an idea might be had as to the public's estimation of the value of the Jean Duluth consignment, the farm offered a Guernsey heifer for the closest guess as to the price Jean Duluth Coronet and her half brother, May Rose Searchlight, would bring when sold at auction. More than 1600 guesses came in. South Dakota led in numbers, with New York a close second, but the Red River Valley landed the prize. Perry N. Johnson of Thief River Falls guessed the exact amount Coronet later brought and was only $125 off on the amount her half brother sold for. This shows a close study of Guernsey pedigrees and a keen knowledge of financial conditions over the United States.

The majority of guesses on Coronet was around $18,000.00 and most guesses on Searchlight were around $7,000.00. While financial conditions have improved greatly in 1922, livestock are not bringing the prices that they were considered worth two years ago, and bulls have never sold well at public auction. There is usually one outstanding sire at each auction which sells for about what he is worth and all the others are practically given away. Mr. Johnson evidently knew all this and therefore his guess was surprisingly close.

In breeding and as a sire, May Rose Searchlight is considered a very valuable bull. His first two dams average 831 lbs. fat and he is the sire of the largest cow in the Jean Duluth herd, one that will doubtless make 800 lbs. of fat in 1922.

May Rose Searchlight was owned jointly by Jean Duluth Farms and L. Jensen of Clearbrook, and it is a coincidence that the contest calf by May Rose Searchlight should go into the Red River Valley where much of his blood is owned. A study of the consignment made at the Thief River Falls sale indicates that L. Jensen's and the Jean Duluth Farms' stock carry the blood of May Rose Searchlight, a half brother to Coronet, record 952 lbs. fat in class AA. The Jean Duluth consignment, Rose Mary of Jean Duluth 2d is a half sister to the contest calf, and will be sold either bred to Golden Coronation King or with a return privilege of being bred to him. Golden Coronation is a son of the world's champion Coronet. Minnesota is to be congratulated on topping the sale and the Red River Valley is fortunate not only in having some of the blood lines of the famous Coronet, but in winning the contest calf as well.

NOVEL HIGHWAY TESTING USED IN STATE OF ILLINOIS

The Illinois Department of Highways and highway engineers of the Bureau of Public Roads have constructed a novel test road at Bates, Ill., two miles long and in 63 sections.

The different sections show various kinds of constructions, bases and thicknesses. A continual watch is kept for changes and effects of temperatures, loads and sub-grade conditions. According to a truck tire official of the Firestone company, expert work of this kind will do more for progress in transportation than anything of the kind advanced for years.

GROWERS' WORK HEADED BY LAU

Tracy Man In Charge of Organization Work in Minnesota

Henry C. Lau of Tracy, member of the board of directors, U. S. Grain Growers, Inc., has assumed responsibility for organization work in Minnesota and has employed S. E. Elliott to take active charge of the state office at St. Paul. Mr. Lau will have charge of organization work in the absence of J. S. Jones, former director, who is doing farm bureau work temporarily in South Dakota.

The decision to put Mr. Lau in charge was reached last week after a conference in St. Paul, attended by himself, C. H. Gustafson, president, and J. F. Reed, president of the Minnesota farm bureau federation.

The northwest office of the corporation's department of information, formerly in charge of Mr. Elliott, has been abolished. Other retrenchment steps are contemplated.

Mr. Gustafson said material progress is being made toward opening sales agencies at Minneapolis, Chicago, Omaha, Indianapolis and Kansas City. A more definite announcement is expected shortly.

In Minnesota last week, five men obtained 114 new contracts, bringing the total in the state to nearly 2,600. Fifty-six elevators in the state have been signed up. Nationally, the organization has more than 59,000 members.

Woman Moonshiner Nabbed in Roseau

Lady Worked Up Fine Business By Advertising Ability as Distiller

The first woman moonshiner reported operating in Roseau county was caught with the goods last Friday by Sheriff Rice's force. The woman is Mrs. Riski of Barto and she is the mother of several small children. She had a very neat still, the main tank of which is a 10-gallon cream can, which was gathered in by the officers together with some mash and a gallon or two of "moon." It is stated that Mrs. Riski had quietly advertised her goods as being made in a neat and cleanly operated outfit and she had not only gained a reputation to that effect but but further had the word of making the best product in the county and her patronage is said to extend as far as Roseau.

Her hearing was to have been held last Monday but a two week's stay was granted.—Roseau Time Region.

KEEPING HIS WORD

Jinks Jenkens always kept his word throughout his useful years, and when his funeral occurred the town was wet with tears. We'd planted bards at sundry times and famous statesmen, too, and plutocrats whose stock of dimes was something fierce to view; and while we grieved to note their doom and see their projects bust, we only wept around each tomb enough to lay the dust. For gifted gents and famous gents and gents with gorgeous rolls are commoner than 20 cents, and oft have tawdry souls. But when you meet that human bird with sunshine on his brow, who never goes back on his word, take off your hat and bow. He says he'll pay you what he owes when clocks are striking eight, and though through storm and fire he goes he'll promptly keep the date. No promise lightly leaves his lips, but when his pledge is made he never fails, he never slips, his word must never fade. He's an example to the town, a landmark good to see; and when at last we lay him down beneath a churchyard tree the briney tears in streamlets roll like waters in a rill and in the town there is a hole it will be hard to fill.—Walt Mason.

ASK CLOTHING FOR SUFFERING EAST

Minnesota Asked to Adopt 5,000 Armenian Orphans This Year

The greatest clothing collection ever taken in Minnesota is being organized by the Minnesota Near East relief committee of which Dr. George E. White of Minneapolis is chairman. Announcement of the clothing drive came from Minneapolis today simultaneously with instruction to the Near East county chairman in each county to make immediate preparations for the collection.

"Minnesota is asked to adopt 5,000 Armenian orphans, at a cost of $300,000 this year," said Dr. White's message. "For every pound of used clothing collected, 75 cents will be allowed on that quota. Michigan recently collected and shipped to the Near East 12 carloads of old clothing and shoes, Philadelphia alone responded to the plea with 14 carloads. Surely Minnesota, too, has a generous answer ready for this acute appeal."

The pitiful need for clothing in the Near East was stressed by Dr. White. "More than 100,000 war orphans now housed and fed by the contributions of the American people through the Near East relief committee are totally dependent for their clothing upon the response to this clothing campaign. In addition to the orphans, thousands of refugees who have been made homeless and helpless by the vicisitudes of war are in need of warm clothing."

Last year, more than 1,000 tons of spare clothing was sent by America to the Near East. It is estimated that 500,000 Armenians were clothed in those cast off garments. Workers in the Near East say the Armenia will have to dress in American secondhand clothes for at least two years more, Dr. White said.

The clothing collected in each community will be sent direct to the national Near East headquarters in New York City, there gathered into warehouses and shipped abroad in time to serve next winter's needs.

SAYS JOHN P. MEDBURY

Some of the large barber shops are installing orchestras and serving tea and cakes. The first thing we know we'll have to be playing a cover charge.

* * *

If you want something light you can order a shave and if you want something heavier you can ask for a shampoo or a massage.

* * *

The musicians will come in handy. While the barber is trying to sell you a bottle of hair tonic the orchestra can be playing "Silver Threads Among the Gold."

* * *

A lot of barber shops already have fancy names. One guy thought a tonsorial parlor was a place where you went to have your tonsils taken out.

* * *

These barber shops will soon be run on the order of Zeigfeld's Midnight Frolics with a chorus of fifty manicurists.

* * *

Can you imagine going into one of these Barberets and asking for a shave a-la-minute?

* * *

It won't seem like anything to go in and ask for a haircut with Thousand Island dressing.

* * *

It will be wonderful to be shaved while you're drinking tea and listening to the orchestra play operatic selections from Peroxide.

Review of Activities In Automotive Field

There are seven manufacturers of automobiles in Belgium.

The national parks were visited by 1,171,797 persons last year.

Canada gives employment to 15,000 skilled automobile mechanics.

The average wholesale price of an automobile in 1921 was $702.

In Ontario, Canada, one farm in every four has an automobile.

Motor trucks handled about $1,200,000,000 pounds of freight during 1921.

New York is said to be preparing legislation for compulsory automobile insurance.

More than 3,000 drivers were sent to jail by the traffic court in New York in 1921.

Rubber mats on the running board protect against slipping when you're in a hurry.

Don't throw spare tubes in your tool box or allow them to come in contact with oil and grease.

Nearly all automobiles at the New York show displayed spare tire equipment confined to the rear.

The United States has invested about the same amount in automobiles as it has in steam railroads.

The world's auto racing classic at Indianapolis, May 30, holds cash purses amounting to nearly $50,000.

The King of Siam is said to have ordered many canals filled in as an aid to his good roads program.

There is a greater demand for the motorcycle in Great Britain than for any other type of motor vehicle.

Thirty states are offering employment to some 200,000 men, during the next six months, on road construction.

Excessive speed shortens the life of tires because the generation of heat reacts unfavorably on their construction.

More than one-third of federal aid road projects completed and under agreement 1916 to 1921 were of gravel construction.

In three years ending 1920, records show 3,636 lives were lost and 10,644 people were injured at Grade crossings in the United States.

Taxi and bus lines in the United States now number 37,658.

Of the 13,000 Smiths on the subscription list of a popular farm journal 11.5 per cent reported by questionaire buying an automobile in 1921.

Between November and January there was a reduction of 17 per cent in car prices, 33 per cent in gasoline, 38 per cent in tires, 43 per cent in oil.

It is said that light cars of European make do not stand up under the rough road usage, general in many countries abroad, as well as do autos of American manufacture.

Passenger cars play an important part in relieving housing congestion in the large cities?

Seven thousand people were killed at grade crossings in 1921?

FARMERS FORM SALES AGENCY

Minnesota Producers Interested In Exchange Started In Michigan

Farmers in this county, who have helped to put their state in the lead in the establishment of co-operative marketing enterprises, will watch with interest a new enterprise launched by the farm bureau of another state.

The county farm bureaus have received a report from their national organization, outlining the purposes of the farm bureau produce exchange, which is to be opened this month in Detroit by the Michigan state farm bureau.

The directors of the farm bureau have adopted regulations making the produce exchange a department of the Michigan state organization, under the management of the board and the secretary-manager of the farm bureau.

The produce exchange will handle produce for member associations only. It is to establish, without profit, a sales service for fruits, vegetables, poultry, eggs, butter, cheese, dressed hogs, veal calves, and similar market commodities, which are handled by local farm bureau units or by co-operative shipping associations.

CYCLING IS VERY POPULAR AMONG FRENCH PEOPLE

A recent Associated Press dispatch from Paris, France, says: "Cycling which is practically a dead art in the United States, as far as use of the wheel for 'recreational purposes' is concerned, is more popular than ever in France. With 4,308,129 bicycles in commission, there is a wheel to every ninth man, woman or child in France. In 1920 there were only 2,272,324."

Mr. and Mrs. Carl Sutter who hail from Boston, are conducting an experiment thath olds great interest for most newspaper men. They propose to go into the Maine woods without food or clothing, expecting to subsist on shrubsa nd ants, using as body covering leaves and bark from trees.

Ten years ago the annual production of automobiles in this country was 1881,000, and today the capacity is 2,750,000?

ROSEWOOD

The Haugen and Sorenson families motored to Warren last Saturday to attend the funeral of Mrs. C. Engelstad.

Abe Strobles was up from Angus on Sunday for an afternoon visit with the Haugen brothers and P. Sorenson.

Mr. and Mrs. Oscar Blomberg and children from Crookston were Sunday visitors with the Emil Blomberg family here.

Mrs. John Bergland and son, Leonard, and Mrs. Carrie Nelson arrived on Friday from Bemidji to attend the Nelson funeral and the former will spend some time visiting at the T. Mellem home.

Mr. and Mrs. Henning Backlund from Strathcona motored up on Saturday to attend the Nelson funeral and visit with Backlund's parents, Mr. and Mrs. T. Mellam.

Mrs. O. H. Field and three children from Thief River Falls came up on the train on Saturday morning for a day's visit with the Bernhard Ranum family.

Mr. and Mrs. S. O. Ostgaard and daughter from Gatzke were in town on Sunday enroute home from Fargo and visited here with the Ranum families briefly.

Mrs. O. S. Hellerud has been on the sick list the last week and has been attended by Dr. Adkins from Thief River Falls.

Mr. and Mrs. Emil Anderson spent a few days the latter part of the week with relatives at Thief River Falls.

The first ball practice of the newly formed association took place last Sunday, and although the ball ground is kind of soft yet, the prospects and spirits are the very best and the enthusiasts have nothing but praise to say so far.

T. Mellem spent a couple days at Warren last week at the bedside of E. Nelson.

C. Engelstad came up from Warren on Tuesday where he spent a few days.

Three of the Ben Peterson boys went to Thief River Falls Wednesday evening to visit with their uncle, Rev. A. A. Larson, for a few days.

Harry Myrom spent Monday on business at Warren.

Mrs. Carl Stromberg and baby from Dakota Junction was in town between trains last Thursday to visit with Mr. and Mrs. S. Rafteseth.

Mrs. Rev. George Larson from Thief River Falls taught the parochial school here on Wednesday, while her husband made a professional call at Goodridge.

Several members of the Mrs. Axelson family motored to Wannaska last Sunday to spend the day with relatives.

Miss Viola Axelson of the Thief River Falls hospital force, spent Sunday with her home folks here.

Swen Swenson left on Saturday evening for Thief River Falls from where he will leave on Monday in company with George Lee and a few other friends for different parts in the state of Washington to look about for eventual future settlement if pleased.

Albert Hellquist from Newfolden was in town last Sunday on a call from his father, J. E. Hellquist.

Emil Hellquist is on the road grader through Rosewood this year.

Enoch Nelson is Dead

Enoch Nelson one of the communitie's early settlers, and live wires and a man who possibly has done more than anybody else towards the upbuilding and progress of Rosewood, died last Thursday at the Warren hospital, after a six-months illness, with cancer of the stomach. He has been seeking medical aid at the Williams hospital at Minneapolis this winter and some over two months ago returned therefrom with the hopes of recovery, however within a few days after returning, he became ill again and an examination at Warren revealed that the disease had only been temporarily checked but not cured, more operations were performed and Doctors Bratrud Bros. and Meland did everything towards a complete cure but were unsuccessful, and for the last five weeks his pains at intervals were excruciating, and his suffering a terror; friends who visited him during this time were appaled at his bravery and patience. Nelson was born at Trysil, Norway, on Dec. 10, 1864, emigrated to the United States in 1894, coming first to Harwood, where he spent two years, later coming to this community which has since prectically been his home, excepting partial stay at Viking where he was engaged in various business enterprises. He was married twice, and the latter time in the year 1898 to Miss Thea Mellem of this community who survives together with five children, Nic Nelson of Big Timber, Montana, of the first marriage, and Theodore, Myrtle, Carrie and Eleanora all residents of this place. Mr. Nelson was at his death, 57 years, five months and one day old. Undertaker Skalman of Warren had charge of the arrangements and the body was shipped here for burial at the Rindal cemetery two miles north of town. Funeral services were held on Saturday afternoon from the Mission church at Rosewood, with Rev. Werner Drotts of Viking officiating, and was attended by a very large assemblage. Enochs disposition was very remarkable from an optimistic standpoint, and few men can take life's irregularities, with a calmness and hopefullness like he. And owing to his sunny view of things he was generally well liked by all his fellow men, and within his family he was an ideal of perfection. He was by trade a carpenter, and many a building and landmark will remain a recommendation to his genius for many years to come.

Beg Your Pardon

We published a notice in last week's Rosewood News announcing another good time party at Rosebank for the benefit of the baseball association last Saturday evening, having heard the item from what we thought a reliable source, but after it was too late to correct we learned it was a mistake. The notice brought quite a number of people to Rosebank, many coming from quite a distance, and to all who were kind enough to respond, we offer an open apology, please pardon us, we did not intend to fool you, but published the notice in good faith. Thank you!

Mrs. C. Engelstad formerly of Reserve Montana, and a daughter of Mr. P. Sorenson of this place, died at the Haugen Bros. home here last Thursday after a lingering illness with pulmonary tuberculosis and is survived by three children and husband. The remains were brought to Warren by an auto hearse from that place, and interment will take place alongside her first husband, Mr. William Engelstad who died several years ago.

Mr. and Mrs. Ole Skaar and family from town of Norden were in town last Friday shopping and visiting with Mrs. Ingrid Nordhagen.

Word has been received from Mr. and Mrs. Jos. Whitmark who left two weeks ago by car for Washington, that they have found the roads blocked by snow farther west, and have been forced to stop at Missoula Montana, where Mr. Whitmark expects to find employment for a month, until the roads are open.

Miss Alice Thompson, the Busy Bee teacher, left on Friday evening to spend Sunday with her home folks at Thief River Falls.

WARREN

(From The Sheaf)

Miss Gladys M. Grindeland, daughter of Judge and Mrs. A. Grindeland, and Mr. Henry Halvorson, son of Mr. and Mrs. J. M. Halvorson, of this city, students at St. Olaf college, Northfield, are members of the combined choirs which will appear in concert during the annual Music Festival to be held there May 20 and 21. Miss Grindeland and Mr. Halvorson are both members of the famous St. Olaf choir. Miss Grindeland sings second alto, and Mr. Halvorson first tenor.

To be chosen a member of the choir is considered as great an honor as can come to a St. Olaf student. The May Festival is an annual three-day celebration at St. Olaf which draws large crowds from surrounding territory, special trains being required to take care of the visitors.

Mr. and Mrs. P. W. Turner of Ada, Ohio, were the guests of their nephew, Mr. B. R. Houser, manager of the Marshall County Farm Bureau association, a couple of days last week on their return east after an extensive trip around the United States and Canada. Mr. Turner, a man of wide business experience, is the president of The Turnerized Roofing corporation of Ada, Ohio. Mr. Turner was very much pleased to meet again while in Warren many of the service men who were his guests at his park and Paradise Ranch at Deming, New Mexico, while at Camp Cody. Mrs. Turner is a lady of very pleasing personality. She was for many years the Executive Manager of the Jacob Tome Institute at Port Deposit, Maryland, the largest endowed preparatory school in the country.

Mr. James Malia, father of Mrs. Charles Franks, of this city, died last Saturday at his home in Winamac, Indiana, at the advanced age of more than 80 years. Mrs. Franks, who left for Indiana to be at the bedside of her father arrived there about five days before his death.

Axel Holmgren, who has been in the insurance business at Virginia, Minn., has moved to Crookston, where he will make his headquarters from now on. He has been engaged as a traveling salesman for a large wholesale house. Mr. Holmgren was in Warren the first part of the week calling on his many friends here.

Peter Grund, one of the well known early pioneer farmers of Alma, who came there in 1887, and has lived there continuously since then until last fall when he moved to Pitt, Minn., was a visitor in the city yesterday. He was accompanied by a young nephew Elmer Peterson, also of Pitt. Mr. Grund owns a valuable farm at Pitt also and says he likes that country very much, although he says times are dull there also, only one carload of wood having been shipped out of there the past winter.

The Misses Ethel Humphrey and Engeborg Dale who have spent the past week as guests at the home of Dr. and Mrs. J. N. Nesse, at Thief River Falls, together with Carl Sundal, called at the W. G. Hamrick home on Sunday evening. Miss Humphrey remained till the following day when she left for her home near East Grand Forks while Miss Dale will depart for her home at McIntosh from Thief River Falls in a few days.

ST. HILAIRE

(From The Spectator)

Will Hartje is entitled to honor of being the most optimistic citizen in this community. Last fall his new residence burned to the ground before he had even a chance to occupy it. Last week his new barn in course of construction, was scattered all over the farm by the storm. In spite of it all, Will says he is going to rebuild and try again.

Mrs. R. Wallen came Saturday from her home at Minneapolis for a visit with her sisters, Mrs. K. O. Gigstad and Mrs. Albin Olsen, and her mother and brother, Mrs. E. E. Anderson and Anton Anderson as well as numerous friends in a near town.

Members of the ball team are anxiously awaiting word from Tudy Brink, who is at Jordan, Mont., and who has stated he might consent to come here for the season, in which case he would take a place on the team.

O. A. Anderson returned Thursday from Warren where he visited his son, Oliver, who underwent an operation at the Warren hospital last week. Last report is that Oliver is getting along in good shape.

A. Satterberg has a crew of men at work tearing down the roof and front end of his barn which was wrecked by the storm last week. He intends to rebuild the feed barn part of the structure.

The man you call a fool may be only fooling you.

Direct from our Factories

A Ranger bicycle for you—the best bicycle ever built—at a much lower cost than even cheap imitations. Dealing direct with the factory, you save the main selling expenses that increase the price but give no real value to ordinary bicycles. ALL you pay for in a Ranger is real quality, best material and skilled workmanship. That's why you can own the famous Ranger, the aristocrat of bicycles for less money than an ordinary bicycle costs.

Mead Ranger BICYCLES

44 Styles-Sizes & Colors

Ranger bicycles afford a choice for every taste and pocket book, Camel-Backs, Roadsters, Racers, Juveniles, Arch-Frames; Girls' and Ladies' models too. You can't equal the bicycles or the prices anywhere. For a generation we have devoted all our time to manufacturing bicycles. The enthusiastic "good will" earned by satisfactory service to over a million riders in all parts of the world is our best guaranty of service and value to you.

12 Months to Pay

You can secure possession and use of your Ranger at once and pay for it in twelve small monthly payments. Our thousands of cash customers buy at very low Factory-to-Rider prices. The Easy Payment prices are only slightly more to cover added clerical work. Because you are dealing direct with the Makers both Cash and Easy Payment Prices are naturally lower than you can obtain on other bicycles.

We send Ranger bicycles all over the country by fast prepaid express, so there will be no delay in receiving the Ranger you select from the big free catalog we will send you. Safe delivery in perfect condition absolutely guaranteed.

Big Free Catalog

Over a million customers in all parts of the world save money buying their bicycles and accessories direct by mail from our big Chicago factories. The beautiful Ranger Catalog (printed in six colors) shows all models in full colors and the small boy or girl can make selection and order, just as easily as the grown man or woman.

Tires lamps, horns, front or rear wheels, and bicycle equipment of all kinds are also illustrated and described in the catalog. We save you big money on tires and bicycle sundries. Use the coupon today and get this magnificent free catalog of Rangers and valuable information with Factory Cash Prices and Easy Payment terms.

Send No Money

Simply use the coupon or on a postal write today for the big free illustrated Ranger Catalog and Special Factory Prices and Easy Payment plan. You run no risk as we allow 30 days free trial (actual riding test) on all Rangers ordered by mail. If not satisfied in every way, send it back and the trial will not cost you a cent.

Effective May 8, 1922, the Excise Tax on United States Tires for passenger cars, both casings and tubes is absorbed by the makers and is not added to the selling price. United States Rubber Company.

For Ten Dollars and Ninety Cents—This 30 x 3½ Usco

THE 30 x 3½ tire situation today is just this—

The man who buys an USCO at $10.90 is justified in believing that his money is going farther in tire value than it *ever has gone* or *could* go before.

Naturally he appreciates the quality of USCO. That was established *long ago.*

It is still fresh in his mind that USCO *led the national market* into the $10.90 price range.

* * *

The makers of U.S. Tires *always* intended the 30 x 3½ USCO to be the highest value in its field.

At $10.90 it creates a *new classification of money's worth.*

EDITORIAL

CONCERNING THE MAIL SERVICE

It is about time something were done about getting better mail service for the farmers residing in the adjacent territory east and south of Goodridge, who are now served by the Torgerson rural route out of Erie. Not only is it ridiculous, but it is well nigh intolerable to think that mail sent out of Goodridge must go to Thief River Falls; back to Erie and from there distributed to farmers within a radius of a few miles of this town, where all their business is transacted.

To us it seems unthinkable that such a condition could exist for any length of time were the proper officials of the postoffice department aware of the facts. The pride of the department and the aims of its efficiency experts is to deliver mail with all possible dispatch by the shortest available route. Therefore we cannot believe the farmers in our territory now served by the Torgerson route would long have to endure service which brings the mail to their doors a week late, if proper efforts were made along the right lines.

We are fully aware that previous letters and petitions to the department have been ignored or at least have met with scant consideration, but we are just as firmly convinced that a barrage laid down now and persistently laid before the officials higher up, the change suggested would take place forthwith.

It is worth trying again. These farmers are entitled to have their mail come from Goodridge and it is up to the business men of the town to take steps to correct a condition which has prevailed entirely too long now. We are sure their efforts will be applauded and appreciated by the farmers affected.

"THE HOME OF THE DAIRY COW"

In another column of this newspaper appears a news article telling of the sale of a blooded sire by one of eastern Pennington county's tsockmen. The fact that breeders of the country are coming here for their sires should indeed be gratifying news to the residents of this section of the state, and The Banner feels like shouting about it.

It has been the custom in times past for us to look elsewhere for blooded sires and dairy cattle when in search of a better grade of stock and now that we are sending them elsewhere, we have just cause to rejoice.

The supplanting of the dairy cow as against a straight grain raising policy is a most progressive move and one that will in all probability pull the farmer out of his rut—if he is in one. The farmer who in former days was compelled to depend almost entirely upon the products of his land is seeing his way clear and is making his plans accordingly.

Good cattle are always the best investment. They are the easiest to keep and they swell the cream checks beyond all expectations. The dairy cow—the year-round producer—is coming into its own in eastern Pennington county in the same way as it has brought prosperity to hundreds of other communities heretofore.

GRADUATING TIME

In thousands of schools and colleges, graduating classes are now preparing for the great event of Commencement day. No other occasion in life, save possibly marriage, will seem of such tremendous import to the young people.

They now approach a great landmark of life, a time of fresh beginnings, and face untried issues. But young folks makes these sharp breaks with ease. Most of them are delighted to try their inexperienced wings.

Getting ready for graduating, in the minds of some young women, means principally long sessions with the dressmaker, and a splendiferous display of fine feathers. The girl of the struggling home sometimes makes more show than the one from the abode of wealth. The former may feel that this is her one chance to show that she is as good as anybody. Her parents may sacrifice on the absolute necessities of life to give her this splurgy send-off.

School authorities should try to persuade young people not to waste family resources in this manner. The necessity of providing costly graduating clothes and incidentals has deterred many parents from sending their children through the schools. The principles of American democracy would have every one of these young women appear in a simple and inexpensive gown, with special applause for all who make these frocks for themselves. Those that adopt such ideas show that school training has put some very wise ideas into their heads.

Young people preparing for graduation should have their hearts on higher purposes than dress or sports. They should be anxious to keep up their achievement in study until the last day of school. They should not be content merely to get by, but should covet marks that will send them out with honor.

M. O. HOUSES LOSING OUT

Minnesota publishers who attended the annual short course at the state agricultural college, last week, received much interesting and helpful information from the various numbers on the program.

Possibly the most interesting address during the session, from a business standpoint, was that given by Benjamin Wood of the big mail order house of Montgomery, Ward & Co. Mr. Wood told how the mail order houses built up their business through publicity and said each big catalogue which his firm sent out last year, cost 85 cents. They always have serious problems to contend with. But despite all their efforts their business fell off more than $20,000,000 last year. They are hoping for better results this year.

Mr. Wood said that the mail order success is built on publicity, backed by intelligent buying, and while there are many items on which they can offer real bargains, they can never successfully compete with the live retail merchant, who conducts a well-planned advertising campaign and gives his customers the service which he should. In the matter of service, the local merchant has a big advantage over the mail order house, and service is the most important factor in any selling campaign.—Waseca Herald.

A federal prohibition officer says that in Cuba liquor is being distilled from sugar cane molasses at about two cents a gallon. Most of it is then worked over and sold in this country at several dollars a quart. No wonder that rum running and bootlegging are now listed as great industries. There seems to be only one easy and sensible way to stop this law breaking. Quit buying the stuff! If the booze profiteers had to drink their own product the business would soon die.

School Notes

The students of the 1922 graduating class of the local school drove to Thief River Falls Thursday afternoon for the purpose of having their pictures taken. The cut will appear in the next issue of The Banner. The graduates are Miss Kathleen Lang, Christine Bundhund, Roy Olson, Joe Christianson and Daniel Payne. Mr. Bundhund took Miss Bundhund, Miss Lang, Roy Olson and Daniel Payne in his car and Mr. Nystul took Joe Christianson with him. They returned the same afternoon.

* * *

The domestic science department of the school served lunch to the Oklee boys and the local baseball team on Saturday afternoon after the game.

* * *

At assembly hour on Wednesday morning a very interesting program was rendered as follows:

Several musical selections by the school.
"The Schoolhouse Yard"—Elmer Ronken.
"Apple Orchard in the Spring"—Albert Poppenhagen.
"The May Queen"—Clarice Anderson, Eunice Thoreson, Ruth McDonald.
"The Story of India Rubber"—3rd and 4th grade pupils.
"Robins Secret"—Concert recitation, five girls.
Concert recitation and song—First grade pupils.
"When the Little Boy Ran Away"—Dale Harms.

* * *

Miss Rambeck of Thief River Falls, called at the school Wednesday morning.

* * *

School will not be in session on Tuesday, May 30th, it being a legal holiday.

* * *

Mrs. Stilman Noble visited the high school department on Thursday.

Entertains For Mrs. Noble

Mrs. J. Payne was hostess at a dinner party Thursday evening in honor of her sister-in-law, Mrs. Stilman Noble who has been her guest for the past week. The invited guests were: Mr. and Mrs. M. O. Seavey and little daughter, Mr. and Mrs. J. Josephson and Miss Gladys Wilson.

Every Potato Means
Additional Profit

When the price per bushel you receive for your potatoes is low, good profits can still be made by saving time and labor and by getting every potato in the field. It costs you no more to harvest completely and you get the extra dollars for your increased crop, if you use a

HOOVER
POTATO DIGGER

The Hoover Potato Digger digs up all the potatoes in the field and piles them in neat rows where they can be handled with minimum labor. This digger has proved to be an especially good investment to all potato-growers who have used it.

The shovel is of best quality high-carbon crucible steel and shaped so as to gather the potatoes with the least possible loss. No danger of cutting the potatoes to the extent that a plow or hoe does. Stone guards can be used in stony ground. You can raise and lower the shovel while the machine is in motion. All adjustments are made from the seat by convenient levers.

The vine-separating rear rack has a backward and forward motion that sifts out all dirt and deposits the potatoes in a compact row on clean ground directly at the rear of the machine, while the vines and trash are deposited at one side.

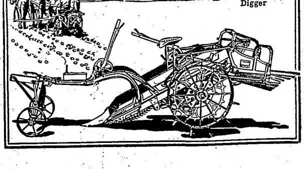
Four roller bearings and wide tires on the wheels assure light draft.

Patented Double-Action Front Truck permits the digger to be turned in a very short space.

Solid steel frame, strong main sides of Bessemer steel, beams of best quality charcoal malleable castings, and steel chains and hardened steel sprockets that greatly resist wear.

Don't fail to see the Hoover Potato Digger before you harvest your potato crop; its use means greater profits. Also ask us about Hoover Engine Drive Potato Diggers—two-horse machines under all conditions, and any other potato tools you require.

Goodridge Mercantile Company



Mrs. James Wilson of Grygla was in town Wednesday, the guest of her daughter, Miss Gladys Wilson.

Mrs. Elmer Peterson was in Goodridge Wednesday the guest of Mr. and Mrs. V. C. McLeod.

H. CHRISTIANSON & SON
GOODRIDGE, MINNESOTA

The Missouri Synod

By HENRY LUTZ
Pastor Lutheran Church, Missouri Synod

In the spring of the year 1847, 23 pastors and a dozen lay delegates met in Chicago, then a town of 20,000 inhabitants, squatting on the frontier. That group organized the Evangelical Lutheran Synod of Missouri, Ohio, and other states. Today, after 75 years of consistent adherence to the principles of conservative Lutheranism, "Missouri" as it has become familiarly known, numbers over a million souls, including 2,500 pastors with congregations all over the Union, in Canada, Brazil, Argentina, and England. "Missouri" is at present made up of 25 District Synods; our Minnesota district convenes at Concordia college, St. Paul, on the 21st of June. Synod maintains the only formidable week day parish school system, numbering 1,310 schools, attended by over 73,000 children, and taught by 1,500 trained parish school teachers, and 489 pastors. The Synod owns and controls 14 colleges and seminaries, with 91 professors, 26 assistants, and 2,042 students. There are five privately owned high schools with 42 teachers and 667 enrolled students. Home mission work is carried on at 1,364 stations. Synod also maintains missions among the Jews, Indians, foreign tongue immigrants, deaf mutes, and, very extensively, among the Negroes. Foreign mission work is conducted in Brazil, Mexico, Argentina, China, East India, Alsace, and through so-called Free churches in Germany, Australia and New Zealand.

Some of the things for which "Missouri" has stood and still stands, and to which, under the grace of God, it owes its marvelous growth are:

(a) The Bible, the whole Bible, and nothing but the Bible as the inspired word of God and the only rule of faith and life. No pastor is tolerated who does not confess and teach that the whole Bible, from cover to cover is the infallible word of God, every word of it.

(b) Christ crucified the only way to life. "I am the Way and the Truth and the Life, no man cometh unto the Father but by Me," says the Savior. And the Missouri Synod of the Lutheran church does not try to change the meaning of thes words, but gladly accepts and clings to their full and blessed meaning.

(c) Faith as the only means of attaining eternal life. The pastors of "Missouri" do not tell their congregations that they must earn their Salvation by their own works, but they reach the gospel which tells us that Christ has earned it for all men, and that He has earned it fully and completely. A person needs only to believe in Christ as his Savior and Redeemer and he is saved. For St. Paul says: "Believe on the Lord Jesus Christ, and thou shalt be saved, and thy house," Acts 16, 31.

(d) Grace as the only cause of our salvation. Not even faith, by which man accepts the salvation which Christ has merited, is man's own work, it is a gift of grace, for: "No man can say that Jesus is the Lord, but by the Holy Ghost." The salvation of man is completely and entirely God's gracious work. "By grace are ye saved through faith, and that not of yourselves; it is the gift of God. Not of works, lest any man should boast." Eph. 2, v. 8&9.

That is "Missouri's" position on some of the most important points.

In the accompanying cut we find the pictures of the men who have been at the head of the Missouri Synod, from its beginning until this day. Drs. Walther, Wyneken, and Schwan have long since passed to the Great Beyond and have received their gracious reward. All three were great men, but Walther was undoubtedly the greatest. He has been called the Luther of America. Dr. Pieper is at present professor of Theology at the largest Theological Seminary in America, Concordia Seminary, St. Louis, Mo. He is a gifted instructor and the author of many good theological works. Dr. F. Pfotenhauer, the present president of Synod, began his labors for the church as a frontier missionary in what was then known as the great Northwest, Minnesota and Dakotas. Dr. Pfotenhauer is a preacher of great power, an excellent presiding officer, and a wise leader in the affairs of our church.

MORTGAGE FORECLOSURE SALE

Notice is hereby given that default has been made in the conditions of a certain mortgage containing power of sale, executed by Tollef Loyland and Tina Loyland, his wife, mortgagors, to First State Bank of Thief River Falls, a corporation under the laws of the State of Minnesota, mortgagee, dated the 20th day of January, 1917, and duly recorded in the office of the Register of Deeds in and for Pennington County, Minnesota, on the 25th day of January, 1917, at 1:45 o'clock P. M., in Book 54 of Mortgages at page 297, which said mortgage was thereafter and on the 31st day of January, 1917, for a valuable consideration and by an instrument in writing, dated on that day, duly executed and acknowledged by said First State Bank of Thief River Falls, sold, assigned and transferred to Edwin White, which said written assignment was thereafter and on the 21st day of February, 1917, at 1:00 o'clock P. M. of that day duly recorded in the office of the Register of Deeds in and for Pennington County, Minnesota, in Book 56 of Mortgages on page 352 thereof, which said mortgage was thereafter and on the 4th day of May, 1917, for a valuable consideration and by an instrument in writing, dated on that day, duly executed and acknowledged by Edwin White sold, assigned and transferred to Gertrude M. Harlow by said Edwin White, which said written assignment was thereafter and on the 10th day of May, 1917, at 1:00 o'clock in the P. M. of that day duly recorded in the office of the Register of Deeds in and for Pennington County, Minnesota, in Book 56 of Mortgages on page 385 thereof, and at the time of this notice there is claimed to be due and is actually due on the said mortgage, according to the terms thereof, the total sum of Two Thousand and Thirty-one and 08-100 ($2,031.08) Dollars, on the note secured by said mortgage, consisting of the principal sum of Two Thousand ($2,000.00) dollars, and interest thereon amounting to the sum of Thirty-one and 08-100 ($31.08) dollars, which said default has continued to date by virtue of the failure and neglect of said mortgagors to pay said sums, although demand has been made therefore, and no action or proceeding having been instituted at law or other-wise to recover the debt or any part thereof secured by the said mortgage.

NOW, Therefore, Notice is hereby given that by virtue of the power of sale contained in the said mortgage and of the statute made and provided the said mortgage will be foreclosed by a sale of the mortgaged premises therein described at public auction, to the highest bidder for cash, at the main front door of the Court House in the City of Thief River Falls, Pennington County, Minnesota, on Monday, June 26th, 1922, at 10:00 o'clock A. M. of that day, to satisfy the amount that shall then be due on the said mortgage with interest thereon from the date hereof and the costs and expenses of such sale and the sum of Seventy-five ($75.00) dollars Attorneys' fees as stipulated in said mortgage in case of foreclosure.

The premises described in the said mortgage and so to be sold is all that tract or parcel of land lying and being in the County of Pennington and State of Minnesota, described as follows, to-wit; The Northeast (NE¼) Quarter of Section Sixteen (16) Township One Hundred Fifty-three (153) North, of Range Thirty-nine (39) West of the Fifth Principal Meridian, containing one hundred sixty (160) acres, more or less, according to the United States Government Survey thereof.

Dated at Thief River Falls, Minn., this 3rd day of May, 1922.

GERTRUDE M. HARLOW,
Assignee of Assignee of Mortgagee.
G. HOWARD SMITH,
Attorney for Assignee,
Thief River Falls, Minnesota.
May 9-16-23-30 June 6-13.

A Poppy For Remembrance

No more simple flower whose crimsoned petals
Bloom and droop and fall
Before each setting sun;
But more—

It typifies the blood of those
Who died but yesterday
Upon the shell torn fields of France.
It symbolizes all two well
The sacrifice of those
Who walk the silent valleys of the deep.
It brings to us the wind tossed sea
Which shelters them.
Within its heart we see
The still, white crosses
Row on narrow row,
Which sentinel the hills,
Where sleep in countless numbers
Our Legion Of The Dead.

And plancing deeper still
Within the poppy's bleeding heart
We see those others—
On their beds of pain
Or stumbling haltingly
Along the Way of Life—
The sick, the lame, the blind;
And side by side with them,
The widowed mother, the orphan and the wife.
A simple flower, 'tis true,
But more,
A symbol of that sacrifice
Which made and kept us free.
And so,
Lest memory dim with time,
We wear today,
A POPPY FOR REMEMBRANCE.

STAFFORD KING,
Minnesota Legion Adjutant.
For Memorial Day, 1922.

OSMUND URDAHL SOLD SIRE TO FARGO, N. D., BREEDER

The Banner wishes to correct a statement made in last week's issue wherein it stated that Osmund Urdahl and Stewart McLeod drove to Fargo with Mr. McLeod's sire which he had sold to a Guernsey breeder.

These two gentlemen did drive to Fargo, but the sire belonged to Mr. Urdahl instead of Mr. McLeod. Mr. Urdahl and Mr. McLeod are both Guernsey breeders. This is the second sire Mr. Urdahl has sold this spring. The first one he sold to a Crookston party, and the animal was shipped to that point. The latter was sold to a breeder living near Fargo, and the two gentlemen took it there in a truck. They both have a herd of high type, and are making good at it.

School Picnic

The annual school picnic will take place Wednesday P. M., May 31st, on the school campus. This will be a union picnic and will include all the grades and high school. Lunch will be served and games will be arranged to entertain the participants. A baseball game is also arranged for. This game will be between the different grades.

Perhaps one reason some autos are slow is because they are tired.

A Hard
Worker

You may be a hard worker. Possibly you are the most industrious person in the community. If so, we congratulate you.

But there is one thing that is a harder worker than you are, and that is MONEY. While working for money, always save something from your wages, so that in time you have money working for you. Money at interest works day and night, holidays and Sundays. You can't equal that for industry. No other servant you might employ these days would do half so well. Your money will be secure at our bank.

THE FRIENDLY BANK

COLOR LINE IN THEATRES

The Liberator magazine of New York recently asked Claude McKay, a negro journalist, to review a play at the Fulton theatre and provided tickets for orchestra seats which McKay and a companion, also a negro, duly presented. The usher, "with a look of quizical amazement on his face," stopped them and summoned the manager, who said there had been a mistake, took the stubs marked orchestra and gave in exchange two tickets marked balcony. Commenting on this incident, Hoywood Broun writes in the New York World:

"There are, of course, certain parts of the United States where one gallery is reserved for negroes alone. That is discrimination, but at least it represents a point of view. The New York practice represents race prejudice plus an additional snobbery. The managers seem to feel that it is unthinkable that a negro should be allowed to sit in the orchestra next a white man who has paid $3,30 for his seat. Accordingly he is shunted off into a gallery next to a white spectator who has paid only $2.20 or less. And thereby Caucasian supremacy is sustained. There is a law in New York state rigorously forbidding race discrimination and providing penalties, but this law is constantly broken in the theatres. The violations are not frank, but the box office men are instructed to say that they have no tickets left when a negro asks for a seat in the orchestra. It seems hardly fair to criticize the South for shortcomings when we of the North have so much to answer for. Prejudice hardly becomes sweeter when it is accentuated by hypocrisy."

Mr. Broun might have done well to add that in the cities and towns of the South, with about a third of the population black and uncleanliness far too common, a color line in the theatres is considered imperative as a matter of personal comfort as well as for the sake of order. Though such discrimination is undemocratic, separate accommodation for the races in the South may be defended as a police measure to prevent serious disturbance of the peace. But ground for such excuse may be hardly said to exist, or to be of relatively slight proportions, in the northern city where the negro population is small and where the whites are likely to outnumber the blacks in a theatre two or three hundred to one. Yet the few well dressed and well mannered negroes who apply for good seats in northern theatres are told that only gallery seats are left, just as the same class of negroes who apply at one of the better hotels are told that the house is "full up". One would think that the blacks themselves, in the long run, would prefer southern frankness to northern disingenuousness, for the former at least puts them on due notice of what to expect.

SAVE ROADS AND SCHOOLS

In the general and insistent demand for lower taxes now being given expression, good roads and schools, it is gratifying to note, are positive and almost universal exceptions. These reservations in the cry for reductions in federal, state and local taxation are made for quite obvious reasons.

Adequate highways and educational facilities in America are essential to public welfare and advancement. They are closely related. The northern consolidated or community school is dependent to a considerable degree upon improved roads. They are the pride of every good citizen, whether he is of the country or city, and enjoy his liberal support.

The farmer of today regards good roads as necessary as good soil, warm barns, improved machinery and other modern aids to agriculture. He will not long waste time attempting to reach a trading place over a bad road while his neighbor speeds to market over a good road which also carries his children by bus to the graded community school. The town man has learned that the progress of a community is vitally affected by its accessibility by highway.

Many other reasons are advanced for the position to retrenchments which would adversely affect roads and schools. Government figures show that because of cheap construction costs, highway and school facilities may be obtained now with borrowed money and their use enjoyed without additional cost over that predicted for a few years in the future.

Minnesota is numbered among the progressive states standing for better roads and schools aside from any tax-reducing policy. It always has been a leader for good schools and has vast permanent school funds to lighten the school taxes. Its highway development plan, the envy of many other states, is written into the constitution. The arterial highways are being improved and maintained with the proceeds of taxes of motor vehicles, a large percentage of which is contributed by large city users, and the local taxes are left for use exclusively on the local roads. In this situation Minnesota has assumed and is certain to maintain the leadership for good roads and good schools.—Carlos Avery in The Hutchinson Leader.

POLITICAL ANNOUNCEMENT

Inserted in behalf of the candidate whose name appears in this advertisement, for which the sum of $10 is to be paid.

Elmer Ohm

CANDIDATE FOR REGISTER OF DEEDS
PENNINGTON COUNTY, MINN.

PRIMARIES, JUNE 19, 1922.

HAIL TO NORTH STAR STATE!

During the summer months, there is no state in the union that surpasses Minnesota in beauty.

We who live here do not fully appreciate the beauties and glories of our state. We take too much for granted.

But the tourists who come to Minnesota for their summer vacations marvel at what they see, and go home and tell their friends of our ten thousand lakes, our wonderful forests, our fertile farms, our great cities and prosperous villages.—Winnebago City Enterprise.

Motorists pay an average of $34.67 each in various forms of taxation?

There is a foreign genetleman in Los Angeles of the name of Lieuiessuesszesszes Hurruizzisstizzii. The court clerks call him "Mr. Sodafountain" for short.

The seeming complexities of the tariff problem in these times call to mind the perplexities induced by the old Chinese puzzle.

Before long we may read an ad something like this: "Come in and listen to our Saturday afternoon concert of special music. Lyrics by William Atteridge, Melodies by Victor Herbert."

Political Announcement

(Prepared by the candidate whose name appears below, for which the sum of $5 is to be paid.)

To the Voters of Pennington County:

I hereby announce myself as a candidate for nomination to the office of register of deeds at the primary election to be held Monday, June 19th, I have resided in the county since 1904, and all my interests are here. For eight years I have served as a member of the board of county commissioners and for five years have been honored by my colleagues with the chairmanship.

In case of my nomination and election I promise to give the office my entire attention and will endeavor to serve the people efficiently and impartially.

I respectfully solicit your vote and support.

Yours for service and reliability.
OSCAR J. PETERSON.

Political Announcement

(To be paid for by the candidate at regular space rates.)

To the Voters of Pennington County:

I wish to announce that I am a candidate for the office of Superintendent of Schools of Pennington county. I was graduated from the State Teachers' college at Moorhead in 1914. I am 30 years of age and I have had ten years' of actual experience as a teacher in elementary and semi-graded rural schools. I served approximately one year in the United States army, nine months overseas. I have filed as a candidate for this office because I believe that I can give the people of the county real service and an efficient administration. I shall appreciate your vote and support at the primary election to be held on June 19.

Very respectfully,
O. R. SANDE,
Town of North.

Political Announcement

I hereby announce myself as a candidate for nomination to the office of register of deeds at the primary election to be held Monday, June 19th. I have resided in the county since 1904 and all my interests are here. For eight years I have served as a member of the board of county commissioners and for five years have been honored by my colleagues with the chairmanship.

In case of my nomination and election I promise to give the office my entire attention and will endeavor to serve the people efficiently and impartially.

I respectfully solicit your vote and support.

Yours for service and reliability,
OSCAR J. PETERSON.

Political Announcement

(This notice to be paid for by N. J. Anderson at regular space rates.)

To the voters of Pennington county:

I am a candidate for re-election for Register of Deeds of Pennington county. During the years I have served the people of the county as Register of Deeds I have made many friends, but I am not asking support in the present campaign merely by virtue of this friendship. Rather I would have the voters consider my candidacy on a purely efficiency basis as the only proper method of electing officials to public office. In regards to fitness for the office of Register of Deeds, both as to honesty and capability, I prefer to rest my case with the people of Pennington county, whom I served in past years.

Yours respectfully,
N. J. ANDERSON.

Political Announcement

(This space to be paid for by E. A. Mostue at regular rates).

For Superintendent of Schools

To the voters of Pennington county:

The undersigned begs leave to announce his candidacy for the office of Superintendent of Schools for Pennington county.

I respectfully solicit the support of the voting citizenery, at the primary election, June 19th.

If nominated and elected, my aim, as ever, shall be efficiency and economy in the administration of our rural schools.

Yours respectfully.
E. A. MOSTUE,

Noesen of Thief River Falls, a brother of the bride, officiating. The attendants were the bride's nephew, Lawrence Mulry of Thief River Falls, and his daughter, Miss Nora Mulry of this city. Mr. and Mrs. O'Connell will continue to make their home in this city.—Crookston Daily Times.

80th Birthday Anniversary

Mrs. J. E. Bacon was tendered a very pleasant surprise on Thursday afternoon, when she celebrated her 80th birthday, at the home of her daughter, Mrs. J. L. Stitt, where a group of ladies gathered to spend the afternoon. At five o'clock a sumptuous lunch was served of which a huge birthday cake topped with eighty candles was a feature. Those attending were: Mrs. J. W. Anderson, Mrs. C. M. Carlson, Mrs. Fred Johnson, Mrs. Elmer Ohm, Mrs. Knute Melby, Mrs. F. Eagler, Mrs. H. Kinghorn, Mrs. William Smithers and Mrs. Skog.

A FINE MOTOR TRIP

W. J. Brown told friends in Warren yesterday about a pleasant motor trip he had just completed from his cottage at Union lake. Shortly after leaving the lake he picked up a valve stem which went clear through one of his good tires. He replaced it with his only spare and went on another mile when he picked up a 10 penny nail which punctured his spare. Then his wiring became short circuited. Getting started again he blew up another tire—then Bill blew up. The last reports from the front are to the effect that he was saying things about automobiles and things in the road which The Tribune, being a respectable family newspaper, could not allow itself to repeat.

FREE-$1,855 in Cash
You Can Win

A Word Contest without a Catch in It

OPEN to everybody—and everyone has an equal chance at the big prizes—$500, $375, $250, $175, $125, $100, etc. Here's an easy, enjoyable way to win some real vacation money, enough to take a long trip.

See how many words you can make out of the letters in the three words—

"Nash's Delicious Coffee"

(For instance: Ah, Nice, Delicious, Clean, Coffee, etc.)

Send in your list today—you may win a big prize. Someone will win it. You have the same chance. Try your skill now. If your list is the largest, and conforms with the rules printed below, you will be awarded first prize. If your list is second largest, you will get second prize, and so on.

Costs Nothing to Try

You do not have to pay anything or sell anything or buy anything to enter this contest, or to win a prize.

But if you send one complete label from a can of Nash's Delicious Coffee and the judges decide your list is the nearest correct list—the first prize will be $100 in place of $20.00.

If you send THREE complete "Nash's Delicious Coffee" labels with your list, you will receive a still larger prize. See schedule of prizes below. We make this special inducement because we want you to get acquainted with

DELICIOUS
Nash's Coffee

WE BELIEVE that if you try it once, you will never be satisfied with any other kind.

It's the last word in coffee blending—a *perfected* blend based on exhaustive studies and research. It is so blended and roasted that it neutralizes hard or alkaline water and brings through the true coffee flavor. Whether you use hard or soft water, it makes a delicious, smooth, satisfying and refreshing cup of coffee.

Mountain plantation coffees are bought at premium prices for this special blend because of their better flavor, body and richness of sap. Only a few of the thousands of offerings of coffee beans made to us pass our exacting tests and meet our strict requirements.

Always the same. By constant care in buying our raw coffee beans, and by making careful tests throughout every process of its manufacture, we always maintain the same perfected blend—the same high standard in every batch that goes out of our factory. Nash's Delicious Coffee is the same today as a month ago, and will be the same a year hence, always delicious.

Air cleaned. Chaff and coffee dust are removed by air suction during the process of steel cutting in our special machines—leaving a clean clear-cut coffee. The result is a crystal-clear cup of coffee, free from all stale and bitter flavors, free from "coffee mud."

"Hot Roasted" Freshness. Nash's Delicious Coffee is shipped on the same day as roasted and cut—or not later than the following morning. We roast only enough each day to fill orders on hand.

Packed in moisture-proof, hermetically-sealed "Napacans"—which protect its crispy freshness and pleasing flavor from dampness—dampness being one of the greatest enemies of coffee flavor.

Sold by grocers in one and three pound containers. Whether you enter the contest or not, you will be well rewarded if this advertisement induces you to try Nash's Delicious Coffee.

RULES OF CONTEST

1. This contest is open to any man, woman, boy or girl in America, except employees of The Nash Coffee Co. and their relatives. There is no entrance fee of any kind.
2. Use only one side of the paper on which you write your list. Write your list of words in alphabetical order and number them. Write your full name and address in the upper right hand corner of each sheet.
3. In any one word, do not use any letter oftener than it appears in the words "Nash's Delicious Coffee."
4. The judges will count only English words found in Webster's New International Dictionary.
5. Obsolete, compound or hyphenated words may be included in your list if found in the dictionary mentioned above. Either the singular or plural of a word may be used, but not both of them.
6. The same spelling of a word will be counted only once, even though it may have different meanings.
7. Two or more people may co-operate in this contest, but only one prize will be awarded to any such group, and only one prize will be awarded to any one household or family.
8. If you send labels with your list, each label must be *complete* as wrapped around the face of each can of "Nash's Delicious Coffee."
9. All lists will receive equal consideration, whether labels are sent or not.
10. The prizes will be awarded for the largest list of words that qualify. The person sending in the largest correct or the nearest correct list will win the first prize. The one sending the next best list will receive second prize, etc. No other consideration, such as neatness or arrangement will have any bearing in awarding prizes. However, by writing as plain as possible, or by typewriting your list if possible, you will assist the judges in counting every word that qualifies.
11. In case of a tie, the full amount of the prize will be awarded to each contestant tied.
12. The prizes will be awarded by a committee of impartial judges.
13. *All lists must be mailed by post office closing time, Friday, June 8, 1922.*
14. The prize winners will be announced two weeks after the close of contest.

Address, Contest Manager, NASH COFFEE CO
1330 Quincy St. N. E., Minneapolis, Minn.

LIST OF PRIZES WINNING ANSWERS WILL RECEIVE PRIZES AS FOLLOWS:

	If No Labels Are Sent In	If 1 Label Is Sent In	If 3 Labels Are Sent In
1st Prize	$20.00	$100.00	$500.00

MINNESOTA HISTORICAL SOCIETY

FIR[illegible] GRADUATING CLASS OF LOCAL SCHOOLS RECEIVE THEIR DIPLOMAS

Exercises at School Auditorium Last Night Attended By Large Number, Who Honor Premier Students of Local Institution of Learning.

Last night at the high school auditorium was graduated the first high school class from the Goodridge Consolidated schools, when Christina Bundhund, Joseph Christianson, Kathleen Lang, Ray Olson and Daniel Payne, the first senior class received their diplomas. The presentation of the certificates was made by Palmer O. Tvedt, of the board of education.

The village of Goodridge and the citizenry in general is duly proud of its senior class, of its efficient school system and of the faculty which has so generously given of its efforts in behalf of the institution.

Since the organization of the Goodridge school six years ago, it has enjoyed a healthy growth. Each year has been marked by an ever increasing enrollment of pupils of high school age, the curricula has gradually been expanded, and school activities in general have been developed. During all these years the school has received the united and liberal support of the people in the community. Popular support, and the interest and co-operation of the various community organizations such as the Community club, Tri-County Fair association, and the Farm Bureau, have been strong factors in the making of this school. The present board of education consists of: Carl Christianson, president; Peter Lovely, vice-president; A. B. Mandt, secretary; Palmer O. Tvedt, treasurer; Nick Bundhund, director; John Kusmak, director.

Progress of the School

In response to the awakened interest in an approved rural life and education the school board has introduced work in special departments in addition to the regular academic studies. There has been a gradual expansion of the industrial and vocational side of public school education and to meet the demand for this training the Goodridge high school now offers the following courses: Home economics, agriculture, manual training, and commercial. These departments are adequately equipped to carry out the special work required for credit in any of the above named courses.

Girls' Glee Club

During the past two years the high school Girls' Glee club has been an active factor in school activities. Under the able direction of Miss Giefer, the organization has made wonderful progress. This year the club has a membership of twenty. Following is the personnel: Christina Bundhund, Myrtle Iverson, Maggie Johnson, Florence Johnson, Olga Grimley, Ida Anderson, Deith Schie, Vivian Thoreson, Frances Hincik, Luella Urdahl, Clarice Aarness, Alice Coan, Eunice Tvedt, Kathleen Lang, Clenora Urdahl, Ruby Thompson, Emma Gilbertson, Gertrude Anderson, Angeline Svobodny and Agnes Vaughan.

Club Work

The Boys' and Girls' club has been an active organization the past four years. The last two years the club has state requirements and at the close of the year's work obtained a state charter, issued by the State Club Leader, T. A. Erickson. The members of the club have been doing a great deal in the interest of better farming. The boys and girls take pride in being able to raise marketable vegetables, take care of good calves, hogs, sheep and chickens. Many of them have brought their exhibits to the local and county fairs where they carried away the blue ribbon. The following are members in this year's club: The Garden Club—Esher Ronkin. Elmer Ronkin, Albert Poppenhagen, Eunice Thoreson, Inga Hanson; the Potato Club—Elmer Ronkin, Esther Ronkin, Orville Urdahl, Albert Poppenhagen, and Morris Erickson; the Calf Club — Ward Thompson, Gayhart Hagen, and Eddie Hanson; the Sheep Club — Daniel Vaughan; the Poultry Club—Hazel Thoreson, Tina Gaudland, Clarice Anderson. The club officers are: Esther Ronkin, president; Daniel Vaughan, vice-president, and Clarice Anderson, secretary and treasurer.

The faculty for the past year consisted of B. O. Norby, superintendent; Elmer J. Beithon, English and science; John Nystul, high school principal; Clara Breen, grammar grades; Teresa M. Giefer, home economics; Sarah E. Vaughan, intermediate; Joren Hagland, primary. George Josephson has acted in the capacity as janitor.

The children living at a distance have been brought to school in busses. The legally bonded bus drivers are: Route No. 1, Gunder Erickson; Route No. 2, E. H.Besancon; Route No. 3, O. N. Urdahl; Route No. 4, Noble Urdahl, and Route No. 5, L. P. Poppenhagen. The last three have used motor busses the major portion of the school year.

Pupils having perfect attendance for the year are: Augusta Harms, John Anderson, Esther Hanson, Peter Poppenhagen, Tina Gaudland, Edith Gunderson, Ethel Vaughan, Clifton Seavey, Rosella Lovely, Norton Gunderson, Emma Gilbertson, Gertrude Anderson and Jessie Leslin.

Baseball

Among the extra curricular activities, baseball is one of the most prominent. Through the courtesy of local business men, it was made possible to provide the team with suits this year. A number of games have been played with neighboring high schools and the score book shows an even break of victories and defeats. Following make up the nine: Daniel Payne, pitcher; Gustav Thompson, catcher; Alvin Halvorson, first base; Roy Olson, second base; Joseph Christianson, short stop; Stuart Ferdinandson, third base; Loudolph Urdahl, left field; Bennie Mandt, center field; Herbert Nelson, right field.

THE GRADUATES

Ray Olson, Daniel Payne, Joseph Christianson, Kathleen Lang and Christina Bundhund.

A "Peep" Into the Lives of the Honored Seniors---What They're Famous For and Why

Kathleen Lang

Kathleen Lang entered as a sophomore from the Thief River Falls high school. During her school career she has proved herself a very dilligent, conscientious and thorough student. With admirable persistency she has worked her way through high school and graduates as valedictorian for her class. Kathleen is a member of the High School Girls' Glee club.

Christina Bundhund

Christina Bundhund is a confirmed optimist. Speaking of "contagious buoyancy"—she has it. Intensely interested in her school work, she has permitted nothing to interfere with faithful compliance with the routine tasks of school work, and yet extra curricular interests have received due consideration. A worker to the highest degree, undaunted by any task, and blessed with a never-failing source of humor, and cheerfulness, Christina graduates as salutatorian for her class. She is a member of the Girls' Glee club.

Roy Olson

Roy is commonly known to his classmates as the "Deacon". As class president he has succeeded in guiding the graduating class through the vissicitudes of seniordom. Roy ranks ace high among his teachers and classmates and has the potential qualities of success. He has no particular hobbies in the way of studies, altho it isn't on record that he has ever been dumbfounded or overawed by any of the elemental components in the curriculum. He is a member of the baseball team, the high school orchestra and the Goodridge band.

Daniel Payne

It takes a lot of gloom to sadden Dan's heart, and he regards a cheerful grin as one of his most valuable assets. Endowed with keenness of preception and a retentive memory, coupled with interest in his school work, Dan has labored faithfully and attained an enviable record both in and out of school. Dan's knack of sound judgment was demonstrated by his ability to win a leading place in the stock judging contests at the Crookston Winter show and the Minnesota State fair. His keen eye and his ability to pitch ball, has made him an indispensable member of the baseball team. In his school career Dan has tackled each and every subject with a dangerous seriousness. His view of things is thoroly orthodox and logical except for an indefinable aversion to, and a profound disregard for the ancient and honorable art of spelling. "It is not the words themselves that are important," is Dan's philosophy, "it's what you can make out of them when they are put together."

Joseph Christianson

Joseph is a leader and has been the veritable hub of school activities. Naturally talented, studying is to him an avocation. He has the ability to draw correct conclusions without overscrutinizing the premises of any proposition with which he may meet. He is an ardent baseball enthusiast and the pages of the school baseball history record his name with regular and recurring frequency. His prowess in the baseball field has merited him the captaincy of the team for the past two years. He is a talented musician and has been a prominent member of the Goodridge band for several years, and has been one of the mainstays in the high school orchestra. He is a versatile writer and wields a facile pen. His latest bid to fame along this line is an argumentative essay bearing the caption "Twenty-Three Reasons for the Abolishment of the Alarm Clock."

The Baccalaureate Service

The baccalaureate services were held Sunday afternoon at the Lutheran church. Arrangements were in charge of the junior class and great credit is due them for the manner in which the program was carried out. Miss Eunice Tvedt and Miss Mable Graff acted as ushers and the church was crowded to overflowing.

The juniors had decorated the church in a beautiful manner and reserved seats were ribboned off with white tissue paper festooned with pink and white honeysuckles. The pulpit was also covered with white paper and had honeysuckles strewn over it. Large vases of lilacs were placed in various places about the church. The altar was covered with white paper and artistically decorated with oak leaves.

The program was opened with a song by the congregation and a portion of scripture was read by Rev. Akre, pastor of the Luthran church, who also delivered the opening prayer.

The Lutheran choir delivered two songs and Miss Thora Hanson of Thief River Falls sang a solo, "Eye Has Not Seen," accompanied by Miss Gretta Gulrud.

Rev. T. E. Sweger, of Trinity Lutheran church of Thief River Falls delivered the baccalaureate sermon and chose as his topic the timely and beautiful text from: 2 Tim. 2,15, "Study to Show Thyself Approved Unto God—a Workman That Needeth Not to Be Put to Shame." Rev. Mr. Sweger, in his usual eloquent manner, greatly impressed the students and the number of others present.

BACCALAUREATE SERMON

Text: 2 Tim. 2,15. "Study to Show Thyself Approved Unto God. a Workman That Needeth Not to Be Put to Shame."

"With the message of Paul to Timothy, I charge you the graduating class of 1922 to study show thyself approved unto God a workman that needeth not to be put to shame. May there be no feeling of repugnance at the idea of work or of being a workman—yours is not the ordinary duty nor the ordinary task—you are God's workmen. May you be impressed with the fact that while we work to live we also live to work. May you be instilled with the spirit of the Great Master who said 'I must work the works of Him who sent me while it is day and night cometh when no man can labor.'

"The divine edict has gone forth to man 'In the sweat of thy face shalt Thou eat bread.' To work is then the course and at the same time the blessing of existence. Behold the busy work that goes on about us. Man plies unnumbered trades, sets in motion the wheels of a thousand industries, fills to overflowing millions of warehouses with the fruitage of his toil, keeps in endless rotation myriads of freight cars laden with the freightage of his industry, sends his ships to plow the seas of every ocean and clime to give and take of the world's vast treasure, not only that but he has explored all the realms of nature, wrung from creation its unwilling secrets, delved into the inmost parts of the earth and brought to light its hidden treasures of mineral and metal, set sail on the seas of space, fathomed unmeasured depths and guaged untraveled distances between world's far remote from one another, discovered, analyzed and arranged invisible laws, estimated the mechanical forces which make up the machinery of this vast universe, gone out to the very edge of the knowable and dared to peer beyond, active and resourceful, inventive and patient the undaunted pioneers of our advancing civilization.

"But when you ask yourselves, what is the reason for all this ceaseless activity, what powerful motive drives the hurrying crowds, what influences the ebb and flow of the busy life about us. It is primarily that man may be victorious over the natural elements with which he is engaged in ceaseless conflict. The light and the tir and the earth are his enemies in that he must protect himself against them. He must be housed from the rain, warmed and clothed from the cold, sheltered from the heat provided with food and drink to satisfy his hunger and thirst. He is driven by the needs of the body to spend the greater part of life making provision for it. He has multiplied labor that he may sustain physical existence, supply, beautify and furnish with raiment the material frame. But is this the sum total of human existence? Is it necessary to expend energy as boundless as the universe simply for physical gratification? Man works harder than any beast of the field, is more marked for toil, has more of the burden of creation on his shoulders and no creature enjoys as little as he the fruits of his toil. No! Man should have a higher, nobler aim. He alone of all created things is endowed with a higher nature than the purely sensual, he alone is capable of nobler sentiments than physical instincts, he alone, they say has the muscle which turns the eye upwards, he alone has a soul. His work therefore should be spiritual, it should be onwards and upwards towards God. He should not be content with material things but have in view the things which endure for all time, his efforts should not be toward the erection of a house on the shifting sands of time but a mighty temple on the solid rock foundation of eternity.

"When you ask yourselves what it is to be God's workmen the answer is found in our text, Study to show thyself. The Revised Version has it: Give diligence. It is study then or diligence to win the approbation of God. This expresses itself in two ways. In work that goes on within us and without. In other words it is Christian character building and Christian living. It is Christian for it is useless to speak of any other that would be well pleasing to God. Other religions perish, Christianity endures. It is the invisible kingdom in the hearts of all races that is winning millions of subjects with the passing years. It is the leaven pervading all classes of the community with its uplifting influence, raising the standard of every nation's morality, increasing the world's total of charities, manifesting its power in the public and private life of all classes of people. It is the salt which thrown into the corrupt mass of humanity has ever continued to exert its saving sweetening influence, which has made through contact unnumbered lives pure and sweet and strong, which has made cities like Corinth decaying in viciousness strong in righteousness and peoples like those of the cannibal isles of the Pacific revived purified and lifted up to a level with the civilized peoples of the world. Christian character is the priceless jewel in the crown of life, wears no mask to hide its imperfection but is transparent and truthful to all men, a stately monument erected to the glory of God, a mighty weapon to use against the enemy and a strong instrument in the service of God. If you possess a Christian character you are in tune with the infinite, but if you live a lie you are as sounding brass and a clinking cymbal. Phillips Brooks says: "I watch the workman work upon the building which some day is to reach up into the skies and toss its pinnacles to high heaven and I see him looking up at the building and wondering how high those pinnacles are to be and just how they are to be built, and all the time he is cramming a rotten stone into the building just where he is now at work. The thing for him to do is to forget the pinnacles or keep the floating image of them in his mind for his inspiration but to put a good, honest and substantial character into the building just where he is now at work.

"You must give the world not only the benefit of a Christian character but the blessing of an active Christian life. Christianity must not only be static, it must also be dynamic, it must not only be defensive it must also be aggressive. It must not be like an army satisfied to be in a strongly intrenched position, it must also go out and make conquest of the surrounding territory. We must not be satisfied simply to be good but that we may do good. To be pure and sweet and strong is well, but there is something infinitely better.

"'To be to other souls the cup of strength in some great agony, enkindle generous ardor, breed pure love be the sweet presence of good diffused and in diffusion ever more intense. So to live is heaven, to make undying music in the world, breathing a beauteous arder that controls with ever growing sway the growing lives of men.'

"What we need today is a true whole-souled Christianity of unimpeachable integrity. What we want is an aggressive Christianity to force the fighting on every side that the church may see what it has not seen in the 1900 years of its history, whole communities devoted to Christ, where the forces of evil have been banished never more to exercise their devastating influence. What we desire above all else is a Christianity that lives not for itself alone that seeks not merely its own salvation but also the rescue of others, does not only keep itself unspotted from the world but is a purifying influence to others situated under like degrading conditions. What we demand, is a Christianity with its eyes wide open to its own responsibility, so that it may not be possible for souls to be led astray, lives to be wrecked on the shoals of temptation and men and women to walk blindfolded over the awful precipices of sin, without a hand raised to check them, without a voice raised to warn them and within sound of the church bells.

"Young people of the graduating class, your history has not yet been written, your race not yet been run, your ship is still upon the seas. You are God's workmen in this that you are weaving into the warp of life your own character thread by thread and death shall one day reverse the work and show you the result, you are building step by step the pyramid which shall one day raise you to the heights of glory or hurl you to the depths of despair, by daily acts which are recorded in the imperishable scrolls of the recording angel. You are fitting together in the building yard of life the ribs and plates and beams of the vessel which shall one day carry you upon the ocean of eternity. You are writing your own biography and God keeps the manuscript.

Workmen approved unto God were once the saints in glory, the blessed disciples who died in the Lord and whose works do follow them. So, too, are the angels who are ministering spirits sent forth to minister unto those who are the heirs of salvation. So, too, was Jesus who at an early age entered upon his Father's business and went about doing good until they nailed his feet to the cross. So Nehemiah who said 'Remember Me O God, concerning this and wipe not out my good deeds that I have done for the house of My Lord and the observances thereof.' A workman approved unto God was James who said: 'What shall it profit a man if he say he hath faith and hath not works can that faith save him. So Paul who said: 'Finally brethren whatsoever things are true whatsoever things are honest, whatsoever things are just, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report, if there be any virtue and if there be any praise think on these things.' So that other apostle who said: 'God is not unrighteous to forget your good deeds.' So Job who said: 'When the eye saw me then it blessed me and when the ear heard me then it gave witness to me for I delivered the poor that cried the fatherless and him that had none to help him. I put on righteousness and it clothed me. My justice was as a robe and a diadem. I was eyes to the blind and feet was I to the lame. The blessing of him that was about to perish came upon me and I caused the widows heart to sing for joy.'

"So shall you workmen approved unto God. Remember that not a good resolve you make, not a prayer you breathe, not a kindly word you utter, not a sympathising tear you shed, not a helpful step you take, not an effort to rescue the perishing, not a visit to the widow and the fatherless, not a cup of cold water in Jesus name, but what is recorded in the Book of Life and shall be published to the world when Christ through faith in whom and through love of whom you have done all these things shall place the crown of life upon your heads with the words: 'Well done thou good and faithful servant thou hast been faithful over the little things enter thou into the greater, enter thou into the joy of the Lord."

Annual School Picnic.

The annual School Picnic was held Wednesday afternoon on the school campus. All school pupils and many of their parents were present. An interesting program consisting of games and contests and races were prepared. Prizes were awarded to winners of each of the contests. A baseball game was played between the seventh and eighth grades. Lunch was served by the teachers consisting of ice cream and cake.

Dr. Booren and Harry Protzeller returned last evening from a fishing trip to Mahnomen. They had splendid luck and it is reported they came home on a freight train in order to secure adequate transportation facilities for their catch.

Job was a patient man—but he never had to listen to a couple of guys argue about up-keep and differentials.

WORK MORE PLENTIFUL

One of the hopeful signs of the times is the building activity in many sections of the country. Minneapolis and St. Paul have issued more building permits this year than ever before and there is said to be practically no unemployment at this time in either city. Similar conditions prevail elsewhere. An exchange relates how tile plants at Mason City and other Iowa points are handicapped because of a lack of help.

The editor of the Faribault Journal, who has just returned from an eastern trip that included visits to several mining centers, states it is common gossip that the coal strike is a put up job on the part of the miners and operators in order to exact higher prices from the consumer. Whether true or not, there is no excuse for the prices being exacted for fuel and the people are sick and sore over paying war prices. If other commodities were on the same basis there would be little complaint, but it is very unfair to allow the coal industry so important to transportation, to manufacturing and to life itself to be manipulated to the detriment of all other industry by a little band of profiteers whose selfishness knows no limit.—Mapleton Enterprise.

THE CHICKEN BUSINESS

W. W. Brooks in Long Prairie Leader: I find that not only in Todd county but throughout the entire nation, many farmers are going into the chicken business. They are doing this for the same reason that so many new farmers are going into the dairy business. It has been found of late years to be unusually profitable, as well as safe and dependable. There are more eggs on the market today than ever before, this according to government reports. It may be that the increased production will tend to bear down the prices, but in the long run I do not believe the good poultry raiser is going to suffer any loss. There is a tremendous campaign going on all over the country that is calculated to increase the consumption of eggs. All this talk in the papers about "vitamines," that is, eating food that contains the proper kind of nourishment, is calculated to increase the consumption of eggs and this will tend to take care of the supply. Then again, just the same as in dairying, thousands who go into the poultry business will not give the kind of attention necessary to make it successful. The way in which to make money in the poultry business is to be a better poultry man than your neighbor. Put yourself outside the range of competition by having good chickens and then give them the proper care. Of course, it is also necessary to solve the chicken feed problem by raising as much on the farm as possible.

NOT EXACTLY

Thief River Falls lost their first ball game Sunday to Red Lake Falls 10 to 6. As usual Thief River Falls are crabbing and claim that the game should be forfeited to them as Red Lake had better players than they were entitled to.—Karlstad Advocate.

Not so fast Bro. Nordine. The people of Thief River Falls, as well as members of the ball team, feel that the game mentioned was lost fairly, but it happens that the local director of the league, Dr. Penney, lodged protest against two Red Lake players who were not residents of that city, and the fairness of that action seems to be sustained by the entire board as one of the players was declared ineligible at a meeting held at Crookston Friday evening. That seems to be about all there is to be said about the matter.

State Commission Prepared Arguments Which Resulted in Freight Cuts

Much of the credit for the recent order of the Interstate Commerce commission for reducing freight rates is due to the Minnesota Railroad and Warehouse commission. Not only was this campaign one of the first to demand reasonable transportation rates as a means of restoring normal industrial conditions but one of its members prepared the main brief in the case and presented the closing argument before the federal commission. The numerous statistical and analytical data supporting the brief and argument were prepared under the direction of B. C. Smith, Statistician to the Minnesota commission.

Commissioner Fred W. Putnam is chairman of the special committee of the national association of state commissions in charge of the movement for lower railroad rates and was selected by that body to prepare the brief on behalf of twenty-nine state commissions and various farmer and industrial bodies. He was also selected to make the closing arguments.

Mr. Putnam, as his chief argument, contended that the carriers would do more business and earn a greater return by reducing their rates instead of maintaining the war schedules, because substantial reductions would stimulate trade generally and increase railway traffic. With estimated reduction of $425,000,000 annually in labor costs, as well as lower prices for fuel, materials and supplies he contended that the railroads under normal conditions could reduce rates and still earn a return of at least 6 per cent. And he had the figures to prove his assertions. That they were potent and convincing seems to be indicated by the fact that the reductions ordered are computed to earn a return of 5¾ per cent.

HOLT BANK CLOSED

The Holt State bank was closed last week by Superintendent of Banks R. B. Rathbun. The deposits of the bank which were $200,000 last January have decreased more than $40,000, and inability of the bank to realize on its frozen credits led to the closing. Holt people assert the depositors will lose very little by the bank failure.

D. R. Anderson of Wylie attended to business matters on Saturday.

B. H. Founest - Ole Knutson

Political Announcement

(To be paid for at regular space rates by the undersigned candidate).

I hereby announce myself as a candidate for nomination to the office of register of deeds at the primary election to be held Monday, June 19th. I have resided in the county since 1904 and all my interests are here. For eight years I have served as a member of the board of county commissioners and for five years have been honored by my colleagues with the chairmanship.

In case of my nomination and election I promise to give the office my entire attention and will endeavor to serve the people efficiently and impartially.

I respectfully solicit your vote and support.

Yours for service and reliability,
OSCAR J. PETERSON.

A PLEA FOR GUNDERSON.

(Prepared and ordered published by H. P. Rued, personal campaign committee for Geo. M. Gunderson, County Superintendent of Schools, candidate for re-election. Regular advertising rates to be paid.

To the Voters of Pennington County:

This announces the candidacy for re-election of Geo. M. Gunderson, County Superintendent of Schools.

He has a record as a progressive rural superintendent of schools, in recognition of which he has at three different times been honored by the Northwestern Minnesota Educational association; first, by being elected leader of the rural school section, second, as Secretary, and he is now serving as chairman of the executive committee. This association employs only the very best of school men.

He was, even before the organization of this county, and is now a resident tax payer. He has and is receiving a lower monthly salary than several of the teachers under his supervision. He has the lowest traveling expense account of any county official traveling full time in the interest of the county.

He is a member of the committee of finance of the State Educational association.

Outside of the duties connected with the above named honorary positions, he has given his entire time and attention to our rural schools.

He asks your vote and support in the primary election, pledging himself, if nominated and re-elected, to give the same service to our schools in the future.

Political Announcement

(This notice to be paid for by N. J. Anderson at regular space rates.)

To the voters of Pennington county:

I am a candidate for re-election for Register of Deeds of Pennington county. During the years I have served the people of the county as Register of Deeds I have made many friends, but I am not asking support in the present campaign merely by virtue of this friendship. Rather I would have the voters consider my candidacy on a purely efficiency basis as the only proper method of electing officials to public office. In regards to fitness for the office of Register of Deeds, both as to honesty and capability, I prefer to rest my case with the people of Pennington county, whom I served in past years.

Yours respectfully,
N. J. ANDERSON.

Political Announcement

(To be paid for at regular space rates by the undersigned candidate).

To the Voters of Pennington County:

I hereby announce myself a candidate for the office of Register of Deeds of Pennington County, at the Primaries, June 19, 1922. If nominated and elected I can assure the public an accurate and efficient discharge of all the duties in connection with that office, having served for six years as Register of Deeds of Rolette County, N. D. With due respect for other candidates, I shall endeavor to carry on a clean and honest campaign.

Yours Respectfully,
T. O. STAGEBERG.

Political Announcement

(This space to be paid for by E. A. Mostue at regular rates).

For Superintendent of Schools

To the voters of Pennington county:

The undersigned begs leave to announce his candidacy for the office of Superintendent of Schools for Pennington county.

I respectfully solicit the support of the voting citizenery, at the primary election, June 19th.

If nominated and elected, my aim, as ever, shall be efficiency and economy in the administration of our rural schools.

Yours respectfully.
E. A. MOSTUE,

Political Announcement

(To be paid for at regular space rates by the candidate whose name appears in the following advertisement). To the Voters of Pennington County:

I hereby announce my candidacy for the office of sheriff of Pennington county, subject to the wishes of the voters at the primary election to be held on June 19, 1922. I was born and raised in Pennington county and have spent my entire lifetime here and consider that I recognize the needs of the community as well as any man. I spent more than 15 months in the United States Army, one year of which was overseas. I am well qualified for the important office that I seek and if elected I promise to give to it my undivided attention, and on that platform I ask the support of the voters at this time.

Respectfully,
A. W. CROWN.

Political Announcement

(To be paid for by the candidate at regular space rates.)

To the Voters of Pennington County:

I wish to announce that I am a candidate for the office of Superintendent of Schools of Pennington county. I was graduated from the State Teachers' college at Moorhead in 1914. I am 30 years of age and I have had ten years' of actual experience as a teacher in elementary and semi-graded rural schools. I served approximately one year in the United States army, nine months overseas. I have filed as a candidate for this office because I believe that I can give the people of the county real service and an efficient administration. I shall appreciate your vote and support at the primary election to be held on June 19.

Very respectfully,
O. R. SANDE,
Town of North.

SPRAYS FOR POTATOES

A great deal of interest has been aroused of late over the comparative merits of dry and wet sprays for potatoes. The majority of growers in the Red River Valley have been using the liquid sprays. However, an increasing number of growers are using dry sprays exclusively, according to potato experts.

Comparative tests made by T. M. McCall, horticulturist, Northwest Experiment Station, Crookston, of the dry and wet sprays disclosed that pound for pound paris green was as effective dry as when applied wet. It has been demonstrated that the success of spraying is dependent more on the thoroughness of the application than upon the type of machine used.

Liquid sprayers should be able to discharge the spray under high pressure (150 lbs. to 200 lbs. per square inch). With high pressure and two or three nozzles per row the spray should reach both sides of every leaf and settle on the leaves as a fine fog. Liquid sprayers which deliver the solution in large drops at low pressure cannot give perfect insect or disease control.

Dust sprayers should deliver the spray with a good blast so that the spray will adhere to the leaves. The dust sticks to the leaves best when applied when dew is on. However, on a still day sufficient dust will stick to give good control. With a good dusting machine there is generally enough rebound to the dust to coat the lower sides of the lower leaves.

There are two types of dust sprayers on the market, namely the top and sides dusters. But little if any difference in insect control has been noted between the two types of machines.

Spray machines today must be able to give perfect insect and disease control. Dust and liquid sprayers when properly operated control potato beetles. Experimental evidence obtained in the Red River Valley demonstrates that a liquid fungicide such as Bordeaux mixture when applied in season gives profitable returns, but experimental data has not been collected as to the value of dry fungicides.

The Northwest Station is securing evidence of the value of dry sprays for disease and insect control by conducting comparative demonstration tests throughout the district. The spray demonstrations include the testing of low and high pressure liquid sprayers and dust sprayers with fungicides and other spray materials for the control of insects and leaf diseases.

Motor Tax Agents Active Everywhere

Inspectors Rounding up License Slackers in all Parts of State—This Section to Be Scoured

Wholesale prosecutions of auto tax slackers all over Minnesota have brought to date approximately $100,000 of delinquent fees and penalties in the enforcement campaign undertaken by Charles M. Babcock, state highway commissioner. The highway executive is acting upon solicitatious from other state officials to effect 100 per cent collection of motor vehicle taxes and clear up the mystery of why a few have been getting off while the great majority paid.

The Tribune has information that inspectors will make thorough cancanvasses in this as well as all other sections and the round-up will continue through the summer and fall until the last unlicensed car and truck is tagged.

Three special inspectors reported fines in 57 cases and investigations under way in more than 100 cases during the first three days. The first weekly reports were awaited from 144 other inspectors—engineers, superintendents and other field aids regularly employed by the highway department. All agents have orders to take drivers of unlicensed cars, notably those without both tags and cars from other states operated without visitors permits, directly into court. Such action ends their duties, however, the applications being left to go through the regular channels to Mike Holm, secretary of state.

The enforcement campaign by the highway department is daily swelling receipts at the motor vehicle department, and highway officials point out that every dollar will go toward extending Minnesota's roads program.

Big Convention to Be Held at Warren, Minn.

The Young Peoples' convention of the Swedish Mission churches of the Red River valley is to be held at Warren June 7th to 11th. The conference sessions will be held in a large gospel tent, which will seat close to 1,000 people.

G. F. Johnson, pastor of the Swedish Tabernacle in Minneapolis, and Prof. Theo. W. Anderson, president of the Minnehaha Academy, will be the principle speakers. The messages of these men are virile, powerful and timely and to hear them once is to desire to hear them again. There will be three sessions daily, at which capable speakers will cover the different phases of Bible study. Come and be welcome.

KOEFOD APPOINTED JUDGE

Baudette Man Appointed by Preus to Succeed Judge Harris, of Beltrami County

The numerous friends of Attorney S. M. Koefod, of Baudette, are pleased over his appointment as judge of probate of Beltrami county, to succeed the late Judge Harris. The appointment of Koefod was announced last week by the governor.

The new judge is a former Glenwood boy and a personal friend of the governor. He is forty years of age and has a family of four children. For the present his family will continue to reside at Baudette, but will move to Bemidji next fall. Judge Koefod has filed for the office and should easily be the winner. The appointment meets with general approval in Beltrami county.

Here's a story published in an exchange which shows how greatly the people of a community in Kansas appreciated their editor: "In appreciation of the work of a Kansas editor for their community a bunch of citizens recently presented him with a bouquet. On the same occasion a quartet from a local church sang a few sweet songs and a minister made a little talk. After the minister's talk six husky men carried the popular editor from the house and placed him tenderly in a model 1921 plumed sedan, and the whole town formed in parade behind the editor's expensive car. After the parade the appreciative crowd returned to their homes serene in the thought of having provided one bright day in the life of their local news purveyor, even if they did wait until he was dead to do it."—Ex.

Only one and one-half per cent of the people in the United States have incomes over $3,000 a year?

There are some salesmen so good that they could sell feathers to a duck.

Editor of Poultry Division of Farmstead Speaks to Commercial Club.

Editor Stanchfield of the Poultry Division of the Northwest Farmstead, in an address to the members of the Commercial Club last Thursday, followed the lead of the managing editor of that paper by giving his unqualified endorsement to Pennington county as being unusually well adapted to poultry raising.

He deplored the lure of distant fields as set forth in attractive advertisements in the big cities, stating that one big firm in Minneapolis had secured over 600 customers for land in the state of Washington, all sand-covered and with pine stumps, at $250 per acre, when land much better adapted to poultry raising could be had right here in Pennington at from $40 to $50 per acre. It will be remembered that an editorial in The Tribune more than two months ago dealt with this same subject, and the editorial was widely quoted by Minnesota newspapers. This newspaper has always warned its readers against all distant real estate offerings which seem so much greener than the home pastures, but which are a never failing source of woe and despair to those who bite.

By actual figures Mr. Stanchfield showed how relatively important the dairying and poultry industries are, and he expressed the opinion that Pennington county would receive more attention in the near future as a promising field for both industries than any other section of Minnesota.

It was announced by Mr. Stanchfield and Mr. Maloney, who also represented the Farmstead at the meeting, that the writeup of this county by Mr. Kelley will appear in next week's issue of the paper.

Mr. Stanchfield will be remembered here as the judge at last fall's poultry show.—Tribune

FEDERAL AID GUARANTEES GOOD ROADS AND ECONOMY

One of the most far-reaching results in connection with federal aid in construction of public highways is the improvemnet in methods of work, quality of construction and keeping of accounts all of which makes for the saving of money and the permanency of highway construction. In 1915, prior to the federal aid act of 1916 and the insistence of the federal government upon the construction of federal aid roads being carried on under the supervision of state highway departments existing highway departments were recognized and made more efficient and in 17 states highway departments were created. The result of their supervision insures taxpayers not only the services of engineers fully equipped to do the work but also insured them centralized responsibility for expenditure of funds, careful audit of accounts, wholesale competition in bids and rigid compliance with standard of construction.—Brainerd Journal-Press.

What has become of the old fashioned gent who used to delight in drawing the reins over a pair of three-minute trotters?

If you want to see the picture of a man who used to be the wisest in the world, dig up a photo of yourself taken when you were about twenty.

EDITORIAL

THE GRADUATES.

The graduating exercises at the High School last evening held for the people of Goodridge more than usual interest. The class, because it was the first to graduate from the local schools, stands in fulfillment of the hopes and aims of the taxpayers whose sacrifices have made such a school system possible.

Modern school systems are expensive but no one minds the expenditure if the results are satisfactory. Few towns the size of Goodridge have schools comparable with ours, and this very fact is in itself the best indication of the spirit which has made this a good community to live in.

To the faculty the unstinted praise of the community is due, for the splendid teamwork they have introduced in the schools. The graduated will commence their careers with the blessings and good will of a community which will watch over them with the interest of a godfather, and it will be the fervent hope of all that each of them may lead successful and useful lives as a result of the incentive received in the schools of Goodridge.

WHY THE DELAY?

Farmers residing to the east of Goodridge are determined that the jumbled mail facilities extended them by the postoffice department will not long continue and in that connection will shortly bring about concerted action in order to have the objectionable service remedied.

The present mail connections are the wonder of many and that they have continued in their present state for so long is still more wonderful.

Why folks residing four miles east of Goodridge must wait three and sometimes four days to have their mail reach them is difficult to understand were it not so ridiculous. In other words, it takes longer for a person living in this city to communicate by mail with a farmer living practically on the outskirts of this city than it would for a person living in Chicago to do likewise with a friend of his living in San Francisco.

It is not believed that were the proper postoffice authorities aware of the unfairness of delivery to farmers residing east of here that they would allow the situation to continue as at present.

We are living in the twentieth century, still mail comes to many slower than via the pony express or muleback. The Goodridge Banner, mailed at the local postoffice on Thursday of each week reaches a large number of its subscribers along the Torgerson route out of Erie three and four days late. In other words, this newspaper mailed the evening before its publication date, fails to reach many readers before Monday and even Tuesday of the following week. It isn't fair to The Banner, its advertisers, nor its readers. First class mail, however, fares no better, for it must go through on the electric line to Thief River Falls and then forwarded to Erie, where it is distributed over the Torgerson route running out of Erie. A detour, therefore, of perhaps 75 miles becomes necessary while folks making this village their trading point wait for their mail.

As a consequence, some farmers who should have the advantages of rural free delivery, rather than wait for the slow process now in vogue, take their mail at the local postoffice.

A better system will of necessity soon be adopted because of the unsatisfactory mail service and this newspaper cannot understand why the postal authorities have so long delayed the matter, in spite of petitions and protests upon several occasions.

Why the delay?

A long time ago, says the Sauk Rapids Sentinel, three men stood on a street corner as a strikingly beautiful woman passed.

One of the men, with no intent to harm, made a suggestive remark, one of his companions took the remark seriously, but said nothing at the time.

Later a rumor began to creep silently over the community, whispered from lip to lip. It continued to creep and spread, and in time a good and pure woman went to her grave with a cloud hanging over her name.

Don't do it.

The Albert Lea Times-Enterprise says the million dollar fire which occurred in that city last week had its origin in an old building which had been condemned by the state fire marshal, but which had not been removed. The moral is plain. All fire traps which are a menace to property should be promptly removed.

BRONZE MARKERS PLACED AT GRAVES

Impressive Memorial Services Are Held in Village Park Tuesday

Impressive memorial services were held in the village park here Tuesday morning under the auspices of the Henry Svare Legion Post. A large number of people were assembled, including a great many people from the country. A speaker's stand was erected in the center of the park, around which the school children and the audience assembled. The school children paraded from the school house, and were lead by the village band.

John Nystul presided. A portion of scripture and invocation was read by Rev. Aakre. The primary pupils of the school read "As the Flag Goes By" in unison, while the intermediate pupils gave the flag salute. The band played Chopin's funeral march.

Rev. Smith of Thief River Falls delivered the Memorial address. He gave a review of the various wars for the past two centuries, also giving some of his personal experiences during the past recent war. The address was very impressive, and will not be soon forgotten by those who heard it. The American Legion Post presented a bouquet of roses to A. C. Tvedt in appreciation of his efforts in their behalf since the World War, and for the privilege of being able to assemble in the village park for their Memorial services. It was through Mr. Tvedt's efforts that the steel flag staff and flag has been erected, this also has been erected in memory of the World War veterans. Mr. Tvedt also is responsible for the village of Goodridge having the beautiful little park that they now have. You will find him at work at some time every day. B. O. Norby made the presentation speech. Thirty seconds of silent prayer was observed, which was followed by taps, and appropriate music by the band.

After this service a great number of the car owners filled their cars with passengers and accompanied the Legion boys to the various cemeteries at Torgerson, Erie and Germantown, where war heroes are buried. These graves were decorated with wreaths and bronze markers.

Before the decorating of the graves Rev. Smith offered prayer. A salute was given by the firing squad consisting of Owen Olson, Theodore Tandberg, E. Iverson, Elmer Peterson and Bennie Johnson, which was followed by taps. The band played "Nearer, My God. to Thee," and "The Star Spangled Banner."

The names of the soldiers whose graves were decorated are: H. Svare and Alexander Shores, at Torgerson. Alexander Shores is a Civil War veteran. Carl Vacke and Elmer Dahlen at Erie, and Andrew Rosette at Germantown.

Band Leader Feted By Organization Members

Last Monday evening's band practice being the last to be held with John Nystul as leader, H. A. Halvorson, president of the organization, suggested a feed in his honor, at the Stephenson cafe. The boys, numbering about fifteen in all, were soon assembled around the tables at that place, where a very delicious lunch was served. The boys played a few selections, and after the lunch, they enjoyed a smoker and told stories until a late hour. The band boys regret very much that they are losing their leader. He has been faithful to the band since his duties began in the Goodridge school, and has been not only a good leader but a friend and a pal to each member of the band. His companionship will be missed as much as his services.

Special Service to Be Given at School House

Special service will be conducted at the school house Sunday morning at 11 o'clock by Arthur Gates and Walter Bridge of Minneapolis. A special feature of this service will be a violin solo and vocal selections and an inspiring message will be delivered by Mr. Bridge. All are welcome.

ROAD HOGS

This is the open season for "road hogs," the species of biped which infests the highways and byways and who conducts himself upon all occasions exactly like his four-footed brother who gets both feet and snout into the trough. He is generally in the middle of the road, except when he is on the wrong side, and his special mission in life seems to be to obstruct and delay traffic.

There is little to be done with a road hog. We can offer no definite relief except to suggest that the pests may in time die out. Most of them appear to be inbred as well as feeble-minded, and science teaches that such misfits gradually fizzle out.

DRAINAGE MEET AT HIGHLANDING

Goodridge Residents Expected to Be Present June 6th

It is expected that a large number of Goodridge citizens and farmers and others living in outlying towns will be present at the drainage meeting to be held at Highlanding next Tuesday.

Officials of the Red Lake and Clearwater Conservancy project have called a meeting of those interested to be held next Tuesday afternoon, June 6th at the Highlanding pavilion, beginning at 1 o'clock P. M. The announcement states that all officials connected with the project will be present.

It seems that considerable unfriendly sentiment has been developed to the entire project as now constituted, the feeling of the farmers south of Red Lake river being that the promoters have taken in too much territory. Others adhere to the idea that the project should never have proceeded beyond the original intention of lowering the Red Lake river, and that when so lowered the river would amply care for all the flood waters from the north and thus relieve the Clearwater and its tributaries.

Furthermore, the farmers of the district feel unable at this time to bear additional drainage assessments, and it is expected that many of them will come to the meeting fully armed with facts and figures to show that benefits derived from drainage have been exceedingly small as compared with the assessments levied upon the lands as a result of the work already done.

This is a busy time for the farmers but it is hoped that as many as can spare the time come to the meeting. They are the ones who will have to foot the bulk of the expense, and it is right and proper that they be heard in the matter.

Highlanding Breakers

A MISTAKE!

In last week's issue of The Banner it was stated that the picnic to be held at Highlanding was to be held June 4. This was a mistake; the date should have read June 14th, not June 4. Do not forget the date and don't forget to come.

* * *

Mrs. Henry Hiland, Mrs. Andrew Ellingson and Messrs. Ellingson and son, Clarence, were transacting business at Thief River Falls last Wednesday.

* * *

Andrew Ellingson's, Miss Ella and Laurette Cousins, Messrs. Otto and Harry Cousins, Sigerd Sigerdson and Mrs. Bob Hudson were entertained at Anton Johnson's home last Sunday evening.

* * *

Early to bed and early to rise, stick to your business—and advertise.

* * *

Miss Sarah Vaughan of Goodridge spent the week-end at her brother's home, Will Vaughan, at Highlanding.

* * *

The debate in Highlanding last Sunday evening was well attended. A fine program was given and a delicious lunch served.

* * *

Myrtle Ellingson was a guest at the Ovetwold home last Sunday.

* * *

Will Vaughan's are very busy at the present time digging a basement for their new home.

* * *

Miss Maggie Johnson of Goodridge has been seriously ill for the past four or five days, but with the medical aid of Mrs. Asp, she is improving somewhat at this writing.

* * *

The baseball game played at Highlanding last Sunday, Hazel vs. Highlanding, was played very well, especially by the Highlanding boys, who scored 27 runs in the first four innings, while Hazel worked until they grabbed seven scores, when a raincloud came up and scared the Hazel boys to their respective homes.

* * *

Anton Johnson has been very busy the past week planting his potato crop. Mr. Johnson is going to plant 22 acres of spuds this year.

* * *

A number of the young folks from Hazel attended the ball game at Highlanding last Sunday.

* * *

Will Vaughan's entertained Henry Hiland's at the Vaughan home last Sunday.

* * *

There's one thing that will mix well with business, and that one thing is Printers' Ink!

PAVING PRICES DOWN

As showing how paving prices have slumped during the past year, it is noted how 60,000 yards of paving was let the other day at Aberdeen, the price award being made on the basis of $2.13 per yard for vibrolithic concrete six inches thick. The price for seven inch paving for heavy traffic was $2.40 per yard.

THIEF RIVER HIGH TEAM IS TROUNCED

Goodridge Sends County Seat Boys Home Smarting With Defeat

The Thief River high school team met the Goodridge school team on the local diamond last Saturday afternoon and were decisively defeated by a score of 12 to 4. Although the local nine was somewhat crippled owing to the incapacitation of one of the star hitters, Carl Mandt, who injured his thumb in a game with Okle a week previously, the outcome of the game was never in doubt.

The Goodridge team showed great improvement over the class of baseball put up a week ago against Oklee. Hit after hit went out and they almost knocked the Thief River Falls pitcher from the box upon several occasions. Although Olson was fairly steady, his support at times was ragged and clouts that ordinarily would not have counted disastrously against the visitors, developed into clean hits—and scores.

Daniel Payne, on the mound for Goodridge, was master of the situation throughout and let but few hits. With Thompson behind the bat, the receiving end was well taken care of and the game was featured by considerable brilliant fielding on the part of the basemen and fielders.

Thief River Falls opened the first inning with two scores and it looked for a time as though the visitors were going to give the local team plenty of trouble. Everybody tightened up, however, and they were able to collect but two more runs during the entire game, with Goodridge clouting the ball severely during the entire period.

Palmer Tvedt umpired the contest and his decisions worked to the satisfaction of both clubs, including the spectators, and when anybody can do that, it must be admitted they have a "head full of baseball."

The game Saturday was the last of the season and Goodridge emerges with a percentage of .500, having won two and lost two. They broke even with Oklee this year, having defeated that village in the first contest of the season, but losing on a visit there three weeks ago.

Following is the lineup of the teams as they faced each other here Saturday afternoon:

Goodridge—Olson, 2b; Thompson. c; Urdahl, lf; Ferdinandson, 3b; Payne, p; Mandt, cf; Halvorson, 1b; C. Mandt, ss; Nelson, rf.

Thief River Falls—Stageberg, ss; Soderburg, lf; Paranteau, c; Bredesen, 3b; Zeh, 2b; Olson, p; Robinson, 1b; Gulsrud, cf; Larson, rf.

The supreme court last week ruled that candidates for state office whose filings failed to reach the secretary of state on May 10, regardless of the date of mailing the same, are not entitled to a place on the ballot. This leaves Rev. Kvale the only opponent of Congressman Volstead in the 7th district and assures a lively conflict. Among the others thus ruled out are Editor Mattson, of Warren, and Mr. Sunberg for senator.

France's exports of automobiles in 1921 was 19 per cent greater than in 1920?

MORTGAGE FORECLOSURE SALE

Notice is hereby given that default has been made in the conditions of a certain mortgage containing power of sale, executed by Tollef Loyland and Tina Loyland, his wife, mortgagors, to First State Bank of Thief River Falls, a corporation under the laws of the State of Minnesota, mortgagee, dated the 20th day of January, 1917, and duly recorded in the office of the Register of Deeds in and for Pennington County, Minnesota, on the 25th day of January, 1917, at 1:45 o'clock P. M., in Book 54 of Mortgages at page 297, which said mortgage was thereafter and on the 31st day of January, 1917, for a valuable consideration and by an instrument in writing, dated on that day, duly executed and acknowledged by said First State Bank of Thief River Falls, sold, assigned and transferred to Edwin White, which said written assignment was thereafter and on the 21st day of February, 1917, at 1:00 o'clock P. M. of that day duly recorded in the office of the Register of Deeds in and for Pennington County, Minnesota, in Book 56 of Mortgages on page 352 thereof, which said mortgage was thereafter and on the 4th day of May, 1917, for a valuable consideration and by an instrument in writing, dated on that day, duly executed and acknowledged by Edwin White sold, assigned and transferred to Gertrude M. Harlow by said Edwin White, which said written assignment was thereafter and on the 10th day of May, 1917, at 1:00 o'clock in the P. M. of that day duly recorded in the office of the Register of Deeds in and for Pennington County, Minnesota, in Book 56 of Mortgages on page 385 thereof, and at the time of this notice there is claimed to be due and is actually due on the said mortgage, according to the terms thereof, the total sum of Two Thousand and Thirty-one and 08-100 ($2,031.08) Dollars, on the note secured by said mortgage, consisting of the principal sum of Two Thousand ($2,000.00) dollars, and interest thereon amounting to the sum of Thirty-one and 08-100 ($31.08) dollars, which said default has continued to date by virtue of the failure and neglect of said mortgagors to pay said sums, although demand has been made therefore, and no action or proceeding having been instituted at law or other-wise to recover the debt or any part thereof secured by the said mortgage.

NOW, Therefore, Notice is hereby given that by virtue of the power of sale contained in the said mortgage and of the statute made and provided the said mortgage will be foreclosed by a sale of the mortgaged premises therein described at public auction, to the highest bidder for cash, at the main front door of the Court House in the City of Thief River Falls, Pennington County, Minnesota, on Monday, June 26th, 1922, at 10:00 o'clock A. M. of that day, to satisfy the amount that shall then be due on the said mortgage with interest thereon from the date hereof and the costs and expenses of such sale and the sum of Seventy-five ($75.00) dollars Attorneys' fees as stipulated in said mortgage in case of foreclosure.

The premises described in the said mortgage and so to be sold is all that tract or parcel of land lying and being in the County of Pennington and State of Minnesota, described as follows, to-wit; The Northeast (NE¼) Quarter of Section Sixteen (16) Township One Hundred Fifty-three (153) North, of Range Thirty-nine (39) West of the Fifth Principal Meridian, containing one hundred sixty (160) acres, more or less, according to the United States Government Survey thereof.

Dated at Thief River Falls, Minn., this 3rd day of May, 1922.

GERTRUDE M. HARLOW,
Assignee of Assignee of Mortgagee.
G. HOWARD SMITH,
Attorney for Assignee,

Inspiration

By HENRY LUTZ
Pastor Lutheran Church, Missouri Synod

What a world of meaning these simple words contain. All Scripture, the whole Bible, is given by inspiration of God. Our Bible is the word of God Himself. In it we have our heavenly Father's message to us. It is His letter to us assuring us that He loves us and telling us what He wishes us to do and not to do and how to be. It is His hymn book containing the most wonderful poetry the world has ever seen. It is His history, telling us of the wanderings and experiences of His people. It is His Book of Wisdom, explaining to us many of the things in this world, of which we otherwise would have known little or nothing. It is, above all, the "good seed" which alone can bring forth fruits unto eternal life, it is the "lamp unto our feet and light unto our path" which "is able to make us wise unto salvation" because it can lead us out of darkness into light, out of hell into heaven.

And being God's word it must be absolutely true and reliable. We cannot go wrong in believing and trusting in it. It is a guide that is sure and safe, an instructor that has no weaknesses and shorcomings, a comforter, that can comfort at all times and under all conditions. It is so simple that the most ignorant can understand it, and at the same time so learned that it has confounded many of them who thought themselves to be wise.

All this is true if the Bible really is God's word. Is it? Many say that it is not. They claim that it is a purely human book just like "Uncle Tom's Cabin," for instance. To such the words of our text have no very great meaning for they claim that, at best, these words are the pious wish or belief of some man. But let those who deny that the Bible is God's word show us another book that is as old as the Bible, that has been fought as often and as bitterly, and that in spite of all this is as widely known and used and beloved as our Bible today. If they cannot show us such a book, and, indeed, they cannot, then let them explain how this is possible if the Bible is not God's word.

Then there are others, who claim to be Christians, who say the Bible contains God's word. But they will not admit that the whole Bible is God's word. Now, if that were the case the Bible would be of little value to us. For then we must first make sure which words are God's and which not. Unless all the Bible is God's word we cannot point to any part of it and say with absolute certainty that it is God's word. Give up a part of the Bible as God's word and you have given up the whole Bible. Thank God, we have the Lord's own assurance that the whole Bible is His word. "All Scripture is given be inspiration of God," that is God breathed into the holy writers what they wrote. "For prophecy came not in old time by the will of man; but holy men of God spake as they were moved by the Holy Ghost" 2 Peter 1,21.

Finally there are some who believe that the thoughts contained in the Bible are God's but not the words. The opinion is that the Holy Ghost guided the Prophets, Evangelists, and Apostles in their writings and gave them the thoughts, but He did not give them the very words. But the word of God itself assures us that not only the thoughts but also the words are inspired. "Which things also we speak not in the words which man's wisdom teacheth, but which the Holy Ghost teacheth" 1 Cor. 2,13.

Those who still doubt that the whole Bible is God's inspired word will do well to think over the following facts: The prophet Zachariah wrote several hundred years before Christ (Chap. 11, V 12.13) "And I said unto them, if ye think good, give me my price, and if not forbear. So they weighed for my price thirty pieces of silver. And the Lord said unto me, cast it unto the potter." Compare this with the betrayal of Jesus for the same amount of money, and the subsequent use of this money for the purchase of the potter's field. Math. 26, 14-16 and 27, [illegible] according to Matthew points to many of the prophecies of the Old Testament which were fulfilled in Jesus. How could this be possible if the Bible had not been inspired?

So, then, if you wish to be fully convinced that the Bible is the inspired word of God, read the Bible, prayerfully, and diligently.—Amen.

FAMOUS STOCKMAN TO ADDRESS BODY

George P. Grout of Duluth to Speak at Community Meet

George P. Grout of Duluth, owner of the well-known Jean-Duluth farm near that city, and editor of the Stock and Dairy Farmer, will come to Goodridge Thursday, June 9, and in the evening will address the regular monthly meeting of the Community club, which has been set ahead one day in order to accommodate the large number who it is expected will be at Goodridge and later go to Thief River Falls to attend the stock sale of the Guernsey Breeders' association to be held at the fair grounds during the afternoon.

Mr. Grout, who gained fame last year through the sale of the famous animal, Jean-Duluth Cornet, which he sold at the Western National stock sale at Wheaton, Ill., last year for the prize sum of $8,000, will speak to the Community club on the subject of dairy cattle and the dairy industry. It is thought that a large number of farmers will be in attendance because of the trend toward better cattle for this section of the country and they will be afforded an opportunity of meeting and hearing one of the best-known authorities on cattle breeding in the country.

C. G. Selvig of the Crookston Experiment station will also be present to deliver an address, as well as Leslie Wilson, secretary of the State Guernsey Breeders' association.

The program committee, consisting of Miss Gladys Wilson, and Della Urdahl, are busy arranging the rest of the program and getting in readiness. J. J. McCann of the Farm Bureau will speak on the purposes of the New Settlers' association explaining its plans, what they have already done and what they purpose to do in the future.

Christianson's Are Hosts

The H. Christianson family were dinner hosts to the lady teachers of the Gooodridge schools on Thursday afternoon. A delicious lunch was served the faculty guests.

Mrs. Tandberg Entertains

Mrs. Theodore Tandberg entertained eight ladies at a five o'clock luncheon on Tuesday in honor of Miss Teresa Giefer who is leaving the employ of the Goodridge schools, and who is to become a June bride. The invited guests were Miss Giefer, Mrs. R. H. McDonald, Mrs. P. O. Tvedt, Mrs. Carl Christianson, Mrs. V. C. McLeod, Miss Ida Tandberg, and Miss Irma Johnson. The balance of the evening was spent in playing cards.

Reinhard Johnson Dies.

Reinhard Johnson of Reiner Township passed away Monday evening at the home of his parents, Mr. and Mrs. Severt Johnson. Reinhard Johnson was about 19 years of age and the cause of his death was consumption after a two-year siege of illness. The funeral services were held Wednesday afternoon at 2 o'clock at Torgerson, with Rev. Hoyum conducting the services. Interment took place at Torgerson.

JUST RIGHT FOR THE TRAIN
When in Thief River Falls, go to the Thief River Cafe for your noon meal.

Every Potato Means Additional Profit

When the price per bushel you receive for your potatoes is low, good profits can still be made by saving time and labor and by getting every potato in the field. It costs you no more to harvest completely and you get the extra dollars for your increased crop, if you use a

HOOVER
POTATO DIGGER

The Hoover Potato Digger digs up all the potatoes in the field and piles them in neat rows where they can be handled with minimum labor. This digger has proved to be an especially good investment to all potato-growers who have used it.

The shovel is of best quality high-carbon crucible steel and shaped so as to gather the potatoes with the least possible loss. No danger of cutting the potatoes to the extent that a plow or hoe does. Stone guards can be used in stony ground. You can raise and lower the shovel while the machine is in motion. All adjustments are made from the seat by convenient levers.

The vine-separating rear rack has a backward and forward motion that sifts out all dirt and deposits the potatoes in a compact row on clean ground directly at the rear of the machine, while the vines and trash are deposited at one side.

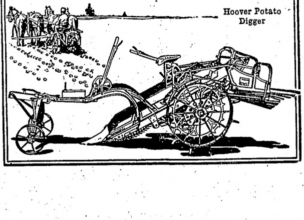
Four roller bearings and wide tires on the wheels assure light draft.

Patented Double-Action Front Truck permits the digger to be turned in a very short space.

Solid steel frame, strong main sides of Bessemer steel, beams of best quality charcoal malleable castings, and steel chains and hardened steel sprockets that greatly resist wear.

Don't fail to see the Hoover Potato Digger before you harvest your potato crop; its use means greater profits. Also ask us about Hoover Engine Drive Potato Diggers—two-horse machines under all conditions, and any other potato tools you require.

Goodridge Mercantile Company



Hoover Potato Digger

ROSEWOOD

Lars Lee, a former farmer of this place, was in town last Monday renewing old acquaintances and returning on the evening train to Thief River Falls.

Mrs. Lloyd Crown and baby of Thief River Falls spent a few days this week with the former's parents, Mr. and Mrs. John Bloom.

Miss Laura Kron, who has been employed teaching school near Erie this winter, having finished her term, came home last week.

Miss Carrie Nelson left on Monday evening for Bemidji, where she will be employed at the Ed Rag family this summer.

Rev. Gustafson, a missionary from China, was in town between trains last Monday, speaking in the evening at the Congregational church, and gathering funds for his future heathen work.

Anton Gullseth, accompanied by his mother, Mrs. Ingeborg Olson, motored to Middle River last Saturday, where the latter will spend a few weeks visiting with her son, Simon Gullseth and family.

The following attended the class play at the Thief River Falls Auditorium last Friday evening: Gena Aos, Gladys Swanson, Isabel Sagmoen, Mrs. John Sagmoen, Serine Tanem and L. L. Furan, John Sorenson and Joel Shoberg.

State examinations will be given at the Rosebank school for the eighth grade subjects on Wednesday and on Thursday, under the direction of the teacher, Mrs. Ebba Sagmoen.

A one month's term of parochial school closed at Rosebank last Friday and the pupils met on Sunday at the Rindal church in various graduation exercises, under supervision of their teacher, Rev. George Larson of Thief River Falls.

The local baseball team will go to Viking this (Sunday) afternoon to meet that place in a game. Quite a few cars of local rooters will accompany them.

Miss Gladys Swenson returned on Thursday morning from Thief River Falls, where she had attended the market day amusements the evening before.

Cashier and Mrs. O. S. Hellerud motored to Thief River Falls on Friday evening in shopping interests.

E. A. Silverness is at Warren this week serving on the petit jury of the district court.

Mrs. James Johnson and son Earl, from Thief River Falls came up on Saturday morning to spend the day with the John Hellquist folks.

Axel Bloom from Thief River Falls is spending part of this week at his parents home south of town.

Mrs. Emil Anderson and daughter, Irma, have spent part of the last week with Mrs. Anderson's father, Mr. J. E. Hellquist.

A number of local people attended the market day and amusements at Thief River Falls last Wednesday.

Rev. Werner Drotts from Viking conducted Sunday evening services at the Swedish church in town.

Mrs. John Ranum will entertain the Rindal Ladies' Aid at her home south of town on Tuesday, May 30th. Lunch will be served.

Mr. and Mrs. Severt Benson and family from Thief River Falls were in town last Sunday visiting with the B. P. Sagmoen folks and attending the baseball game.

Miss Viola Axelson returned to resume her work at Bishop's confectionery at Thief River Falls on Wednesday evening following a few days visit with her home folks here.

The local baseball team will go to Viking next Sunday to meet that place in a game. Last Sunday's game with Viking at the local diamond resulted in a score of 5 to 10 in favor of Rosewood. On Sunday, June 4th, Hazel players will try their luck with Rosewood on the local grounds.

Mrs. T. Mellem and Emil Mellem spent Sunday visiting with friends near Newfolden.

Mr. and Mrs. Albert Hellquist and family from Newfolden motored up last Sunday for a visit with the form-

Miss Anna Harder, student at the local high school, spent Monday evening with her parents, Mr. and Mrs. M. Harder, who reside near St. Hilaire.

Miss Cora Sevaldson left on Monday morning for Warren, where she will spend some time visiting with her sister, Mrs. O. Johnson.

H. R. Kron and Harry and Frank Heinze from Holt attended the baseball game here last Sunday, and visited with Percy Hanson.

Jens Matson has purchased Carlson's Ford automobile.

POCKETBOOK AND HUMANITY

Pocketbook is in the saddle, with humanity trudging along behind.

This is especially true with regard to the strife between labor and capital.

The men in control of our great industrial and commercial enterprises are fattening at the expense of the stockholders who have invested their wealth. They draw big salaries and pull out fat fees while the stockholders have to be content with modest dividends.

The same is true in the ranks of labor. The head men are rolling in comfort, draw large salaries, live high, and revel in their despotic power, while the rank and file of the unions toil and sweat and cough up—or take a forced vacation.

The average stockholder in an industrial concern is essentially honest and does not look for any more than is fair and just. He is by no means sure of even that much.

The laboring man who performs the actual toil is in the same class. He would be content with a just wage and steady employment if the czars and the agitators would leave him alone But they won't.

There is one great trouble with the leaders on both sides. The greed of pocketbook prevails over the cause of humanity. They see nothing except that which is pleasing to their own sight.

Hence the breach, and the bitterness, and the strikes and the stagnation in business, and the idleness, and the privations and want.

Hence the endless turmoil where peace should reign.—Sauk Rapids Sentinel.

A COUPLE OF SIMPS

"After promising to take their girls to a dance, two young men with empty pockets staged a highway robbery, got $20 and hurried downtown to join the girls at a dancehall."

This happened last week in Minneapolis, being one of many daily occurrences of like nature. One of the girls, peeved because she saw her bandit lover with another woman, gave the story to the police.

The poor deluded simps. It was to be their last "job." Always the last job when these brave lotharios get caught. From hardened highwaymen they turn to whimpering curs when the law steps in to check their career of crime.

They deserve the limit of the law, and if we had our way we would throw the spotlight of publicity upon the girls who encourage the attentions of such outlaws.

SCARCITY OF WASHERWOMEN

Someone has discovered the curious fact that the passage of the 18th amendment has produced a scarcity of washerwomen. The natural deduction is that the drunkards who formerly spent their time and earnings at the corner saloon, now contribute to the support of their families, and the women who were forced to wash for a living are now enabled to stay at home and attend to their own housework.

If these facts are correct, as presumably they are, the 18th amendment will never be repealed without a strenuous protest from those women who under its restrictions have taken their rightful places in society.

THE COST OF POOR ROADS

A writer in The Chicago Tribune estimates the cost of doing without good roads in Illinois at $16,500,000 annually. He classes the loss as follows:

Loss of utilization due to periodical repairs, and it costs about $100 a miles more to maintain a dirt road than a concrete road.

Loss in energy due to higher tractive resistance, and it costs about $1.50 a ton mile more to haul freight over a dirt road than a concrete road.

Loss in business efficiency due to the fact that the roads are part of the equipment used for the transaction of business, and this loss amounts to 25 per cent for local merchants.

Loss in farm efficiency due to being cut off from the large market centers by the poor condition of the roads over which supplies must move, and this loss amounts to about 68 per cent for our farmers.

Loss in automobile values due to the increased operation and maintenance costs of machines on rough dirt roads.

Loss in land values due to depreciation of property along poor roads.

Loss in educational opportunities for our children due to unserviceable roads.

An address on the subject of taxation is usually a very dry speech, but not so when delivered by State Auditor Ray P. Chase. His address in Olivia last Thursday evening was the most interesting, instructive and inspiring of any address heard by local people in many a day. Too bad Ray isn't a democrat. We'd like to vote for him.—The Olivia Times.

The fact of the matter is Jim Landy will vote for Ray Chase. So will thousands of other good Democrats who place good men far above petty considerations of partisan politics.

Unimproved roads are highway robbers and the wonder is why so many folks stand for a continuous performance in holdups.

The merchant who gambles a page advertisement on the weather and bad roads, and then declines to support the good roads committee of his town is a gambler indeed.

Thief River Falls, Minn.

FREE-$1,855 in Cash
You Can Win

A Word Contest without a Catch in It

OPEN to everybody—and everyone has an equal chance at the big prizes—$500, $375, $250, $175, $125, $100, etc. Here's an easy, enjoyable way to win some real vacation money, enough to take a long trip.

See how many words you can make out of the letters in the three words—

"Nash's Delicious Coffee"

(For instance: Ah, Nice, Delicious, Clean, Coffee, etc.)

Send in your list today—you may win a big prize. Someone will win it. You have the same chance. Try your skill now. If your list is the largest, and conforms with the rules printed below, you will be awarded first prize. If your list is second largest, you will get second prize, and so on.

Costs Nothing to Try

You do not have to pay anything or sell anything or buy anything to enter this contest, or to win a prize.

But if you send one complete label from a can of Nash's Delicious Coffee and the judges decide your list is the nearest correct list—the first prize will be $100 in place of $20.00. If you send THREE complete "Nash's Delicious Coffee" labels with your list, you will receive a still larger prize. See schedule of prizes below. We make this special inducement because we want you to get acquainted with

Nash's DELICIOUS Coffee

WE BELIEVE that if you try it once, you will never be satisfied with any other kind.

It's the last word in coffee blending—a *perfected* blend based on exhaustive studies and research. It is so blended and roasted that it neutralizes hard or alkaline water and brings through the true coffee flavor. Whether you use hard or soft water, it makes a delicious, smooth, satisfying and refreshing cup of coffee.

Mountain plantation coffees are bought at premium prices for this special blend because of their better flavor, body and richness of sap. Only a few of the thousands of offerings of coffee beans made to us pass our exacting tests and meet our strict requirements.

Always the same. By constant care in buying our raw coffee beans, and by making careful tests throughout every process of its manufacture, we always maintain the same perfected blend—the same high standard in every batch that goes out of our factory. Nash's Delicious Coffee is the same today as a month ago, and will be the same a year hence, always delicious.

Air cleaned. Chaff and coffee dust are removed by air suction during the process of steel cutting in our special machines—leaving a clean clear-cut coffee. The result is a crystal-clear cup of coffee, free from all stale and bitter flavors, free from "coffee mud."

"Hot Roasted" Freshness. Nash's Delicious Coffee is shipped on the same day as roasted and cut—or not later than the following morning. We roast only enough each day to fill orders on hand.

Packed in moisture-proof, hermetically-sealed "Napacans"—which protect its crispy freshness and pleasing flavor from dampness—dampness being one of the greatest enemies of coffee flavor.

Sold by grocers in one and three pound containers. Whether you enter the contest or not, you will be well rewarded if this advertisement induces you to try Nash's Delicious Coffee.

LIST OF PRIZES WINNING ANSWERS WILL RECEIVE PRIZES AS FOLLOWS:

	If No Labels Are Sent In	If 1 Label Is Sent In	If 3 Labels Are Sent In
1st Prize	$20.00	$100.00	$500.00
2nd Prize	10.00	75.00	375.00
3rd Prize	5.00	50.00	250.00
4th Prize	5.00	40.00	175.00
5th Prize	5.00	30.00	125.00
6th Prize	2.50	25.00	100.00
7th Prize	2.50	20.00	80.00
8th Prize	2.50	15.00	60.00
9th Prize	2.00	15.00	40.00
10th to 15th Prizes	2.00	10.00	25.00
	$68.50	$430.00	$1,855.00

Do It Now! *Send in Your List at once*—qualify for the big cash prizes by enclosing the labels with your list.

RULES OF CONTEST

1. This contest is open to any man, woman, boy or girl in America, except employees of The Nash Coffee Co. and their relatives. There is no entrance fee of any kind.
2. Use only one side of the paper on which you write your list. Write your list of words in alphabetical order and number them. Write your full name and address in the upper right hand corner of each sheet.
3. In any one word, do not use any letter oftener than it appears in the words "Nash's Delicious Coffee."
4. The judges will count only English words found in Webster's New International Dictionary.
5. Obsolete, compound or hyphenated words may be included in your list if found in the dictionary mentioned above. Either the singular or plural of a word may be used, but not both of them.
6. The same spelling of a word will be counted only once, even though it may have different meanings.
7. Two or more people may co-operate in this contest, but only one prize will be awarded to any such group, and only one prize will be awarded to any one household or family.
8. If you send labels with your list, each label must be *complete* as wrapped around the face of each can of "Nash's Delicious Coffee."
9. All lists will receive equal consideration, whether labels are sent or not.
10. The prizes will be awarded for the largest list of words that qualify. The person sending in the largest correct or the nearest correct list will win the first prize. The one sending the next best list will receive second prize, etc. No other consideration, such as neatness or arrangement will have any bearing in awarding prizes. However, by writing as plain as possible, or by typewriting your list if possible, you will assist the judges in counting every word that qualifies.
11. In case of a tie, the full amount of the prize will be awarded to each contestant tied.
12. The prizes will be awarded by a committee of impartial judges.
13. *All lists must be mailed by post office closing time, Friday, June 8, 1922.*
14. The prize winners will be announced two weeks after the close of contest.

An Interesting History of Goodridge

Facts Concerning the Village, Its Trials and Tribulations, Its Old-Time Citizens, Its Past and Present

SCHOOLS, CHURCHES, RAILROADS, NEWSPAPERS AND CHIEF INDUSTRIES

Delivered before a meeting of the Community Club held in this city on Friday, May 19, 1922, by Miss Vaughan, teacher in the local schools, and through the author's courtesy published in The Banner.

Mr. President, Members of the Community Club and Friends:

When the Program Committee asked me to contribute something for this evening, I was at a loss to know what I could give that would be of most interest to you.

Then it occurred to me that perhaps a little history of the settlement of our township and village would interest the later settlers, and it probably would make we first settlers realize more fully what we have in our home community.

We get so used to seeing and doing the same things day after day that we are apt to forget what advantages we have and the benefits we receive from the many good things we have at home.

From 1900 to 1903, as I used to watch the Red Lake Indians (who lived in the vicinity of Highlanding and came to Germantown to do their trading) wend their way homeward over the trails of the wild prairie, little did I dream then that in so short a time so much of this prairie would be under cultivation, producing the finest hay, grain and vegetable crops, and a thriving village built here.

The Eleven Towns was opened for settlement in June, 1904. The first meeting in this township was called by the County Auditor for July 1st, 1905

Joe O'Reilly and Morgan Vaughan acted as judges of election and the following board was elected at that time:

Frank Madden, clerk; A. Baker, treasurer; Mr. Glanville, justice; Mr. O'Brien, constable; John Conaker, assessor; Peter Brachman, Joe Reilly and Osmund Urdahl, supervisors.

At this meeting the Board made out a list of names they thought suitable for the township. Their first choice being "Park." This list was forwarded to the County Commissioners. Finding the name "Park" had previously been chosen, Daniel Shaw, one of the Commissioners, selected Goodridge, which we think is very appropriate for our section of the Eleven Towns.

Of the people I have mentioned at this first town meeting, two alone are still with us—Osmund Urdahl and Morgan Vaughan. We will have to admit they are the men who have "stuck." Three of the men have gone to the Great Beyond—Glanville, and O'Reilly and O'Brien. Brachman is living in the West, Madden and Conacher at Pine City, Minn., and Baker at Thief River Falls.

Of all the people who bought at the first sale, established residence at once and lived here continuously I find only one—Morgan Vaughan. Those who bought at the first sale, but did not establish residence at once are still living here, only two are left—Christ Urdahl and myself.

You will pardon me for using the names of Urdahl and Vaughan so frequently, but the members of these two families are so numerous that it is hard to have anything that they won't get in on somehow or somewhere.

Here it goes again: The first child born in our township was Agnes Vaughan on Nov. 6, 1905, and Ludolf Urdahl has the honor of being the next, on Jan. 29, 1906.

The settlers at once saw that in order to farm successfully they must have cattle and sheep, so right from the start they began on a small scale with only a small herd, but kept increasing it and trying to improve it in every way.

To J. H. Hay, deputy state commissioner of agriculture, belongs the credit of the sheep industry. Mr. Hay still has real estate here and has been and is one of our best boosters. Now we find a nice flock of sheep on nearly every farm.

For bringing the dairy herd up to a high standard, we will have to take off our hats to Stuart McLeod and Osmund Urdahl. In the fall of 1919 these gentlemen invested in some pure bred Guernseys of a high type and they have not regretted making the investment. They are increasing the herds right along and have been able to dispose of them at good prices.

Besides this they have been valuable patrons to our creamery. I think it would be a wise thing for our farmers to visit them before buying pure bred stock. They would be pleased to show you their herds and explain the good points, I'm sure. You always see them sit up and take notice when they hear the word "Guernsey."

The only advice I can offer Stuart is—being our president and all his interests are with us—is that he move over into our township—the best one in the Eleven Towns, we think.

The first good-sized barn was on the Christ Urdahl farm. Why, in those early days I never expected to see a much larger barn here than his. But now we have some of the best and good silos near them.

THE VILLAGE.

And now comes our village—a thriving and prosperous town with a population of 300. It is the terminus of the Minnesota Northwestern Electric Railway and is 18 miles east of Thief River Falls, the best city in Northern Minnesota.

The townsite, which was platted on August 1, 1915, by the Northern Town Site Company, consisted of 40 acres on the north side, which was a part of Carl Lindstrom's homestead, and 20 acres on the south side, a part of John Guinan's homestead.

The first building erected in the village was in August, 1914, by C. G. Gulrud. He hauled his lumber from Thief River Falls and while the building was in the course of construction he and Olaf Fjos lived in a tent which they put up on the ground now occupied by J. P. Jensen's residence.

Mr. Gulrud used the building for a hardware store; later he rented it and went farming, but he realized that he had left one of the best little towns in the state and moved back, and we find him today in the same building, carrying a line of drugs, stationery and groceries.

P. C. Halvorson built a grocery store and later on he sold out his business and is one of our substantial farmers.

This building is now occupied by Mr. Sunquist, who came here in 1921 and opened up a fine hardware store.

John Foss built the first hotel and a fine building it was for a new town. Later he sold and went west. Mr. Gunderson, who was one of our farmers, is the proprietor of this hotel at the present time.

One hotel could not take care of the rush, so Julius Stephenson built the Soo Hotel. He is still with us as a private resident.

Even these two hotels could not accommodate all the traveling public, so Mr. and Mrs. Ole Kirklie left their claim at Mud Lake, came here and built the O. K. Restaurant in September, 1914. They built on an addition and at the present time have not the room to take care of their many customers.

Then it became necessary to have a lunch room and confectionery and M. J. Stephenson built the Dairy Lunch, where you can secure a good lunch at any hour. The travelers never go by Goodridge when they want a good meal.

It would never do to have a town without a barber shop, so Chas. Stephenson takes care of the work in that line.

Rasmus Oen, one of the pioneer merchants of Thief River Falls, formed the Goodridge Mercantile Company and established a fine, large general store, with Messrs. Gilbertson and Thoreson in charge. They carry a full line, including farm machinery. The two gentlemen at the head of this business are counted among our farmers.

Christenson & Son saw a bright future for our town, so they built a fine store, and carry a full line of dry goods, groceries, boots and shoes.

Severt Anderson saw at once that people in a new town with a farming community surrounding it would need harnesses and all kinds of leather goods. He lost no time in getting his harness and shoe store ready for business. Besides retailing these, he saves us many a dollar by repairing our shoes.

The directors of the Farmers State Bank of Germantown began to take notice of our village and it so attracted them that they moved here, bringing with them one of the oldest settlers from Germantown, Nick Bundhund, as cashier, and from the Eleven Towns, Jay Payne as vice president.

This bank saw at once if they wanted to keep up in line with our village they must have a new home. They erected a new brick building and the old bank building is used for a postoffice.

A little later Mr. Bundhund built a fine residence in the south part of town and moved his family here. He is known to us all as "Nick."

Banking people from Thief River Falls and from other parts of the world began to realize what a good future our village had and that fact brought the Goodridge State Bank—which opened its doors in a nice brick home, for business Oct. 16, 1914, with J. P. Jensen as cashier. Mr. Jensen was a stranger to us, but we made him feel so much at home that he is with us still. Later he moved his family here from Thief River Falls. Both banks have been doing a thriving business.

One good thing leads to another, and A. C. Tvedt & Son and Winton Nichols Company saw our village and surrounding country could not grow rapidly unless we had materials to build with, which lead them to establish lumber yards at this place, and I want to say right here that their buildings and yards would be a credit to any town. They carry a full line of lumber and other building materials.

This being the terminus of the railroad, Reson & Yaher, two enterprising young men, saw a good investment here and established a livery and feed stable. Later Mr. Yahn sold his interest and Mr. Reson is with us yet. He is also interested in farming.

One livery and feed stable could not take care of the business, so M. O. Seavey and William Josephson engaged in this business. Later this was sold to Mr. Sands, Mr. Seavey engaging in farming near the village.

You can't carry on farming without a blacksmith and we needed more than one. This brought two of the old veterans in this business from Germantown, Martin Olson and Carl Edseth.

Carl is still in his place of business, busy all the time. He likes to stop me once in a while and talk about old times at Germantown when he used to "bach it." But Carl didn't stay "baching it" long after he got his house here.

You have no idea how much work we had in the blacksmith line so Andrew Sands joined the forces; we now have three.

"All work and no play makes Jack a dull boy," so H. C. Johnson, in January, 1915, built a pool hall, where men might have a little recreation. This place is now under the management of Bert Tanem.

Not wanting our village to be outdone in any line of business, in the summer of 1915 Carl Lindstrom erected a fine large garage, and he sure has made good, and he's kept busy all the time. Carl always had the right spirit. Many a young man would not have held down his claim as he did. He was a bachelor at that time and mighty lonesome he used to get. He came on skiis to the Germantown store for his supplies, but when he came to the village he gave up "baching."

Then autos began to multiply so fast the town needed another garage, so we find Tollefson & Olson in a nice new building. The business at this time is under the management of Owen Olson, another Germantown boy and a veteran of the World War.

In 1915 the Standard Oil put in a station, with Palmer Tvedt as manager. The station is now taken care of by George Johnson. Oil is delivered at farms by oil truck. Quantities of it are used in tractors.

Hanson & Barzen, the oldest grain firm in Thief River Falls, already knew what farmers had been raising out here, so they put in a big elevator with A. H. Halvorson in charge.

One elevator couldn't begin to take care of the business, so in 1915 the Atlantic elevator was built.

About this time a prosperous farmer, A. B. Mandt, who lived south of the Red Lake River, began to hear such good reports of the business done here that he decided to make this his home, so he bought out the Atlantic elevator. Later he formed a company known as the Farmers Elevator Company. He saw farmers needed feed, flour, etc., so he interested his company in the building of a flour mill near his elevator. The mill began operations in April, 1915, with a capacity of 50 barrels. Under the able management of Mr. Mandt and Mr. Gaudland, the miller, the mill turns out a fine brand of wheat flour, "The Marquis." They manufacture all kinds of flour and this past winter we saw many farmers from long distances bringing in their flour to be ground, so they could get their own flour, bran, etc.

Mr. Gullman opened his feed mill in 1917. This was—and is—a great convenience for the farmers.

Jay Payne erected a building so we could have a butcher shop. This was run by Johnson & Rossman and later sold to Albert Halvorson, who runs a first class shop.

Ladies couldn't live if they didn't have fine hats, so Mrs. Miller erected a millinery store with Mrs. Otto Gulrud in charge. Later this building was sold to George Wold, a well-to-do farmer. Mr. Wold has other interests in our village.

Then comes to our village R. P. Palmer, a young farmer from Highlanding, and to keep our town apace with the rest, he put in a movie theater, and in 1917 he established our electric light plant. Later the city purchased the plant and it is run by A. B. Mandt. It furnishes lights to 41 buildings.

Lysbakken Brothers bought a building from Reson & Farmen and if you want a good job of paper-hanging or painting, just call on Severt.

People wanted to invest in our real estate, so Gaylord & Lysbakken opened a real estate office. This past year, on account of poor health, Mr. Gaylord was forced to give up his business.

TELEPHONE AND CREAMERY.

The Red Lake & Eastern Marshall Telephone Company, with Miss Christine Bundhund as chief operator, and Miss Mabel Tweeton as assistant, have their office in the Gunderson Hotel. This enables us to get into quick communication with all outside points. This line was established here in 1915 and reaches practically every home.

In 1919 our Co-operative Creamery began operating with Mr. Larson as buttermaker. Like every undertaking in a new country, it has to battle against many difficulties, but there is no reason why it can't be one of the best investments we have made—and will be if every farmer and business man boosts for it and it is given all the cream in this section that it should receive. Last year in the 10 months it was operated it made 90,000 pounds of butter.

For anything in the "chicken line," call at the Martin Anderson chicken ranch east of town.

For concrete work call on our Mr. Kately.

The village was incorporated at a special election held Aug. 6, 1915, and on Sept. 9, the first board of village officers was elected.

This year we had the honor of sending a woman delegate, Mrs. George Josephson to the Republican State Convention at St. Paul.

Under the leadership of John Nystul our village band gives much pleasure to our community.

The volunteer fire department has not been pressed into service very often.

Little Margaret Bundhund has the honor of being the first child born in our village, April 3, 1915. Lester Halvorson carries the second honors, being born Sept. 15, 1915.

HISTORY OF OUR SCHOOLS.

In the fall of 1914 the pupils in the village were taken in busses to the Urdahl schoolhouse.

The next summer this schoolhouse was moved into the village and in the fall school opened with two teachers, Miss Gullingsrud in the schoolhouse and Miss Lind in the village hall.

In the meantime, the members of the school district decided to build a good, substantial building that would take care of the children for some time.

The building when completed was a credit to our town. In fact it was the best building outside of those at Thief River Falls, and the first consolidated school in the county.

In approaching our town it makes a very favorable impression upon all strangers coming into our community. The building was ready for occupancy after the holiday vacation.

Too much praise cannot be given the taxpayers who have so loyally contributed to it, the members of the different school boards who have given so much of their time and efforts and all the teachers who have helped to raise it to its high standard.

We are all proud to send forth this year our first class of high school graduates.

Through the efforts of Mr. Norby, our superintendent, the boys and girls have become interested in gardens, sheep and calf clubs, the good effects of which we will see in our future farmers.

In 1905 we began using school busses, two in number, driven by John Kusmak and Osmund Urdahl. In 1918 we increased this number to five, the present number.

We could not find better men for the position than Messrs. Besancon, Erickson, Poppenhagen and Urdahl. Last fall Messrs. Poppenhagen and Urdahl put on auto busses, which they used the greater part of the winter.

Supt. Norby furnished me with some interesting facts of our school, which I will give to you, data showing enrollment of pupils and number of teachers employed in the schools beginning in 1915:

Year 1915-16.

Teachers—Miss Lind and Miss Gullingsrud. Enrollment, 101.

1916-17.

Teachers—A. O. Halvorson, Miss Arndt and Miss Giefer. Enrollment, 102.

1917-18.

Teachers—A. C. Halvorson, Miss Giefer, Miss Murray and Miss Ruth Anderson. Enrollment, 109.

1918-19.

Teachers—Mr. Blankenship (Nov., Dec., Jan.), B. O. Norby filled unexpired term; Miss Giefer, Miss Arndt, Miss Elg. Enrollment, 117. High school work was started.

1919-20.

Teachers—B. O. Norby, Miss Giefer, Miss Thomas, Miss Vaughan, Miss Johnson, Miss Martha Anderson. Enrollment, 138. School placed on the graded list.

1920-21.

Teachers—B. O. Norby, John Nystul, Miss Giefer, Miss Wildes, Miss Vaughan, Miss Bauer. Enrollment, 164.

1921-22.

Teachers—B. O. Norby, John Nystul, E. J. Beithon, Miss Giefer, Mrs. Breen, Miss Vaughan, Miss Hegland. Enrollment, 175; 41 enrolled in high school; five graduated.

CHURCHES.

No town can make right progress that looks only to physical education of the child. Goodridge has taken care to see that they get moral and spiritual training as well.

We find this taken care of in the different churches. The Free Lutheran, American Lutheran and Catholic. The German Lutherans have a resident pastor who holds regular services.

All the churches have a Sunday school in connection for the benefit of the boys and girls.

FAIRS.

Our first Tri-County Fair was held Sept. 20-22, 1919. We used our fine assembly room for exhibits and the manual training room for grains, grasses and corn. I make no hesitancy in saying no rural community could have put forth a better exhibit.

The second fair was held September 22-23. The exhibits were fine and we could see great progress being made in dairy cattle and farm products. The girls and boys had fine exhibits in canning, sewing, garden vegetables, sheep, calves and pigs.

Last year at our Market Day, people were surprised to see the fine varieties of corn and potatoes on exhibit.

The members of the Calf and Sheep Club certainly were to be congratulated on their exihibit.

NEWSPAPERS.

To let the outside world know what we had and were accomplishing, we had to have a newspaper. It took no persuasion to get John T. Lattimore, who edited a fine paper at Erie, to move his plant here.

On account of poor health, Mr. Lattimore was later compelled to sell. The paper changed hands several times. Then known as The Banner, it was purchased by I. D. Converse, ex-postmaster from Grygla. He continued to give us a good paper until a short time ago on account of his health he had to sell. John Nystul, our high school principal, bought the paper and in a week's time disposed of it to S. V. Arneson of Thief River Falls, who will continue to give us a good, live newspaper, and if his first few copies are a criterion, it sure will be live. Mrs. Theodore Tandberg has charge of the office here.

PARK.

To make our village look more attractive, the Northern Townsite Company, which always had the welfare of our town in mind, donated some land for a park.

Through the untiring efforts of A. C. Tvedt, it has been turned into a place of beauty. Early and late, from spring till fall, you will see Mr. Tvedt there at work. Too much credit cannot be given to him for his efforts. Years hence his name will always be remembered in connection with our park.

In the park, in 1920, the city erected to the memory of our boys who served their country in the World War, a 60 foot flagpole. This was dedicated September 22, 1920, Mr. Tvedt giving the dedication speech. J. H. Hay and D. P. O'Neill were the other speakers. The first Fourth of July celebration was held in the park in 1915.

FACILITIES FOR MAIL.

On March 8, 1915, our postoffice was established in the village of Goodridge, with Mrs. Jennie M. Payne as postmistress. Prior to this time we received what little mail came here in a grain sack from Thief River Falls. Our supply station was Austad, by way of Germantown, three times a week.

The postmistress at once wrote the postal authorities at Washington to have the supply station changed to Thief River Falls, and through the kindness of Messrs. Shaw and Protzeller, the conductor brought the mail out on the electric car gratis. On May 24, 1915, a messenger boy was appointed to deliver the mail. He still continued to ride free until the fall of 1915 when the manager of the line refused to carry the messenger and mail any longer without a contract. Then Mr. Payne made 40 trips by auto carrying the mail, without compensation, until the snow was too deep for auto traffic. The railroad company then took on the mail and messenger, without pay, until the matter was finally settled and a contract was granted. Regular mail service on the electric line began Jan. 17, 1916, daily except Sunday.

May 1, 1916, Star Route Service was established from Goodridge to Graygla, with A. B. Josephson as carrier. On Aug. 1, 1916, rural delivery service was established, with M. O. Seavey as temporary carrier. On Jan. 15, 1917, V. C. McLeod was appointed rural carrier on Route 1, but was granted leave of absence for the purpose of rendering military service in the World War, Aug. 2, 1918. George Josephson was appointed temporary carrier. When Mr. McLeod returned from France, he resumed his duties and is still on the route.

April 1, 1921, it was raised to a third class office. Gross receipts that year were $1,500, while the receipts in 1915 were but $900.

As a reward for efficient service, Mrs. Payne was reappointed last year.

RAILROAD.

The question arises: What made it possible for our township to make such rapid progress and gave us this thriving village, up-to-date in every way, with so many modern conveniences? The answer is: The Coming of the Minnesota Northwestern Electric Railway.

It was in 1913 when Mr. Protzeller, a progressive young man from St. Paul, arrived in Thief River Falls with plans for building a railroad in this new country. But it takes more than plans to build a railroad.

It was a most fortunate day for us when he finally laid his plans before a man who was a pioneer in this Northwest, one who never knocks and always boosts, one who always has predicted a bright future for this section, if it could be properly developed—Daniel Shaw.

They encountered many obstacles and received little encouragement from the majority of business men; but by their determination and hard work they were able to give us one of the best short line railroads in the state.

I doubt if any town and farming community has better service. They built us a nice depot and in a short time built a warehouse to care for their freight. At the beginning, Will Vaughan had charge of the office. Later he resigned to go farming, and R. H. McDonald came and is still filling the position. "Mac," as he is familiarly known, can rustle freight with any of them. Mr. Patterson, the engineer, has been with the road since it began operations. Lee Erhart has been the conductor since the second year. These boys have a fine record for having their train on time, never missing a trip.

Mr. Schutt, the auditor, who has also been with the company from the beginning, furnished me with a few statistics which no doubt will be of interest to you:

Minnesota Northwestern Electric Railway Company.

Original incorporation, Sept. 29, 1913, under the Laws of Minnesota. Daniel Shaw, president and treasurer; D. N. Winton, vice president; H. W. Protzeller, secretary and general manager. Charter amended March 20, 1914. Operating permit granted Oct. 12, 1914. Two passenger trains and one mixed passenger train. November, 1915, forwarded 86 cars of grain. From November, 1917, to April, 1918, 305 cars of hay. From September, 1919, to March, 1920, 235 cars of hay. From August, 1918, to July, 1919, 292 cars of grain. From September, 1921, to April, 1922, 30 cars of potatoes. From October 12, 1914, to April, 1922, 221 cars of emigrant movables going in. First train of seven cars of livestock October 8, 1914, before incorporated.

In conclusion, I want to thank those who have contributed to my paper, and you people for your kind attention.

CLUB MEETING SET AHEAD 1 DAY, THURSDAY, JUNE 8

The next meeting of the Community club, which was scheduled for Friday evening, June 9, has been set ahead one day and will be given on Thursday evening. The reason given is that that the stock sale of the Guernsey Breeders' association will be held on that day and owing to the fact that a number of stockmen and breeders will be here looking over pure-bred cattle on local farms and to attend the sale at Thief River Falls during the afternoon. George P. Grout, editor of the Stock and Dairy Farmer, will address the local body, as will C. G. Selvig of the Crookston Experiment station, and Leslie Wilson, secretary of the State Guernsey Breeders' association.

o—o—o

Mrs. William Wendt and two sons and one daughter visited with her daughter, Mrs. George Johnson, over Sunday. Her daughter, Teresa, is staying over this week with her sister.

o—o—o

H. S. Dahlen and W. H. Frederick of Thief River Falls were in Goodridge Tuesday on business.

$227.07 IS COST OF SERVING NOON MEAL

Report Shows Average of 70 Pupils Per Day Partake

Miss T. M. Giefer, teacher of the Goodridge schools this week concluded the yearly report on the cost of noon-day meals to the various pupils attending school here throughout the year.

A complete report is herewith submitted of the expenditures for the domestic science department, including the cost of serving a hot dish at noon to an average of 70 pupils per day.

Noon lunch and domestic science report, 1921-1922:

H. Christianson & Son—	
October	$ 23.30
December	20.34
February	17.37
April	4.36
Year's total	65.37
Goodridge Mercantile Co.—	
September	26.50
November	14.49
January	13.31
March	17.35
May	5.87
Year's total	77.52
Halvorson Meat Market—	
Year's total	2.65
Johnson (Milk Del.)—	
September	8.25
October	10.44
November	9.91
December	8.66
January	9.40
February	7.42
March	8.32
April	8.96
May	10.17
Year's total	81.53
Summary—	
H. Christianson & Son	65.37
Goodridge Merc. Co.	77.52
Meat Market	2.65
Mrs. Johnson	81.53
Year's grand total	227.07

Average number of noon lunch pupils 70.

Average per pupil, $3.24.

$3.24 divided by 180 days equals .018 cents, average cost per pupil including cooking department expenses for twelve pupils.

State Board of Health

J. H. HAY PLEADS FOR EQUALITY IN SCHOOL TAXATION IN ADDRESS

Deputy Commissioner of Agriculture "Comes Home" to Deliver Commencement Address at Goodridge Schools Thursday Evening and Strikes "Soft Spot" When He Declares State Should Assume Its Just Share of Responsibility in "The Making of Citizens" By Educational Institutions.

J. H. Hay, deputy commissioner of agriculture of Minnesota, was introduced by B. O. Norby, the superintendent at the commencement exercises last Thursday evening of the Goodridge Consolidated Schools, as "coming home to address the first graduating class of the local school system." Mr. Hay, who is well-known to most all the old-timers of eastern Pennington county, where his hand has often been seen in various projects for its development, accepted his introduction as being substantially correct and forthwith proceeded to deliver a most stirring address, in which he made a foreful and eloquent appeal for the equalization of school taxation, stating that he had reason to believe that some sort of readjustment of the problem would probably be taken up at the next session of the Minnesota state legislature.

Mr. Hay opened his address by recalling the time when eastern Pennington was but a vast wilderness, without roads and improvements of any kind and when Indians for the most part composed the population. He commended the hardy pioneers who had "blazed the trail" into the wilderness and made out of it one of the most fertile regions in the country and whose children—some of them members of the graduating class—stood willing and ready to take up the challenge where their parents leave off.

Mr. Hay paid a high compliment to the taxpayers of the community who had so loyally stayed by their schools through good times and bad, "in season and out of season," never faltering when the growth and proficiency of the school system was at stake. Although he recognized as well as any one the burden of maintaining the schools at their present state, Mr. Hay said that they had but done their duty.

During the process of his talk, Mr. Hay stopped long enough to "take a whack" at the injustice of the present economic system, as it is known to many of the farmers of this section marketing wool and other products of the farm. He stroked the suit he wore, and said:

"This suit of clothes cost me just $50, and it isn't such a wonderful garment at that. The wool in it perhaps was 'harvested' from the back of one of Morgan Vaughan's sheep out here and the mere transferring of the wool from the sheep's back to Hay's back has netted someone a handsome profit—at least the difference between about the $2 the wool cost the manufacturer and the $50 I paid for it."

After discoursing on various timely and interesting topics regarding the interests of this section, Mr. Hay took up the question of school taxation and pointed out the many inequalities of the almost terrific burden folks living in the new and sparsely settled communities of the state are called upon to pay in order that their children may be able to achieve an education.

"The schools are not primarily operated for the turning out of professional men, lawyers, doctors, ministers and the many other vocations." While he admitted they are a stepping stone to these things, they are essentially maintained for the purpose of making boys and girls patriotic citizens. That being the case, he said, the state should recognize its duty and pay a part of the expense.

Drawing an imaginary line along the speaker's platform, he emphasized how in some of the well-to-do communities of southern Minnesota they are paying but a 25 to 40 mill tax for school maintenance as against 75 to 90 mills for the newer and undeveloped sections of the state.

This, declared Mr. Hay, appeared to him as manifestly unfair, and he believed that a readjustment should be brought about in order that people living in a section such as this would be relieved of a part of this unjust burden.

"We must strike a common level somewhere and I believe that the state of Minnesota should not longer hesitate in the matter of compelling these thickly settled and well-to-do communities in coming to the assistance of you folks out here who have for so long, without complaint been paying this tremendous tax to insure your children an education."

In closing, Mr. Hay stated that he was in a position to leave with his hearers a "ray of hope" and a "rift in the clouds," and stated that there is at the present time a committee at work on the problem of which he had spoken and that he had every confidence that some sort of recommendations would be made to the next session of the legislature to bring about the readjustment.

Turning to the graduating class, Mr. Hay congratulated them upon the fact that they constituted the first to eminate from the local schools and further that they sprang from the sturdy stock typical of this community.

"You have good reason to feel proud tonight, my young friends, but I do not envy your position. Were I young again, perhaps I would just as soon change places with you, but having arrived at the stage where I am compelled to step down to make a path for youth—you are welcome to everything lying before you. Commencement! You are just stepping on to the threshold of opportunity and I hope that you make the most of it. The world lies at your feet, challenging you in the sciences, the professions and the crafts. The universe—a hidden and unknown quantity—remains for your experiment. Others have searched out the mervelous discoveries of the telephone, the wireless and the radio, and now I cannot but wonder what will be your portion. We shall have to wait and see. No matter whether your task is the most humble and commonplace, do it well and honorably and I am sure we will all feel proud of you."

A splendid musical and speaking program was given by members of the senior and eighth grade, which included a piano solo by Vivian Thoreson; salutatory address by Christina Bundhund; eighth grade valedictory by Esther Ronkin; senior valedictory by Kathleen Lang; presentation of class memorial by Roy Olson; response, Eunice Tvedt; selection, high school Glee club. The valedictory and salutatory addresses of Miss Bundhund and Miss Lang are given in another column of The Banner. Rev. Aakre opened and closed the exercises with invocation and benediction services.

Mr. Norby then made the presentation of the graduating class and thanked the citizens of the community for the hearty co-operation which had always been extended to himself and the faculty in all school matters and expressed his appreciation for the assistance rendered by the members of the school board.

He also thanked The Banner for the keen interest it had taken in school affairs during the past several weeks and the generous amount of publicity this newspaper had accorded to the closing days of the school year. This service, said Mr. Norby, had been of incalculable value to Goodridge and its people and a favorable impression thereby attained in outside centers toward local educational activities.

Palmer Tvedt, president of the board of education, presented the diplomas to the class and congratulated then upon their graduation and, speaking for the board, he felt that all were satisfied with the progress made by the schools during the past four years.

John Nystul made the presentation of the certificates of award to a number of students who had excelled in their studies and who had scored a perfect attendance during the year. As principal of the school, he thanked the student body for their adherence to school duties and said that his relations with the school had always been of a most cordial nature and it was with deep regret that he was now severing his connections.

LARGE TRUCKS OF HOUSEHOLD GOODS PASS THROUGH TOWN

Walter J. Sjoberg of Cloquet moved to Thorhult last week. He passed through Goodridge the first of the week with two large trucks of household goods. The rest of the family passed through here a few days later by auto. Mr. Sjoberg is a son-in-law of D. H. Fish.

ROY OLSON ACCEPTS POSITION

Roy Olson who recently graduated from the local high school left Goodridge Thursday morning for Hibbing, where he has accepted a very desirable position with a contracting company at that place.

Mr. Herbert Race, Prof. of the Oklee school, was a visitor in Goodrige on Tuesday.

FLAG DAY PICNIC AT HIGHLANDING

Prominent Speakers, Baseball and Dance Scheduled for June 14

There will be a Flag Day Picnic held at Highlanding on June 14th, to be held at the Highlanding Pavilion, at which time prominent speakers will be heard, including Rev. J. B. Smith, pastor of the M. E. church of Thief River Falls, C. L. Hansen, who will address the people on various timely topics, and Bj. Bjornaraa.

Music will be furnished by the Goodridge band and a baseball game will be played between Highlanding and the Hickory Indians. The redmen are said to have organized a fast nine and will undoubtedly give the Highlanding athletes a close rub.

A dance will be given during the afternoon and evening at the pavilion and motor boat excursions up and down the river will be run during the entire day. The committee in charge of arrangements are sparing no means in making the day an enjoyable one from every standpoint, as it is expected a large number of people from nearby towns will be present.

"Bring your baskets," says the committee, and stay all day. There will be something doing every minute."

FARMERS OPPOSE DRAINAGE PROJECT

Believe the Benefits Derived Will Not Justify Expenditure

A meeting was called by the Drainage board on the deepening and straightening of the Red Lake River Tuesday afternoon at Highlanding. The meeting was held at the Johnson pavilion. About three or four hundred farmers were present. Mr. Selvig of the Crookston Agriculture school was the main speaker, and a good many of the farmers present were called on for talks. The result of the meeting was that about ninety-five per cent of those present were against the project on account of the assessments that would be against them in case this work went through. They stated that if the board could assure them of a certain amount of assessments they would be willing to have the river widened and straightened, but the board was unable to do so. It is true that the river is too shallow and overflows its banks nearly every year, but the damage done by this overflow does not seem to be sufficient to justify the amount of assessments and taxation that the farmers in that locality would be compelled to pay to have the work done.

VALEDICTORY

Kathleen Lang.

Friends: You are here to witness the commencement exercises of the first graduating class of the Goodridge high school.

We have chosen as our motto: "Courage, loyalty, and truth." Loyalty and truth signifies the principles we have stood for during our past school years, and the principles we are carrying with us through life. By courage we mean strength to do what is right and to bear forward the standards of righteousness and integrity. Loyalty is the faithfulness we have tried so hard to carry all through our school work. It is one of the best watchwords in our language and we are glad we have chosen loyalty the second word in our motto. Truth, the last word in our motto symbolizes an open mind which always seeks the vereties of life. Courage, loyalty, and truth. These three go hand in hand. When we have loyalty, we have truth, and where we have truth we have courage to stand by our convictions, loyalty to stand by our friends, our school, and our country. As Farquar has said:

"Courage, the highest gift, that scorns to bend,
To mean devices for a sordid end.
Courage—an independent spark from Heaven's bright throne,
By which the soul stands raised, triumphant, high, alone.
Creating itself, not praises of the crowd,
Above all vice, it stoops not to be proud,
Courage, the mighty attribute of powers above,
The spring of all brave acts is seated here,
As falsehoods draw their sorded birth from fear."

Dear friends and classmates: It is with a feeling of thankfulness that we look back at the years we have spent at the dear Goodridge high school, and when we think of what it means to us, these closing exercises carry with them a sadness of parting from friends who have come to mean so much to us during our school life. It is not easy to bid farewell to the teachers and classmates with whom we have worked, but while we shall miss the friends and associations that were our while at school, we are happy to think that in the world outside there are tasks awaiting us—tasks in which our hands and hearts will be given an opportunity to do the work that the future has in store for us.

Miss Joren Hegland left Monday morning for her home at Fosston, after a successful school year, to spend the summer with her parents. She was accompanied by Miss Hilda Christianson as far as Thief River Falls.

Mr. and Mrs. Gust Anderson of Pelican Rapids accompanied by Mr. and Mrs. Clarence Stephenson and son, Earl, drove to Goodridge Sunday remaining until Tuesday visiting with relatives and friends.

The Goodridge Lutheran choir autoed to Thief River Falls Sunday morning, where they sang for the confirmation services at the Free Lutheran church.

Mrs. Joe Becker of Thief River Falls arrived on the Electric car Saturday afternoon. She is the guest of her daughter, Mrs. Joe Gangness.

Miss Gretta Gulrud Drove to Thief River Falls on business Friday.

SALUTATORY

Christina Bundhund.

Parents, Faculty, Members of the Board of Education and Friends:

It is with great pleasure that I have the privilege of addressing you in behalf of the first graduating class in the history of the Goodridge high school. We fully realize that without your united efforts we should not be able to be on this platform tonight. Therefore, we wish you all a hearty welcome and assure you that we are honored by your presence at these exercises.

We welcome our parents who have helped us reach this goal and to whom we owe our reverence and sincere love. We realize that you have given us your strength, time and patience and assisted us in many other ways in gaining our high school education. We hope that we shall be worthy of the sacrifice you have made for us. In spite of our many trespasses, we have all meant well and we hope to repay you in time.

In behalf of the class, I wish to welcome the members of the faculty who have directed us through our school work, and to whose faith in the abilities of us to make good, we owe much. You have spent much of your energy and patience to help us in our efforts to obtain a high school education. We are mindful of this tonight and we shall never forget your counsel and admonition.

To those who have been members of the board of education, during our school career, a great deal of credit is due for the efficient management of this school, and we welcome you tonight.

As classmates we rejoice on this occasion. During the years that have passed we have stood by one another with the constancy of clansmen, and we hope we shall meet again on life's pathway in the future.

Commencement signifies a beginning, and to the graduate it has a special significance. To all of us it signifies "commencement" in the sense that we are looking forward to new fields of endeavor and activity. Some of this year's graduates will no doubt continue their education at some higher institution of learning; others of us will receive our further education from the experiences of life, but to all of us it marks a passage from the joys and reverses of a high school life to a life of activity beyond the walls of the Goodridge high school. It is with a mindful feeling of joy and regret that we welcome you to these exercises. We are glad we have attained this achievement, but we also realize that our delightful associations as fellow students have come to a close.

Again, in behalf of the graduating class of 1922, I welcome you!

FARMERS ASK CREAMERY APPROACH BE REPAIRED

Something should be done by the creamery board to the platform in front of the creamery in the way of leveling the approaches. Farmers are complaining of losing their cars, or at least some of them have had the experience of having their cars start down the road after they had left it. One man had the misfortune of having his car start out with one door open, which was nearly taken off, as the car passed some obstacle.

Mr. and Mrs. Geo. M. Wilson of the W. P. T. U. Range near Esplee were Goodridge shoppers on Tuesday.

WORK ON RED LAKE HIGHWAY TO START IN JULY; CONTRACT IS LET

A contract was let yesterday by the Beltrami County Board for the construction of the first 10 miles of road of the proposed Red Lake Highway leading to Red Lake, and it is expected that work will commence early next month. The contract was let to Albert Moen of Middle River, who it is believed will have his road building machinery on the job within the next few days. That part of the road contract let to Mr. Moen will be a 10-mile stretch lying between the Ridge and the Narrows and will connect with the road running one mile south of Goodridge. The contract let yesterday is by far one of the most important road projects under consideration affecting Eastern Pennington county and it is though that its completion will lead hundreds of tourists into the Red Lake country.

CONSIGNMENT SALE OF GUERNSEY COWS

Picnic and Sale at Thief River Falls Attended With Success

That "the Guernsey cow is the profit cow" and that the strain is fast becoming popular in Pennington county was emphatically proven at the sale of the Red River Valley Guernsey Breeders' association held at the fair grounds at the county seat yesterday afternoon, when the number of cattle placed on sale were disposed of at good prices.

At the time of going to press, The Banner is without information as to who the new owners are or the prices that were paid, however, these facts will be published in the next issue.

Eleven head of purebred Guernseys and 22 other high grade cattle from tuberculine accredited herds went on the block and were quickly sold to farmers and dairymen of this vicinity. Jean-Duluth Farm had consigned Starlight's Defender, a son of May Rose Starlight Fifth (42571), out of Leda's Daisy Moon (102680), now on testmaking record of 52 pounds of milk per day. This calf's 20 near dams average 717 pounds of butter-fat.

Radison Farm of Anoka, Minn., had consigned a yearling son of Ultra King of Egdemoor (42532), out of a daughter of Pencoyd Quaker Boy. This youngster is of a show type and is of the best of breeding.

George Grout of Duluth, Minn., secretary of the State Guernsey Breeders' association, was in attendance at the sale and during the evening came to Goodridge, where he addressed members of the Community club on the topic of dairying and cattle breeding. C. G. Selvig of the Crookston Experiment Station, who also attended the sale at Thief River Falls, accompanied Mr. Grout here and delivered an address.

INFORMATION ON CERTIFYING OF SEED POTATOES IS GIVEN

Many potato growers in Pennington and Marshall county are requesting information on how to make application for certifying seed potatoes. In order to do this it is necessary to fill out a blank, which may be obtained in the Farm Bureau office or will be sent to any potato grower who may request it. It is not necessary to buy certified seed for this year's certification. Select any ordinary good seed from one variety, treat and plant. The field will be inspected twice by a state inspector and once when the crop is in the bin.

The state makes a certification charge of $1.50 per acre on each plot applied for with a minimum fee of $5.00. If over eleven acres are to be certified the fee is seventy-five cents per acre, if over twenty acres the fee is fifty cents per acre.

Anyone interested in further details may receive full information from the Farm Bureau at Thief River Falls.

J. McGilvery of Thief River Falls was in Goodridge Friday.

GROWERS ASK FOR POOLING OF WOOL

Meeting at Goodridge School June 16 to Consider Matter

Many of the wool growers have requested that the wool be again pooled this year because of the high prices and the success of the pools in other parts of the state. R. E. Jones of the Wabasha Wool Pool is making advance payments upon receipt of wool according to the following schedule.

27c on clear bright mediums and fine.

24c on clear dark semi-bright mediums and fine.

22c on low one-fourth.

20c on rejects, f. o. b. Wabasha.

They said their present market to patrons would net around 32c f. o. b. Wabasha for the clear bright and fine wool. They also send the following instructions along with their letters to the wool growers:

Promptly upon receipt of each lot, we return statement showing the number of pounds of each grade and our check to cover the advance.

We have wool sacks which we will send you upon request.

We have twine to tie fleeces which we furnish at 20c per lb. Wabasha.

No charge for sacks when returned with wool.

Tie your fleeces neatly and take out all foreign matter and tags and heavy skirts.

Don't use sisal twine.

See that your wool is absolutely dry before shearing.

There will be a meeting held at the school house at Goodridge at 2 P. M., Friday, June 16th, to consider the pooling of wool in Pennington county.

GOODRIDGE LOSES TO MOYLAN

A very clean cut and interesting ball game was played on the Goodridge diamond Sunday afternoon between the Highlanding and the Moylan teams. The game resulted in a score of 7 to nine in favor of Moylan.

Ellef Aakre, "Potato King"

Ellef Aakre is to be the potato king for the coming year. He is putting in a large piece, and says his planter has been busy all day and part of the night for some time.

J. M. Bishop and son, Morland, of Thief River Falls, were in Goodridge Tuesday on their way to Highlanding, where they attended a meeting of the farmers for the purpose of discussing the matter of deepening the Red Lake River.

Mrs. Joe Larde of Eden Valley and her sister, Miss Moe, passed through Goodridge Tuesday on their way to Grygla, where they will spend a few days visiting with relatives and friends.

Mr. Olson, manager of the Thief River Falls creamery, was in Goodridge Thursday attending to affairs pertaining to the Goodridge creamery.

Nick Bundhund was a business caller in Thief River Falls Friday.

Clean-up Week!

Unless all garbage piles and alleys are cleaned up by the 15th of June, also all cleaning up in general, it will be necessary for the Village Council to have same done, and this work will be charged to the resident.

BY ORDER OF VILLAGE COUNCIL.

1—Mrs. James S. Sherman, widow of the former vice president, photographed in Washington where she renewed old friendships. 2—Typical distribution station, in St. Louis, for payment of Missouri's state bonus to ex-service men. 3—President Vauclain of Baldwin Locomotive company starting the "Prosperity Special" of 20 big oil-burning locomotives from Eddystone, Pa., to southern California.

NEWS REVIEW OF CURRENT EVENTS

Wages of Rail Employees Are Reduced by Board and Big Strike May Result.

HOOVER SETS COAL PRICES

Germany Yields to Allied Ultimatum and International Bankers Plan Reparation Payments and Loans—War Fraud Investigation Begins—British Warn Ireland.

By EDWARD W. PICKARD.

ANOTHER great strike is threatened, this time of the railroad workers whose wages have been or are to be reduced by the United States railway labor board. Already the board has made public one decision cutting nearly $50,000,000 from the annual wages of the maintenance of way men, and before this reaches the reader it is almost certain another decision will have been published slashing between $50,000,000 and $75,000,000 from the yearly pay of the shopmen. Either ruling is sufficient to bring on a walkout if the men remain in their present state of mind, and still others may follow soon.

The first decision announced orders a reduction of 13.2 per cent in the prevailing pay of maintenance of way men, effective July 1. It affects about 400,000 workers, and their new wages will range from 23 to 35 cents an hour. It was signed by the three public members and the three railway members of the board. The three labor members signed a dissenting opinion, holding that the new pay does not constitute the "just and reasonable" wages guaranteed under the transportation act, and that in fact it does not represent a living wage. The majority report, however, points out that common labor on railways, even after the reduction, will be better paid than similar labor in most other industries.

Edward H. Fitzgerald, president of the railway clerks' organization, took the lead in planning for the prospective strike, inviting sixteen chiefs of rail unions to meet this week in Cincinnati. He was forestalling an expected decision by the federal board cutting the pay of the clerks, telegraphers and other smaller classes. There is a possibility that this conference will result in a defensive alliance between the railway workers and the miners. Such a compact really was formed several months ago, but failed to provide for aggressive action unless each step was approved by referendums of the various organizations involved. This lack may be supplied at the Cincinnati meeting.

The six federated shop crafts are concerned not only in wage reduction. They accuse twenty-two roads of violating the transportation act by letting out shop work to contractors not within the board's jurisdiction, and their president, B. M. Jewell, has demanded that the board assume jurisdiction in these cases and compel the railroads to restore conditions in effect previous to the alleged violations. He said that unless this were done strike ballots would be sent out, regardless of the wage issue. The board already has shown that it sympathizes with the attitude of the shopmen in this matter.

Wages of train service men are not involved in the present and immediately prospective rulings of the labor board.

UNOFFICIALLY but authoritatively it is announced that the government is taking no action to end the strike of coal miners and that it does not look for any decisive turn in affairs before the middle of June or the first of July, when the shortage in coal may begin to be felt. Secretary of Commerce Hoover, however, does not propose that the consumer shall suffer unjustly if he can prevent it. He held a conference last week with the representatives of more than 500 producers of bituminous coal, whose mines are in operation in the nonunion fields, and told them that he would assume personal responsibility for fixing minimum prices at the mine, in order to prevent profiteering. He asked, however, that the operators agree among themselves on fair prices in order that the anti-trust laws might not be infringed. Mr. Hoover then announced what he considered fair prices in three districts. These ranged from $2.20 to $2.60 a ton for the Alabama district; $3.50 a ton for the smokeless coal districts of West Virginia, and $3.50 a ton for the Harlan and Hazard fields of Kentucky and the southern Appalachian fields of Tennessee and Kentucky. The maximum for the Alabama district is 25 censt a ton below the final Garfield war-time scale, while the maximums proposed for the other districts are somewhat above the Garfield prices. The prices are to apply only to spot coal.

GERMANY'S reply to the ultimatum of the allied reparation commission was near enough to complete acceptance to satisfy that body, which, after a day's intensive study of the note, telegraphed to Berlin its approval of the German promises to balance the budget and to stop the issue of paper money. The commission then turned over to the committee of international bankers in session in Paris the entire question of German finances and payment of reparations. Those bankers, among whom is J. Pierpont Morgan of the United States, are now studying the questions of Germany's capacity to pay, the guarantees she can give for the series of huge loans that will be necessary, and, in connection with the latter, the possibilities involved in the Russo-German pact.

The German proposals were drawn up by Finance Minister Hermes and are not at all liked by some other members of the Wirth cabinet and many members of the reichstag. The Stinnes group especially attacked them as a surrender of sovereignty that will bring on catastrophe. The reichstag refused to pass a vote of lack of confidence in the government, but the cabinet is believed to be in a shaky condition.

Lloyd George made a statement on reparations in the house of commons in which he strongly intimated that Germany would be granted reductions, postponements and revisions when these appeared necessary, and this was greeted with cheers. France, naturally, is not pleased with developments, but is not in position to object strenuously.

SENATOR M'CUMBER'S bill for a soldier bonus was approved by the senate finance committee by a vote of 9 to 4, and he announced he would be ready to make a favorable report on the measure to the senate within a few days. He hopes to induce the senate to sidetrack the tariff debate long enough to pass the bonus bill, but as the latter does not go into effect until January 1 next, many of the Republican leaders are opposed to this idea. The Democrats will support McCumber's plan for immediate consideration of the bonus. The bill as approved by the finance committee is almost identical with the bill passed by the house. The Democrats are not satisfied with it, and Senator Smoot will try to have his insurance measure adopted as a substitute, so the debate in the senate is likely to be a long one.

INVESTIGATION of war frauds now is under way in Washington, the first of the government's series of cases, dealing with contracts for disposal of surplus lumber, having been presented to the special federal grand jury by United States Attorney Peyton Gordon. Attorney General Daugherty issued a statement saying that at no time during the grand jury investigation would any information be given out as to its activities or the names of the cases presented.

Meanwhile Senator Caraway and others continue their attack on the attorney general unflaggingly, with the avowed intention of driving him out of the cabinet because of his connection with the release of Charles W. Morse from the federal penitentiary. It is stated in Washington that President Harding has full confidence in Mr. Daugherty's honesty and integrity, which of course means that he will not ask him to retire from the cabinet.

THE delectable Senator Tom Watson of Georgia indulged in another outburst in the senate because Senator Lenroot intimated the Georgian had made an untrue statement concerning the Hoover relief fund accounts. Watson yelled that he was not afraid of "the insolent junior senator from Wisconsin" on the floor of the senate or anywhere else, and that he defied him. Some day one of the husky senators will take Tom Watson at his word and "knock his block off."

OVER in England short shrift is usually given criminals. Horatio Bottomley, member of parliament, editor of John Bull and professional hater of America, has been found guilty of fraudulent conversion of $660,000 in connection with the victory bond clubs he organized among poor people, and was promptly sentenced to seven years' imprisonment. He announced he would appeal but was denied bail and locked up in Brixton prison. Bottomley will lose his seat in parliament if the conviction stands.

IRELAND has about two weeks in which to establish a government in accordance with the treaty creating the Free State and to restore order to a measurable degree. If she fails the British troops now in Ulster and others to be sent over will be used to suppress the republicans and the Sinn Feiners and put an end to the border warfare. Such is the warning given in the house of commons by Winston Churchill, who added that the British cabinet still has faith in Michael Collins and Arthur Griffith. The Irish elections are to be held on June 16 and Churchill said that if De Valera and others who have rejected the treaty are elected to the Irish parliament they must publicly announce that they are bound by the treaty, otherwise the pact will become worthless and will be automatically violated. Collins and Griffith heard Churchill's statement and afterward said they believed they could work out the affair if they had time. Sir Lamington Evans, minister for war, has complete plans ready for military operations for the reduction of Ireland, one of the preliminaries being the full occupation of Dublin.

Along the Ulster border the fighting goes on merrily and every day a number of persons are murdered. In many localities the Free Staters and republicans are making common cause against the Protestants of Ulster. Bloody conflicts between the military and constables and gunmen take place daily in Belfast.

OBSERVANCE of Memorial day was made especially notable by the dedication of the beautiful Lincoln Memorial in Washington, now virtually completed. It was turned over to the nation by Justice Taft as head of the memorial commission and was accepted by President Harding in an eloquent address. In the great throng that witnessed the ceremonies was Robert Todd Lincoln, son of the Great Emancipator.

ONE of the pledges of the Harding administration and a prediction made early in the year by treasury officials was fulfilled last week. All issues of Liberty bonds sold at par or better, for the first time. The trading in them on Wall street was very heavy. At the low quotations of last year most of these bonds were yielding from 5 to almost 6½ per cent. On the present basis of values the 3½s net exactly 3¼ per cent and the 4s and 4¼s from 4 to 4¼ per cent.

TWELVE balloons started from Milwaukee Wednesday in the national race, and at this writing six have landed, in Illinois, Indiana, Ohio and Missouri. The others probably were traveling northeast. One of the great bags, belonging to the navy and therefore a non-contestant, is filled with helium and carries a new secret radio device from which much is expected. The three balloons that travel the greatest distances will be America's entries in the international race in France later in the year.

PLANS for the unification of China are moving forward. Uuon the meeting of the old Republican parliament, backed by General Wu, the President, Hsu Chih Chang, resigned and was succeeded by Former President Li Yuan Hung. Overtures have been made to Sun Yat Sen.

News of Minnesota

EVENTS of the week throughout the "State of Ten Thousand Lakes" told in brief form

Owatonna—There are 38 men and one woman seeking office in Steel county. Heading the list of county offices in popularity is that of sheriff.

Austin — Seventy-five Guernsey breeders of Mower county attended the annual picnic of the county association at the Banfield farm.

Luverne—Louis M. Wiese, a farmer living seven miles north of here, told the court that his home had been raided seven times within a year.

Delano—Commencement exercises for the high school will be conducted when 13 pupils who have completed their courses will be graduated.

Biwabik—The eighth district group of the Minnesota Bankers' association, meeting at the Esquagama club, here, re-elected the present officers.

Fairmont—A pair of robins is raising its young in a nest built on the electric sign in front of a Fairmont store. Three of the four eggs hatched.

Osakis—Construction work has been begun at the new First National Bank building here which is to cost $40,000 and be ready for occupancy by the 1st of August.

Bemidji—Wool growers of Beltrami county will assemble their wool here June 12 and 13 to sell it in pool. A large number of buyers from throughout the northwest will bid on the wool offered.

Monticello—H. Hoblitt, aged 76, walked to Minneapolis and returned the following day. On his way Hoblitt said he was offered numerous lifts by persons driving in his direction but he refused and completed the entire trip on foot.

Winona—C. A. Bolton, secretary of the Winona Association of Commerce, announces that the anticipated influx of tourists to and through this city are to be provided with better facilities than ever before.

Minneapolis—Among the early Minnesota pioneers who have died recently is Mrs. Mary A. Watt, aged 88, who came to Minnesota with her husband, William Cowen Watt, in 1855.

Ely—John Lytre, aged 19, cook at a road construction camp, was fatally burned when the cook shanty, in which he, another cook and choreboy, were sleeping, was burned to the ground.

Hibbing—Many small farms in this section which have been idle since before the war are now being operated, according to Forest Ranger D. L. McIntosh, who has just returned from a tour of his district.

Pipestone—The program has been issued for the first regional conference of the Child Welfare board of Murray, Pipestone, Lyon, Lincoln and Nobles counties, which will take place in Pipestone Friday, June 9.

Northfield—Northfield greeted Governor J. A. O. Preus and a distinguished party of northwestern railroad executives and twin city businessmen who came here to witness a demonstration of how the common barberry bush infects fields of grain with black rust.

Albert Lea—This week has been ideal for growing crops in this section of the state. The moisture of a week ago was followed by excellent growing weather. The corn is beginning to show above the ground, and potatoes give evidence of rapid development.

St. Paul—Saving of $4,500 a week is being effected by the co-operative creameries of Minnesota by their carload shipment plant, it was announced by A. J. McGuire, manager of the Minnesota Co-operative Creameries association.

Hallock—Kittson county will have no contest for county offices at the primaries on June 19 except for sheriff, five having filed for that office, including O. J. Anderson, who has held the office for more than 20 years.

Wheaton—With the close of the school year, Wheaton loses almost its entire corps of teachers. One elementary teacher is returning and only five of the high school teachers will be back in the fall.

St. Cloud—An "ambition survey" made in one of the St. Cloud schools discovered two cowboys, a sheriff, a fireman, several physicians, a sailor, a circus owner, baseball players and a score of other careers as the goals of the boys.

Minneapolis — The Minneapolis branch of the Ford Motor company is assembling cars at the rate of 240 in an 8 hour day and is unable to supply them to northwest dealers fast enough for the demand, according to a bulletin published by the Ford Motor company at Detroit.

Lake City—Governor J. A. O. Preus, State Legion Commander Van Dyke, State Adjutant King and several other men prominent in the state or in American Legion affairs attended the first annual convention of the First District Legion posts, which was held here.

Minneapolis—Preparations are under way to attract the largtst assemblage of retail merchants in the twin cities' history from Aug. 7 to 12 for Twin City market week, an occasion which marks the first time that Minneapolis and St. Paul have joined in an enterprise of the kind.

Minneapolis—The body of an unidentified man about 40 years old was found floating in the Mississippi river near the west end of the Hennepin avenue bridge.

Madison—Work will be commenced at once on Madison's new armory. McGough Brothers and company, of Benson, were awarded the contract of their bid of $22,884.

Glencoe—Clyde Clough was awarded a verdict of $9,800 in a suit against the Chicago, Milwaukee & St. Paul Railway company in district court here.

Fergus Falls—The annual picnic of former Fergus Falls people now living in the twin cities will be conducted at Como park, June 10.

Windom—The first women jurors to be drawn in Cottonwood county, have been named for the term of district court which opens here in June.

Mankato—Ollis Wild of this city was exonerated in court at Le Sueur and discharged when arraigned on a charge of having held up the night telegraph operator at that place recently.

Pipestone—Mrs. Ann M. Jenckes of this city has filed as a candidate for the office of register of deeds in Pipestone county. She is opposing the present titleholder of the office, G. W. Nash.

Hutchinson—Three million pike fry have been planted in Belle, Hook, Stahl and Jennie lakes in this vicinity. The stocking was done by the state game and fish commission.

Moorehead—Mrs. Clara Jones of Brainerd was elected president of the Lake Region Library club in annual meeting here, and St. Cloud was chosen the next meeting place.

Springfield—August Trapp, 70 years old, a pioneer farmer near Sanborn was seriously mutilated about the head and face when one of his horses kicked him as he was unhitching the animal.

Hastings—The summer schedule of the St. Paul Southern Electric line reduces the running time between here and St. Paul to one hour and 10 minutes, against one hour and 30 minutes at present.

Fairmont—With filings ended, Martin county has 32 candidates for the various city offices. Five have filed for sheriff and four for county treasurer. District Judge E. C. Dean has no opposition.

Austin—Major Harold Nelson of Owatonna has been directed by Adjutant General Rhinow to come to Austin to investigate the fire which caused damage estimated at from $300 to $400 in the armory here.

Hibbing—Shipments of iron ore from the state mines during the week ended May 27 comprised 1,427 cars with a total tonnage of 70,539 tons, according to a report made to R. P. Chase, state auditor.

St. Paul—In seven raids in various parts of Minnesota over Memorial day, federal agents confiscated 1,200 gallons of moonshine, and mash, four stills and arrested seven men, M. L. Harney, group chief, reported.

Minneapolis—Thirty thousand dollars' worth of personal property is left in the estate of William H. Grimshaw, former United States marshal, man of business and politics, according to the will filed in probate court.

Duluth—Grain shipments from the Head of the Lakes by both rail and vessel to points east last week amounted to 2,707,770 bushels, according to the weekly report of the grain commission.

Clinton—Economy and Market day, put on here by the merchants under the auspices of the American Legion, attracted more than 2,000 people from the surrounding country and neighboring towns.

Duluth—John Swanson was awarded a verdict of $4,000 against the Duluth & Iron Range Railroad company, by a jury in Judge W. A. Cant's court. Swanson's leg was hurt when a steel floor fell on it, he alleges.

Canby—Mrs. Annie Moriarty is suing this town for $5,000 damages because of injuries alleged to have been received when she fell on an icy sidewalk here on Feb. 19, 1922, sustaining a fractured arm and wrist.

Willmar—During the month of May, about 600 trees have been planted in the new Sibley state park near Lake Andrew. Five hundred of the young trees planted are black walnuts, obtained from the forestry department of the University of Minnesota.

Duluth—Authorities awaited the outcome to an autopsy to be held over the body of J. E. Kreager, deputy state game warden, before continuing investigation of his death. The body was found in Grand lake, 25 miles northwest of Duluth.

Hibbing—For the first time in the history of Hibbing a president of the United States will be heard here—but by radio—on June 8, at the Trade on the Range exposition, it is announced by Secretary Saxby of the Commercial club.

St. Paul—Approximately $1,250,000 will be paid in to the office of Henry Rines, state treasurer, during the next few weeks in payment of state school lands. The money will be available for additional school loans and is expected to take care of virtually all applications on hand and expected before July 1.

Luverne—The city council is still as badly divided as when the body was organized a few weeks ago. Mayor Hinkley and two of the aldermen find the majority vote against them, with sufficient power to carry matters over the mayor's veto.

Mantorville — Businessmen here have offered their co-operation to Rochester business interests to induce the Great Western railroad to construct 12 miles of road between a point north of Rochester to this village. The change would mean better train service to this point as well as other small villages in this vicinity.

MINE STRIKERS SCORE VICTORY

Court Reverses Decision, Mine Strikers Need Not Pay Damages.

UNIONS ARE SUABLE

United Mine Workers Win Big Victory When Supreme Court Reverses Lower Court's Decision in $600,000 Damage Suit.

Washington.—Striking coal miners won a tremendous victory when the supreme court held that the United Mine Workers need not pay damages amounting to more than $600,000 to the Arkansas coal mine owners as the result of strike riots in the Arkansas fields in 1914.

The court reversed the decision of the Arkansas courts, holding that the officers of the mine workers by inciting violence during the strike caused the destruction of property and thus were guilty of restraining interstate commerce in violation of the Sherman anti-trust law.

Several mines were burned during the riots which threw that section of the state into a veritable war zone.

Five Questions.

Five questions were presented by the controversy, Chief Justice Taft said. First, whether they had been a correct selection of the parties to be sued; second, whether the parties not being incorporated were subject to suit; third, whether the United Mine Workers of America had been engaged in a conspiracy or in the destruction of property, for which that organization and its officers could be held liable; fourth, whether there was evidence to show that the conspiracy alleged did restrain or monopolize interstate commerce; and fifth, whether the trial court, in charging the jury, had coerced them into returning the verdict. There had been no misjoiner of the parties under the laws of Arkansas, where the case was tried, the supreme court held.

In view of federal legislation, the court announced "that such organizations are suable in the federal courts for their acts and that funds accumulated to be expended in conducting strikes are subject to execution to suits for torts committed by such unions in strikes."

FORD'S PROSPECT BRIGHTER

Two Bills on Ford's Offer Are Presented by Military Committee.

Washington.—Two bills authorizing Secretary Weeks to execute contracts with Henry Ford and transfer to him the government's $100,000,000 power and nitrate project at Muscle Shoals, Ala., were introduced in the house by members of the military committee.

One presented by Acting Chairman McKenzie of Illinois provided for the acceptance of Mr. Ford's offer for the property on condition that the Gorgas steam plant be excluded. The other submitted by Representative Wright, Democrat of Georgia, called for unconditional compliance with the terms of the Ford proposal. House Republican leaders announced that action on the measures would be deferred at least until delivery of reports by their authors explaining them in detail and that time would be allowed the house to analyze each of the documents.'

NOTED OPERA SINGER DIES

Lillian Russell, Noted Stage Beauty, Dies After Short Sickness.

Pittsburgh, Pa.—Mrs. Lillian Russell Moore, wife of Alexander P. Moore, publisher of the Pittsburgh Leader, and noted stage beauty of a score and more years past, died at her home after an illness of several days.

At the bedside at the end were her daughters, Mrs. Dorothy Calbit, Mr. Moore, her niece, Mildred A. Martin, and Dr. C. B. Schilldecker.

Following a crisis in Mrs. Moore's condition last week, her physician had expressed belief she would rally. But it became evident that she had suffered a relapse.

Lillian Russell, "The Queen of American Opera," in private life Mrs. Alexander P. Moore, wife of the editor and publisher of the Pittsburgh (Pa.) Leader, for more than 30 years starred in various operatic roles in the United States and England.

She was one of the most popular singing actresses on the American stage. Still famed for youthfulness and beauty after she retired from the stage, she toured her native land with a lecture on "How to Live a Hundred Years."

Reduced Rates to Fair.

Fargo.—Reduced rate or discount tickets for the North Dakota state fair which will be held at Fargo, July 17 to 22, will go on sale Wednesday, June 7, it is announced by F. W. McRoberts, secretary. Tickets will be placed with any merchant in North Dakota or Red river valley counties in Minnesota who purchases 25 tickets. Several thousand letter inserts are being mailed out through Fargo jobbing houses to merchants in this territory, calling attention to this saving of 20 per cent.

Timely Comments on Agricultural Topics for Our Readers

PERTINENT POINTERS for MODERN FARMERS

Prepared Under Direction of

North Dakota Agricultural College

CARE IN CULTIVATION AND GRADING INSURES BETTER POTATO PRICES

With the greatly increased acreage planted to potatoes this year, proper cultivation of the crop becomes of increased importance.

As soon after planting as possible, the potatoes should be blind cultivated, the rows may be followed by the ridges thrown up by the planter. This cultivation should be deep in order to loosen up the soil. The field should then be harrowed crosswise, thus leveling down the rows and destroying all weeds. A weeder or light spike tooth harrow may be used about once a week, or oftener, until the vines are several inches high. This will keep down the weeds in the row.

Don't Injure Roots.

Cultivation should then begin and should be repeated every week or 10 days until the vines are too large. The cultivation should be deep the first time, and thorough, after which surface cultivation is preferable in order that the roots may not be injured. If the potatoes are planted deep enough hilling may be beneficial, but ordinarily it is not the best practice.

It is important that the potatoes be dug early in North Dakota so as to avoid field frost which often causes a heavy loss to the potato growers of the state. The delay of a few days in digging may mean the loss of the entire crop.

As their skin is very tender when freshly dug, potatoes should be left to be in the sun for a few hours before they are picked up. The skins will thus become more firm and much of the dirt will fall off. Growers having five acres or more can profitably use an elevator digger. It may be possible to own one in co-operation with several neighbors.

Grade for Better Price.

In normal years or years of overproduction, the sorting and grading of potatoes is essential in order to secure the best prices. On a glutted market the standard graded potatoes are always the first to be sold. The ungraded stock is marketed with difficulty. Even in seasons of high prices, graded potatoes receive a sufficiently higher price to pay a profit above the labor of grading. The constant marketing of well graded potatoes has the effect of establishing a reputation for that grower or community which results in a premium being paid for such stock.

When ungraded stock comes on the large markets, it must be screened, sorted and graded, especially when potatoes are plentiful. This must be done where labor and storage room is high and the shipper must pay the expenses, as well as the freight charges on the dirt and culls. This work could more profitably be done on the farm and the culls fed to the stock. The sooner the farmer markets his products in condition ready for the consumer, that much sooner he will receive better prices for it.

There are various grading machines on the market that sort potatoes into different grades.

The culls may be disposed of in various ways, but should not be used for seed.

Avoid Diseased Stock.

Potato diseases form one of the serious problems in North Dakota. The growers in this state should profit by the experience of other communities where the potato industry has a very promising future, which was practically ruined because of failure of the growers to take the proper precautions to keep out potato diseases. The southern seed trade is one of the chief outlets for North Dakota potatoes and the growers in that section find it profitable to pay a premium for northern grown stock which they are sure is free from disease which causes more damage in the warmer sections.

However, the necessity of keeping clean seed for the southern trade is not the only reason for keeping diseases out of the fields in North Dakota. Diseases will reduce the yield of potatoes and will to a very serious extent injure their appearance, and reduce their market value as table stock. Experience has shown that diseases may decrease the yield as much as 50 per cent in this section.

The diseases most liable to give trouble in North Dakota are fusrium wilt, blackleg, Rhizoctonia and early blight.

Treating Potato Diseases.

Various methods of eradicating these diseases are here briefly summarized.

Practice rotation.

Plant only sound seed.

Treat the seed before planting. This treatment consists in cutting off about one-half inch of the stem end to eliminate any possible diseases often found there. If a dark brown ring appears at the half-inch depth discard the potato for seed. The potatoes are then soaked in a solution of corrosive sublimate (bichlorid eof mercury) 1½ to 2 hours. This solution is made by dissolving 4 ounces of corrosive sublimate in a gallon of warm water and then adding this to 29 gallons of water so as to make a total of 30 gallons. This is extremely poisonous, therefore great care should be taken with the material itself and the solution as well as with the potatoes after they are treated so that it will not endanger children or livestock. As it corrodes metal, wooden vessels should be used. This treatment when properly used will control scab, Rhizoctonia and blackleg and other diseases that may be on the surface of the potato. The diseases that live inside the tuber as brown rot and wilt can be controlled only by selecting tubers for seed that show no evidence of these diseases. On thirty-seven farms in eastern North Dakota in 1918 the yield was increased on an average of 10 1-2 bushels per acre or 20 per cent by this method.

Another solution which may be used for the common scab is made up of one pint of formaldehyde to 30 gallons of water in which the potatoes are soaked 2 hours. This is not as desirable as the corrosive sublimate treatment as it does not control the Rhizoctonia disease.

Many farmers, by treating their seed potatoes in this way, have been able to increase the yields from 25 to 100 per cent. The treatment may be given either before or after cutting the potatoes preparatory to planting. Treatment after cutting is most apt to properly control the rot diseases. If treated after cutting, they should be planted immediately as there is danger of heating which may destroy germination. Care should be taken to prevent reinfection after the seed has been treated.

The diseased vines found in the seed plot should be pulled up and burned and the tubers of the hill dug and destroyed in order to eliminate these potatoes from the next year's seed.

Controlling Early Blight.

To control early blight, spray with Bordeaux mixture. This is made by dissolving 5 pounds of copper sulphate (blue stone) in 25 gallons of water, and by slacking 5 pounds of quick lime and adding 25 gallons of water, straining this through a screen that will remove all lumps large enough to clog the pump, and then thoroughly mix the two solutions. Apply with a high pressure sprayer every ten days from the time the vines are six or eight inches high.

As it will be necessary to spray for potato bugs, the spraying for disease can be done at the same time. The poison for the bugs can be added to the Bordeaux mixture just the same as to the water.

The potato bug can be controlled by spraying with arsenate of lead or calcium arsenate—3 pounds of the paste or 1 1-2 pounds of the powder to 50 gallons of water or mixture, or paris green, 1-2 to 1 pound to 50 gallons of water or mixture. The arsenate of lead adheres to the leaves longer than does the paris green.

The best storage place for seed potatoes is a well ventilated cellar kept at or near 32 to 34 degrees Fahrenheit.

As soon as mothers have learned to hitch the surplus energy of their young sons to the handles of egg beaters, dish mops and washing machines, the bad boy problem in that neighborhood will be greatly simplified.

JULY WHEAT DECLINES

Hogs Also Down—Beef is Firm and Veal Stronger.

U. S. Bureau of Markets, Washington, D. C., for week ended June 2, 1922.

LIVESTOCK AND MEATS—Chicago hog prices declined 15-30c; beef steers firm to 10c higher; butcher cows and heifers steady to 35c lower. Feeder steers unchanged. Veal calves generally 25c higher. Fat and spring lambs generally 75c-$1 lower; yearlings down 50-75c; fat ewes down 50c-$1.25. June 2nd Chicago prices: Hogs, top, $10.70; bulk of sales $10.15-10.65; medium and good beef steers $7.90-8.90; butcher cows and heifers $4.25-8.60; feeder steers $6-7.85; light and medium weight veal calves $8.25-10.50; fat lambs $9.75-12.85; spring lambs $13.25-14.75; yearlings $8-10.75; fat ewes $3-7.

Stocker and feeder shipments from 12 important markets during the week ending May 26th, were: Cattle and calves 62,404; hogs 13,527; sheep 19,343.

VEGETABLES — Potato markets firm, demand fair to good. Northern sacked Round Whites steady in Chicago at $1.40-1.50 per 100 lbs.

GRAIN—Chicago July wheat declined 4¼c for the week closing at $1.18¼; Chicago July corn down 1¼c at 62c. The drop was caused by liquidation and big decline in May wheat. Only firmness shown on 26th when oversold condition was disclosed and on 1st account strength in cash market and improved milling and export demand. Closing prices in Chicago cash market: No. 2 red winter wheat $1.21; No. 2 hard winter wheat $1.20; No. 2 mixed corn 60c; No. 2 yellow corn 61c; No. 3 white oats 37c. Average farm prices: No. 2 mixed corn in central Iowa about 47c; 1 dark Northern wheat in central North Dakota $1.28¼; No. 2 hard winter wheat in central Kansas $1.12. For the week Minneapolis July wheat down 2¼c at $1.38; Kansas City July wheat down 2c at $1.12⅝; Winnipeg July wheat down 3¼c at $1.31½.

HAY—Market fairly steady on good grades because of light receipts, poorer quality, slow sale, movement and country trading light. Alfalfa market weak. Quoted June 2nd: No. 1 timothy, New York $32.50, No. 1 prairie Minneapolis $18.

DAIRY PRODUCTS—Butter markets have been unsettled during the week and price declines occurred although at the close today the tone is firm and the price tendency is upward. There is an increasing interest in buying for storage purposes and a good consumptive demand. Closing prices, 92 score: Chicago 35c; New York 35c; Philadelphia 36c; Boston 36c.

Cheese markets steady to firm. Current demand and appears to be trifle lighter and as yet no active buying for storage has occurred. Quality of current make good for season. Production outlook points to increase as pastures are in excellent condition in principal producing sections. Prices at Wisconsin primary markets June 1st: Flats 18¾c; Twins 18¼c; Daisies 18½c; Double Daisies 18c; Young Americas 18¼c; Longhorns 18¼c; Square Prints 18½c.

Minneapolis Closing Cash Prices.

Spring Wheat—No. 1 dark northern $1.47⅝@$1.60; No. 1 northern $1.46⅝@$1.55; No. 1 dark hard $1.48⅝@$1.53; Durum No. 1 amber $1.25¼@1.30¼; No. 1 $1.20¼@1.25¼; Corn—No. 2 yellow 54¾@55¼c; Oats—No. 2 white, 35¼@36¼; Barley—Choice to fancy, 58@61c; Rye—No. 2 95@96c. Flaxseed No. 1, $2.63@2.65.

South St. Paul Live Stock.

So. St. Paul—Steers, $6.00@9.25; veal calves. $3.00@9.50; cows and heifers, $4.00@8.50; hogs $8.00@11.00 sheep and lambs $3.00@14.00

Minneapolis Butter, Eggs and Poultry.

BUTTER—Extras, 33c; firsts, 28c; seconds, 24c; packing stock, fresh sweet, 20c; state goods, 5c; grease, 1c.

EGGS—Country receipts, rots out, per case, $6.30; No. 1 candled, good extras, free from rots, small dirties and checks out, per dozen, 23c; seconds, dirty and held stock, rots and leakers out, dozen, 16c; quotations on eggs include cases.

LIVE POULTRY—Not advisable to ship turkeys under 7 pounds in weght. Hens 4 pounds and over 21c; hens under 4 pounds, 19c; crpples and culls, unsalable; ducks, fat, 18c; geese, fat, 12c; turkeys, fat, over 8 pounds, 25c; turkeys, thin and small, 15@20c; cripples and culls unsalable, guineas per dozen, $5.00; rooters, 13c; broilers, 1½ lbs. and up, per pound, 40c; Leghorns and small broilers, lb. 35c.

Moves for New Grain Law.

Washington—A new bill for regulation of future trading on grain exchanges, designed to meet the recent decision of the supreme court holding the present trading act inoperative in part, was introduced in the Senate, by Senator Capper, Republican, Kansas, chairman of the unofficial Senate agricultural bloc and author of the original act.

DAIRY

WEIGHING MILK FOR MARKET

Less Trouble Between Producers and Dealers if Records Are Kept at Both Ends of Line.

(Prepared by the United States Department of Agriculture.)

Producers who ship milk to city distributors have voiced frequent complaints because of the disparity between their figures on the quantity of milk shipped and those of the dealers on the quantity received. In order to locate the cause of complaint by studying the actual loss between the country shipping point and the city plant the United States Department of Agriculture made an investigation on the Baltimore market. Records kept on more than 1,100 cans showed that the loss between the country station and the city plant was less than 1 per cent. The loss on trains, probably due to spilling, was only 0.19 per cent; and from the city railroad platform to the plant it was 0.55 per cent.

However, it was found that when the milk was weighed in the city plant there was a shortage of 2.56 per cent on the amount shipped according to can measure in the country. Of this shortage, 0.74 per cent was due to actual losses, while 1.82 per cent was the difference between can measure and weight. This is easily accounted for by the fact that cans become dented and battered, which decreases their holding capacity.

What Part of Your Milk Check Represents Profit.

In a former investigation by the department an even greater discrepancy was found between can measure and weight, the difference being over 8 per cent. It would seem that there would be less trouble between producers and dealers if the milk were weighed at both ends of the line.

PROVIDE PLENTY OF WATER

Cows Must Have Abundant Supply in Summer and Winter for Profitable Milk Production.

Successful dairy farmers find that it pays to provide plenty of good, clean, cool water for milk cows. Eighty-seven per cent of milk is water, as is nearly three-fourths of a cow's body. Experimental data show that the amount of water required by cows is in direct proportion to the amount of milk produced. In the summer, the average cow will require nearly three pounds of water for every pound of milk she produces. In one experiment a cow giving 27 pounds of milk drank 77 pounds of water daily. The same cow drank less than half as much when giving no milk. In all cases, it is decidedly good practice to provide an abundance of clean, fresh water, cool in the summer and warm in the winter.

KEEP MILK AND CREAM COOL

Product Will Soon Sour on Warm Spring Days Unless Promptly Placed in Tank.

As warm weather approaches, better care must be taken of the milk and cream. The can of cream must be put into a cooling tank into as cold water as possible to keep the cream cold. Unless milk and cream is cooled promptly and well it will sour during the warm spring days.

PLANT CROPS FOR COW FEED

Animals Will Not Prove Profitable Unless Properly Fed—Ensilage and Alfalfa Urged.

Dairy cows are not profitable unless fed properly. Ensilage and alfalfa hay are the best cow feeds. The canes, kaffirs, darso, faterita and corn are good row crops for the silo. If alfalfa cannot be grown, cow peas, soy beans or peanuts are leguminous crops to plant for dairy cow feeds.

CONTROL DISEASES AND INSECT ENEMIES OF VEGETABLE GARDEN

(Prepared by the United States Department of Agriculture.)

The insects which attack the potato and the eggplant injure the tomato to a less extent, and tomatoes suffer greatly from pests.

Tomato Hornworms.

The tomato hornworms are large green worms, sometimes called tomato worms or tobacco worms, as they feed about equally well on both plants. They are the larvae, or young, of large sphinx moths of two species, which are very similar in habits and distribution. These insects produce two broods, and when they begin to mature they cut all the leaves from tomato plants. Growers should be on the lookout for the first as well as the second brood. They appear at various times, according to the locality.

Control.—Hand picking can be practiced, but it takes an experienced eye to detect these worms when they are at rest. When feeding they are more easily seen and can be destroyed readily. A single application of lead arsenate at the usual rate will destroy them even though crudely applied. Those which eat the poison first will be found dead the following day. The remainder will be found on the second or third day.

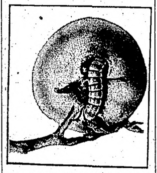
Tomato Fruitworm.—The tomato fruitworm is the same insect as the boll-worm of cotton and the corn earworm and is the cause of much trouble to tomato growers, because of its eating into the ripening fruit and destroying its market value.

Control.—Lead arsenate, 2 pounds to 25 gallons of water, applied two or three times, will keep the insect under partial control. As long as sweet corn is growing in the vicinity it attracts the worms, leaving the tomatoes less subject to attack. Hand picking is too difficult.

Cutworms.—Various cutworms attack the tomato when it is set out. Indeed, it is the favorite food plant of most forms of cutworms.

Flea-Beetles.—The potato flea-beetle frequently attacks tomatoes and does considerable damage.

Control.—Dipping young plants in lead-arsenate solution at the rate of 1 pound to 50 gallons of water, before setting out, will protect them considerably against injury.



Characteristic Work of the Tomato Fruitworms.

Bordeaux mixture also acts as a deterrent.

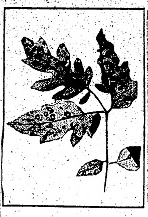
Late-Blight.—A rapid blighting of the leaves, accompanied by rotting of the fruit, is due to the same fungus as that causing potato late-blight. This is common in the Appalachian region.

It is controlled by spraying with Bordeaux mixture, as advised for leaf-spot.

Leaf-Spot.—In leaf-spot, the leaves are covered with dark brown spots (Fig. 3) and shrivel and die, beginning at the base of the plant. This is the worst disease of the tomato. Spray with bordeaux mixture and resin fish-oil soap before the disease appears, and repeat at ten-day intervals. Try to spray the lower side of the leaves as well as the upper side.

Mosaic Disease.—Mosaic disease crumples and distorts the leaves and produces irregular, light green areas. The plants are weak and unfruitful. In the "fern-leaf" type the leaves become very narrow.

Mosaic disease is communicable from plant to plant by insects, especially plant-lice, and by contact. When it appears in gardens it is best to destroy the affected plants and set out others.



Tomato Leaf-Spot.

Blossom-End Rot.—A decay of the fruit at the blossom end, though not understood clearly, appears to be connected with soil conditions, particularly with the water supply. To prevent it, try to make the soil well drained, but retentive of moisture. Water the plants if needed. Plant the variety Bonny Best, which seems to resist blossom-end rot. Tomatoes trained to stakes and pruned often are less attacked.

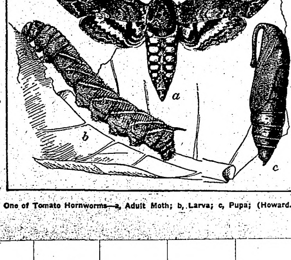
Wilt.—Wilt causes the plants to wilt and die suddenly. It is especially prevalent in the South, where three different forms of wilt are found.

Destroy diseased plants. Use new land for the next planting.

Turnip.—Turnips are attacked by the same insects as cabbages.

Clubroot.—Clubroot of the turnip causes swollen, distorted roots similar to those caused by cabbage clubroot. Rotation and lime are advised, as for the cabbage.

Watermelon.—Watermelons are affected by insects which attack the cucumber, and great injury is done by the melon aphis.



One of Tomato Hornworms—a, Adult Moth; b, Larva; c, Pupa; (Howard.)

SOIL FOR BLACK RASPBERRY

Sandy or Clay Loam Is Preferable—Do Wonderfully Well on Newly Cleared Land.

The best soil for black raspberries is a rich, deep, moist and well drained one. A sandy or clay loam is preferable. Raspberries do wonderfully well on newly cleared land containing plenty of leaf mold.

Turkeys Easy to Raise.

Turkeys are not as hard to raise as many people feel; but it is absolutely essential that conditions be right and that the stock come from a hardy, vigorous strain.

Indication of Efficiency.

The farmer who uses a purebred herd sire from a high-producing family is likely to be efficient in other things and will get high production at low cost.

EDITORIAL

BANKER AND FARMER

The banker stands close to the farmer. He is in position to know about the farmer and his business. When a farmer goes to the bank to borrow money, the banker learns his financial circumstances, his various sources of income, the kind of a farmer he is, the number of children he has, and whether his wife works in the field. We do not claim that the banker is not modest because he pries so deeply in the farmer's affairs, for he does not do it through personal inquisitiveness but to get at the facts concerning the security of a loan. However, it makes no difference as to the reason for the banker asking questions that will unfold the farmer's affairs. He gets them, and a farmer is always willing to confide in a good banker. In most instances the banker does not need to ask questions. He already knows the character of the farmer, his income, how he manages his farm, and all matters pertaining to his welfare. The farmer's business is an open book. He cannot hide his wealth, his buildings, and his improvements, for they are in the full glare of God's sunlight; while the crops in the fields or granary and the stock in the pasture or stable can be judged, his field measured, his cattle counted, and the value of all recorded. There is no basement business in farming, it is done above the ground.

Not all farmers have informed themselves upon the business practices of farming in order to judge what constitutes good farming, what makes for a permanent system of agriculture and produces a rural community. Not so very long ago we came in contact with a banker who did not look upon the dairy interests as meriting a credit and looked upon lending money to the dairy farmer as being more or less hazardous. This is not the position taken by most bankers and especially by those who have studied conditions in dairy communities and states. They have learned that no branch of agriculture is more stable and sound. Bankers who have done this know that to lend the dairy farmer money for a year may prove more injurious than helpful, for it requires a longer credit for the dairy farmer than for the person who raises wheat. If a banker lends money to a farmer to purchase heifers, he can not expect the return of his loan until the heifers have come into milk and have had time to produce a sufficient amount of milk and have had time to satisfy the loan. In the meantime, the farmer must have a certain portion of his living and other expenses.

It is a hopeful sign to know that most bankers are informing themselves upon the various types of farming and by so doing they can render the farmer good business judgment and determine whether they can lend him money for the period required. The banker who does not take sufficient interest in the farmer to know the character of farming he is following, and the length of time he needs money to carry on his business, is not working to the advantage of the farmers or to the best interest of his own welfare. The prosperity of the banker and farmer go hand in hand.

THE MAIL QUESTION

There has been much said and done heretofore on the proposal for changing the rural free delivery system as at present affecting patrons of the route out of Erie, but so far nothing has been done to guarantee better mail facilities for patrons living near Goodridge.

The Banner is not in a position to state what is proposed to be done nor when action will be taken, but upon one thing we are all agreed and that is patrons of the route making Goodridge their trading point are entitled to something better, and if Goodridge can come to their assistance in bringing it about, we should not hesitate in so doing.

Complaints daily come in from farmers living along the Torgerson route, telling of the late delivery of mail from points along the electric line and it is safe to say that all of these would welcome a change being made—the sooner the better.

As is natural in instances of this kind, opposition arises from other points when the matter of changing the route is considered. If other towns can serve our territory with mail, it must be admitted it is of distinct advantage to them. If we are unable to serve our own constituency or bring pressure to bear that would cause the present unfair service to be discontinued in substitution for something better, it is to our disadvantage.

Whatever may be done, the postal department will, in the last analysis, have the final say. If, however, we can demonstrate to the department that we have a better scheme than the one in vogue, Goodridge will serve its own people. Until then, others will provide us with the service.

We shall have to wait and see.

A JAZZING NATION

Jazz bands and orchestras, composed largely of American players, have become such a menace to the morals of France, that the government over there is about to invoke a law which states that not more than 10 per cent of the ensemble of an orchestra can be foreign born. The French in this way have hopes that they will rid themselves of this pestiferous form of music and make the country safe for respectable music.

What a high compliment to pay to the musical ideals of America! What an appalling reflection upon the nature of the music which at this time best suits the American!

The Carleton professor who declared that "jazz was the invention of idiots to amuse embeciles" came very close to the central fact. That professor down at Carleton, whatever he is a master at, it must be admitted he is a master of expression, for the accusation suits us to a fare-thee-well.

After listening to the soothing and gentle effect of the kind of music France is used to and to have Americans invade their fair land with laughing trombones, saws, traps, gallers and such musical contraptions common to jazzers who have for the past four or five years murdered our hearing and stifled our sense of the finer music, The Banner wonders why the French hadn't trained one of their famous "75's" on them long ago.

At least we have one consolation: Not all the candidates will be elected.

Advertising which chugs along day in and day out, fair weather and bad, in season and out of season, makes the big impression. The reason you don't know where General Villa is today is because his name isn't being advertised any more in the newspapers. Soon they'll lose track of you if you continue to stay in your hole. The only thing that will settle on your shelves is dust, and the only thing that will enter your door is the lazy afternoon sun.

Goodridge again distinguishes itself, says J. H. Hay, by having more boys than girls in its graduating class. What the girls lack in numbers, he said, they will undoubtedly make up in quality. To which we would add: And in good looks.

The late Theodore Roosevelt once said: "If any candidate for office makes a pre-election pledge to you that he doesn't fulfill, hunt him out." And the ballot makes a mighty good weapon on election day. In fact, it's the only one you've got, so make your aim straight.

Why do we have weed inspectors? Because we have weeds to inspect. If we didn't have weeds to inspect, we would have something else for them to investigate. Therefore why not let weeds answer the purpose?

Perhaps the reason why there are so few of us who don't climb the ladder of fame is because we commence to get dizzy with success before half way up.

Things You Want

There is usually quite a gap between the things you WANT and the things you GET. One reason we do not get all the things we want is because we do not want them hard enough.

The things you really want and bend every energy to attain, are usually secured. Work, plan, save and see if our prediction is not true. Above all, put your savings in our bank where they will be secure. You will then get more of the things you really need. We will help you.

THE FRIENDLY BANK
FARMERS STATE BANK
of Goodridge

Political Announcement

(To be paid for at regular space rates by Fred D. Lorentson.)

FRED D. LORENTSON
—for—
REGISTER OF DEEDS

Worked as railroad laborer for several years and have followed the farming profession the last 10 years. My parents were among the pioneers, settling in Polk Centre Township over 40 years ago. I attended school in Thief River Falls and District No. 99. I wish to assure the voting public, ladies and gentlemen, that any consideration at the Primary Election June 19th will be heartily appreciated. If elected, a CLEAN OFFICE, COURTESY and EFFICIENCY will be my aim.

Political Announcement

(This space paid for by Elmer Ohm at regular space rates.)

I hereby announce my candidacy for the office of register of deeds of Pennington county, subject to the primaries held on June 19th. If nominated and elected I pledge my best efforts to a business like and efficient conduct of that important office.

Respectfully,
—ELMER OHM.

Political Announcement

(To be paid for at regular space rates by the undersigned candidate).

I hereby announce myself as a candidate for nomination to the office of register of deeds at the primary election to be held Monday, June 19th. I have resided in the county since 1904 and all my interests are here. For eight years I have served as a member of the board of county commissioners and for five years have been honored by my colleagues with the chairmanship.

In case of my nomination and election I promise to give the office my entire attention and will endeavor to serve the people efficiently and impartially.

I respectfully solicit your vote and support.

Yours for service and reliability,
OSCAR J. PETERSON.

Political Announcement

(To be paid for at regular space rates by the undersigned candidate).

To the Voters of Pennington County:

I hereby announce myself a candidate for the office of Register of Deeds of Pennington County, at the Primaries, June 19, 1922. If nominated and elected I can assure the public an accurate and efficient discharge of all the duties in connection with that office, having served for six years as Register of Deeds of Rolette County, N. D. With due respect for other candidates, I shall endeavor to carry on a clean and honest campaign.

Yours Respectfully,
T. O. STAGEBERG.

German Lutheran Church

Sunday, June 18, there will be German services at Germantown at 10:00. English services at Neptune at 8:00 P. M.—Rev. Lutz, pastor. During the absence of Rev. Lutz, who is to take his vacation, Rev. Kreidt of Thief River Falls, will hold services as follows: Sunday, July 2nd, services at Goodridge at 10:00 A. M. English services at Thorhult at 3:00 P. M. English services at Grygla at 8:00 P. M. July 23, German services at Goodridge at 3:00 P. M. Services in Goodridge will be held in the school house.

NOTICE

From now on the local banks will close their doors at 4:00 o'clock in the afternoon.

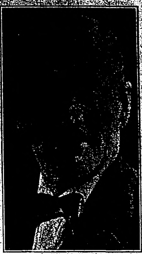
HE WILL BE AT
Goodridge, June 15

Political Announcement

(This notice to be paid for by N. J. Anderson at regular space rates.)



To the voters of Pennington county:

I am a candidate for re-election for Register of Deeds of Pennington county. During the years I have served the people of the county as Register of Deeds I have made many friends, but I am not asking support in the present campaign merely by virtue of this friendship. Rather I would have the voters consider my candidacy on a purely efficiency basis as the only proper method of electing officials to public office. In regards to fitness for the office of Register of Deeds, both as to honesty and capability, I prefer to rest my case with the people of Pennington county, whom I served in past years.

Yours respectfully,
N. J. ANDERSON.

Political Announcement

(To be paid for at regular space rates by the candidate whose name appears in the following advertisement).

To the Voters of Pennington County:

I hereby announce my candidacy for the office of sheriff of Pennington county, subject to the wishes of the voters at the primary election to be held on June 19, 1922. I was born and raised in Pennington county and have spent my entire lifetime here and consider that I recognize the needs of the community as well as any man. I spent more than 15 months in the United States Army, one year of which was overseas. I am well qualified for the important office that I seek and if elected I promise to give to it my undivided attention, and on that platform I ask the support of the voters at this time.

Respectfully,
A. W. CROWN.

(Prepared and ordered published by H. P. Rued, personal campaign committee for Geo. M. Gunderson, County Superintendent of Schools, candidate for re-election. Regular advertising rates to be paid.

George M. Gunderson

"GEORGE MADE GOOD"

To The Voters;

George promised enforcement of the school laws and school supervision. The first year of his term in office, livery rates as well as other things raised in price. His salary of $129.17 per month was not adequate to pay expenses of supervision and the support of his family. He had his salary reduced to $110.00 per month and the traveling expenses paid by the county. This shows his interest in our schools by a sacrifice in salary at a time teachers' salaries were increasing. He was offered a higher salaried position but declined the offer upon request of the rural school officers.

He promised the introduction of vocational training in our schools. Results: A Pennington County rural school girl won first prize at the state fair on a booklet on "Bread Making."

He promised organization of Boys' and Girls' clubs. Results: Every school has its "Little Citizens League."

He promised organization of school boards and teachers for better rural school co-operation. Results: Pennington County School Officers association, and Teachers' Progressive League.

"He stayed by us, let us stay by George."

Sincerely,
H. C. WOOLSON.

Political Announcement

(This space to be paid for by E. A. Mostue at regular rates.)

For Superintendent of Schools

To the voters of Pennington county:

The undersigned begs leave to announce his candidacy for the office of Superintendent of Schools for Pennington county.

I respectfully solicit the support of the voting citizenery, at the primary election, June 19th.

If nominated and elected, my aim, as ever, shall be efficiency and economy in the administration of our rural schools.

Yours respectfully,
E. A. MOSTUE,

Political Announcement

(To be paid for by the candidate at regular space rates.)

To the Voters of Pennington County:

I wish to announce that I am a candidate for the office of Superintendent of Schools of Pennington county. I was graduated from the State Teachers' college at Moorhead in 1914. I am 30 years of age and I have had ten years' of actual experience as a teacher in elementary and semi-graded rural schools. I served approximately one year in the United States army, nine months overseas. I have filed as a candidate for this office because I believe that I can give the people of the county real service and an efficient administration. I shall appreciate your vote and support at the primary election to be held on June 19.

Very respectfully,
O. R. SANDE,
Town of North.

Political Announcement

(Prepared by the candidate whose name appears below, for which the sum of $5 is to be paid.)

To the Voters of Pennington County:

I hereby announce myself as a candidate for nomination to the office of register of deeds at the primary election to be held Monday, June 19th, I have resided in the county since 1904, and all my interests are here. For eight years I have served as a member of the board of county commissioners and for five years have been honored by my colleagues with the chairmanship.

In case of my nomination and election I promise to give the office my entire attention and will endeavor to serve the people efficiently and impartially.

SOCIAL AFFAIRS

Mr. R. H. McDonald and Mrs. P. O. Tvedt delightfully entertained at cards at the home of the latter Wednesday evening in honor of Miss Vaughn who is leaving Goodridge this year to take up her duties as an instructor in the Thief River Falls schools, and Miss Teresa Giefer who is to become a June bride. The rooms were artistically decorated with yellow and green streamers, and a beautiful bouquet of American beauty roses formed a center piece on the dining room table. Progressive whist formed the diversion of the evening. Mrs. Morgan Vaughn carried away high honors while Sena Christianson drew the consolation prize. At 11:30 a very delicious lunch was served. Four tables were laid. A bouquet of yellow daisies formed a center piece for each table. The hosts and guests presented the guests of honor each with a silver spoon, as a remembrance of Goodridge, and a token of friendship and esteem. Those present were: Misses Teresa Giefer, Sarah Vaughn Hilda and Sena Christianson, Della Urdahl, Thelma Gilbertson, Joren Hegland, Eunice Tvedt, Messrs. Breen, Morgan Vaughn, Ferdinandson, Carl Christianson, V. C. McLeod, Ole Kirkelie and Theodore Tandberg.

* * *

Mrs. Carl Edseth entertained at a dinner party Thursday evening in honor of Miss Vaughn who left the employ of the Goodridge school. The guests were Miss Vaughn and Mrs. Ole Kirkelie.

* * *

Mrs. Carl Christianson was hostess at a six o'clock dinner Wednesday evening. Those present were, Miss Joren Hegland, Misses Hilda and Sena Christianson and Della Urdahl.

Highlanding Breakers

Mr. and Mrs. Andrew Ellingson and family were visitors at Erskine last Sunday.

Mrs. Oscar Hanson and Mrs. H. I. Finstad were shoppers at Goodridge Monday.

Mr. and Mrs. Cromston and family and Walter Johnson were out on a pleasant trip Sunday.

The meeting held in Highlanding Tuesday was well attended. The cars there numbered 123. Some very favorable discussions were given for both sides, but the majority of the farmers are very much against the drainage system, as the benefits derived from it would be few, if any.

Mr. and Mrs. Halvorson of Thorhult were visitors at the Sigerdson home last Sunday.

Mr. and Mrs. Anton Johnson were business callers at Thief River Falls last Friday.

"Derby" Anderson and "Herb" Hanson were among the people who attended the meeting at Highlanding last Tuesday. The boys, while there, tried their luck in fishing and succeeded in capturing two large pickerel.

Mr. and Mrs. Ernest Hedeen's are the proud parents of a twelve pound baby boy.

An interesting ball game was played in Goodridge last Sunday, Moylan vs. Highlanding. The scores were 9 to 7 in favor of Moylan. The Highlanding boys played fair and accepted defeat as gladly as victory.

ADDITIONAL LOCALS

Miss Edith Schei of Mavie was in Goodridge Tuesday on business.

Elmer was a business caller in Goodridge on Wednesday.

Carrie Urness who has been visiting with the Ole Prestobak family at Thorhult, returned to her home Monday.

N. J. Anderson and son, Kermit, of Thief River Falls were in Goodridge Saturday in the interest of Mr. Anderson's political campaign.

Miss Irma Johnson, Miss Ruth Soule Miss Velma Webster and Ed. Brevig all of Thief River Falls called at the Tandberg home Thursday evening.

Mr. W. J. LaBree and Leonard DuChamp were in Goodridge Saturday. Mr. LaBree acted as auctioneer for the Martin Olson foreclosure sale.

Olga Olson who has been teaching at Torgerson passed through Goodridge Saturday morning on her way to her home at Hazel.

Miss Theresa Wendt who has been visiting her sister, Mrs. Geo. Johnson, for the past week, left Saturday morning for her home at Holt.

Miss Thompson who has been teaching at Brenkeberg passed through Goodridge Saturday morning on her way to Thief River Falls.

Mrs. Wm. Holthuson of Thorhult, passed through here Saturday on her way to Thief River Falls, where she went for the purpose of receiving dental aid.

Mrs. Oscar Knutson and two children of Thief River Falls attended the graduating exercises here Thursday evening. Mrs. Knutson is Kathleen Lang's sister.

Mrs. Geo. Becker of Thief River Falls, who has been visiting with her daughter, Mrs. J. Gangness, since Saturday left Wednesday morning for her home.

J. McCann of the Farm Bureau of Thief River Falls brought Mr. J. H. Hay to Goodridge Thursday evening for the purpose of delivering the commencement address.

Among the Thief River Falls guests who attended the commencement exercises here Thursday evening were Mr. and Mrs. E. O. Mogensen and daughter, Janet, and Mr. C. L. Hansen.

MORTGAGE FORECLOSURE SALE

Notice is hereby given that default has been made in the conditions of a certain mortgage containing power of sale, executed by Tollef Loyland and Tina Loyland, his wife, mortgagors, to First State Bank of Thief River Falls, a corporation under the laws of the State of Minnesota, mortgagee, dated the 20th day of January, 1917, and duly recorded in the office of the Register of Deeds in and for Pennington County, Minnesota, on the 25th day of January, 1917, at 1:45 o'clock P. M., in Book 54 of Mortgages at page 297, which said mortgage was thereafter and on the 31st day of January, 1917, for a valuable consideration and by an instrument in writing, dated on that day, duly executed and acknowledged by said First State Bank of Thief River Falls, sold, assigned and transferred to Edwin White, which said written assignment was thereafter and on the 21st day of February, 1917, at 1:00 o'clock P. M. of that day duly recorded in the office of the Register of Deeds in and for Pennington County, Minnesota, in Book 56 of Mortgages on page 352 thereof, which said mortgage was thereafter and on the 4th day of May, 1917, for a valuable consideration and by an instrument in writing, dated on that day, duly executed and acknowledged by Edwin White sold, assigned and transferred to Gertrude M. Harlow by said Edwin White, which said written assignment was thereafter and on the 10th day of May, 1917, at 1:00 o'clock in the P. M. of that day duly recorded in the office of the Register of Deeds in and for Pennington County, Minnesota, in Book 56 of Mortgages on page 385 thereof, and at the time of this notice there is claimed to be due and is actually due on the said mortgage, according to the terms thereof, the total sum of Two Thousand and Thirty-one and 08-100 ($2,031.08) Dollars, on the note secured by said mortgage, consisting of the principal sum of Two Thousand ($2,000.00) dollars, and interest thereon amounting to the sum of Thirty-one and 08-100 ($31.08) dollars, which said default has continued to date by virtue of the failure and neglect of said mortgagors to pay said sums, although demand has been made therefore, and no action or proceeding having been instituted at law or other-wise to recover the debt or any part thereof secured by the said mortgage.

NOW, Therefore, Notice is hereby given that by virtue of the power of sale contained in the said mortgage and of the statute made and provided the said mortgage will be foreclosed by a sale of the mortgaged premises therein described at public auction, to the highest bidder for cash, at the main front door of the Court House in the City of Thief River Falls, Pennington County, Minnesota, on Monday, June 26th, 1922, at 10:00 o'clock A. M. of that day, to satisfy the amount that shall then be due on [illegible] and the costs and expenses of such sale and the sum of Seventy-five ($75.00) dollars Attorneys' fees as stipulated in said mortgage in case of foreclosure.

The premises described in the said mortgage and so to be sold is all that tract or parcel of land lying and being in the County of Pennington and State of Minnesota, described as follows, to-wit; The Northeast (NE¼) Quarter of Section Sixteen (16) Township One Hundred Fifty-three (153) [illegible] containing one hundred sixty (160) acres more or less according to the United States Government survey thereof.

Dated at Thief River Falls, Minn. this 3rd day of May, 1922.

GERTRUDE M. HARLOW,
Assignee of Assignee of Mortgagee.
G. HOWARD SMITH,
Attorney for Assignee,

The Mardi Gras Mystery

By

H. BEDFORD-JONES

Copyright by
DOUBLEDAY, PAGE AND COMPANY

The tale of a carnival joke that led to grim realities.

CHAPTER I.

—1—

Carnival.

Jachin Fell pushed aside the glass curtains between the voluminous overdraperies in the windows of the Chess and Checkers club, and gazed out upon the riotous streets of New Orleans. Half an hour he had been waiting here in the lounge room for Dr. Cyril Ansley, a middle-aged bachelor who had practiced in Opelousas for twenty years, and who had come to the city for the Mardi Gras festivities. Another man might have seemed irritated by the wait, but Jachin Fell was quite unruffled.

He had much the air of a clerk, His features were thin and unremarkable; his pale eyes constantly wore an expression of wondering aloofness, as though he saw around him much that he vainly tried to understand. In his entire manner was a shy reticence. He was no clerk, however; this was evident from his attire, He was garbed from head to foot in soberly blending shades of gray whose richness was notable only at close view. One fancied him a very precise sort of man, an old maid of the wrong sex.

Doctor Ansley, an Inverness flung over his evening clothes, entered the lounge room, and Fell turned to him with a dry, toneless chuckle.

"You're the limit! Did you forget we were going to the Maillards' tonight? However, we need not leave for fifteen minutes yet, at least."

Doctor Ansley laid aside his cape, stick and hat and dropped into one of the comfortable big chairs.

"You intend to mask for the Maillards'?" Ansley cast his eye over the gray business attire of the little man.

"I never mask." Jachin Fell shook his head. "I'll get a domino and go as I am. Excuse me—I'll order a domino now. Back in a moment."

Doctor Ansley followed the slight figure of the other man with speculative eyes. Well as he knew Jachin Fell, he invariably found the man a source of puzzled speculation.

During many years Jachin Fell had been a member of the most exclusive New Orleans clubs. He was even received in the inner circles of Creole society, which in itself was evidence supreme as to his position. At this particular club he was famed as a wizard master of chess. He never entered a tournament, yet he consistently defeated the champions in private matches—defeated them with a bewildering ease, a shy and apologetic ease, an ease which left the beholders incredulous and aghast.

With all this, Jachin Fell was very much of a mystery, even among his closest friends. Very little was known of him; he was a lawyer, and certainly maintained offices in the Maison Blanche building, but he never appeared in the courts and no case of his pleading was known.

Ansley knew him as well as did most men, and Ansley knew of a few who could boast of having been a guest in Jachin Fell's home. There was a mother, an invalid, of whom Fell sometimes spoke and to whom he appeared to devote himself. The family, an old one in the city, promised to die out with Jachin Fell.

Ansley puffed at his cigar and considered these things. Outside, in the New Orleans streets, was rocketing the mad mirth of carnival. The week preceding Mardi Gras was at its close.

Now, as ever, was Mardi Gras symbolized by masques. In New Orleans the masquerade was not the pale and pitiful frolic of colder climes, where the occasion is but one for display of jewels and costumes, and where actual concealment of identity is a farce. Here in New Orleans were jewels and costumes in a profusion of splendor; but here was preserved the underlying idea of the masque itself—that in concealment of identity lay the life of the thing!

When Jachin Fell returned and lighted his cigar he sank into one of the luxurious chairs beside Ansley and indicated a newspaper lying across the latter's knee, its flaring headlines standing out blackly.

"What's that about the Midnight Masquer? He's not appeared again?"

"What?" Ansley glanced at him in surprise. "You've not heard? Good heavens, man! He showed up last night at the Lapeyrouse dance, two minutes before midnight, as usual! A detective had been engaged, but was afterward found locked in a closet, bound with his own handcuffs. The Masquer wore his usual costume—and went through the party famously, stripping everyone in sight. Then he backed through the doors and vanished."

Fell pointed his cigar at the ceiling, and sighed. "Ah, most interesting! The loot was valued at about a hundred thousand?"

"I thought you said you'd not heard of it?" demanded Ansley.

Fell laughed softly and shyly. "I didn't. I merely hazarded a guess."

"Wizard!" The doctor laughed in unison. "Yes, about that amount."

"The Masquer is a piker," observed Fell, in his toneless voice.

"Eh? A piker—when he can make a hundred-thousand-dollar haul?"

"Don't dream that those figures represent value, Doctor. They don't! All the loot the Masquer has taken since he began work is worth little to him. Jewels are hard to sell. Of course, the crook has obtained a bit of money, but not enough to be worth the risk."

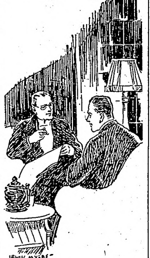
"Yet he has got quite a bit," returned Ansley thoughtfully. "All the men have money, naturally; we don't want to find ourselves bare at some gay carnival moment! I'd warrant you've a hundred or so in your pocket right now!"

"Not I," rejoined Fell calmly. "One ten-dollar bill. Also I left my watch at home. And I'm not dressed; I don't care to lose my pearl studs."

"Eh?" Ansley frowned. "What do you mean?"

Jachin took a folded paper from his pocket and handed it to the physician. "I met Maillard at the bank this morning. He called me into his office and handed me this—he had just received it in the mail."

Doctor Ansley opened the folded paper; an exclamation broke from him as he read the note, which was addressed to their host of the evening.



"Eh? A Piker—When He Can Make a Hundred Thousand Dollar Haul?"

"Joseph Maillard, President,
"Exeter National Bank, City.

"I thank you for the masque that you are giving tonight. I shall be present. Please see that Mrs. M. wears her diamonds—I need them.

"THE MIDNIGHT MASQUER."

Ansley glanced up. "What's this—some hoax? Some carnival jest?"

"Maillard pretended to think so." Fell shrugged his shoulders as he repocketed the note. "But he was nervous. He'll have a brace of detectives inside the house tonight, and others outside."

Ever since the first ball of the year by the Twelfth Night club this Midnight Masquer, as he was termed, had held New Orleans gripped in terror, fascination and vivid interest. During the past month he appeared at least once a week, now at some private ball, now at some restaurant banquet, but always in the same garb: the helmet, huge goggles and mask, and leathern clothes of a service aviator. On these occasions the throbbing roar of an airplane motor had been reported, so that it was popular gossip that he landed on the roof of his designated victims and made his getaway in the same manner—by airplane. No machine had ever been seen, and the theory was believed by some, hooted at by others.

Doctor Ansley glanced at his watch, and deposited his cigar in an ash tray.

"We'd best be moving, Fell. You'll want a domino?"

"I ordered one. It'll be here in a minute."

"Do you seriously think that note is genuine?"

Fell shrugged lightly. "Who knows? I'm not worried. Maillard can afford to be robbed."

"You're a calm one!" Ansley chuckled. "Oh, I believe the prince is to be there tonight. You've met him, I suppose?"

"No. Heard something about him, though. An American, isn't he? They say he's become quite popular in town."

Ansley nodded. "Quite a fine chap. His mother was an American—she married the prince de Gramont; an international affair of the past generation. De Gramont led her a dog's life, I hear, until he was killed in a duel. She lived in Paris with the boy, sent him to school here at home, and he was at Yale when the war broke out. He was technically a French subject, so he went back to serve his time.

"Still, he's an American now. Calls himself Henry Gramont, and would drop the prince stuff altogether if these French people around here would let him."

A page brought the domino. Fell, discarding the mask, threw the domino about his shoulders, and the two men left the club in company.

They sought their destination afoot—the home of the banker Joseph Maillard. The streets were riotous, filled with an eddying, laughing crowd of masquers and merrymakers of all ages and sexes; confetti swirled through the air, horns were deafening, and laughing voices rose into sharp screams of unrestrained delight.

At last gaining St. Charles avenue, with the Maillard residence a half-dozen blocks distant, the two companions found themselves well away from the main carnival throngs.

As they walked along they were suddenly aware of a lithe figure approaching from the rear; with a running leap and an exclamation of delight the figure forced itself in between them, grasping an arm of either man, and a bantering voice broke in upon their train of talk.

"Forfeit!" it cried. "Forfeit—where are your masks, sober gentlemen? This grave physician may be pardoned, but not a domino who refuses to mask! And for forfeit you shall be my escort and take me whither you are going."

Laughing, the two fell into step, glancing at the gay figure between them. A Columbine, she was both cloaked and masked. Encircling her hair was a magnificent scarf shot with metal designs of solid gold—a most unusual thing. Also, from her words it was evident that she had recognized them.

"Willingly, fair Columbine," responded Fell in his dry and unimpassioned tone of voice. "We shall be most happy indeed to protect and take you with us—"

"So far as the door, at least," interrupted Ansley, with evident caution. But Fell drily laughed aside this wary limitation.

"Nay, good physician, farther!" went on Fell. "Our Columbine has an excellent passport, I assure you. This gauzy scarf about her raven tresses was woven for the good Queen Hortense, and I would venture a random guess that, clasped about her slender throat, lies the queen's collar of star sapphires—"

"Oh!" From the Columbine broke a cry of warning and swift dismay. "Don't you dare speak my name, sir—don't you dare!"

Fell assented with a chuckle, and subsided.

Ansley regarded his two companions with sidelong curiosity. He could not recognize Columbine, and he could not tell whether Fell was speaking of the scarf and jewels in jest or earnest. Such historic things were not uncommon in New Orleans, yet Ansley never heard of these particular treasures. However, it seemed that Fell knew their companion, and accepted her as a fellow guest at the Maillard house.

"What are you doing out on the streets alone?" demanded Fell, suddenly. "Haven't you any friends or relatives to take care of you?"

Columbine's laughter pealed out, and she pressed Fell's arm confidingly.

"Have I not some little rights in the world, monsieur?" she said in French. "I have been mingling with the dear crowds and enjoying them, before I go to be buried in the dull splendors of the rich man's house. Tell me, do you think that the Midnight Masquer will make an appearance tonight?"

"I have every reason to believe that he will," said Jachin Fell, gravely.

Columbine put one hand to her throat, and shivered a trifle.

"You—you really think so? You are not trying to frighten me?" Her voice was no longer gay. "But—the jewels—if they are taken by the Masquer—"

"In that case," said Fell, "let the blame be mine entirely. If they are lost, little Columbine, others will be lost with them, fear not! I think that this party would be a rich haul for the Masquer, eh? Take the rich man and his friends—they could bear plucking, that crowd! Rogues all."

"Confound you, Fell!" exclaimed Ansley, uneasily. "If the bandit does show up there would be the very devil to pay!"

Some thrills await you in the next installment.

(TO BE CONTINUED.)

Pope's Good-by to Cardinal Gibbons.

I cannot help recalling an instance where a lady, a guest at the White House at luncheon, asked the late Cardinal Gibbons whether he really believed that the pope was infallible in all he said. The cardinal smiled and answered: "I can only respond to that, madame, by saying that when the pope bade me good-by the last time he said, 'Addio, Cardinale Jibbones!'"—Maurice Francis Egan in the Review of Reviews.

Circular Slide Rule.

A circular slide rule that can be carried in a coat pocket is the invention of a San Francisco man, a magnifying glass aiding in reading it.

POULTRY

STARVE MITES IN HEN HOUSE

In Tests Made Parasites Were Still Alive After 113 Days in Abandoned Building.

(Prepared by the United States Department of Agriculture.)

It takes several months to starve the mites in an infested chicken house after the poultry has been removed. In test made by the United States Department of Agriculture some mites were still alive after 113 days in an abandoned hen house. The nests indicated, too, that the mites live longer in damp locations than in very dry conditions, which accounts, in part at least, for the idea that mites are worse in damp, badly ventilated houses.

The only way to get rid of these pests is to break up their hiding places. Dust baths will not control them. Roosts should be taken down, and all unnecessary boards removed. In badly infested houses the mites are to be found everywhere, including the roof. For small coops a hand atomizer will do for applying insecticides such as sprays, but for larger houses a bucket pump, knapsack sprayer, or barrel pump is desirable. A rather coarse spray should be applied from all angles, and driven thoroughly into all the cracks. The floor also should be treated, as many mites fall to the floor when roosts are being removed.

Commercial carbolineum, which consists essentially of a high-grade anthracene oil, has proved very effective against mites. The killing power of this substance, which is derived from coal tar, lasts for several months, and mites which may be inclined to come in from other buildings are repelled for a long time. This material costs, ordinarily, $1 a gallon, but as its results are superior to those recorded with any other material, and the treatments required are fewer, its use is strongly advised.

Spraying Interior of Hen House for Mites.

Crude petroleum, while not so effective as carbolineum, retains its killing power for several weeks, and in most places is very cheap. Since it does not dry into the wood so rapidly it is more likely to soil the fowls and the clothing. Both of these materials can be sprayed better if reduced with kerosene at the rate of about 1 part of kerosene to 3 parts of the other materials. Both often contain foreign particles which should be strained before the spraying is begun.

It has been found that one spraying with either of these materials often will completely eradicate the mites, but ordinarily it is advisable to make a second application in a month, and in some cases a third treatment is needed. Poultry should be kept out of the houses until the material is well dried into the wood. It is advisable to spray or paint chicken coops a few days before putting broods of young chicks into them.

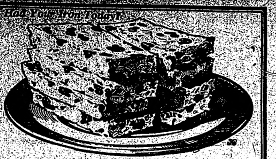
AVOID CROWDING OF CHICKS

Bad Practice With Fowls of All Ages, but Especially With Very Little Fellows.

Avoid overcrowding. It is bad practice with fowls of all ages, but especially with youngsters. Chicks with mother hens or in brooders often are crowded at night. When they get out in the morning most of them take cold and this often develops into roup, which is usually fatal in the case of young chicks.

Five Poultry Factors

There are five major factors in profitable poultry production, says N. E. Chapman, poultry specialist at University farm—breeding, feeding, housing, management and care. "These are the essentials; combined they will put the poultry business on a practical business basis," he says. "A start can be made with hatching eggs, day-old chicks or a few head of breeding stock of high production. The surest way to success is to grow into the poultry business."



Let's Have Raisin Bread Tonight

HOW long since you've had delicious raisin bread—since you've tasted that incomparable flavor?

Serve a loaf tonight. No need to bake it.

Just telephone your grocer or a bakery. Say you want "full-fruited bread — generously filled with luscious, seeded, Sun-Maid Raisins."

The flavor of these raisins permeates the loaf. A cake-like daintiness makes every slice a treat.

Serve it plain at dinner or as a tasty, fruited breakfast toast.

Make delicious bread pudding with left-over slices.

Use it all. You need not waste a crumb.

Raisin bread is luscious, energizing, iron-food. So it's both good and good for you.

Serve it at least twice a week. Start this good habit in your home today.

But don't take any but a real, *full-fruited genuine* raisin bread.

Your dealer will supply it if you insist.

Sun-Maid Seeded Raisins

Make delicious bread, pies, puddings, cakes, etc. Ask your grocer for them. Send for free book of tested recipes.

NATURALLY OBJECT OF ENVY

After All, What Is Power and Wealth Compared With Quality That Vincent Possessed?

Vincent wanted fame more than anything else when he was a young man, and he bent all his energies to attaining it; but though it came to many of his friends it passed him by.

Later, he thought that, after all, he would rather have money, for money could buy almost anything, but every venture that promised success turned out to be a failure. He became somewhat bitter, for money seemed to come of itself to others.

He had many friends who held corporations, titles, and in some cases almost the country, in their power. He looked on it in envy, for though he tried with every power within him, he could not make others follow, and his friends seemed to do it easily and naturally.

He hated women. But they followed him around. Everywhere he went some woman was sure to dog his footsteps.

And all the other men, who won other things in life, looked on in envy at the ease with which he won them.—Katherine Negley in Judge.

Freshen a Heavy Skin

With the antiseptic, fascinating Cuticura Talcum Powder, an exquisitely scented, economical face, skin, baby and dusting powder and perfume. Renders other perfumes superfluous. One of the Cuticura Toilet Trio (Soap, Ointment, Talcum).—Advertisement.

The Wrong Fighter.

Two small boys stood at Fifth avenue and Forty-second street yesterday afternoon, when a parade of soldiers was sighted.

"What's the big doin's?" asked one kid.

"They're givin' a parade fer Jeffries," replied the other.

"Aw, that guy can't fight no more," said the first.

And in a few minutes along came Marshal Joffre.—Pittsburgh Dispatch.

LADIES CAN WEAR SHOES

One size smaller and walk in comfort by using ALLEN'S FOOT=EASE, the antiseptic powder for the feet. Shaken into the shoes and sprinkled in the foot-bath, Allen's Foot=Ease makes tight or new shoes feel easy; gives instant relief to corns, bunions and callouses, prevents Blisters, Callous and Sore Spots.—Advertisement.

Better Pick 'Em Up.

W. T. Ellis, going west in Washington street, saw a hairpin on the sidewalk with the points toward him. He stopped and picked it up. Turning into Capitol avenue, he saw a horseshoe in the street. He picked it up. When he returned to his office a man gave him $70 that had been due for a long time.—Indianapolis News.

Moved.

Bob Newby, Mayor Lew Shank's chauffeur, was explaining the distance from Indianapolis to Columbus.

"It was about forty-three miles," he told the mayor.

"Was?" returned his honor. "Have they moved the town?"—Indianapolis News.

But He Was Wrong.

There is a good story told of the Aga Khan, the great Mohammedan potentate. He has a fine taste in champagne, and an Englishman, who was dining at the same house in Paris asked him how he, as an orthodox Mohammedan, could touch alcohol in defiance of the Koran.

"Oh," said the Aga Khan, "that is simple. I am a holy man, and when alcohol touches my lips it becomes water."

Some time later the prince was dining with the same Englishman, and the butler poured him out a glass of water, when he looked dubiously at it.

"I thought that if champagne, when it touches your lips, becomes water," his host remarked, "surely water would become champagne."

Getting It Straight.

He—So you have finally decided that you cannot marry me.

She—You are mistaken. I knew all along that I could marry you. What I've decided is that you cannot marry me.—Boston Transcript.

Have an Idea.

Adv.—"Wanted, an experienced designer to design latest designs for carpets for carpet factory." A trifle vague, but we think we understand what's wanted.—Boston Transcript.

COULD HARDLY STAND AT TIMES

Hips, Back and Legs Would Have That Tired Ache

Everett, Washington.—"For several years I have had trouble with the lowest part of my back and my hips and my legs would ache with that tired ache. I could hardly stand on my feet at times. I was always able to do my work although I did not feel good. I saw Lydia E. Pinkham's Vegetable Compound advertised and having heard several praise it I decided to try it. I feel first-rate at the present time. It has done wonders for me and I keep it in the house right along. I always recommend it to others who are sick and ailing."—Mrs. J. M. SIBBERT, 4032 High St., Everett, Washington.

To do any kind of work, or to play for that matter, is next to impossible if you are suffering from some form of female trouble. It may cause your back or your legs to ache, it may make you nervous and irritable. You may be able to keep up and around, but you do not feel good.

Lydia E. Pinkham's Vegetable Compound is a medicine for women. It is especially adapted to relieve the cause of the trouble and then these annoying pains, aches and "no good" feelings disappear.

It has done this for many, many women: why not give it a fair trial—now.

POWER IN THIS FLASHLIGHT

Continued Experiments Have Resulted in Development of a Really Remarkable Article.

From the pocket flashlight operated by two or three dry cells of minute size the battery searchlight has been steadily improved until remarkable results are obtained.

Some time ago there was devised a searchlight of 500 feet range operating on six or eight volts. More recently a battery searchlight has been introduced with a range of 2,000 feet up to half a mile, operating on six volts. Equipped with a seven and one-half inch adjustable focus, single shell reflector, on a recent photometer test one of these searchlights gave 453 candlepower.

The combination of a nitrogen-filled tungsten lamp and a correctly designed reflector has worked wonders for the battery-operated searchlight. —New York Herald.

For Falling Hair.

"My hair is falling out," admitted the timid man to the chemist's assistant. "Can you recommend something to keep it in?"

"Certainly," replied the obliging drug man, who had only recently left school. "Here is a nice cardboard box."—Pearson's Weekly.

Even the aristocratic passenger on a sleeping car doesn't object to a lowly berth.

RADIO

INSTRUCTIONS FOR TROUBLE SHOOTING

How to Detect and Remedy the Open Circuit, Short Circuit and Leakage.

Radio circuits are subject to the same ills that the ordinary power circuits are subject to. However, to cure them is not such a difficult task as might be supposed, especially if some logical procedure is used.

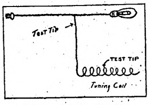
If a receiver is well put together in the first place and all contacts and other parts gone over once in a while, there is no reason why there should be any trouble. But the human being is prone to err, so that for the "once in a while" that is liable to happen, this article will be devoted to the explanation of what might happen to a simple receiver and the best way to fix it.

The usual troubles of the receiver fall under one of the following three headings:

1—An open circuit.
2—A short circuit.
3—Leakage.

An open circuit can most easily be detected by means of a series lamp. Nearly every one has available the ordinary 110 volt lighting circuit. Take an ordinary extension cord and cut one wire at any convenient place and use these two ends as test clips or tips. The extension cord is plugged into the house lighting circuit at any convenient outlet and when the two cut ends are held together the lamp will light as the circuit is closed. When the tips are held open the circuit is "open" and the light will go out.

Suppose it is desired to test for an open circuit in a tuning coil. Connect one tip to one end of the winding and the other test clip to the slider. As the slide is moved back and forth the light should remain lighted. If the light goes out at times there is an open circuit in the coil. If the light goes out when the coil is jarred the slider does not make good contact with the winding.



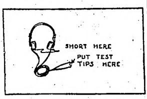
Testing the Tune Circuit.

If a buzzer and battery are available they can be used in testing for an open circuit in the same way that the lamp can be used. Connect the battery and buzzer in series with the test clips or tips and any low resistance circuit can be tested.

The ground connections can be tested with a buzzer and battery, but do not use the house-lighting circuit to test for grounds because one side of the lighting circuit is already grounded and if the other side were connected to the ground a short circuit would exist and an excessive current flow.

If the ground wire is connected to the water pipe, connect one test tip to the ground and the other to the gas pipe, which is also grounded. The buzzer should buzz if one has a good low resistance ground.

Leakage usually exists between the antenna and the ground. An antenna should be well insulated from its support. The lead-in should be brought down to the point where it enters the wall of the station in such a manner that when the wind causes it to swing, it cannot touch any grounded material, and that rain and snow cannot cause a path along which the current can ground. In bringing the lead-in through the wall, insulate it well and inside the station use as short a piece of well-insulated wire as is possible to make good connection with the set.



To Test Telephone Cords.

To test the continuity of the circuit of a pair of telephone receivers, touch the tips of the cord phone to the tongue. If the receivers are in reasonably good condition a slight click will be heard. If the response in one receiver seems to be weaker than that in the other, examine the diaphragm of the receiver giving the weaker response and see if it is bent toward the pole piece. Try tuning the diaphragm over if such is the case. Be careful when the diaphragm of a receiver is removed that the leads of fine wire from the magnet spools to the connection blocks do not become broken in handling.

If the continuity of the circuit of a pair of telephone receivers is checked and no response is heard when the cord tips are touched to the tongue, try checking each receiver of a double head set separately.

The two receivers are connected in series and to check either one separately, short circuit the tips of the cord leading to the other receiver just outside of the case. Should it appear that there is an open circuit in the cord, short circuit both receivers where the cord enters the case and with a buzzer or lamp connected to the tips on the end of the cord test for an open circuit.

Care should be exercised by the operator when adjusting a crystal detector to see that his fingers do not touch the surface of the crystal or the contact point of the little spring. The oil secretion that exists in the skin together with the dust that it collects will render a crystal detector inoperative by the insulating film that it will cause to form on the portion of the crystal surface that is touched. Should the surface of the crystal get dirty as evidenced by the received signals becoming weaker and weaker, try cleaning the crystal with alcohol and a little brush. Or if this does not seem to remedy the trouble, chip off old surface so that an entirely new surface is presented to the spring.

TIPS TO THE RADIOIST

The higher the aerial the stronger the signals. An increase of five to ten feet in the height of the flat top aerial will increase signals.

Addition of a variable condenser to the secondary or to the primary of a loose coupler often helps to tune out the undesired signals.

The sliders on tuning coils often make poor contacts with the slide rod. Thus much of the signal strength is lost. You can overcome this by soldering a flexible wire to the slider.

Increase length of spreaders of two, three or four-wire aerials from six to ten feet for best results. Each wire should be from four to six feet from its neighbor. Two wires one or two feet apart are no better than one wire. Likewise four wires on short spreaders are no better than one wire.

AMATEURS SHOULD PLAY FAIR

Radio Inspector Schmidt Urges That They Learn the Laws and Regulations.

Nine out of every ten radio fans are good sports, but the tenth is either a fan with poor judgment or a "rotter." It is up to the amateurs to see that restrictions are not imposed upon them, by playing fair, says Radio Inspector L. R. Schmidt of the Ninth district.

This can be done by observing certain cautions and by becoming posted on the radio laws and regulations. A copy of these regulations may be obtained from the superintendent of documents, government printing office, Washington, D. C., for 15 cents. It is worth while to spend 15 cents in order to be a "square shooter" in the radio game.

The great trouble with amateurs is that when they want to send a message around a corner they put on all the power they have with the hope that some one in Texas might pick up their message. The object should be to use the minimum amount of power to get the message to its destination.

"In all circumstances, except in case of signals or radiograms relating to vessels in distress, all stations shall use the minimum amount of energy necessary to carry out any communication desired."

Amateurs should keep their wave length to 200 meters.

They should use a "pure wave" or, as the regulations state, "if the sending apparatus is of such a character that the energy is radiated in two or more wave lengths, more or less sharply defined, as indicated by a sensitive wave meter, the energy in no one of the lesser waves shall exceed 10 per centum of that in the greater."

The wave must be "sharp." As to this the regulations state: "At all stations the logarithmic decrement per complete oscillation in the wave trains emitted by the transmitter shall not exceed two-tenths when sending distress signals or signals and messages relating thereto."

Amateurs frequently are at fault in calling stations too often. The law states that they can call three times, send "d e" once and sign their station call three times; but often the amateurs will send the calls a dozen or more times.

HOW TO GROUND AN AERIAL

If Properly Done It Really Protects the Property From Lightning.

Generally speaking, aerials do not attract lightning, but they do store up atmospherical electricity, and, of course, this condition does create a hazard. However, when the aerial is properly grounded it then acts as a lightning rod and really protects the property from this electrical hazard.

Briefly, the fire underwriters require that the aerial be grounded when not in use by a copper wire no smaller than B. S. Gauge No. 4 or larger, and run said wire as directly as possible to the outside ground.

This means that water, gas or steam pipes inside the property cannot be used for a lightning ground, because if ever this ground was called into service there is a possibility that fire and loss of life may result. So do not use inside grounds for lightning protection.

SCIENCE ON FARM

Agriculturist of Today Must Know Business Thoroughly.

Canadian Tillers of the Soil Have Proved That Old Days of Haphazard Methods Have Gone.

Agriculture in Canada has the status of a profession which both its high standard of operation and the prime place it occupies in national life justify. The days when land was casually filed on and farmed without any intelligent understanding of agricultural processes are going with the dwindling availability of the land, and rapidly passing is the epoch of the destruction of soil values, and the abandonment of farms which have been rendered unproductive. Clearer and clearer has become the realization that farming is a specialized profession requiring special training, and in the place of this spoliation there is an intelligent system of crop rotation, preservation of the virtue of the land, a discovery of the nobility of the farmer's calling and a determination to secure and achieve the best possible in everything.

The Education of the Farmer.

Agricultural colleges, experimental farms, government literature, railway propaganda, all in an appreciation of the national benefits which accrue, contribute to the education of the farmer who, if he starts out in ignorance, speedily discovers the futility and profitlessness of continuing in this state. It is only of comparatively recent years that farming in Canada has become the comprehensive and exhaustive study it is and its tenets been so widely absorbed, and older farmers who have followed haphazard methods or systems scientifically unsound are gradually forced from necessity into an intelligent study and application of their profession.

This brings us to the city man who is anxious to leave his old life for the greater freedom of the country and take a farm for himself, and, the foregoing holding good, he need not follow far behind the older farmer if he take up the study of his work seriously, bring energy and intelligence to bear upon a following out of the systems of experienced and successful agriculturists, and utilize the results of the expert investigation and research the Dominion places at his disposal. The whole country is working for him and the novice has almost an equal opportunity with the farmer of a lifetime.

A census of Canadian farmers would probably show that fully one-half are not farmers' sons and were not brought up to the life of the farm. Yet none would criticize Canada's farmers on the score of poor farming methods in general, the excellency of their crops with international honors and the universal demand for their live-stock products refuting this effectually. Significant is it, too, that practically all the farmers who have achieved the most signal honors at international farming competitions have not been lifelong farmers, but city men who, taking to the land after reaching maturity without the remotest previous knowledge of agricultural activities, have through intelligent study and close application of the best farming methods surpassed the efforts of those agriculturists who have continued doing things on the farm in the way their fathers used to do them.

For further particulars, pamphlets regarding Canada, railway rates, etc., apply to W. E. Black, Equity Bldg, Fargo, N. D.; K. Haddeland, Park Hotel, 106 Central Ave., Great Falls, Mont.—Advertisement.

GUARDS WOOL FROM MOTHS

New Preparation Said to Preserve the Fabric From Depredations of the Pests.

A preparation has been discovered in Europe which, it is claimed, makes wool immune from the ravages of moths. It is in the form of a powder, which, before it is applied, is mixed in water with a small quantity of sulphuric acid for all-wool goods, formic acid being used for half-wool.

The wool itself is said not to be affected by the application, and only a few colors, very slightly. In case no alkalies are brought into contact with it the wool remains moth-proof when washed. Tests made with two pieces of wool cloth exactly alike, in which moth eggs were placed, resulted, in the course of six months, in the entire disappearance of the untreated fabric, whereas the wool which had been treated remained intact.

Next Case.

Judge (trying liquor case)—What is the next case?

Clerk (absently)—Scotch, your honor.

"Sap is running in the baseball bats." "Been running a long time in the golf clubs."

CAN NOW WALK AS WELL AS EVER

Esteemed Lincoln Resident Declares Tanlac Has Made a Clean Sweep of Her Rheumatism and and Other Troubles.

"I couldn't believe all they said about Tanlac until I tried it myself, and now I never doubt what I read about it," said Mrs. Anna B. Crawford, 2500 N. 23rd St., Lincoln, Neb., wife of a well-known retired business man.

"I got into a badly run-down condition," she continued, "and suffered greatly from indigestion. I had headache for days at a time, slept poorly and woke up mornings so weak and dizzy I could hardly get up. Then rheumatism set in and made walking difficult and I could scarcely use my arms for the pain.

"But Tanlac has made a clean sweep of my troubles, brought back my appetite and enabled me to gain much weight. It is a pleasure to make a statement in praise of this great medicine."

Tanlac is sold by all good druggists.

Established a Record.

An Irishman, who was to return to his native land by a certain steamer, arrived on the pier just as the vessel was starting—in fact, she was already on the move.

Taking a flying leap, he covered the intervening space of six or eight feet at a bound, but tripped on alighting and hit his head, temporarily stunning himself.

When he recovered his senses, the vessel was a couple of hundred yards out at sea.

"Be jabbers!" he exclaimed, not realizing what had happened, "what a jump."

They'd Met.

Church was over, the congregation filed slowly out and gathered in little chattering groups in the churchyard.

Presently the vicar came up and joined a select little party. He introduced an old sea captain to the leading light of the village, a wealthy Mr. Smith.

"You must have seen each other in church today," said the beaming vicar.

"Sure," said the old salt. "'E was sleepin' in the next bunk to me."—London Answers.

To please others an artist must first please himself—but he must be hard to please.

Baby Specialists.

THAT there are Physicians who specialize on Infant ailments you know. All Physicians understand Infant troubles: all Physicians treat them. It is his profession, his duty, to know human ills from the Stork to the Great Beyond.

But in serious cases he calls in the Specialist. Why? He knows as every Mother knows, or ought to know, that Baby is just a baby, needing special treatment, special remedies.

Can a Mother be less thoughtful? Can a Mother try to relieve Baby with a remedy that she would use for herself? Ask yourself; and answer honestly!

Always remember that Baby is just a baby. And remembering this you will remember that Fletcher's Castoria is made especially for Infants and Children.

Children Cry For
Fletcher's
CASTORIA

The False and the True.

Advertising by the use of large space, the expenditure of huge sums of money have placed on the market, have put in *your* home, perhaps, many articles that today have been discarded, as you will readily admit.

Do you recall anything that has more modestly appealed to the public than has Fletcher's Castoria: modest in all its claims, pleading at all times—and truthfully—for our babies?

The big splurg, the misleading claims may win for a time, but the honest truth-telling advertiser is like the old story of the tortoise that beat the hare.

Mothers everywhere, and their daughters, now mothers, speak frankly, glowingly, enthusiastically in praise of Fletcher's Castoria. Speak of it lovingly as a friend that has brought comfort, cheer and smiles to their little-one.

To them: to these true mothers no argument can induce them to set aside their bottle of Castoria, their old friend, that they might try even another and unknown remedy for babies. Then, would YOU think of going to YOUR OWN medicine chest to find relief for Baby's troubles? Can you not separate the false from the true?

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

GENUINE CASTORIA ALWAYS
Bears the Signature of
Chas. H. Fletcher.

Mrs. Elmer Peterson was a visitor in Goodridge Friday.

Dr. Mellby made a professional call in Goodridge Saturday.

J. A. Sundquist and family drove to Highlanding Sunday.

M. G. Thoreson and family drove to Thief River Falls Thursday.

Martin Sande of Grygla was in town Thursday attending to business.

Donald Stein of Thief River Falls arrived in Goodridge Wednesday afternoon.

Mrs. Julia Gebhardt went to Thief River Falls Thursday on a shopping trip.

Rev. Larson of Thief River Falls was in Goodridge Wednesday to meet with his confirmation class.

E. A. Mostue of Thief River Falls was in Goodridge Thursday in the interest of his political campaign.

Frances Burns of Thief River Falls was in Goodridge on business Thursday.

The Bescanson and Kusmac families attended the graduating exercises at Thief River Falls Friday evening.

A. W. Crown was a Goodridge caller Monday. He was here in the interest of his political campaign.

H. B. Rockne, Mrs. J. Payne and Miss Gladys Wilson drove to Thief River Falls Wednesday evening.

Ole Prestobak and family of Thorhult were in Goodridge Monday evening on business.

Mr. and Mrs. Bert Geerling living east of Goodridge were shoppers in Goodridge Thursday.

Ed. Singer and son of Erie were business callers in Goodridge Saturday.

Mr. and Mrs. W. L. Hall and daughter visited at the Sundquist home Saturday evening.

Peter Giefer of Thief River Falls called at Goodridge Friday. He took his daughter, Teresa, home with him.

Peter Engelstad of Thief River Falls, was in Goodridge Friday in the interest of the local creamery.

B. O. Norby attended Graduating exercises at Thief River Falls Friday evening.

E. M. Stanton was in Goodridge Saturday in the interest of his political campaign.

Miss Sarah Vaughn left for Thief River Falls Saturday morning, after a successful school year here.

Mrs. Breen left Friday evening. She will visit friends at Ulen, Minn., before she goes to her home at Duluth.

Mr. and Mrs. F. B. Robinson and son, Frances, of Kratka were in Goodridge Friday attending to shopping.

L. R. Johnston and Isaac Halseth of Thief River Falls were in Goodridge Saturday on business.

Mrs. Soren Hermanson of Reiner went to Thief River Falls Friday to shop.

Peter Lovely and family of Erie, attended the graduating exercises here Thursday evening.

Andrew Trovaton of Thief River Falls attended graduation exercises here Thursday evening.

J. Payne and family accompanied by Alice Swanson drove to Highlanding Sunday evening.

Rev. Giles and Rev. Bridge held services at the school house Sunday morning. Rev. Bridge delivered a very fine sermon.

E. K. Aasen of the Oen Mercantile Co., of Thief River Falls was in Goodridge Thursday attending to business matters.

Mr. and Mrs. Osmund Urdahl and Mrs. A. McLeod and son, Stewart, drov to Thief River Falls Wednesday evening.

Alfred Vigenstad of Pelican Rapids arrived in Goodridge Monday via auto. He is attending to his farm interests west of town.

Mr. and Mrs. G. C. Gulrud were called to Fosston Friday by the serious illness of Mrs. Gulrud's mother, Mrs. O. Peterson.

J. Aga of Thief River Falls drove to Goodridge Monday morning for the purpose of taking home articles which he has purchased at the Martin Olson auction sale on Saturday.

J. Maney and G. Struber of Grygla drove to Thief River Falls Tuesday each with a truck load of butter. Mr. Struber returned the same day, and Mr. Maney returned on Wednesday.

Mr. and Mrs. Dr. Spink, Miss Agnes Bakke and Henry Wendt all of Middle River visited here Sunday with the latter's sister, Mrs. George Johnson. They also visited at the Theodore Tandberg home.

Mr. and Mrs. P. O. Tvedt and son, Earl, also Eunice Tvedt and Mrs. Tvedt's mother, Mrs. Rustad visited at the home of Ole Strande east of Oklee on Sunday. Mrs. Strande is Mrs. Tvedt's sister.

Mrs. J. P. Jensen and son, Raymond, also Mr. and Mrs. Beithon, left Saturday morning by auto for Brookings, S. D., for a visit. Mrs. Jensen and Raymond are expected home some time the latter part of this week.

Louise Besancon and Elizabeth Johnson who have been attending high school at Thief River Falls the past year passed through here Saturday evening on their way to their respective homes southeast of Goodridge to spend the summer with their parents.

Mrs. Ronkin and daughter, Esther, were shoppers in Goodridge Tuesday.

Julius Groeger of Thief River Falls visited in Thief River Falls Wednesday.

Thelma Gilbertson was a shopper in Thief River Falls Monday. She returned the same day.

Mrs. E. M. Bennes and Mrs. O. D. Ostby of Thief River Falls were guests at the Thoreson home Sunday.

Esther Bennes of Thief River Falls is spending a few days visiting at the Thoreson home.

Stewart McLeod visited at the Toomey farm near Thief River Falls Sunday.

Miss Christina Bundhund was a shopper in Thief River Falls Wednesday.

Mrs. L. P. Poppenhagen's mother and brother from Holt visited with the Poppenhagen family over Sunday.

Mr. and Mrs. V. C. McLeod attended the Guernsey picnic near Thief River Falls Thursday.

Dr. Larson, eye specialist, who has spent several days in Grygla passed through Goodridge Tuesday on his way to his home at Bemidji.

Peter Hoium of Thief River Falls passed through Goodridge Wednesday morning on his way to visit his daughter, Mrs. Ole Quam, near Goodridge.

Mr. and Mrs. Anton Lien and family left Tuesday for an extended vacation by auto. They expect to visit friends and relatives in South Dakota.

Harry McDonald went to Thief River Falls Tuesday morning to receive dental aid. He returned the same afternoon via Electric line.

John Nystul visited with his parents near Grygla over the week-end. He returned Monday morning accompanied by his sister, Anna.

John Nystul and B. O. Norby were in Thief River Falls on business Wednesday and Thursday. They also attended the Guernsey picnic.

Mr. McBrier of Grygla has sold his farm and is leaving for his old home in Ohion, where he will take care of his aged parents.

Mrs. Lea Babcock of Thief River Falls attended the commencement exercises here Thursday evening. She returned to Thief River Falls on Friday.

Emma, Agnes and Alfred Peterson of Sleepy Eye are expected to arrive at the Elmer Peterson home some time this week. They are driving across country.

Kathleen Lang left for Thief River Falls Friday afternoon, where she will visit with her sister, Mrs. Oscar Knutson, until Wednesday. She leaves Wednesday for Bemidji where she will attend summer school.

J. Payne drove to Warren on a business trip Thursday.

Carl Christianson drove to Thief River Falls on Thursday on business.

PETITION GOES FORTH IN HOPES OF SECURING MAIL ROUTE HERE

Believe Postoffice Department Cannot Longer Deny Proper Mail Delivery to Farmers Residing Near Goodridge in Face of Strong and Emphatic Appeal to Postal Authorities—List of 61 Names is Sent to Washington This Week Where But 60 Patrons Are Required to Secure Route.

In order that farmers residing east and southeast of Goodridge may be assured of better mail facilities than that now in operation and in order that the postal authorities will establish a route with headquarters in Goodridge, a petition of 61 names was this week sent in to the Third Postmaster General, asking that the proposed change be brought about as soon as possible.

As will be seen from the names contained in the petition, the various farmers at the present time live from one-fourth to five miles from the nearest route, and several of them who are entitled to rural free delivery service are taking their mail here rather than take advantage of the available facilities accorded them over the Torgerson route.

A total of 61 farmers ask for free delivery service over the proposed route, and it is thought that there are a score or two more who will later be patrons in the event that the route is established. Most of the signatories to the petition are farmers with families and it is fair to assume that there is an average of four or five patrons who will receive their mail at each mail box. For example, at the Elev Aakre farm there are five adults who would take their mail over the proposed route. Mr. Aakre is one of the strongest exponents of the proposed route and he considers the present system entirely unsatisfactory from various standpoints.

Says Mr. Aakre: "At the present time it required one week for me to secure a reply to a letter sent to Thief River Falls—three days going and three days coming this way. There is no reason why such a condition should continue and I know that there are many others in my predicament. We are going to see what can be done about the matter and I believe that when the postoffice department come to realize the unfairness of the situation, that they will provide a remedy."

A number of similar complaints have been heard from time to time during the past few years and it is thought that this latest petition will have good effect in that the postal authorities will undoubtedly consider that a real emergency exists and summarily take the matter up and provide the petitioners with the proper mail facilities.

The proposed route will assure all subscribers to The Banner of securing this newspaper on Friday morning of each week, whereas at the present time they must wait until Monday and sometimes Tuesday to learn of certain meetings and important notices of all kinds. By having a route out of Goodridge this contingency will be eliminated and The Banner will be of greater benefit to readers and advertisers alike.

The Banner herewith publishes the names of signers to the petition showing in some cases the distances from farm homes to mail boxes and how a number of them are served at the present time. Answers to the questionaire sent out from the department are also published. The question of whether or not intended patrons would erect an approved mail box in the event the route is established is answered by the entire number of signers answering in the affirmative.

The Questionaire

1. Has this change to your knowledge ever before been presented to the Department? No.
2. Are any of the petitions now served by rural or star routes from your office or from other offices? Served by Erie Route.
3. If so, state the names of such offices? Erie.
4. State the number of petitioners served by each route. 61.
5. State what distance each petitioner now resides from nearest route or post office. From ¼ to five miles.
6. What is the length of the entire route at present? 31 miles.
7. What will be the length of the entire route if changed as proposed? 31 miles.
8. How many families are now served on the entire route? 100.

Names of heads of families and distance from nearest Route:

Henry Rye; Martin B. Johnson; John Boorah; A. W. Hanson; S. O. Prestegaard; James Ramsey; Edwin Hanson; Elev Aakre; John O. Vraa; Thos. Aaberg; Theo. Hyland; J. M. McVay; Jerry Race; Martin Lai[illegible]n, two miles from nearest route; Christ Tangen; Hans C. Solberg; Joe Novak; E. K. Rime, one mile from nearest route; Art J. Baird, 1¼ miles from nearest route; P. C. Halvorson, five miles from nearest route; John M. Johnson, three miles from nearest route; Knute Shirley; Morgan Vaughn;, two miles from nearest route; Sarah E. Vaughn, two miles from nearest route; Albert Arnt; Andrew Wells, 2¾ miles from nearest route; J. A. McEnelly, one-fourth mile from nearest route; T. O. Berg; Elmer Vraa; Gustav Birknes; Alfred Olson, 1¾ miles from nearest route; H. M. Hohn, 1¼ miles from nearest route; Torjus Halvorson, 1¼ miles from nearest route; T. G. Jelle; Ole A. Olson; Ole E. Vraa; Gilbert O. Vraa, three-fourths mile from nearest route; Carl O. Wahlin; Jerry A. Race; Johan Erikson Udstrand, John J. Stenvik, 1½ miles from nearest route; G. M. Tanner; J. S. Miller; Mr. Johnsrud; Tom Belland; Even Grimeley, 1½ miles from nearest route; Andrew Iverson, 2½ miles from nearest route; Ellef Halvorson; Soren H. Hermanson; Oscar Stenvik, 1½ miles from nearest route; E. H. Brekken, 2½ miles from nearest route; Frank J. Race, one mile from nearest route; Sever Johnson; Mrs. Ole Quam; Victor Miliander; Theo. Nelson; John Markuson; Gunder Erickson; John Kusmak; E. H. Besancon; John T. Coan.

Miss Sarah Vaughn visited friends here between trains Saturday.

"YE GENUS BOY"

With Apologies to K. C. B.

DOWN AT LaPorte, Indiana
* * *
RIGHT ON Silver Lake
* * *
THERE is a wonderful, level plain
* * *
WALLED IN by wooded hills
* * *
AND HERE is Camp Roosevelt
* * *
NAMED after a great American
* * *
WHO LOVED boys and men
* * *
AND I think every red-blooded
* * *
AMERICAN BOY and his dad
* * *
SHOULD KNOW about this camp
* * *
FOR I WAS there last year
* * *
AND I SAW boys,
* * *
FROM everywhere in the U. S. A.
* * *
GROW TANNED and rugged and alert
* * *
UNDER regular army officers
* * *
AND picked high school teachers
* * *
FOR there is a summer school
* * *
AS YAU should know
* * *
AND CRACK athletic coaches
* * *
FOR THE boys swam and hiked
* * *
AND SANG and boxed and drilled
AND studied French and algebra
* * *
AND ATE, Gosh, how they ate
* * *
AND THEIR proud parents came
* * *
AND WATCHED and praised
* * *
MAJOR F. L. Beals
* * *
WHO IS a big man
* * *
AND KNOWS the boys' game
* * *
AND IS a human being
* * *
AND THIS year 1922
* * *
THE CAMP will be bigger
* * *
AND IT only costs a little bit
* * *
BECAUSE Chicago's Board of Education is back of it all
* * *
AND THE camp's not run
* * *
TO MAKE any money
* * *
BUT TO MAKE true Americans
* * *
SO I really think
* * *
EVERY BOY that you reach
* * *
SHOULD KNOW. Don't you?
* * *
YOU TELL 'EM!
* * *

"Yours for Better Boys,"
L. EWERTSEN.

LARGE CROWD AT PICNIC SUNDAY

E. M. Stanton and Gay Halvorson of Thief River Falls Talk

A benefit picnic was held at Highlanding Sunday afternoon. A very large crowd attended. A great many people were there from Thief River Falls and Goodridge.

E. M. Stanton was the speaker of the day. His talk was very interesting. He talked about farming in the early days, how it was done compared to the present day farming, also made a comparison of the cost of farming in those days and the present. Gay Halvorson of Thief River Falls talked, also Mr. Bjorneraa. Julius Olson of Warren was booked as the main speaker of the day, but for unknown reasons he was not present. Ice cream, sandwiches and coffee were sold from a stand. A pickup team played baseball with the Brunkeberg boys, which resulted in a score of 7 to 11 in favor of Brunkeberg.

A collection was taken up for Mrs. Gunderson who resides near Highlanding with her father, for her maintenance. Mrs. Gunderson is very needy and deserving of the kind act which was displayed at this gathering.

LUTHERAN LADIES' AID HOLDS ANNUAL MEETING THURSDAY

The Lutheran Ladies' Aid held their annual meeting last Thursday. The business which came up was the election of officers for the coming year. Mrs. M. G. Thoreson was elected president, Mrs. G. S. Gaudland vice-president, Mrs. Rev. Aakre secretary and Mrs. Albert Halvorson treasurer. No further business came up. After the business meeting Mrs. M. J. Stephenson and Mrs. Ole Kirkelie entertained the aid, proceeds of which was $12.20. which goes to show that an unusually large crowd was taken care of.

Mrs. Barney Baker and Robert Rudpreckt residing east of Goodridge were shoppers here on Saturday.

Albert, Emma and Agnes Peterson of Sleepy Eye, Minn., brother and sisters of Elmer Peterson, arrived here Wednesday evening and will spend a week visiting at their brother's home.

Mrs. K. Peake of Barnesville returned to her home Tuesday morning after having spent a few days visiting Mrs. Ole Kirkelie. Her mother, Mrs. Basgaard accompanied her as far as Crookston, returning here for a longer visit.

W. P. Rose and daughter, Mary, of Ayer, N. D., visited at the A. McLeod home over Friday and Saturday. They drove up for the purpose of attending the Guernsey sale at Thief River Falls Thursday. Mr. Rose is a Guernsey breeder.

James D. Medeck, J. W. Little and C. T. Lay of Pine Lake, Minn., were here over Sunday. They were on their way to their farming lands here. They have recently negotiated for two quarters of land. One quarter is located near Jelle, and the other one is located west of the old George Wold farm.

WOOL POOL AT 35-CENT MARK

Farmers' Agency Sells 1921 Stock at High Figure

Another bright spot appeared in the wool market this week.

The National Wool Department of Farmington announced the sale of its entire 1921 pool at prices based on 35 cents a pound for medium wools. A week before it had announced offers of 30 cents a pound, but stated that it was insisting on at least 32 cents. The sale of the entire 1921 pool on the 35 cent basis followed.

The National Wool Department at Farmington is one of three co-operative agencies endorsed by the Minnesota wool marketing committee, which was organized by the Minnesota Farm Bureau federation at the request of a conference of wool producers, to handle Minnesota's 1922 clip on the statewide pooling plan. The marketing committee was organized by the Minnesota Farm Bureau federation at the request of a conference of wool producers early this year. It unanimously recommended pooling of all Minnesota wool to take advantage of the rising market, strengthening of county wool growers' associations, and the organization of a state association in the autumn.

FRANK PITMAN MEETS WITH SERIOUS ACCIDENT

Frank Pitman residing a few miles from Goodridge met with a very serious accident a few days ago. He was in the barn attending to his chores when he was kicked by a horse. He was kicked against the side of the barn, and his chin was cut badly, Mr. Pitman was unconscious, for some time and does not know just what was the cause of the horses action, nor which horse it was that kicked him. He went to Thief River Falls for medical treatment, and is getting along nicely.

Elert Wiseth who has been in Thief River Falls a few days, returned to Goodridge Wednesday afternoon.

Ruth McDonald spent the week-end at the Ronkin home, the guest of Miss Esther.

Fred D. Lorentson of Black River was in Goodridge Wednesday in the interest of his political campaign. He is running for the office of register of deeds.

Mr. and Mrs. A. Erickson of Thief River Falls were in Goodridge on business Wednesday. Mr. Erickson represents the M. Giller Fur and Hide company of Crookston.

Victor Severson and sister of Pelican Rapids passed through town Wednesday evening en route to their home at Grygla, after having spent a few days visiting at the Otto Lee home.

Mr. and Mrs. H. A. Halvorson, also son, Alvin, and daughter, Florence, drove to Fargo and Moorhead to spend the week-end. They returned Sunday, bringing their son, Harry, back with them, who has been attending normal at Moorhead.

FRANK JEFFERS IS SPEAKER AT GRYGLA

Urges Co-operation Breeders in Dairying Industry

The Grygla Community club held its monthly meeting last Sunday afternoon, which was in the form of a community picnic. This meeting was well attended, and the large crowd showed a great deal of interest and spirit along community lines. The balance of the meetings this season will be held in the form of a picnic, and will be held at the various farms in the community.

Frank Jeffers of Red Lake Falls was the main speaker of the day. His talk covered many subjects, and was very interesting and well received by its audience. He spoke at length to the Livestock Shippers association, urging them to increase their shipping of livestock. Mr. Jeffers has a large purebred herd on his farm near Red Lake Falls and when he talks livestock, he talks from actual experience. Mr. Jeffers laid a great deal of stress on co-operation, and showed what could be accomplished thereby.

J. H. Hay also spoke at length to the people. He congratulated them for living where they were and sticking to it as they have and on the wonderful progress they had made. He also talked along dairy lines, he told the Grygla people that they were in the dairy center and wonderful things could be done along those lines. Conditions in the northwest were right for dairying, where in other parts of the state they were not as good. In the southwest part of Minnesota the dairy people are compelled to send their cattle to St. Paul on account of the drought. He talked at length on the scrub cow, asking the people to dispose of them as readily as possible, and replace them with grades until they were able to replace the grades with purebreds. However, said Mr. Hay, the scrub cow has done her bit, and is still doing it, and should be considered where the grades and better stock can not be had. He stated that last year the scrub cows of Minnesota produced over $202.000.000, while all the mining industry in Minnesota produces only $170,000,000. This seems like a wonderful comparison. Mr. Hay visited the iron range last week and the mining districts of northern Minnesota, and had many very interesting facts to relate, even at this big figure, Mr. Hay says get rid of the scrub cow as soon as possible, and put in its place grades, replaced by better grades each year, until at last you have a purebred herd.

After the program a lunch was served which was prepared and brought by the ladies of the community.

REINER LADIES' AID TO HAVE ANNUAL AUCTION SOON

In the near future the Reiner Ladies' Aid society will hold their annual auction sale. The place and the date of the sale have not been fully decided upon, and will appear on the next issue of The Banner. This will probably be the third week in June, however.

FAMILY REUNION

The L. P. Poppenhagen home was the scene of a family reunion a week ago Sunday, when 29 relatives assembled to celebrate the occasion. The guests were from Holt, Thief River Falls and surrounding country.

SPLENDID PROGRAM AT COMMUNITY MEET

Last Meeting of Season Is Attended By Large Number

Last Thursday evening marked the event of the last Community club meeting of the season for Goodridge and surrounding country. In spite of the rain and bad weather a large crowd with the usual amount of interest and enthusiasm were present. A very entertaining program was prepared by a committee composed of Miss Thelma Gilbertson chairman and Della Urdahl. The Goodridge orchestra rendered two very pleasing selections. A quartette consisting of Misses Christina Bundhund and Carrie Urdahl, Henry Rockne and Mr. Gulrud sang "Home Sweet Home," accompanied by Miss Gretta Gulrud. Mrs. Theodore Tandberg gave a short reading, entitled: "Around the Corner." An octette sang a number of songs, this octette was made up of boys from out east, and was worthy of comment. They were very good. A dialogue was presented by Eunice Tvedt, Mrs. Josephson and Joe Christianson, entitled: "The Minister's Mistake," which added much humor to the program. Miss Myrtle Iverson sang two solos, which were very well received. The program committee is to be congratulated on their fine program, owing to the fact that they were so handicapped for material.

Mr. Berg who spoke at the Guernsey picnic and sale at Thief River Falls, and who is at the head of the livestock experimental station at Grand Rapids spoke at this meeting. His whole talk was based on livestock and dairying. He has a great deal to say for the purebred herd, and how to care for them to obtain the best results. At the conclusion a vote was taken by those who were present at the last three meetings to decide which of the three programs was the best. The first program given under a committee composed of Mrs. Carl Christianson as chairman, Miss Sarah Vaughn and Mrs. Kirkelie carried off the honors, which was responded to by a short speech by the chairman, Mrs. C. Christianson.

Goodridge Wins From Picked Aggregation

Goodridge won the baseball game played at Highlanding Wednesday when they met what was purported to be the Hickory Indians, but which in reality was a picked bunch of would-be baseball performers from Thief River Falls and elsewhere.

The game ended with Goodridge at the long end of the score, 16 to 6, and local batsmen pounded two opposing pitchers from the mound and ran the bases almost at will. On the other hand, the local team had everything almost their own way and their opponents were powerless to make a showing against them. It is thought that some sort of a return game will be played in Goodridge some time in the near future.

Mr. and Mrs. V. C. McLeod and daughter, Beth, and Mrs. R. H. McDonald spent Thursday in Thief River Falls shopping.

Mrs. P. O. Tvedt and son, Earl, visited at the home of Mrs. Tvedt's parents at Highlanding several days during the latter part of the week.

NEWS REVIEW OF CURRENT EVENTS

Railway Shopmen Taking Strike Vote Because Their Pay Is Cut $60,000,000.

WALKOUT MAY BE AVOIDED

Supreme Court Deals Organized Labor Severe Blow—France's Refusal to Reduce Reparation Blocks German Loan Plans—Radical Republicans Win Victory in Iowa Primary Election.

By EDWARD W. PICKARD

ABOUT $60,000,000 having been lopped off their yearly pay by the federal railway labor board, the railroad shopmen are taking a vote returnable on June 30, on the question of accepting the reduction or going on strike. The maintenance of way men, whose annual wages were cut some $50,000,000, also are taking a strike vote.

Thus, apparently, the country faces a strike, probably effective in the middle of July, that might come near to tying up its rail transportation. But there is hope that it will not eventuate. An affirmative strike vote and an actual strike are different things, and the vote is but seldom used only as a weapon in the hands of union officials in negotiating. Railroad executives profess to believe that the men will not even vote to strike. A committee of six rail presidents issued the following statement:

"There is no talk of strike among the men," the statement says. "The disturbing statements are prepared by leaders of the unions, whose viewpoint has been distorted by months of efforts before the board to resist the inevitable downward trend of wages. The employees are in the main sincerely interested in taking care of their jobs and their homes, and few employees in any industry have more good reasons for doing so.

"The records show that the proposed scale of wages for the classes of employees involved in the two wage reduction orders already issued practically would restore the scale in effect at the end of federal control in 1920, which carried an increase for these employees of 119 per cent over the wages paid in 1916. The cost of living, as shown by the Department of Labor for March, 1922, was 42 per cent above 1916."

On the other hand, B. M. Jewell, head of the railroad employees' department of the American Federation of Labor, says: "The new wages do not permit a minimum living wage, and they are wholly at variance with the saving wage championed by President Harding and Secretary of Labor Davis." Mr. Jewell and other union chiefs who were in conference in Cincinnati predicted that unions with a membership of 1,200,000 would vote to strike.

Just as in the last previous wage decision by the board, the three labor members dissented, and this time they were especially vigorous in their dissenting opinion.

While the rulings of the railway labor board are professedly being made quite without regard to the rulings of the interstate commerce committee in the matter of rates, the two cannot be disconnected in the public mind, and the railway executives also couple them, naturally.

UNION labor received what it considers another body blow last week in the decision of the United States Supreme court in the Colorado coal mine case. The United Mine Workers of America and certain individuals had appealed from a decision by the United States District court of Arkansas, approved by the Circuit Court of Appeals, holding them guilty of violating the Sherman antitrust act during a strike in 1914, and imposing damages of $200,000, which was trebled under the antitrust law. The opinion of the United States Supreme court, read by Chief Justice Taft, in effect sets aside the damages, finding the acts which caused the destruction of property were not incited for the purpose of restraining interstate commerce. But the court also held that labor organizations, even though not incorporated, are not only suable, but are amenable to the Sherman antitrust law, and under it may be prosecuted for restraint of interstate commerce.

Samuel Gompers, as might be expected, denounced this decision bitterly, saying that it set a precedent under which capital "can impose any condition on the working people of the country, and they would not dare resist." He declared he believed congress and the people of the United States would repudiate the ruling, and continued: "The court has, for the first time in the history of federal legislation, laid down the principle that a voluntary corporation is liable for damages by any act of one or a group of its members, no matter how far unrelated they may be in distance or supervision."

Unless it is nullified by congressional legislation, this decision of the highest court in the land will powerfully and widely affect the future relations of union organizations with employers and with the general public.

BRITISH, Italian and Belgian members of the reparations commission voted to enlarge the international committee of bankers that was trying to adjust Germany's financial affairs and to permit it to make its own inquiry into Germany's capacity to pay, ignoring the London schedule. America's unofficial delegate, Roland W. Boyden, though he could not vote, stated that he considered the reparations demanded—$33,000,000,000—to be too high. France's representative, however, voted in the negative. This created a tense situation, for although a unanimous vote is necessary for the reparations commission to reduce the sum demanded from Germany, until 1926 only a majority vote is needed to give Germany a partial or full moratorium.

The bankers, recognizing that unanimity does not exist among the nations that would be expected to participate in the immense loans they were planning for Germany, decided to give up all idea of an international loan, and so reported to the reparations commission.

Premier Poincare and President Millerand—who, it may be said, are backed up completely by their government—asked a special meeting of the commission, and to it the statement was made that France denied the right of other allies to reduce the French claim on Germany since the amount of reparations has been fixed and apportioned; and that the French government would not consider reduction of the reparations unless the war debts were reduced proportionately. The latter proposition, of course, would put the matter up to the United States, which up to the present has shown no disposition to scale down the vast amounts owed her by other nations. Meanwhile there hangs over Europe the menace of independent action by France against Germany.

EXASPERATED by the continual and increasing warfare in Ireland between the Sinn Feiners and the Ulster folk, the British government has undertaken to resume control of the situation. Large reinforcements were sent to the troops already in the island and vigorous attacks were made on the republicans who infested the border and regions adjacent. The British used airplanes and small war vessels with telling effect. The Free State leaders and the British government are discussing changes in the Irish constitution which the latter demands, and both sides are awaiting the Dail elections, which come on June 16. It has been surmised that the De Valera faction might win more seats because of the bitter feeling aroused by the fighting, and indeed it was intimated that the fighting was instigated for that purpose.

SOVIET Russia, having failed to frighten the rest of the world into giving it large credits, has resumed its old uncompromising attitude. Foreign Minister Tchitcherin, who says he is not going to the conference at The Hague, declares Russia will not recede one step from its May 11 memorandum, which disrupted the Genoa confab. It will make no more concessions, he asserts, and rejects America's demands for additional guarantees as the price of recognition. He said America would recognize the futility of her policy, and then launched into an attack on Charles R. Crane and others whom he accused of assisting the counter-revolutionary movements.

Persistent reports come from places near Russia to the effect that Premier Lenin is a desperately sick man. His physicians have issued a bulletin stating that he suffered an acute attack of gastritis, which affected his nerves and heart, but that he is now well on the road to recovery.

THE cabinet in Japan has resigned, owing to opposition in the parliament. But the privy council has decided that this does not affect the treaties and agreements signed at the Washington conference, these being international in character and outside the sphere affected by a cabinet change.

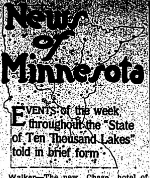
ALEXANDER, king of Jugo-Slavia, and Princess Marie of Rumania were married Thursday in Belgrade in the presence of representatives of nearly every nation in the world. The affair was marked by all the splendor and display of medieval times and the ceremony in the ancient Byzantine cathedral was followed by a great procession of quaintly clad deputations from the provinces, with wonderful floats and pageants. Ordinarily the marriage of royal personages excites only passing interest in these days, but this one is of more importance in that by it are linked the dynasties of three Balkan countries. It serves to strengthen the little entente, and possibly to lessen the danger of future wars in that long turbulent part of the old world.

PROGRESSIVES in the Republican party scored another victory last week in the nomination of Col. Smith W. Brookhart for United States senator from Iowa. Really this was a triumph for the radicals, for Brookhart is rated as more than a progressive. He is a former soldier and a lawyer, residing in Washington, Ia. It was necessary for him to obtain 35 per cent of the primary vote to obtain the nomination independent of the state convention. He got 41 per cent. Chairman McCormick of the Republican senatorial campaign committee says the committee "will join the national committee and the Republican state committee in Iowa to assure the election of Colonel Brookhart. Colonel Brookhart bears the reputation of a citizen of high purpose and high courage and had a fine record of service during the war."

AT LAST the senate has before it the soldiers' bonus bill, as drafted by the finance committee. Chairman McCumber's accompanying report placed the probable cost to the federal government at $3,845,659,481, spread over a period of 43 years from next January 1. The estimate is based on the theory that 75 per cent of the 4,458,199 veterans who would be eligible for compensation would elect the adjusted service certificate option; 22½ per cent farm, home and land settlement aid, and 2½ per cent vocational training aid.

With reference to financing the legislation, Senator McCumber's report said it was hoped that the reduction in governmental expenditures plus the payment of interest on the refunded foreign obligations would be sufficient to obviate the imposition of additional taxation.

LILLIAN RUSSELL—Mrs. Alexander P. Moore of Pittsburgh—is dead. For years she was the typical American stage beauty, but she was more than that. She was a first rate light opera singer, the helpful and beloved friend of many in and out of her profession, a good newspaper writer and a devoted and hard working patriot in time of war. In recognition of her services to the country during the war she was buried with military honors, and a detachment of marines stood watch over her casket, since she held the rating of gunnery sergeant in the United States navy. One of the the most gracious figures in American life thus has passed away.



News of Minnesota

EVENTS of the week throughout the "State of Ten Thousand Lakes" told in brief form

Walker—The new Chase hotel of Walker was formally opened with a dinner and dance.

Slayton—About 5,000 people attended the third annual picnic of the Murray County Farm bureau at Avoca park here.

St. Paul—St. Paul has been officially characterized as "the wettest spot in Minnesota" by Federal Judge Page Morris.

Rochester—Arrangements are complete for the 50th annual convention of fire departments of Minnesota, to be held here.

St. Paul—Appointment of A. D. Wilson as a regent of the University of Minnesota was announced by Governor J. A. O. Preus.

Minneapolis—E. B. Heiberg, aged 63, state dairy and food inspector for 12 years and United States inspector of internal revenue, is dead.

Moorhead—Governor A. M. Hyde of Missouri will give the commencement address for the graduating class of the Moorhead State Teachers college.

Akeley—Citizens of Akeley have completed an up to date tourists' camp on Eleventh lake. Everything has been made convenient for the traveler.

St. Cloud—Several thousand faremrs of Stearns, Sherburne and Benton counties are expected to attend the annual Tri-County Farm bureau picnic here.

Austin—N. V. Gardner, of the First National bank of Winona, was elected president of the Minnesota First District Bankers association, which closed its annual session here.

Marshall—Governor J. A. O. Preus is to deliver an address at a picnic to be given by farmers of Lyon county. There will be ball games, races, wrestling matches and other sports.

Minneapolis—This city leads every other metropolis in the United States in aeronautical development, and now is offered the opportunity of becoming the aerial center of the northwest.

Fairmont—The juniors and seniors may continue to dance at their annual reception, as has been the custom for several years, if they so desire, according to decision of the school board.

Thief River Falls—Nine women are in the list of grand and petit jury filed with the sheriff. The grand jury is summoned to appear on June 27 and the petit jury will report on the following day.

Hibbing—The extermination of obnoxious weeds in the district surrounding Hibbing will begin at once. Orders were issued to residents of Kittzville and Brooklyn to start the cutting of weeds at once.

Minneapolis—Repair crews worked in Minneapolis, St. Louis Park and the vicinity to repair thousands of dollars in damage caused by one of the most severe storms in recent years which swept the northwest. A boy was killed by a broken power wire.

Minneapolis — An innocent-looking brown-paper parcel left in a side-room near the main waiting room of St. Mary's hospital provided a big surprise for nurses, when they opened it to find its "contents" a healthy, daintily-dressed baby boy.

St. Paul—The 17th annual meeting of the Tri-State Postmasters' association of Minneosta, North and South Dakota, took place at the Hotel St. Francis. H. B. Brown of Clark, S. D., president of the association, presided.

Winona—Crop conditions in southern Minneosta have not been better in several years, according to the weekly report issued here by H. J. Wagan, division freight and passenger agent of the Chicago & North Western railway.

St. James—E. Z. Dasey, age 77, of this city, was elected Minnesota state commander of the G. A. R. at the annual encampment in Minneapolis. He enlisted when 17 years old, in the Thirty-second Wisconsin regiment.

Minneapolis — Three women from England, France and Germany concluded a series of addresses given in Minneapolis in an attempt to stir Minneapolis women to join their movement to prevent war in the future.

Mankato — Blue Earth county, through the board of county commissioners, will pay to the farm bureau $3,000 for aid in conducting the business of the organization in this county for the coming year.

St. Paul—The last written address prepared by Dr. Cyrus Northrop, president emeritus of the University of Minnesota, written especially for the Macalaster senior class of 1922, will be read at the exercises by George D. Dayton, president of the college board of trustees.

Virginia—The Lincoln mine near here, owned by the Interstate Iron company is the first in this section to be hit by the strike of coal miners. In laying off a number of its men, officials of the company said they cannot get coke which they need in their work.

St. Cloud—At a meeting here of the special deputy sheriffs of the Automobile club, who were sworn into office to aid in upholding city traffic laws, it was decided to take drastic measures for the prevention of automobile accidents caused by careless driving.

Windom—At a meeting here the wool growers of Cottonwood county decided to again pool their wool this year.

Jeffers—The board of education has decided to proceed with the erection of a large addition to the public school building.

Mankato—The annual convention of the Butter, Poultry and Egg Shippers' association was held here.

Fairfax—Vandals entered the high school building here and broke open the door to the superintendent's office. A kodak and a small amount of cash was taken.

Albert Lea—The annual picnic of the Freeborn County Farm Bureau clubs was held here at the fair grounds.

Adams—The village council has practically decided to sell the electric light plant to the Consumers Light company of Osage, Iowa.

Hibbing—The A. C. Schirmer company of this city was awarded the contract for the equipment of the cafeteria to be placed in the new high school here, at their bid of $10,345.

Wanamingo—Because of a general closing of stores in Red Wing and adjacent towns, upward of 2,000 people attended the annual picnic of the Goodhue County Farm bureau held here.

Madison—The Women's Christian Temperance union of Lac qui Parle county have filed a petiton with the county commissioners asking that the sale of cigarets be prohibited in this county.

Red Wing—At a meeting of former service men it was decided to change the name of the Ex-Service Men's Voters league to the Red Wing Veterans association.

Hibbing—The Oliver Iron Mining company put 200 additional men at work at their local properties, according to an announcement made by officials of the company here.

Ralston—A branch of the Federal War Loan bank has been organized here, with M. H. Hahn, prominent farmer of Amiret, president.

Slayton—The postal employees of Murray county, including postmasters, assistants and carriers, met here and perfected the Murray County Postal Welfare association.

Windom—The city of Windom may decide to have the water power situation carefully looked into here, with a view to using the power for the operation of an electrical generating plant.

Pipestone—Six counties in southwestern Minnesota—Rock, Nobles, Jackson, Cottonwood, Pipestone and Murray—have taken the initiative in starting a larger farm bureau paper in co-operation with the state federation.

Two Harbors—There is more activity around the local D. & I. rail shops and the ore docks than in months. The shops have been running full time, and the boats are coming in for ore in full measure.

Luverne—Luverne's paving fight has resulted in the organization of an anti-objectors society, to support the city attorney and old council in their efforts to have the paving assessment upheld and the city's interests protected. The case will come up in court June 20.

Duluth—Frank Keating of this city, who has been making a study of the problem for several years and making tests of Minnesota peat is now arranging to put in a manufacturing plant at Kelsey, Minn.

Sleepy Eye—Members of the Minnesota Valley Drainage district have decided it is necessary a huge dam be built at the confluence of the Minnesota and Cottonwood rivers, thus creating a lake near New Ulm.

Pillager—The annual Old Settlers' picnic was conducted here with a large gathering of the community. The principal topic was the division of Cass county, which comes up for a vote this fall.

Winona—Although there is a possibility of a slight decline in land values, farmers in the middle west cannot look for much relief in the form of lower taxes or greatly reduced interest rates, the Winona County Shorthorn Breeders' association was told by J. L. Tormey, field representative of the national organization, at its annual meeting.

Winona—The proposed referendum in Winona on the beer and wine question authorized by the city council several months ago to be held in connection with the primary election June 19, has been abandoned following an opinion from Albert F. Pratt, assistant attorney general, that "the proposed question is not one authorized to be submitted at the June primary election on either the regular or a special ballot."

St. Paul—Arthur E. Nelson became mayor of St. Paul, succeeding Laurence C. Hodgson, who retires after four years of service as the city's executive. Mr. Nelson, who was elected by a record breaking majority last month, was formally inaugurated in the council chamber.

New Ulm—The proposed dam at New Ulm in the Minnesota river, which has been urged by members of the Minnesota Valley Conservatory district board, and which would create a large body of shallow water at this place, found decided opposition at a mass meeting of New Ulm citizens.

Kenyon—Final decision has been made by the commercial club to have the postponed community picnic here on July 4. Former residents of the village are to be invited to a homecoming as the main feature of the event.

Faribault—Introduction of evidence that Carleton college is operated not as an investment but as a benefit for the public as an educational institution was presented in district court before Judge Arthur B. Childress, in the case wherein Carleton appealed to the district court, claiming exemption from taxation.

WORKING GIRLS LOOK HERE

Read What Mrs. Lucas Writes Concerning Her Troubles, Which May be Just Like Yours

St. Louis, Mo.—"I had troubles that all women are apt to have, with pains in my back, weak, tired, nervous feelings and a weak stomach. I had been this way about a year and was unable to work or stand on my feet for any length of time. My husband's aunt told me how much good Lydia E. Pinkham's Vegetable Compound had done her and begged me to try it, so I did. All my pains and weakness are gone, my stomach is all right and I do my work at home and also work for Swift's Packing Company. I recommend your Vegetable Compound to my friends and you may publish my letter as a testimonial."—Mrs. LULU LUCAS, 719A Vandeventer St., St. Louis, Mo.

Again and again one woman tells another of the merit of Lydia E. Pinkham's Vegetable Compound.

You who work must keep yourself strong and well. You can't work if you are suffering from such troubles. Mrs. Lucas couldn't. She tried our Vegetable Compound and her letter tells you what it did for her. Give Lydia E. Pinkham's Vegetable Compound a fair trial now.

"Willing to Pay."

Two colored ball teams were assembled and were about to start their game, but discovered one of their fielders missing. Their captain asked for someone from the crowd to fill the fielder's place. A tall gent said he had some experience, so they put him in the game. Everything went all right till it came his turn at bat. After the newcomer had swung at two pitched balls he connected with the next one and it went soaring over the fence. The crowd all began to yell "Run! Run!" But he didn't get it, and turning to the crowd he shouted: "Run nothing. I'll buy them another ball!"

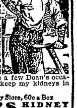
Clever Boy.

Mother—"You should learn to make things go as far as possible." Johnny—"Should I stretch the truth, ma?"

Help That Aching Back!

Is your back giving out? Are you tortured with backache and stabbing pains? Does any exertion leave you "all played out"? Feel you just can't keep going? Likely your kidneys are to blame. Overwork, strains, hurry and worry tend to weaken the kidneys. Backache is often the first warning. Headaches and dizziness may come, too, and annoying bladder irregularities. Help the kidneys with *Doan's Kidney Pills*—the remedy recommended by thousands. *Ask your neighbor!*

A North Dakota Case



A. L. Fallor, carpenter, 1108 Dakota Ave., Grand Forks, N. D., says: "My back ached so I could hardly stoop and when I stooped, it was difficult to straighten again. My kidneys acted too freely so I started using Doan's Kidney Pills. They gave me benefit from the start and soon entirely relieved the trouble. I take a few Doan's occasionally and they keep my kidneys in good shape."

Timely Comments on Agricultural Topics for Our Readers

GRAIN MARKET HEAVY

All Stock Shows Trend Upward—Indications Better.

U. S. Bureau of Markets, Washington, D. C., for week ended June 9, 1922.

HAY—Because of increased receipts and slow demand the market is slightly weaker although prices are nominally unchanged. Quoted June 9, No. 1 prairie Minneapolis $18, St. Louis $31.

FEED—Wheat feed market fairly steady account of little pressure to sell. Demand weak.

Demand for other feeds unchanged.

GRAIN—Market heavy most of week and although stronger last three days closing prices were still below week ago. Chief depressing influences were long liquidation and selling against cash wheat taken on May contracts.

Short ocvering and evening up for government report brought about firmness last of week. Closing prices in Chicago cash market:

No. 2 red winter wheat $1.19; No. 2 hard winter wheat $1.18; No, 2 mixed corn 60½c; No. 2 yellow 61¾c; No. 3 white oats 36¼c. Average farm prices: No. 2 mixed corn in central Iowa 48c; No. 1 dark Northern wheat in central North Dakota $1.24¼; No. 2 hard winter wheat in central Kansas $1.12. For the week Chicago July wheat up one cent at $1.15; Chicago July corn up 1¼ cents at 62 cents; Minneapolis July wheat up 1⅜c at $1.35⅝; Kansas City July wheat up half cent at $1.08; Winnipeg July wheat unchanged at $1.26⅝.

FRUITS AND VEGETABLES—Potato Markets continue to advance. Northern round whites up 60c in Chicago at $2.10 to $2.15 per 100 pounds.

LIVE STOCK AND MEATS—Chicago hog prices ranged from 10 to 25 cents higher; Beef steers generally 25c higher, butcher cows and heifers 15c to 25c higher; feeder steers 15c higher; light and medium weight veal calves $1 to $1.25 higher; aged lambs 25c to 75c lower, ring lamb euchanged, ewes steady; yearlings 50c lower. June 9 Chicago prices:

Hogs, top $10.95; bulk of sales $10.15 to $10.90; medium and good beef steers $8.10 to $9.15; butcher cows and heifers $4.40 to 8.75; feeder steers $6.15 to 8; light and medium weight veal calves $9.50 to 11.50; fat lambs $9 to 12.60; spring lambs $13.25 to 14.75; yearlings $7.50 to 10.35; fat ewes $3 to 7.

Stocker and feeder shipments from 12 important markets for week ending June 2 were: Cattle and calves 43,339, hogs 12,189, sheep 12,830.

DAIR YPRODUCTS—Butter market irregular during week but steady to firm at close. Heavy storage buying although many buyers feel that the risk is great at present prices. Holdings in storage have increased over six million ponuds in the four eastern markets since week ago. Closing prices 92 score: Chicago 35c; Philedelphia and Boston 37c and New York 36½c.

Cheese markets steady, trading fairly active, but price changes have been erratic depending upon demand for various styles. Some buying for storage. Price at Wisconsin primary markets June 9: Twins 18½c; Daisies 18¼c; Double Daisies 17¾c; Young Americas 17¾c; Longhorns 17½c; Square Prints 18c.

Mineapolis Closing Cash Prices.

Minneapolis—Wheat, No. 1 dark northern, 1.44@1.57; No. 1 northern, 1.43 @1.52; fancy No. 2 dk. 1.42@1.53; No. 2 dark northern, 1.42@1.53; No. 1 dk. hard, 1.43@1.48; No. 1 hard, 1.35@1.40; No. 1 am. durum, 1.22@1.27; No. 1 durum, 1.17@1.22. Corn No. 2 yellow, 54¾@55¼. Oats No. 2 white, 33¼@34¼. Barley, choice to fancy, 55@58. Rye No. 2, 86½@87. Flaxseed No. 1, 2.41¼@2.43¼.

South St. Paul Live Stock.

So. St. Paul—Steers, $6.00@8.25; veal calves. $3.00@9.50; cows and heifers, $4.00@6.00; hogs, $9.00@10.00. sheep and lambs ,$3.00@14.00

Minneapolis Butter, Eggs and Poultry.

BUTTER—Extras, 34c; firsts, 28c; seconds, 24c; packing stock, fresh sweet, 20c; state goods, 5c; grease, 1c.

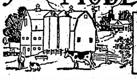
EGGS—Country receipts, rots out, per case, $6.30; No. 1 candled, good extras, free from rots, small dirties and checks out, per dozen, 23c; seconds, dirty and held stock, rots and leakers out, dozen, 16c; quotations on eggs include cases.

LIVE POULTRY—Not advisable to ship turkeys under 7 pounds in weght. Hens 4 pounds and over 21c; hens under 4 pounds, 19c; crpples and culls, unsalable; ducks, fat, 18c; geese, fat, 12c; turkeys, fat, over 8 pounds, 25c; turkeys, thin and small, 15@20c; cripples and culls unsalable, guineas per dozen, $5.00; rooters, 13c; broilers, 1½ lbs. and up, per pound, 40c; Leghorns and small broilers, lb., 30c.

Asks Pay for Wives.

Waukegan, Ill.—That 20 million wives who do their own housework be paid for their services, it is said, is the basis of a resolution presented at the annual convention of the National Women's Trade Union league.

PERTINENT POINTERS for MODERN FARMERS



Prepared Under Direction of

North Dakota Agricultural College

Managing The Flax Crop To Get Maximum Returns

A very good crop of flax sometimes may be grown from a late planting, of one fails to get the seed in early and cares to gamble on the late coming of frost.

There are many areas of land which are too wet to work early in the spring which would produce good yiels of flax if properly handled. In using such lands for flax, be sure that there is good surface drainage. Work the land as for sod areas. Do not do any packing when the soil is wet. Leave no uneven places in which water can stand after heavy rains. Growing flax can live but a few hours if it has to stand with its roots in surface water.

Late planting of flax does not make for a sure crop. If the crop after it has reached the blossom period runs into just a moderate frost, it will be destroyed. By late planting we mean flax which is seeded approximately June 10 to July 1. Often there have been very large yields from late plantings because the blossom period started just after the cool autumn weather set in and continued during a long period. If such late maturing flax chances to escape frost, the yield may be exceptionally large. One must, however, recognize that he is gambling on the late coming of frosts. The late seeding gives tim efor tillage to kill pigeon grass and other late sprouting weeds and to prepare a good seed bed. To summarize: The seeding time in most parts of North Dakota should usually be the earliest date possible without having the ground actually freeze after the crop is up. Ordinarily, it is safe to plant flax as soon as wheat planting is over. For early planting try April 20 to May 10; for late plantig, June 10 to July 1; for mid-esason plantings, May 15 to June 10.

As a general rule, for the mid-state and western areas one bushel of seed is sufficient for three acres. If the seed bed is well prepared, this amount of seed should give sufficient stand on any area. Somewhat more seed may be used on the heavier lands of the eastern portion of the state. Under favorable conditions of soil moisture, the usual seeding of approximately two pecks has given good results. Do not sow shriveled, scaly flax seed. If these injuries were not due to frosting of the paret crop, it may be assumed that they will carry disease and death to neighboring plants in the drill row. Awell packed seed bed is of greatest importance. Firm the ground so that the moisture will come to the top and the seed will not need to be planted deeper than three-fourths inch to get moisture. The roots will then be protected from the drying winds. On new breaking or sod lands make the furrow slices lie flat. Run a heavy packer immediately behind the plow. Disc and harrow sufficiently to get dirt enogh to fill cracks and air spaces. Pack some more, then drill in the seed. Follow the drill immediately with a packer. The yield will pay for the work. On old lands, whether spring or fall plowed, it is equally important to make a firm seed bed. If you sow late, disc, harrow, and pack to kill the pigeon grass. Seed the flax on this fresh harrowed and packed land, then again firm down the soil after the drill.

On new lands properly plowed, packed and seeded, any good northwestern flax seed, graded to plump, bright seeds properly treated, may be expected to produce a good yield under normal weather conditions. If the cropping is done on old lands, subject to wilt infection, reliance should be placed upon wilt resistant varieties., N. D. R. 114 is the variety most suitable for the eastern one-third of North Dakota, and eastward. In the western two-thirds of the state, on land that has not previously grown flax, N. D. 115 (Frontier) is one of the best yielders. N. D. R. 52 is a resistant variety best adapted to western North Dakota and eastern Montana. It does not do so well as N. D. R. 114 on the heavy soils of eastern North Dakota.

CONTROL OF CUTWORM LIES IN DIVERSIFICATION

The pale western cutworm, which has been causing severe damage to wheat in western North Dakota for several years, was the subject of much discussion at the recent conference of entomologists from the United States and Canada at Minot. The insect has given much trouble in Alberta, Saskatchewan and Montana, as well as in North Dakota.

Experiments with poison bran have not been successful, mainly because the cutworms feed below the surface of the soil. Little hope of control is expected in this direction. In Montana, fields plowed before May 1 suffered much less damage than those plowed after that date.

It was generally agreed that the most severe infestation has occurred on ground that was in spring wheat the previous year.

The following information has been sent out to all the county agents in the Slope counties, where trouble by the insect is anticipated.

1. Crops on fields where spring wheat was damaged by cutworms a year ago are likely to be injured again this year. No crop on the same ground will escape damage completely.

2. Less damage by this cutworm is likely to occur on old corn ground, or on old potato ground.

3. From what is known of the insect at present, the ultimate control seems to lie in more diversified farming.

NURSING TO GET BEST SWEET CLOVER RESULTS

Spring wheat and Sixty-Day oats made nurse crops particularly favorable for sweet clover production, says Prof. H. L. Walster. Seed yields were very low where barley was used as the nurse crop. This is in accord with the results obtained in 1919 where barley also proved to be a poorer nurse crop for seed production than either oats or wheat. Barley does not check the vegetative growth of the sweet clover sufficiently the year of seeding.

Seeding trials indicate that sweet colver may be safely sown in the Red River valley over a wide range of time from early April to the middle of June, but that there is some advantage in early seeding. Eight to 10 pounds of seed is enough seed when put on clean land. Spring wheat makes an excellent nurse crop. The use of a nurse crop seems to favor seed production the following year. North Dakota grown seed is of excellent quality.

PLANT IN ROWS TO INCREASE FLAX YIELD

Flax sown in rows and cultivated has given a higher yield than flax sown in six or eight inch drills, according to Professor H. L. Bolley of the North Dakota Agricultural college, who states that for a number of years flax has been planted with the ordinary grain drill in rows for cultivating. This is accomplished by stopping up certain spouts of the drill. Single, double, and triple flax rows with 28 to 36 spacings have been used.

The average yield for the past six years has been 9.06 bushels per acre as compared with 8.45 bushels from the solid flax areas during the same period. The cultivation puts the ground in most excellent condition for a following small grain crop, which should be planted across the flax rows. Pigeon grass in the flax rows cannot be kept down except by hand weeding, but does not seem to effect an appreciable reduction of the yield.

SECURING A MORE HARDY ALFALFA STRAIN

Grimm has proven to be the hardiest of the alfalfas in common use. Efforts are being made to secure even a hardier Grimm. L. R. Waldron, plant breeder at the experiment station of the A. C., says:

"By fertilizing for two generations a plant of Grimm alfalfa was secured much purer bred than the ordinary bulk Grimm. A planting of 28 of the resulting strains has been made and from these selections for increase hardiness and other desirable qualities are being made. One strain has been secured with only 4 per cent killing during three winters. All strains showed average killing of 40 per cent."

IMPROVEMENT OF DAIRY INDUSTRY AIMED AT BY RECENT CONFERENCE

(Prepared by the United States Department of Agriculture.)

As a result of the conference of representatives of the purebred dairy cattle associations held in Washington, May 5, at the call of Dr. C. W. Larson, chief of the dairy division of the United States Department of Agriculture, a number of important recommendations were made for the improvement of the dairy industry, especially the purebred dairy cattle business. Each of the breed associations, including the Ayrshire, Brown Swiss, Guernsey, Holstein-Friesian, and Jersey, was represented by two or more delegates. The subjects of discussion had to do with the improvement of dairy cattle, advanced registry, fairs, and sales.

No conferences of this kind had been held for several years, and the representatives expressed the desire that this one might result in the formation of a permanent organization to thresh out problems of mutual interest and to work for the general betterment of the industry. Figures prepared by the department showed a decided need for improvement in dairy animals and in making the best use of the improved animals that are now available. The average production of the cows of the United States is about 4,000 pounds of milk and 160 pounds of butterfat a year, while the average cow in some other countries produces almost twice as much. There are 80 million grade and scrub dairy animals in the country and less than a million purebreds. There are 4,566,664 American farms having dairy cattle, and only 208,251 of these farms have purebred dairy cattle. It is estimated that approximately 250,000 purebred dairy bull calves born each year are not needed on the farms where purebreds are kept. Of the purebred animals that were registered last year, about 150,000 were females and less than 75,000 males, which indicates that not half of the purebred dairy bulls are registered.

Recommend Better Sires.

Among the recommendations made by the conference were those expressing approval of plans for increasing the use of purebred bulls in scrub and grade herds, and of the plans for cooperative bull associations as being the best known means for distributing surplus bulls and introducing them into new territory. Although there is a place in this country for all the purebred dairy cattle that may be produced for some time, it was the consensus of opinion that an expert business in purebreds would help to stimulate interest among farmers at home.

A number of questions related to advanced registry were brought up. Co-ordination of effort by and between the agricultural colleges and the breed associations was suggested, and it was recommended that these organizations and institutions make special efforts to co-operate. In this connection it was suggested that the various representatives ask their associations at their earliest meetings to appoint committees to meet with the Dairy Science association to see if an improved plan for making official tests of cows can be worked out, which will be agreeable to the breeders, the associations, and the colleges that send out the official testers.

The showing of dairy animals at fairs and expositions received a good deal of attention from several angles. It was decided to recommend to the associations that they cease giving money prizes at these shows, but spend the funds in putting on educational exhibits; that more attention should be given to production records in awarding prizes at fairs and shows; that the associations represented should give more attention to educational exhibits showing the economic advantage of purebreds in dairy practice; that each association has a distinct duty in connection with the selection of suitable persons to act as judges of the various breeds of dairy cattle at fairs and shows; that no animals should be admitted to fairs and expositions unless they are from herds accredited as being free of tuberculosis or in herds under federal or state supervision, and that fairs not enforcing such a rule should not be favored with animals for exhibits.

Live Stock Sales Discussed.

Questions relating to private and public sales were discussed, and it was decided to suggest a meeting at an early date of all the dairy cattle associations with a view to drafting a code of ethics for sales that would eliminate some of the undesirable conditions. Since an excessive amount of attention is given to a few high prices to the neglect of average conditions, it was also agreed to recommend to the associations that they send in to the bureau of markets and crop estimates of the department regular reports of prices paid for purebred dairy cattle.

The list of associations and their representatives taking part in the conference is as follows:

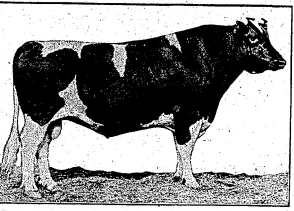
Ayrshire Breeders' association: Paul O. Reymann, president, West Virginia; C. L. Burlingham, secretary, Vermont.

Brown Swiss Cattle Breeders' association: A. E. Bower, president, Ohio; L. E. Hull, Ohio.

American Guernsey Cattle club: Robert Scoville, president, New York; S. M. Shoemaker, Maryland; Karl B. Musser, New Hampshire.

Holstein-Friesian Association of America; Fred Pabst, Wisconsin; H. W. Norton, Jr., Michigan; D. D. Aitken, Michigan.

American Jersey Cattle club: M. D. Munn, president, Minnesota; R. M. Gow, secretary, New York; O. H. Baker, New York; C. J. Tucker, Missouri.



There Is a Decided Need for Improvement in Dairy Animals and in Making the Best Use of Those Now Available.

REFILLING SACKS IS PROHIBITED

(Prepared by the United States Department of Agriculture.)

Some feed dealers are refilling used feed sacks stamped or printed with the name of the manufacturer and the brand name of the feed that was originally in the sack, so that the names and brands are not true in reference to the feed in the sack after refilling, according to officials of the bureau of chemistry, United States Department of Agriculture, who are charged with the enforcement of the Food and Drugs act.

A feed dealer of Iowa was recently cited to a hearing under the Federal Food and Drugs act for shipping into interstate commerce a molasses feed in bags which he had refilled but which bore the name of another feed manufacturer. The sacks also bore a brand name under which the original owner of the sacks sold a stock feed of much higher grade than the feed with which the sacks were refilled.

The Federal Food and Drugs act does not require the name of the manufacturer or the brand name to appear on sacks of feed coming within its jurisdiction, according to officials of the bureau, but if the name of the manufacturer and brand are given on the sack they must be true. The Food and Drugs act prohibits the use of any statements on foods or feeds that are false or misleading in any particular.

A dealer who contemplates refilling used feed sacks on which is printed the name of another manufacturer or any statements that are not correct when applied to the product he uses in refilling the sacks should be very careful to see that all such statements are obliterated.

Inspectors have been instructed to look out for interstate shipments of stock feeds which are adulterated or misbranded in this or any other particular. Appropriate action will be taken in all cases found to be in violation of the law, it is said.

Hogs are not so injurious to alfalfa as horses and sheep.

DAIRY HINTS

SECRETS OF DAIRY SUCCESS

Two Big Things Are Proper Care and Feed, Says Specialist of Oklahoma College.

"Two great secrets in dairying which have been the reason for the success of thousands of dairymen are proper feeding of cows and proper care of cows," says A. C. Baer, head of the Dairy Husbandry department of Oklahoma Agricultural and Mechanical college.

"Thousands of cows would be profitable and good cows if they were given a chance; if they were properly fed, housed, and cared for.

"Good feeding means to give cows enough feed to produce milk and the right kind of feed to produce milk. Most of the feed for cows ought to be grown on Oklahoma farms. Alfalfa hay is the best dairy cow feed which can be grown. Corn and sorghums, such as kafir and darso, can be grown for the silo. Ensilage on a dairy farm or any farm where dairy cows are kept provides succulent feed and is indispensable.

"Most of the grain for cow feeding can be grown on the average Oklahoma farm. A good grain mixture for milk cows is as follows: 4 parts ground oats, 3 parts bran or alfalfa meal, 3 parts ground kafir, 1 part cottonseed meal.

"A dairy cow needs about one pound of grain for three or four pounds of milk produced. Dairy cows should be fed grain individually according to the amount of milk for growth if immature, and at times to produce gain in weight.

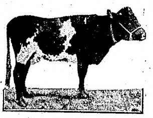
"Dairy cattle will respond to good care. Every Oklahoma farm where cows are kept should have at least a good shed to protect the cows from bad weather and cold winds. A blanket in very cold weather will pay for itself in a very short time. Every dairy cow should be cleaned and brushed regularly. It helps to keep her in better health."

DAIRY COWS RETURN PROFIT

High-Producing Animals Are Usually Most Economical in Matter of Food Consumed.

(Prepared by the United States Department of Agriculture.)

High-producing dairy cows are nearly always economical producers, says the United States Department of Agriculture in replying to an inquirer who asked for a comparison of purebred and grade cows as to economy of production. If a herd of purebred cows has greater ability to produce milk and butter fat than a herd of grades, it will return more milk and butter fat for the feed consumed. As a rule purebreds are bred for high production, and just to the extent that they are higher producers than the grades they may be expected to return more for the feed they use. But purebreds are not always high producers.



Scrub Cows Are Not Worth Their Keep.

The ratio is not constant between the quantity of feed consumed and the quantity of milk produced. The records of cow-testing associations show that the cows that produced 10,000 pounds of milk a year ate only 55 per cent more feed than those that produced 5,000 pounds of milk a year. The cows that made 7,500 pounds of milk a year ate only 21 per cent more than those that made 5,000 pounds of milk a year. These figures are based on thousands of records.

GRAIN BOOSTED MILK FLOW

Large Increase Obtained by Minnesota Community by Feeding While on Pasture.

Twenty-one dairy herds in the Blue Earth County Cow Testing association averaged 7,120 pounds of milk and 285 pounds of butterfat per cow in 1920. Nineteen herds in the same association averaged 8,500 pounds of milk and 345 pounds of butterfat per cow in 1921. The percentage of gain in milk in 1921 over 1920 was 19.3; in butterfat, 21. The tester in charge in his annual report to University farm says:

"I attribute this gain to better care and feeding. The cows were fed a grain ration the year round, thus keeping up the production during the late summer months when it usually drops because of short pastures."

EDITORIAL

The more you step on the gas, the higher it goes.

"Many men have reached the top of the ladder of fame because their wives held the ladder," says the St. Cloud Times.

While the bridegroom at a June wedding may not look like much of a factor, it would be a mistake to try to get along without him.

Goodridge is getting better dairy herds, better weather and better prospects every day—and better mail facilities are looming upon the horizon.

Jake Preus wants a state constabulary. Why not organize his forces from the numerous candidates who will undoubtedly be defeated for sheriff in Minnesota this year?

The square deal has a way of living down every form of oppression, and eventually it gets courage enough to give wrong a swift kick under the coat tails. And so it is with everything—the mail service notwithstanding.

NOT WORTH HER BOARD

Thousands of them—maybe a million—in Minnesota are not worth their board.

She is a no good citizen and should be killed without delay.

Who?

The scrub cow!

Just a little headwork and a few figures can frame her death warrant.

It costs as much to keep 100 scrub cows as it does to keep the same number of good grade or pure-bred cattle. But, oh, what a difference when the cream checks come in!

The 100 scrubs will produce no more than one-fourth the product of quality animals. This means that 25 cows are doing what 100 scrubs are eating their heads off to do.

Here is a gross economic loss that can be stopped. It isn't every dairyman who can afford pure-bred stock, but every dairyman can see to it that he has good grade cattle and that they ultimately are bred up to the pure-blood standard. Bred to blooded bulls, grade cattle will become pure-breds in five generations. In other words, the great, great, great grandchild of a grade cow may become pure-blooded. It doesn't take so long to build a pure-bred herd.

But a good grade herd is an excellent start and the cost is not prohibitive. A scrub herd is costly at any price.

By getting into the good grade stock and then co-operating in the purchase of blooded sires, the dairymen are on the highway to success, and that the farmer with a dairy herd is the man who knows no "lean" years is a pretty generally recognized fact.

Beltrami county is alert to the possibilities of dairying. The interest shown in the work of clearing the land indicates a development along agricultural lines greater than the most optimistic can imagine—and the ring leader of the outfit is our good friend, the cud-chewing, contented cow.—Bemidji Sentinel.

THE MAIL PETITION

There could not possibly be a stronger appeal for the establishment of a rural free delivery mail route out of Goodridge than the petition this week sent from Goodridge to prevail upon the postal authorities to provide and maintain a rural route from this point.

That there is a strong and certain demand for a route is evidenced by the number of farmers who have signed the petition, and The Banner believes that the postoffice department cannot longer allow the appeal for better mail service to go unheeded.

As this newspaper understands the situation, the postoffice department is willing to establish a rural free delivery route in every case where it can be shown that a total of 61 patrons are available along the route. The farmers effected have the 61 names, sure enough, and many others will undoubtedly avail themselves of the opportunity of free delivery service as soon as the route is established.

That being the case, the service should be instituted without unnecessary delay in order that farmers to the east and southeast of Goodridge may not be handicapped with the intolerable mail facilities with which they have been faced for so long.

An optimist is a fellow who loans a guy $10 when said guy already owes him $20.

Looks as if a lot of the girls were actively participating in the "paint up" campaign.

Since the modern bath tub was installed, it is pretty hard to tell when Saturday night rolls around.

FARM WIFEHOOD FOR YOUR GIRL?

"Yes, Because Service Means Happiness," Says Farm Mother

Would you want your daughter to marry a farmer?

More than 8,000 farm mothers answered that question in a nationwide contest recently. And more than 90 per cent of them said an emphatic and wholehearted "Yes!"

"Yes," wrote Mrs. Fannie L. Brundage, who won first prize, from a farm in Fairfield county, Connecticut, "Yes, even in the light of the hard years I have spent upon the farm, I would be willing for my daughter to marry a farmer because I believe in a constructive policy for farm homes and that true happiness is found in well-rendered service. In something so vitally necessary to the growth and progress of our nation as is agriculture, it is wisest for us farmers not to decry our occupation, nor to make mountains of our difficulties and molehills of our pleasures.

"The strength of our nation lies in the youth of our land and, with intelligent care, nowhere can boys and girls be reared to a sturdier manhood and womanhood than on our farms.

"If our men are to till our farms to feed the multitudes, side by side with them must be women to help carry on. Who are better fitted than our daughters who can bring to their task understanding hearts?

"'Oh,' but I hear someone say, 'it is such a hard life!' Have you ever known any great work, of brawn or brain wrought by one seeking the 'easy job?' The making of happy farm homes is a great work.

"Our government is awaking to the fact that the farmer is to be reckoned with in our national policies. Our home demonstration agents are showing us farm women how to make becoming and inexpensive clothing; the automobile is making it possible to do and see any interesting things—and get home for 'chores.' On many a lonely farm, our club workers are touching the lives of boys and girls, inspiring them with a keen interest in their work and surroudnings.

"Last, but not least, the farmer is aroused as he never has been and is speaking for himself. When he shall have spoken wisely enough, I hope the great lack in the life of our farm woman today—ready money—will be filled and she will have machinery to relieve the drudgery of her work and opportunity to enjoy some of the niceties of life. It is her due. To such a life I would gladly give my daughter.

"I love the country; take a keen interest in farmer folk; admire their sincerity, quick sympathies, and sane and clean thinking. I find true enjoyment in the changing seasons; the spot where the children find the first hepatica; the bird songs; the beautiful colorings of the skies, the refreshing spring water; the feeling of nearness to the Creator of all things good and beautiful.

"Because of this and because I am an American Patriot, I should like to pass this legacy on to my daughter's children."

Political Announcement

(Prepared by the candidate whose name appears below, for which the sum of $5 is to be paid.)

To the Voters of Pennington County:

I hereby announce myself as a candidate for nomination to the office of register of deeds at the primary election to be held Monday, June 19th. I have resided in the county since 1904, and all my interests are here. For eight years I have served as a member of the board of county commissioners and for five years have been honored by my colleagues with the chairmanship.

In case of my nomination and election I promise to give the office my entire attention and will endeavor to serve the people efficiently and impartially.

I respectfully solicit your vote and support.

Yours for service and reliability.
OSCAR J. PETERSON.

(Prepared and ordered published by H. P. Rued, personal campaign committee for Geo. M. Gunderson, County Superintendent of Schools, candidate for re-election. Regular advertising rates to be paid.

To the Voters of Pennington County:

COUNTY SUPERINTENDENT OF SCHOOLS

GEORGE M. GUNDERSON	X

If you mark your ballot as indicated above it will mean to YOU:

1. The retention in office of a true and tried servant.
2. A county taxpayer in a county office.
3. The upbuilding of our rural elementary school system along modern, progressive lines.
4. Maintaining the present high standards of our schools through employment of well qualified teachers.
5. Saving of money for the schools through a strict enforcement of the laws applying to schools, such as the compulsory education law which has bearing on apportionment money receipts.

It will mean to Me:

1. Employment in a work which I am well acquainted with and which I am capable of doing.
2. That my term in office has been to the interest of the schools.
3. That my past record meets with your approval.
4. That I made no mistake in staying with the rural schools when I declined the offer of a better paying position.
5. That you and I can co-operate in the future as well as in the past.

Sincerely,
GEO. M. GUNDERSON.

Attention, Livestock Shippers!

Farmers and others who have stock to ship will find it worth while to notify Oscar Stenvick. Direct 'phone from Goodridge. OSCAR STENVICK, Manager, Reiner Shipping Assn. 4t

GOODRIDGE BUILDERS ATTENTION!

If you are contemplating building this spring ocnsult us for your metal and gravel roofing and roof recoating. We install drain pipes and do all kinds of sheet metal work.

POLITICAL ANNOUNCEMENT
Inserted in behalf of the candidate whose name appears in this advertisement, for which the sum of $10 is to be paid.

Elmer Ohm

CANDIDATE FOR REGISTER OF DEEDS
PENNINGTON COUNTY, MINN.
PRIMARIES, JUNE 19, 1922.

To the Voters of Pennington County:

I wish to announce that I am a candidate for the office of Superintendent of Schools of Pennington county. I was graduated from the State Teachers' college at Moorhead in 1914. I am 30 years of age and I have had ten years' of actual experience as a teacher in elementary and semi-graded rural schools. I served approximately one year in the United States army, nine months overseas. I have filed as a candidate for this office because I believe that I can give the people of the county real service and an efficient administration. I shall appreciate your vote and support at the primary election to be held on June 19.

Very respectfully,
O. R. SANDE,
Town of North.

Political Announcement.

(To be paid for at regular space rates by Fred D. Lorentson).

FRED D. LORENTSON
—for —
REGISTER OF DEEDS

Worked as railroad laborer for several years and have followed the farming profession the last 10 years. My parents were among the pioneers, settling in Polk Centre Township over 40 years ago. I attended school in Thief River Falls and District No. 99. I wish to assure the voting public, ladies and gentlemen, that any considderation at the Primary Election June 19th will be heartily appreciated. If elected, a CLEAN OFFICE, COURTESY and EFFICIENCY will be my aim.

G. HOWARD SMITH
ATTORNEY AND COUNSELLOR AT LAW
Office Over First National Bank
Thief River Falls, Minn.

FOR SALE

We have feed oats for sale at 45 cents per bushel in elevator. Apply at Hanson & Barzen Eelevator.—adv. tf.

To the Voters of Pennington County:

I hereby announce that I am candidate for the office of Register of Deeds of this county at the coming primary. Your support at the polls next Monday will be appreciated.

I was born within sixteen miles of the City of Thief River Falls. I have lived in this community all my life. For 28 years I have lived at Thief River Falls. I feel that my past experience qualifies me to give this office the attention it deserves.

If nominated and elected I will give my personal and undivided attention to the work of the office.

M. N. BENSON.

Political Announcement

(To be paid for at regular space rates by the undersigned candidate).

To the Voters of Pennington County:

I hereby announce myself a candidate for the office of Register of Deeds of Pennington County, at the Primaries, June 19, 1922. If nominated and elected I can assure the public an accurate and efficient discharge of all the duties in connection with that office, having served for six years as Register of Deeds of Rolette County, N. D. With due respect for other candidates, I shall endeavor to carry on a clean and honest campaign.

Yours Respectfully,
T. O. STAGEBERG.

Political Announcement

(This space to be paid for by E. A. Mostue at regular rates).

For Superintendent of Schools

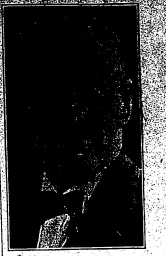
To the voters of Pennington county:

The undersigned begs leave to announce his candidacy for the office of Superintendent of Schools for Pennington county.

I respectfully solicit the support of the voting citizenery, at the primary election, June 19th.

If nominated and elected, my aim, as ever, shall be efficiency and economy in the administration of our rural schools.

Yours respectfully.
E. A. MOSTUE,



To the voters of Pennington county:

I am a candidate for re-election for Register of Deeds of Pennington county. During the years I have served the people of the county as Register of Deeds I have made many friends, but I am not asking support in the present campaign merely by virtue of this friendship. Rather I would have the voters consider my candidacy on a purely efficiency basis as the only proper method of electing officials to public office. In regards to fitness for the office of Register of Deeds, both as to honesty and capability, I prefer to rest my case with the people of Pennington county, whom I served in past years.

Yours respectfully,
N. J. ANDERSON.

Political Announcement

(To be paid for at regular space rates by the candidate whose name appears in the following advertisement).

To the Voters of Pennington County:

I hereby announce my candidacy for the office of sheriff of Pennington county, subject to the wishes of the voters at the primary election to be held on June 19, 1922. I was born and raised in Pennington county and have spent my entire lifetime here and consider that I recognize the needs of the community as well as any man. I spent more than 15 months in the United States Army, one year of which was overseas. I am well qualified for the important office that I seek and if elected I promise to give to it my undivided attention, and on that platform I ask the support of the voters at this time.

Respectfully,
A. W. CROWN.

GRINDELAND AND WATTS
Candidates for Re-election

To the Voters of the Fourteenth Judicial District:

As we are candidates for re-election we beg leave to state that we believe our experience in judicial work will, if we are retained, enable us to give you still better service than in the past.

With thanks to you for past favors, we respectfully solicit your support at the coming primary election.

ANDREW GRINDELAND—WILLIAM WATTS

Evolution

By Rev. Henry Lutz,
Pastor Lutheran Church, Missouri Synod.

Text: Genesis, I v. 1: "In the Beginning God Created Heaven and Earth."

So much has been written and said out evolution, or rather the evolu on theory of late, that one almost sitates to discuss the subject again. ut, since not only Atheists and outoken unbelievers, but also people ho claim to be ministers of the gos el, believe and defend it, and since e opinion of any minister carries onsiderable weight with the unlearn d and unsuspecting public, and above l since the evolution theory in its very phase and aspect is directly con rary to the clear teaching of God's ord. we feel that a few words on this ubject are not only justified but also ecessary.

The evolution theory is neither true cience, nor is it truly Christian. True cience is not based upon supposition r probabilities, but upon positive roofs. There is no human witness, and there never has been any, who could and did prove that the earth came into existence in its own power, and that man evolved from the monkey. No one saw it, so no man can say positively that it is true.

What evolutionists base their theory upon is some discoveries of recent date, and especially their own imagination, only not upon the word of truth, God's word. They claim they cannot accept the record of the Bible concerning creation. They want something that is more reasonable. And so they took to the evolution theory. Now not all evolutionists agree in every particular. Some accept a creating power (God) as having created the matter from which all things have developed, others say there was no creation, they say matter is eternal, and in the course of millions of years it developed from a crude formless condition into its present state. And their theory is that things have developed from a lower to a higher plane, that they have become better and better as the time went on. If that were the case, it would be possible to see and notice such development. But, though much progress has been made in the line of invention and discovery, yet no one will say that in general life has been made more pleasant, and the earning of a livelihood less difficult, and surely no one will say that man as such has become any better. The wars of today are just as cruel, and probably worse than formerly. There is just as much murder, robbery, adultery, grafting and dishonesty today as there was at any time before in the history of the world.

Furthermore: a person is far more wonderful and marvelously made than a book, for instance. And no scientist will claim that a book can come into existence by chance and in its own power. And yet evolutionists say that man came into existence without being created or made. And even if the body of living beings did come into existence without external force (without a God to create them),—then where did the life come from. It is an unalterable law of nature—and science does not deny that—that lifeless things cannot bring forth life. And if they cannot bring forth life now, how could they in the first place? So then before I accept the theory of evolutionists they must show me where life came from.

Now what does the Bible say about the existence of all things? Here are the very first words: "In the beginning God created heaven and earth" And then as we continue to read the first chapter we learn that in six days God made everything, and that all things were very good. The third chapter then tells us that man, the crown of creation, fell into sin, and thus brought the curse of God upon himself and all creatures on earth. So the Bible teaches not evolution but rather degeneration. And the language in which this is recorded is so plain and forceful that one cannot but feel that this is God's truth. Here is no theory, no supposition, but definite facts. And although the Bible does not claim to appeal to human reason, yet who will say that the history of creation as recorded in Genesis, is not reasonable, yea more so than the evolution theory. But for a Christian the reasonableness of a thing is not the deciding factor. A Christian knows that the Bible demands faith therefore he simply accepts what the Bible says, whether he understand it or not. And the Bible teaches creation, and not evolution. The Bible says: "In the beginning God created heaven and earth" and "The heavens declare the glory of God and the firmament showeth His handiwork." No room for evolution there!

Of course anybody, even a preacher may accept the evolution theory, if he so desires. But let him then not call himself a Christian minister but rather a false prophet, for he is one of those of whom God says: "Behold I am against the prophets which use their tongues and say He saith."

Evolution is not Christian, it is the doctrine of the devil. So beware of it!

PRODUCERS MAKE $48,000 PROFIT

Farmers' Livestock Agency Sets New Co-operation Record

Minnesota farmers have set a new record for co-operation in the United States.

The surplus set aside by the Central Co-operative Commission association at South St. Paul in the first five months of 1922, and just reported to the local shipping associations throughout the state, exceeds every former achievement in co-operative marketing of livestock.

Since Jan. 1, the farmers' sales agency at South St. Paul has set aside a surplus of $48,183, after paying the entire cost of operation, and handling the largest volume of business on the market at rates considerably below the prevailing commission charges. The company already has paid back to its patrons in patronage dividends more than $19,000, a sum larger than the total amount invested in its capital stock.

The investigation department of the Minnesota Farm Bureau federation has compiled figures showing that the money invested by livestock producers to establish their own sales agency on the terminal market amounted to than 45 cents apiece.

In the first five months of 1922, the Central association has handled 5,849 carloads of stock; the total volume of business on the market amounted to only 23,087 cars. The co-operative firm's business so far this year has been more than four times as large as that of its nearest competitor.

Norwegian Lutheran Church
V. O. Aaker, Pastor.

Sunday, June 18: English services at Goodridge at 11 A. M. and Norwegian services at Hjelle at 3 P. M. The Young People's society meets at the church at Goodridge Wednesday, June 21. The Ladies' Aid of Erie will hold auction sale at Mr. M. Anderson's Wednesday afternoon, June 21, and the Northern Ladies' Aid of Erie will have auction sale on Friday, June 23. Everybody welcome.

Auction Sale

The United Ladies' Aid of Goodridge township will hold an auction sale at the Peter Lovly home on Friday, June 23rd. Many beautiful and useful articles made by the ladies of the aid will be sold at auction. Lunch will be served after the sale. A cordial invitation is extended to all.

MORTGAGE FORECLOSURE SALE

Notice is hereby given that default has been made in the conditions of a certain mortgage containing power of sale, executed by Tollef Loyland and Tina Loyland, his wife, mortgagors, to First State Bank of Thief River Falls, a corporation under the laws of the State of Minnesota, mortgagee, dated the 20th day of January, 1917, and duly recorded in the office of the Register of Deeds in and for Pennington County, Minnesota, on the 25th day of January, 1917, at 1:45 o'clock P. M., in Book 54 of Mortgages at page 297, which said mortgage was thereafter and on the 31st day of January, 1917, for a valuable consideration and by an instrument in writing, dated on that day, duly executed and acknowledged by said First State Bank of Thief River Falls, sold, assigned and transferred to Edwin White, which said written assignment was thereafter and on the 21st day of February, 1917, at 1:00 o'clock P. M. of that day duly recorded in the office of the Register of Deeds in and for Pennington County, Minnesota, in Book 56 of Mortgages on page 352 thereof, which said mortgage was thereafter and on the 4th day of May, 1917, for a valuable consideration and by an instrument in writing, dated on that day, duly executed and acknowledged by Edwin White sold, assigned and transferred to Gertrude M. Harlow by said Edwin White, which said written assignment was thereafter and on the 10th day of May, 1917, at 1:00 o'clock in the P. M. of that day duly recorded in the office of the Register of Deeds in and for Pennington County, Minnesota, in Book 56 of Mortgages on page 385 thereof, and at the time of this notice there is claimed to be due and is actually due on the said mortgage, according to the terms thereof, the total sum of Two Thousand and Thirty-one and 08-100 ($2,031.08) Dollars, on the note secured by said mortgage, consisting of the principal sum of Two Thousand ($2,000.00) dollars, and interest thereon amounting to the sum of Thirty-one and 08-100 ($31.08) dollars, which said default has continued to date by virtue of the failure and neglect of said mortgagors to pay said sums, although demand has been made therefore, and no action or proceeding having been instituted at law or other-wise to recover the debt or any part thereof secured by the said mortgage.

NOW, Therefore, Notice is hereby given that, by virtue of the power of sale contained in the said mortgage and of the statute made and provided the said mortgage will be foreclosed by a sale of the mortgaged premises therein described at public auction, to the highest bidder for cash, at the main front door of the Court House in the City of Thief River Falls, Pennington County, Minnesota, on Monday, June 26th, 1922, at 10:00 o'clock A. M. of that day, to satisfy the amount that shall then be due on the said mortgage with interest thereon from the date hereof and the costs and expenses of such sale and the sum of Seventy-five ($75.00) dollars Attorneys' fees as stipulated in said mortgage in case of foreclosure.

The premises described in the said mortgage and so to be sold is all that tract or parcel of land lying and being in the County of Pennington and State of Minnesota, described as follows, to-wit; The Northeast (NE¼) Quarter of Section Sixteen (16) Township One Hundred Fifty-three (153) North, of Range Thirty-nine (39) West of the Fifth Principal Meridian, containing one hundred sixty (160) acres, more or less, according to the United States Government Survey thereof.

Dated at Thief River Falls, Minn., this 3rd day of May, 1922.

TAKES NO CHANCES ON MASQUER.

Synopsis—During the height of the New Orleans carnival season Jachin Fell, wealthy though somewhat mysterious citizen, and Dr. Ansley, are discussing a series of robberies by an individual known as the Midnight Masquer, who, invariably attired as an aviator, has long defied the police. Joseph Maillard, wealthy banker, is giving a ball that night, at which the Masquer has threatened to appear and rob the guests. Fell and Ansley, on their way to the affair, meet a girl dressed as Columbine, seemingly known to Fell.

CHAPTER I—Continued.

—2—

"And Maillard would do the paying." Fell's dry chuckle held a note of bitterness. "Let him. Who cares? Look at his house, there, blazing with lights. Who pays for those lights? The people his financial tentacles have closed their sucker-like grip upon. His wife's jewels have been purchased with the coin of oppression and injustice. His son's life is one of roguery and drunken wildness—"

"Man, are you mad?" Ansley indicated the Columbine between them. "We're not alone here—you must not talk that way—"

Jachin Fell only chuckled again. Columbine's laugh broke in with renewed gaiety:

"Nonsense, my dear Galen! We masquers may admit among ourselves that Bob Maillard is—"

"Is not the man we would have our daughters marry, provided we had daughters," said Fell.

They had come to a file of limousines and cars, and approached the gateway of the Maillard home. They turned into the gate. Jachin Fell touched the arm of Ansley and indicated an inconspicuous figure to one side of the entrance steps.

"An outer guardian," he murmured. "Our host, it seems, is neglecting no precaution! I feel sorry for the Masquer, if he appears here."

They came to the doorway. Columbine produced an invitation, duly numbered, and the three entered the house together.

CHAPTER II.

Masquers.

Joseph Maillard might have hopefully considered the note from the Midnight Masquer to be a hoax perpetrated by some of his friends, but he took no chances. Two detectives were posted in the grounds outside the house; inside, two others, masked and costumed, were keeping a quietly efficient eye on all that transpired.

Each guest upon entering was conducted directly to the presence of Joseph Maillard himself, or of his wife; was bidden to unmask in this private audience, and was then presented with a favor and sent forth masked anew to the festivities. These favors were concealed, in the case of the ladies, in corsage bouquets; in that of the men, inside false cigars. There was to be a general opening of the favors at midnight, the time set for unmasking. All this ceremony was regarded by the guests as a delightful innovation, and by Joseph Maillard as a delightful way of assuring himself that only invited guests entered his house. Invitations might be forged—faces, never!

Lucie Ledanois entered the presence of her stately relative, and after unmasking, dutifully exchanged kisses with Mrs. Maillard. Until some months previously, until she had come into the management of her own property—or what was left of it—Lucie had been the ward of the Maillards.

"Mercy, child, how marvelous you look tonight!" exclaimed Mrs. Maillard, holding her off and examining her high color with obvious suspicion.

"Thank you, ma'am," and Lucie made a mock courtesy. "Do you like little Columbine?"

"Very much. Here's Aunt Sally; take Miss Lucie's cloak, Sally."

An old colored servant bobbed her head in greeting to Lucie, who removed her cloak. As she did so, she saw that Mrs. Maillard's eyes were fastened in utter amazement upon her throat.

"Isn't it pretty, auntie?" she asked, smilingly.

"My goodness gracious!" The stern eyes hardened. "Where—where on earth did you obtain such a thing? Why—why—"

Columbine's features flinched. She was a poor relation, of course, so the look in the older woman's eyes and the implication of the words formed little less than an insult.

Quietly she put one hand to her throat and removed the collar, dropping it into the hand of Mrs. Maillard. It was a thing to make any woman's eyes widen—a collar of exquisitely wrought gold studded with ten great blazing star sapphires. Beside it the diamonds that bejeweled Mrs. Maillard's ample front looked cold and lifeless.

"That?" queried Lucie, innocently, producing a scrap of chamois and dabbing at her nose. "Oh, that's very interesting! It was made for Queen Hortense—so was this scarf that keeps my ragged hair from lopping out! They were a present—only this morning."

"Girl!" The lady's voice was harsh. "A present? From whom, if you please?"

"Oh, I promised not to tell; he's a particular friend of mine. Aren't the stones pretty?"

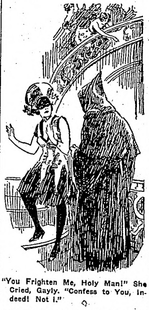
Mrs. Maillard was speechless. She compressed her firm lips and watched Lucie replace the sapphire collar without a word to offer. Silently she extended a corsage bouquet from the pile beside her; then, in a trembling voice, forced herself to explain about the favor inside.

Slipping her mask into place, Lucie was gone, not without relief. She knew very well that within half an hour Bob Maillard would be informed that she had accepted gifts of jewels from other men, with all the accompanying implications and additions that imagination could furnish. For, although Bob Maillard wanted very much indeed to marry her, his mother had no intention of sanctioning such a union.

"Neither has Uncle Joseph," she reflected, smiling to herself, "and neither have I! So we're all agreed, except Bob."

"Columbine!" A hand fell upon her wrist. "Columbine! Turn and confess thy sins!"

She had come to the foot of the wide, old-fashioned stairway that led to the floors above, and beside her had suddenly appeared a Franciscan monk, cowled and gowned in sober brown from head to foot.



"You Frighten Me, Holy Man!" She Cried, Gayly. "Confess to You, Indeed! Not I."

"You frightened me, holy man!" she cried, gaily. "Confess to you, indeed! Not I."

"Never a better chance, butterfly of the world. Haste not to the dance, fair sister—tarry a while and invite the soul in speech of import! Having passed the dragon at the gate, tarry a moment with this man of vows—"

"Shrive me quickly, then," she said, laughing.

"Now, without confession? Would you have me read your thoughts and give penance?"

"If you can do that, holy man, I may confess; so prove it quickly!"

The Franciscan leaned forward. His voice came low, distinct, clear-cut, and he spoke in the French which Lucie understood as another mother-tongue, as do most of the older families of New Orleans.

"See how I read them, mademoiselle! One thought is of uneasy suspicion; it is typified by a hard-lipped, grasping man. One thought is of profound regret; it is typified by a darkly welling stream of oil. One thought—"

Suddenly Lucie had shrunk away from him. "Who—who are you?" she breathed, with a gasp that was almost of fear. "Who are you, monsieur?"

"A humble brother of minor orders," and he bowed. "Shall I not continue with my reading? The third, mademoiselle, is one of hope; it is typified by a small man who is dressed all in gray—"

Lucie turned away from him quickly.

"I think that you have made some grave error, monsieur," she said. Her voice was cold, charged with dismissal [illegible] cuse me."

Not waiting any response, she daftly ran up the stairs. After her, for a moment, gazed the Franciscan, then shrugged his wide shoulders and plunged into the crowd.

While she danced, while she chattered and laughed and entered into the mad gaiety of the evening, Lucie Le- that ominous Franciscan. How could danois could not banish from her mind he have known? How could he have guessed what only she and one other barely suspected? There was no proof, of course; the very breath of suspicion seemed a calumny against an upright man!

Joseph Maillard had sold that Terrebonne land six months before any gas or oil had been discovered there, and eight months before Lucie had come into the management of her own affairs. He had not known about the minerals, of course; it was a case only of bad judgment. Yet, indubitably, he was now a shareholder and officer in the Bayou Oil company, the concern which had bought that strip of land.

Lucie strove angrily to banish the dark thoughts from her mind. Why, Maillard was a rich man, a banker, an honorable gentleman! To doubt his honor, although he was a harsh and a stern man, was impossible. Lucie knew him better than most, and could not believe—

"May I crave pardon for my error?" came a voice at her elbow. She turned, to see the Franciscan again beside her. "With a thousand apologies for impertinence, mademoiselle; I am very sorry for my faults. Will not that admission obtain for me one little dance, one hint of forgiveness from fair Columbine?"

Something in his voice spelt sincerity. Lucie, smiling, held out her hand.

"You are pardoned, holy man. If you can dance in that friar's robe, then try it!"

Could he dance, indeed! Who could not dance with Columbine for partner? So saying, the monk proved his word by the deed and proved it well. Nor did he again hint that he had recognized her; until, as they parted, he once more left her astonished and perturbed. As he bowed he murmured:

"Beware, sweet Columbine! Beware of the gay Aramis! Beware of his proposals!"

He was gone upon the word.

Aramis? Why, that must be the Musketeer, of course—Bob Maillard! The name, with its implications, was a clever hit. But who was this brown monk, who seemed to know so much, who danced so divinely, whose French was like music? A vague suspicion was in the girl's mind, but she had no proof.

Half an hour after this Bob Maillard came to her, and with impatient words made a path through the circle which surrounded her. "I know you now, Lucie!" he murmured. "I must see you at once—in the conservatory."

She was minded to refuse, but assented briefly. The words of the monk intrigued her; what had the man guessed? If Bob were indeed about to propose, she would this time cut off his hopes for good. But—was it that sort of a proposal?

As she managed to rid herself of her admirers, and descended to the conservatory, she was highly vexed with herself and the Franciscan, and so came to her appointment in no equable frame of mind. She found Maillard waiting in the old-fashioned conservatory; he had unmasked, and was puffing a cigarette.

"By gad, Lucie, you're beautiful tonight. Where did you get that collar of jewels?"

"Indeed!" The girl proudly drew herself up. "What business is that of yours, sir?"

"Aren't you one of the family? D—n it—Lucie! Don't you know that I want to marry you—"

"My dear Robert, I certainly do not want to marry any man who swears to my face—you least of all!" she coldly intervened. "I have already refused you three times; let this be the fourth and last. Now, kindly inform me why you wished me to meet you here."

"I have a chance to make some money for you in a hurry," he said. "Your father left you a good deal of land up Bayou Terrebonne way—"

"Your father sold some of it," she put in, idly. His eyes flickered to the thrust.

"Yes; but you've plenty left, near Paradis. It's away from the gas field, but I'm interested in an oil company. We've plenty of money, and we're going to go strong after the liquid gold. That land of yours is good for nothing else, and if you want to make some money out of it I'll swing the company into leasing at a good figure and drilling there."

"You think there's oil on the land?"

"No." He made a swift, energetic gesture of dissent. "To be frank, I don't. But I'd like to throw a bit of luck your way, Lucie. That fellow Gramont—the prince, you know him—he's an engineer and a geologist, and he's in the swim."

Next week — the Midnight Masquer.

(TO BE CONTINUED.)

Tell-Tale Traits.

You cannot rightly judge people by what others say about them, but you can by what they say about others.—Boston Transcript.

Perhaps the easiest way to have a good time is to go ahead and have it.

RADIO

VACUUM TUBE USED AS RADIO DETECTOR

How This Device Depends on Emission and Control of Electrons for Its Operation.

Readers of the radio column are urged to clip each article and paste it in a file book. The articles printed are continuous and the entire series will be valuable for reference.

The greatest advances made in the past few years in the radio art have been due in one way or another to the use of vacuum tubes. In view of this fact a more careful consideration of them will be of interest.

All of these tubes, known by a variety of names, such as radiotron, audion, seriotron (trade names of the manufacturer) depend upon the same fundamental principles for their operation. For the sake of simplicity of brevity these will be referred to in this column simply as vacuum tubes. A vacuum tube can be made to function as a detector, as an amplifier, or as an oscillator.

The vacuum tube depends on the emission and control of electrons for its operation. The electron is the smallest subdivision of matter which mankind recognizes and it carries the smallest known charge of negative electricity. For years previous to electron research it had been held by scientists that matter was built up of distinct particles or units which they called atoms and molecules. At first the molecule was assumed to be the smallest quantity of matter that could have a separate existence or take part in chemical action, but more vigorous research pointed to the fact that the molecule is made up of still smaller elements which are termed atoms; that is, a molecule may be composed of several atoms. Then for a time it was assumed that the atom was the very smallest quantity of an element that could exist, but later researches have revealed that atoms may be further subdivided into particles called electrons. The apparent mass of an electron is about one-eighteen-hundreth part of that of an atom of hydrogen which is the smallest of the chemical atoms.

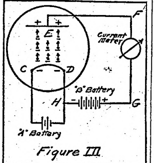


Figure III

According to the electron theory an atom consists of a definite number of electrons grouped around a nucleus having a positive charge and so long as none of the component electrons are driven from the atom, the latter possess no detectable charge. The positive charge on the nucleus is said to be exactly neutralized by the negative charges on the electrons grouped about it.

Suppose now that by some means an electron can be detached from the atom. Then the atom becomes what is known as a positive ion and it exhibits the properties of a positively charged body, or in other words since an electron which carries a negative charge has been removed from the atom which has equal positive and negative charges, the portion of the atom now remaining has a deficiency of negative charge and acts like any positively charged body.

On the other hand if some force can be brought to bear that will add an electron to a normal atom which is neutral as far as electrical charges are measured, the result will be a negative ion, which will possess all the properties of a negatively charged body. An atom then which has a deficiency of electrons is called a positive ion and one having excess of electrons is called a negative ion.

Since each electron carries a negative charge of electricity an electron represents a certain quantity of electricity. Forcing electrons to move from one point to another causes electricity to flow. The ability of any medium to conduct electricity or allow a current to flow through it depends upon the number of free electrons available as carriers of charges.

It has been known for many years that the space surrounding a piece of heated metal is a conductor of electricity. It has been demonstrated more recently that this is due to the release of electrons and that if an incandescent metal be placed in a bulb exhausted of all gases, pure electrons will be liberated from the incandescent metal.

In a vacuum tube such as we are using at the present time, the piece of metal used to furnish the electrons is called the filament and is usually made of tungsten and sometimes is coated with oxides to increase the electron emission. For convenience the filament of a vacuum tube is heat- [illegible] furnished by the battery current that constitutes the force that disrupts the atoms of the filament and liberates electrons.

Fig. III is a spherical glass bulb from which all the air and gases have been exhausted and having mounted in it a filament C-D which can be heated to incandescence by the "A" battery connected to it, and the metallic plate E. When the filament C-D is heated to incandescence by the "A" battery connected across its terminals electrons are emitted. Connecting the cold plate E to the incandescent filament C-D by means of the circuit E-F-G-H which includes a current meter and a "B" battery, with its negative side connected to the filament lead at H and its positive side connected through the current meter, the plate becomes electrically positive with respect to the filament.

Since like charges repel and unlike charges attract, there will be a movement of electrons from the filament to the positively charged plate, and the current meter will show a deflection which indicates that a current is flowing in the circuit E-F-G-H.

Increasing the "B" battery voltage causes an increase in the current flowing in the circuit E-F-G-H, the plate circuit, until the positive charge on the plate E is so strong that all of the electrons given off by the filament are attracted to it. Assuming that the temperature of the filament is kept constant and that the plate voltage has been increased to the point where all of the electrons given off by the filament are attracted to it, any further increases in the "B" battery voltage will not cause any increase in the current in the plate circuit.

Increasing the temperature of the filament will increase the total number of the electrons emitted.

FRISCO TALKS TO HONOLULU

New Radio Station at the Presidio Can Be Heard Half Way Around the Globe.

"Hello, Honolulu."

That may sound like fiction, but it is a reality, nevertheless.

The new radio station at the Presidio, San Francisco, with aerial conditions right, can be heard half way around the globe. Officials in charge of construction declare it to be the most powerful vacuum tube transmitter on the Pacific coast.

Located on the highest point in the Presidio, overlooking San Francisco bay, two 150-foot aerial towers to augment its efficiency, the new station will command similar stations in Salt Lake City and Cheyenne.

Radiophones on German Trains.

Wireless telephone instruments will be installed on a number of important German express trains, and receiving instruments will be placed in hotels and embassies, according to an announcement made recently. Experiments conducted in a moving freight car have shown that the wireless system works well, the men engaged in the testing of the instruments being able to hold conversations with friends in Berlin. The tests were made under the observation of engineers, military attaches and the diplomatic representatives of the United States and Sweden.

Handling Vacuum Tubes.

When you handle the vacuum tubes of your receiver great care should be exercised that they are not knocked about or that the elements are broken. These little lamps are the heart and soul of the set. A good way to operate these tubes is to keep the glow just a little below the critical point.

ADVICE FOR AMATEURS.

The voltages applied to the plate circuits of amplifying tubes are not extremely critical and one voltage control will suffice. The detector tube, however, is often very critical and an efficient potentiometer will work wonders in controlling it.

Apparatus used for the reception of broadcasting is exactly the same as that used for the reception of code signals. The transmitting equipment, however, is different.

The use of a single wire for reception is advantageous because it lessens the amount of objectional interference in the way of static. It is equally as good as a multiple wire system for reception.

Defective "B" batteries will often cause roaring in the telephone receivers.

The electron often talked about is the smallest known quantity of negative electrical energy. In motion it makes up the electric current.

A "soft" vacuum tube is used as a detector tube and a "hard" vacuum tube as an amplifier. The terms "hard" and "soft" refer to degree of evacuation.

Radio waves travel at the same speed as light, namely 186,000 miles per second.

A wavemeter is an instrument used for checking up the wave lengths of sending and receiving stations.

Gas pipe or water pipe systems may be used for grounds, the latter being more advisable.

Lightning protection secured by grounding the antenna when not in use is essential and is required by the underwriters.

COULD NOT HIT A LICK FOR MONT

Petersburg Resident Says She H About Lost Hope of Getting Better—Now Well and Happy.

"Tanlac has been such a blessing me I can't help singing its praise said Mrs. T. J. Archer, highly esteem resident of 1147 Shepard St., Petersburg, Va.

"I had indigestion so bad I could eat a thing without being in misery hours, and the pain around my hea caused by the gas seemed all I could stand. I constantly had headach and awful spells of dizziness. Th to make matters worse rheumatis in my arms, shoulders and knees a most drove me to distraction, and f three months I couldn't do a stroke work.

"I had just about decided it was n use to take any more medicine whe my husband brought me a bottle Tanlac. Now I never have a touc of indigestion. Headaches and dizz spells are a thing of the past, an rheumatism has left me entirely. never have known a medicine to equa Tanlac."

Tanlac is sold by all good druggists

To Honor Canadian Heroes.

Six thousand soldiers' graves, located in 1,200 cemeteries, scattered throughout Canada, are to be marked with suitable headstones by the imperial war graves commission and will receive perpetual care. These are the graves of members of the Canadian expeditionary force and the royal air force who died in Canada on the way to or from the front. Included among the number to be cared for are the graves of a few alien enemies who died while under internment during the war, and which, under the terms of the peace treaty, must be looked after.

Proof.

"Hubby, do you love me?"

"Of course."

"How much do you love me?"

"Well, here's my check book. You can glance over the stubs."—Judge.

THE PRAYER OF A HORSE

By Laurence E. Cash.

O MAN, my Lord and Master, hear Thou my prayer:

Water me, feed me, keep me clean and work me in reason. O Lord, when my day's work be done give me shelter from rain, wind and cold and a clean, dry bed in a stall wide enough for me to lie down in comfort. Do not tie my head in an unnatural position or cut off my tail, which is my only defense against flies. Do not, O Man, drive me rapidly down hill. O Lord, do be merciful and considerate of me in hot weather, and do not kick, strike or otherwise abuse me when I do not understand your desires. Prod me not with merciless spurs. Teach Thou me to understand Thy desires. Speak gently unto me, O Lord, Thy voice means more to me than whip and reins. I have a sense of humor. Play with me, and pet me, O Man, and I will gladly lend myself to Thee in willing service.

Have mercy on me, O Master, when I have colic, and do give me one spoonful of Di-Col-Q. It will relieve me quickly. When I have scours drench me with Di-Col-Q. And, O Master, when I be galled, have sores on shoulders or back, wire cuts, scratches, mange or swellings, apply Thou Di-Col-Q to mine affected parts and I will praise Thee for relief from mine afflictions. Di-Col-Q will enable me to do Thy bidding with delight.

O Man, Di-Col-Q is just as good for similar human ills.

Remember, O Lord, Di-Col-Q is made in mercy by New York Drug Concern, 401 Lafayette Street, New York City. Praise Thou this firm for their alleviation of beastly ills.

O Master, when I fail to eat examine my mouth for the cause. Do not work me when I can not eat. Be merciful unto me, O Man, and I will serve Thee and Thy family many years with a glad heart.

Finally, O Lord, when my youthful beauty and strength be gone, and my days of service ended, neither turn me out to starve and freeze, nor sell me to some cruel man to be tortured. O Man, if Thou be financially unable to care for me in my old days, take Thou my life in the kindest way.

Hear and answer my prayer, O my Lord, and YOUR God will reward you both here and in the hereafter.

With all reverence I so pray unto Thee in the name of Him, who was born in a manger.—AMEN.

Western Canada
Land of Prosperity
offers to home seekers opportunities that cannot be secured elsewhere. The thousands of farmers from the United States who have accepted Canada's generous offer to settle on FREE homesteads or buy farm land in her provinces have been well repaid by bountiful crops. There is still available on easy terms

Fertile Land at $15 to $30 an Acre
—land similar to that which through many years has yielded from 20 to 45 bushels of wheat to the acre—oats, barley and flax also in great abundance, while raising horses, cattle, sheep and hogs is equally profitable. Hundreds of farmers in Western Canada have raised crops in a single season worth more than the whole cost of their land. With such success comes prosperity, independence, good homes and all the comforts and conveniences which make life worth living.

Farm Gardens, Poultry, Dairying
are sources of income second only to grain growing and stock raising. Attractive climate, good neighbors, churches and schools, good markets, railroad facilities, rural telephone, etc.

For certificate entitling you to reduced railway rates, illustrated literature, maps, description of farm opportunities in Manitoba, Saskatchewan, Alberta and British Columbia, etc., write

Children Cry for Fletcher's Castoria

Tin Can.

An old lady was crossing the street the other day. A dog ran into her with such force that it knocked her down. Just then a light auto ran over her. A gentleman witnessing the accident came to her assistance. He said: "Lady, did that dog hurt you?"

She looked at him a little dazed and replied: "No, the dog didn't hurt me, it was the tin can tied to its tail."

The Cuticura Toilet Trio.
Having cleared your skin keep it clear by making Cuticura your every-day toilet preparations. The Soap to cleanse and purify, the Ointment to soothe and heal, the Talcum to powder and perfume. No toilet table is complete without them.—Advertisement.

Innocent Pastime.

An old man was walking along a road one night, when he was confronted by a burly stranger.

"What do you want?" he asked.

"We're going to 'ave a game of put and take, mate," replied the stranger.

"Put and take!" gasped the old man, shivering with fright.

"Yus," said the burly one. "You put yer 'ands up and I'll take yer watch!" London Tit-Bits.

SAVE SHOES AND STOCKINGS
They will last twice as long if you Shake Into Your Shoes ALLEN'S FOOT=EASE, the powder for the feet. It takes the friction from the shoe and gives quick relief to Corns, Bunions, Callouses, sore, aching, swollen, tender feet. Shake Allen's Foot=Ease into your shoes and enjoy the bliss of feet without an ache.—Advertisement.

She Said Something.

Every day new examples of the versatility of the very young come to hand. The latest is about the little girl who forgot her manners when she was handed a piece of candy. "Aren't you going to say anything to me?" asked her mother. And the tiny youngster threw her arms around mother's neck and exclaimed:

"I'll tell the world, mother, you're some kid."

Both Sides Pleased.

"The rain falls alike on the just and unjust." "They both point to that with pride."

TORNADO DEAD FILL MORGUES

Swift Swoop of Storm on New York City Engulfs Hundreds.

LASTS FIVE MINUTES

Marine Police Predict Victims in Bay Will Bring Toll to at Least 80 and Still Grapple for Bodies.

New York.—Morgues and undertaking shops of the metropolitan area held the bodies of more than three score men, women and children—victims of the brief cylonic thunderstorm.

Marine police, who continued all day their work of grappling in Pelham bay and Long Island sound, off City Island, where the greatest toll was taken among canoeists and fishermen, predicted they would find at least a score more victims—enough to push the death toll past 80. Eyewitnesses of the swift tragedy placed the number even higher.

Engulfed in Storm.

At least 250 canoes, rowboats and small motorboats were bobbing about off the island, witnesses said, when the storm came screaming down on the resort, at a velocity of 86 miles an hour or better. Occupants of the little craft, sensing their danger, made a run for shelter, but scarcely had they got under way when they were engulfed in a blinding storm of rain and hail.

As quickly as it had come, the storm vanished. It had lasted less than five minutes. But scarcely a dozen of the 250 small craft had survived.

Crowds Helpless to Aid.

Horror stricken, but helpless to aid, the crowds on the beach and about the Casino pier saw scores of men and women clinging to wrecked and overturned craft in the choppy sound and bay. One by one, they gave up the struggle, and dropped quietly off, to be carried out toward the open sea by the tide.

Some bodies, the police say, probably never will be recovered. The tide, turning, brought more than a score of them back today.

Heroic Work Saves Hundreds.

Eyewitnesses estimated there were between 500 and 750 persons in the wrecked craft. Heroic work by United States life guards, members of nearby yacht clubs, and volunteers from the shore crowd saved hundreds.

More than 50 craft of all sorts were out, dragging to safety the survivors of the disaster. A score or more saved themselves by clinging to the sides of Cornelius Vanderbilts' schooner yacht Intrepid, until they were hauled in or picked up by rescue craft.

Bodies Occasionally Found.

The waters had been cleared by nightfall of all the living, but the search for the dead continued through the night. Guided by the searchlight of a policeboat, a score of boats cruised about, grappling for, and occasionally finding bodies.

Meantime, chaos reigned on shore, where darkness descended, unbroken by the usual flare of electric lights. The island power plant had been put out of commission by the storm, as had telephone and telegraph lines.

Mothers, fathers and wives of the missing besieged the police station, where a temporary morgue had been set up—gazing fearfully at the faces of the dead by the flickering light.

COULTER ANNOUNCES PLANS

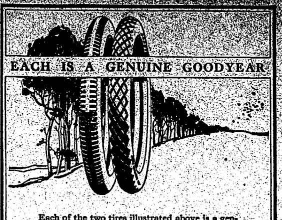
Commencement Address of A. C. President Is Key to Policies.

Fargo, N. D.—Dr. John Lee Coulter, president of the North Dakota Agricultural college, in his commencement address to the class of 64 students who received degrees on completion of their work this week, outlined for the first time his policy of conducting the school, some phases of which would mean changes of far-reaching consequence, the chief change suggested being the removal of the "regulatory department" from college control, and the placing of this work under a separate department.

Dr. Coulter advocated retaining the present name of the institution, admitting that it does not cover all of the activities of the institution, but because of "its historic use, the tremendous importance of agriculture in North Dakota and to prove our appreciation of the dignity of that vocation."

Indians To Greet Landis.

Devils Lake, N. D.—When Judge Kenesaw M. Landis arrives in Devils Lake on June 21 for the state convention of the American Legion, he will be met with a war whoop from a band of Sioux Indians in battle regalia. The Indians, from the Fort Totten reservation across the lake, will play a part in the entertainment of the veteran Chicago jurist, and will stage a special ceremony at Lakewood in honor of the man who fined the Standard Oil company $29,000,000.



EACH IS A GENUINE GOODYEAR

Each of the two tires illustrated above is a genuine Goodyear through and through.

One is the famous reliable 30 x 3½ inch Goodyear All-Weather Tread Clincher.

Its companion is the popular 30 x 3½ inch Goodyear Cross Rib.

The Goodyear Cross Rib is built of the same high grade Egyptian cotton fabric that goes into the All-Weather Tread Goodyear.

It has a long-wearing but differently designed tread, and sells for less money.

More than 5,000,000 of these tires have been sold in the last five years.

Their fine performance has demonstrated the folly of buying unknown and unguaranteed tires of lower price.

Ask your Goodyear Service Station Dealer about their advantages.

GOODYEAR

HAD NAVAL OFFICER GUESSING

Peculiar Combination of Names Seemed to Be Almost Too Much Out of the Ordinary.

While Lieutenant Commander H. E. Parsons, navy recruiting officer at Houston, Tex., was sitting at his desk a few days ago a young man entered and said he wanted to enlist.

"What is your name?" the officer asked.

"Bryan Dry," was the reply.

"You are a namesake of William Jennings Bryan, I take it," suggested the officer.

"Yes, sir."

"What is your home address?" was the next question.

"Moonshine Hill."

Parsons found on further inquiry that there is a Moonshine Hill in Texas and that Bryan Dry was one of its young inhabitants. Without more questioning, the applicant was signed up for a term of service in the navy.—Kansas City Star.

The Styles.

"What, in your opinion, has been the outstanding feature of woman's emancipation?"

"She talks less and reveals more." —Judge.

Cutting Off the Last Word.

Archeologists have recently been puzzled over the finding of the headless body of an Egyptian princess in an ancient tomb. It seems that the question as to how the lady lost her head is important in archeologic circles.

In certain Oriental countries it is customary for the head of the house, in the event of a domestic argument, to behead the lady, thus cutting the lady as well as the argument short. Doubtless, the last words that issued from the lips of the headless princess were: "Where have you been?"—Judge.

Sure of It.

Margaret looked up at her mother one day and said:

"Mother, Jesus has wash days, hasn't he?"

"Why, no, child," her mother replied.

"But he has," insisted Margaret.

"Why do you say that?" the mother asked.

"Because, mother, didn't He wash my sins away?"

An honest man's word is as good as his bond.

Envy will find faults where there are none.

Unkind Remark.

A scenario writer experienced great difficulty in getting his plots accepted. As a rule, they were so uninteresting that a complete hearing was seldom granted. At last he managed to persuade a weary producer to listen to the synopsis of his latest play.

"Imagine," he began, "midnight, all silent as the grave.

"Two burglars force open library windows, and eventually commence operations on the safe. The clock strikes one—"

"Which one?" yawned the producer.

Bringing Him to the Point.

Miss De Muir—Papa has forbidden you to come to the house. He says you are a dangerous man.

"Dangerous. What can he mean?"

"He says you are the kind of a man who will hang round a girl all her life and never marry her."

Then he proposed — Edinburgh Scotman.

All things are difficult before they are easy.

CUT HERE
Grape-Nuts
Made of Wheat and Barley
Company
"There's a Reason"

Here's a real treasure from Nature's storehouse

GOOD old Mother Nature has placed in wheat and barley the wonderful food properties which build and sustain life and health.

Many so-called "refined" foods are robbed of vital elements which the body needs.

Grape-Nuts—that famous wheat and barley food—brings you all the natural goodness of the grains in perfected form, with a crispness and flavor that charm the appetite.

You will find Grape-Nuts an ideal dish for breakfast or supper-time. Ready to serve from the package, with cream or good milk.

Order Grape-Nuts from your grocer today.

Andrew and Martha Norby, sister and brother of B. O. Norby, and Grundy Senum and Gina Landsveik all of Fosston drove to Goodridge last Thursday to attend the graduating exercises and to visit with Mr. Norby. They left Friday afternoon.

WOMEN—THE SPENDERS

Those who have anything to sell should play to women; they are the spenders. A recent survey reports that they buy as follows: Of drygoods—96 per cent of all that is sold; of foods—87 per cent; of hardware—49 per cent; of automobiles—41 per cent; of drugs—51 per cent; of phonographs—100 per cent.

About the time a fellow thinks he's a "big gun," someone comes along and fires him.

The fellow who watches the clock can hardly expect to be anything but one of the hands.

STANTON NOSES OUT QUALE IN RACE FOR COUNTY ATTORNEY

Close Contest Gives Stanton 1,350 to 1,343 for Quale. LaBree Gets Big Vote in County—Gunderson and Sande High for Superintendent of Schools and Fred Lorentson in Finals Against Anderson for Register.

VOTE ON COMMISSIONER FOR THE TOWNSHIP OF GOODRIDGE

The vote on County Commissioner for the Township of Goodridge indicates that but 29 votes were cast for these offices. Of this vote Hanson received 12, and Race, 3; Simstad, 8; Aaker 6, and Letnes, 0.

The contest between Theo. Quale, incumbent, and E. M. Stanton for county attorney developed into a real horse race and was the only fight in Monday's primary to cause a ripple of excitement. With Deer Park, the last precinct to report, missing, Quale led Stanton by eight votes, but Deer Park added 30 votes to Stanton's total and he was placed in the lead by a margin of seven votes.

Sheriff W. J. LaBree registered the big vote of the primary, coming in with 1,556, the highest vote accorded any candidate. His opponent will be Alderman Ihle of Thief River Falls, who defeated A. W. Crown for second place by about 100 votes.

As was generally expected, N. J. Anderson polled the largest vote for register of deeds. He will be opposed this fall by Fred Lorentson, a young farmer, who surprised everybody as a vote getter.

In the race for superintendent of schools, Mostue was eliminated and Gunderson, the incumbent, led his nearest opponent, Sande, by about 100 votes.

The table on this page gives the detailed vote in Monday's primary, except Deer Park, which voted as follows: For judge, Fourteenth district: Bishop, 16; Grindeland, 39; Halvorson, 17; Watts, 12; Wilson, 3. Register of deeds: Ohm, 1; Oscar Peterson, 18; W. A. Swanson, 34; T. O. Stageberg, 3; Benson, 1; Lorentson, 1. Sheriff: LaBree, 54; Ihle, 7; Crown, 7. Superintendent of schools: Mostue, 42; Sande, 9; Gunderson, 8. County attorney: Smith, 13; Stanton, 30, and Quale, 21.

Republican Ticket Leads.

Associated Press dispatches state that the Republican ticket, headed by Senator Kellogg and Governor Preus, has swept the state by a two-to-one vote over Ellsworth and his followers. The race in the Third Congressional district between Thoreen and Charlie Davis is said to be close.

GRINDELAND AND WATTS ARE HIGH

Halvorson, of Thief River, Third in Race—Bishop Wins Pennington.

Outside of the fact that Judge Grindeland lost his own county of Marshall to both Bishop and Halvorson in Monday's primary, there were few surprises in the returns. The sitting judges, with a few scattering precincts missing, are high by comfortable margins. Bishop carried this county and Marshall, but fell behind in the other counties to such an extent that he will be the fourth man in the race.

Halvorson failed to carry a county, but his lead of nearly 1,000 votes over Bishop in Polk county places him third in the race. Judge Watts carried Roseau, Red Lake and Polk, while Judge Grindeland carried Kittson, Norman and Mahnomen.

QUINN FOR SUPREME COURT; ARCHIE VERNON IS SECOND

Judge Quinn, member of the Supreme Court, is leading his opponents by a safe margin, according to late reports, many counties giving him a two-to-one lead over his nearest competitor. Indications are that Archie Vernon, former Legion Commander, will be Judge Quinn's opponent in the fall election.

Village Streets Will Receive Coat of Gravel

The streets of Goodridge are being repaired. Several teams are busy hauling dirt now, and as soon as that work is completed they will haul gravel as a top layer, and in a few months the streets of Goodridge will not be far behind the average city streets. It will be a wonderful improvement during the rainy season.

A good many of the alleys have also been filled in recently, and by fall we expect out streets and alleys will be in first class shape.

HANSON AND FINSTAD IN LEAD FOR BOARD

Above Men Are in Finals for Commissioners of the First District.

The race for county commissioner in the First district placed Hanson in the lead with 155 votes, a close contest developing between Finstad and Aaker for second place, the former getting a place in the finals by the narrow margin of seven votes. Following is the total vote in the First district:

Hanson, 155; Finstad, 107; Aaker, 100; Race, 93; Letness, 71.

In the Fifth district, Larson apparently ran away from his opponents, polling 209 to 130 for Olson, his nearest competitor. Following is the detailed vote in the Fifth: Larson, 209; Olson, 130; Austin, 116; Mandt, 73.

Highlanding Election Returns Show Big Vote

That the voters turned out in the township of Highlanding on Primary Election day is evident from a tabulation of the votes cast last Tuesday. W. J. LaBree for sheriff and O. R. Sande for superintendent of schools polled the highest votes, the former receiving 53 and the latter a total of 52. An accurate statement of the Tuesday result follows:

Wm. A. Anderson, 27; Wm. B. Anderson, 21; Conrad H. Christofferson, 19; Jas. H. Quinn, 14; W. H. Vanderbrow, 9; Archie H. Vernon, 6; J. M. Bishop, 28; Andrew Grindeland, 42; G. Halvorson, 27; Wm. Watts, 20; Geo. M. Wilson, 40; Water E. Day, 0; Nels Fore, 0; Marius Waldal, 0; N. J. Anderson, 11; M. N. Benson, 15; Fred D. Lorentzon, 3; Elmer Ohm, 9; Oscar J. Peterson, 24; T. O. Stagberg, 2; W. A. Swanson, 50; A. W. Crown, 17; Ole Ihle, 49; W. J. LaBree, 53; G. Howard Smith, 24; E. M. Stanton, 41, Theodore Quale, 42; G. M. Gunderson, 21; E. A. Mostue, 30; Sande, 52; H. I. Finstad, 64; A. W. Hanson, 39; Race, 4; Akre, 6; Letness, 3.

FORMER RESIDENT VISITOR

Mrs. G. W. Hahn, of Rockford, Ill., formerly Edna Stephenson, is the guest of her parents, Mr. and Mrs. J. Stephenson. Mrs. Hahn was married June 10th, to G. W. Hahn of Rockford, Ill. They spent several days in Chicago on a honeymoon trip, Mr. Hahl returned to his work at Rockford, while Mrs. Hahn came on to Goodridge to visit her home for a short time. Mrs. Hahn has been absent from Goodridge for about two years.

M. G. Thoreson and family visited at the Sigrud Anderson home Sunday.

CREAMERY MAKES SPLENDID RECORD

Total of 13 Farmers Receive More Than $40 for Their Cream During Month

Perhaps the most gratifying record ever made by the local creamery is shown in the last monthly report recently issued, which shows that for the month of May, 10,600 pounds of butter was manufactured. It is now believed that the record of last month will be outdone for June, as the local institution is daily gaining new patrons.

Farmers of the Goodridge territory are taking added interest in the affairs of the creamery and the new management is giving to its patrons every consideration in order to prove to them that patronizing the co-operative association proves beneficial to all concerned.

Stewart McLeod leads the list of patrons for the month in the amount received for cream, his checks amounting to $92.29. Tom Harms is second with $69.05 and Morgan Vaughan is third with $63.02. Thirteen patrons received checks amounting to $40 for the month for cream and it is thought that when the report for June is published it will show a marked increase.

Following is the report this week presented to The Banner by P. Englestad, secretary of the Association:

Stewart McLeod	$92.29
Tom Harms	69.05
Morgan Vaughan	63.02
And. Feragan	60.18
John Lamporter	59.18
O. N. Urdahl	53.28
T. Halvorson	49.54
Ed Keale	49.46
Elmer Olson	42.73
Casner Iverson	42.54
L. P. Poppenhagen	40.88
T. G. Helle	40.47

5,276 Pounds of Wool Is Shipped Out During Week

The wool business has taken quite a leap in the vicinity of Goodridge. Last week 5,275 lbs. of wool was shipped out of here and farmers are bringing loads of it in every day. This is another proof that the farmers are on the right track, that they have come to realize that livestock of any kind is much more profitable than small grain. Even though the price of wool has gone down three cents the past week, it still sells at a good figure. At the present time wool is being bought for 27 cents.

Mr. Romkin and family were shoppers here Tuesday afternoon. Miss Ruth McDonald returned with them to spend the balance of the week as the guest of Esther.

LOCAL PASTOR WEDS GRYGLA WOMAN

Ceremony Performed in Presence of Large Circle of Friends

A wedding of interest to the people of Goodridge took place last Wednesday, June 14th, at the Franzman home near Grygla, when Miss Ida Franzman and Rev. Henry Lutz of Goodridge were united in marriage. Rev. Kreidt of Thief River Falls performed the marriage ceremony. The wedding took place at the home of the bride a short distance southwest of Grygla. The marriage vows were spoken under an arch decorated with artificial flowers in the center of which hung a large wedding bell. Miss Ida is the second daughter of Mr. and Mrs. John Franzman. She was a very popular and well liked young lady in her community. The groom is pastor of the German Lutheran church near Grygla, making his home in the village of Goodridge. He is an able young man, well known and highly respected throughout his charge and by all who know him. Rev. Kreidt delivered a very impressive wedding service. The bride was given in marriage by her father. The wedding march was played by a sister of the bride Miss Alice Franzman and the maid of honor was Miss Hofer of Tenstrike, a Bemidji classmate of the bride, and the brides maids were Mrs. Alfred Franzman and Miss Mable Johnson. The best men were Herman Lutz, brother of the groom, Alfred and John Franzman, brothers of the bride. Herman Lutz, father of the groom of Dennison, Ia., was present, beside a large circle of friends and acquaintances. Out of town guests were: Mr. and Mrs. Dr. Froehlich, Rev. and Mrs. Kreidt, Clara Bucholz, and Mr. Hermanson of Thief River Falls. Rev. and Mrs. E. Weidenhoefer of Wylie; Rev. O. Fedsch of Plummer. There were about 100 guests in all. There were also guests from Germantown, Esplee, Erie, and Goodridge. The bridal couple were the recipients of a large number of valuable gifts as a token of high esteem in which they are held. After the ceremony a most delicious lunch was enjoyed under the shade of the trees.

The happy pair left Monday for an extended trip by auto. They will visit Mr. Lutz's home at Dennison, Ia., also points in South Dakota and Illinois where they will be their home.

The Banner joins their many friends in wishing them a long and prosperous married life.

JUNG'S QUALITY BREAD IS POPULAR WITH HOUSEWIVES

In order that Victory Bread, the product of the Jung Quality Bakery, of Thief River Falls, may become more famous than ever with housewives of Goodridge and surrounding territory and in order that buyers of this excellent brand of bread in eastern Pennington and Beltrami counties may be better served, the manufacturers have arranged with H. Chrstianson & Son of this village to handle the jobbing of the product in this village.

Victory Bread is becoming more and more popular in this section of the country and householders have declared their entire satisfaction with it and it is being sold here almost to the exclusion of all other brands. A 30-inch advertisement on another page of The Banner tells the story in a few seconds.

Mr. and Mrs. Bundhund drove to Bemidji on Thursday accompanied by Mrs. Bundhund's sister, Mrs. Emil Risteau, of Germantown. Mrs. Risteau and Mrs. Bundund will visit at Bemidji for a few days while Mr. Bundund drove on to Hibbing. They returned to Goodridge on Monday.

N. C. Kapeloyits, representative of the Minnesota Loan & Trust Co. of Minneapolis, called at the Goodridge State bank last Friday on business.

PURE BRED SIRE FOR EVERY HERD

Blooded Sire for Every Herd Is Slogan for Campaign

O. M. Kiser, secretary of the Red River Valley Liestock association will devote the next three months to the work of organizing co-operative bull associations in "A Purebred Sire for Every Herd" campaign sponsored jointly by the association and farm bureaus. This move has the sanction of W. E. Morris, district leader of county agents, the county agents and the officers and directors of the Red River Valley Livestock association.

Grade and scrub sires are found at the head of nearly three-fourths of the Valley herds. The tremendous annual loss from this source alone is not fully understood or it would soon be overcome. Mr. Kiser will push this campaign among the farmers themselves as they are the ones who will benefit.

Bankers and breeders will co-operate in extending credit where this is needed. In most cases the farmer sells his scrub bull and makes a first payment from the proceeds. The breeders selling the pure bred sire will be asked to accept notes for one-half the balance and the banker to loan the buyer the other half.

The first township to boast a full quota of purebred sires will be recognized in some suitable way by the Red River Valley Livestock association, C. G. Selvig, president of the association, said at a recent conference. It is expected that the eleven counties of this section will speed up in this work to see which one secures this premier honor.

Durum Wheat Acreage is Above Average in 1922

Washington, D. C., June 23.—The area of durum wheat in Minnesota, North Dakota, South Dakota, and Montana is estimated by the United States Department of Agriculture to be 5,276,000 acres, or 35.2 per cent of the total spring wheat acreage of these states. This compares with 4,890,000 acres of durum wheat in these states in 1921, or 30.4 per cent of their total spring wheat acreage, and with an annual average of 3,644,000 acres of durum wheat for the five years 1917-1921, or 22.0 per cent of all spring wheat in the same states.

This wheat has gained in popularity because of its resistance to rust and the trying weather conditions of these four spring wheat states and also because of its higher yield per acre than that of other varieties of spring wheat.

Breeders' Association To Meet at Farm Bureau

The Pennington County Holstein Breeder's association will hold a meeting in the Farm Bureau office, Saturday, June 24th, at 7:30 P. M. At this time the association will discuss the probability of holding a sale at the Fair grounds during the month of September.

Plans for a purebred sire campaign is also under way and the association wishes to do something definite in eliminating the scrub bull from the county in the very near future.

NOTICE

Board of Directors of the Red Lake Eastern Marshall Farmers Telephone company will hold a directors meeting at 1 o'clock P. M., June 30th. All subscribers indebted to said company are requested to meet on that day and make some arrangements for settlement, before said delinquent accounts are turned over to an attorney for collection.

A. HAMMERSTEIN,
President Board of Directors.

Sell Your Cream Where Your Best Interests Lie---at the Local Creamery

When you sell your cream to the Goodridge Co-operative Creamery Association you dispose of it to an institution that's interested in your welfare along both dairying and farming lines. All competition is successfully met here and we always aim to give all our patrons "The Square Deal." MARKET YOUR CREAM WITH US—IT'LL PAY YOU IN THE LONG RUN!

Goodridge Co-Operative Creamery Association of Goodridge, Minn.

LABOR OPPOSES RETAIL SALE TAX

A. F. of L. Delegates See Menace in Present Program to Raise Bonus Money.

STRIKE VOTES TAKEN

Final Week's Work of Convention Finds Union Leaders Taking Definite Actions—Criticize Federal Budget Administration.

Cleveland.—A strike vote of railway clerks and freight handlers employed by the New York Central railway has been authorized.

Cincinnati.—Opposition to a retail sales tax, accompanied by the warning that an effort can be expected to have it written into the soldier bonus bill, and the redeclaration of a policy opposed to unrestricted immigration marked the latest action of the American Federation of Labor convention as it settled down to its final week's work.

Debate Importation of Labor.

By unanimous vote, the convention directed officers of the federation to wage the fight against the sales tax with "unabated force," the decision of the delegates coming without debate on the legislative committee's report.

The immigration policy provoked only brief discussion, during which Max Greenstein, of the Jewelry Workers' union, urged unrestricted immigration at least for skilled workers, while Charles L. Bayne, of the Shoe Workers' union, replied there was "too much unemployment in this country now without bringing in more immigrants."

Budget Law Hit.

Administration of the federal budget law also was brought before the convention by the committee report, asserting that the "budget administrators have prostituted the high purpose of the budget system by using it for "political propaganda." The committee, however, declared in favor of a satisfactory budget system," provision, instructing the federation's executive council to use every "effort to correct glaring administrative defects which are operating to the disadvantage of the present system.

Special complaint was made by the committee that administrators of the budget had been overzealous in reducing expenditures of the department of labor.

Faced with a big work program for the final week, the delegates were not inclined to debate. Quick action generally ruled in the disposition of all questions, and adjournment came when no more work was ready for immediate consideration.

CONVENTION RUNNERS LEAD

Indorsed Candidates Favored in Incomplete Minnesota Returns.

St. Paul.—Convention-indorsed candidates on the Republican ticket were leading in returns available the day following the statewide primary election in Minnesota, while on the Democratic ticket Mrs. Anna Dickie Oleson was running a close race for the senatorial nomination.

Senator Frank B. Kellogg, Governor J. A. O. Preus and other state candidates indorsed by the Republican convention were leading for their respective office nominations when scattered returns from 23 of the 86 counties had been received.

HUNDREDS TO TOUR HOLSTEIN DAIRY CIRCUIT

Fargo.—Professor J. H. Shepperd, animal husbandman of the North Dakota Agricultural college, predicts that 1,500 people will attend the annual picnic and tour of the New Salem dairy circuit this week.

"The interesting features of the dairy circuit and the community will be shown and demonstrated to visitors by members of the circuit as they pass from farm to farm and to the creameries. It will be a moving picture in real life," says Professor Shepperd.

McCormick Acquires New Life.

Chicago.—Newly equipped with the elixir of youth, Harold F. McCormick ordered arrangements rushed for his romantic trip to Europe with his daughter Mathilde. From his bed at Wesley Memorial hospital, where the life-giving glands of a poor youth were reported grafted onto his body, the harvester king directed plans to take him to Paris in a month. There, after seeing his 17-year-old daughter and ward, Mathilde, safely married to Max Oser, her Swiss lover, he will be free to marry Ganna Walska, Polish opera star.

Churches Appeal to President.

Washington.—President Harding has been asked to take steps to end the coal strike in a joint appeal presented to him by the commission on social service of the Federated Council of Churches, with which are affiliated 30 Protestant communions, the department of social action of the Catholic Welfare council, and the social justice commission of the Conference of American Rabbis. This is the first time that these representative organizations of Protestants, Roman Catholics, and Jews, have taken such joint action.

1—Princeton Battle monument dedicated by President Harding at Princeton, N. J. 2—Young America celebrating Flag day, a scene repeated everywhere throughout the land. 3—Drumhead election of the Ancient and Honorable Artillery company onBoston Common.

NEWS REVIEW OF CURRENT EVENTS

Big Row Over Sale of Liquor on Vessels Controlled by the Shipping Board.

DRYS AND WETS BOTH ANGRY

Controversy May Hamper Ship Subsidy Legislation—European Experts Meet at The Hague—Russia Is Recalcitrant—American Federation of Labor in Convention.

By EDWARD W. PICKARD

"BIGGEST bootlegger in the world" is what they are calling Uncle Sam these days—and just because alcoholic beverages are sold on passenger vessels owned and controlled by the government, outside the three-mile limit.

The storm of controversy, which has its center in Washington, is amusing to the people generally, but it is a mighty serious affair for Chairman Lasker and the other members of the United States shipping board, who are trying to compete with the passenger liners of other nations. And it is likely to be equally serious for those who favor and are trying to pass ship subsidy legislation.

Prohibition, like politics, makes strange bedfellows. United in the attack on Chairman Lasker's policy are the Anti-Saloon league, the dry leaders in congress, the Association Against Prohibition and such eminent wets as the men of the Busch family, brewers of St. Louis. The Busch men, indeed, started the row by letters written while on a shipping board vessel on which drinks were sold, openly and at moderate prices. Their wail, of course, is directed against a policy that prevents their brewing and selling beer while it permits the selling of German and English beer on government-owned ships. The Association Against Prohibition insists that the Volstead act be enforced to the limit, in the hope and expectation that it will thus be proved so unpopular that it will be rescinded. Wayne B. Wheeler, counsel for the Anti-Saloon league, reiterates the league's position concerning the three-mile limit, holding that liquor cannot legally be sold on American vessels anywhere; but he says the Busch attack is "simply an effort to discredit prohibition and create sentiment for the sale of beer," and he thinks the shipping board can take care of itself. Prohibition Commissioner Haynes admits there has been a difference of opinion as to whether the Volstead act applies to vessels outside the three-mile limit. That is does not so apply is held by counsel for the shipping board, according to Mr. Lasker, and he adds:

"Both from the standpoint of legal right and from the standpoint of the life and security of our national merchant marine the shipping board has permitted, and will continue to permit, the serving of liquor on its ships, so long as foreign ships are allowed to enter and depart from our shores exercising that privilege."

IN CONGRESS the results of the controversy may be more serious because, as has been said already, the ship subsidy legislation is likely to get mixed up in the tangle. Senator Willis of Ohio, Republican, and one of the most ardent dry leaders, said it was about time for the "prohibition navy" to turn its guns on the American merchant marine, and that the ship subsidy bill about to come up offered an excellent and timely legislative vehicle for action to end the sale of liquor on ships operated by the government.

Senator Jones of Washington, who is just as arid as Senator Willis, but who is also chairman of the commerce committee, made energetic protest against the Ohioan's proposal. He declared that the prohibition issue would complicate seriously the ship subsidy legislation and imperil its success. This is also the opinion of leading Democrats in the lower house, wherefore they are gleefully getting ready to offer amendments to the subsidy measure providing that subsidies shall not be paid to shipowners who sell liquor on American ships outside the three-mile limit.

So long as Mr. Lasker is able to maintain his position—that an American ship is not American territory after it passes the three mile limit—thousands of thirsty and grateful Americans will patronize the shipping board vessels. If and when he is driven from that position, the thirsty American travelers will transfer their patronage to ships that fly some other flag than the Stars and Stripes.

PRESIDENT HARDING is so insistent on the passage of the ship subsidy bill, which has been re-drafted by the house committee on merchant marine, that he has warned congress its failure in this respect will certainly lead him to call an immediate extraordinary session. The President has also let congress know that in his opinion the tariff is the most important matter before it, and that it should have undivided attention until it is disposed of. Then, and not until then, he thinks the soldiers' bonus bill should be taken up. McCumber and other senators who are pushing the bonus legislation showed a disposition to disregard this advice from the White House and went ahead with plans for sidetracking the tariff in favor of the bonus this week. They believe the latter measure can be put through without a long debate.

FLAG DAY was observed generally throughout the country and among the celebrations was one especially worthy of note. This was in historic Fort McHenry where was unveiled the monument erected by congress to Francis Scott Key, author of the "Star Spangled Banner." The handsome shaft stands near the spot where floated the Flag while Key was writing his immortal lines. President Harding delivered a graceful dedicatory address.

ONCE more the European experts are gathered together to determine the best method of dealing with Russia and accomplishing the regeneration of the nations suffering from the effects of the World war. This time they are at The Hague, and for the present no representatives of Russia and of Germany are admitted. When a plan has been settled on, the soviet government will be asked to send delegates to take part in pourparlers, beginning June 26.

First the attitudes of Great Britain and France must be harmonized. At present these are diametrically opposed. The British want Europe to forget the war; to do away with international debts; to conciliate the vanquished states and make concessions to them; to jolly soviet Russia; and generally to base the new Europe largely on economic interests and compel the smaller states to enter into agreements accordingly. The French, as desirous as the British for peace and stable conditions, believe the war cannot be forgotten; and that international obligations should be fulfilled as far as possible. They want the new order maintained by physical force and the alliances re-enforced and gradually extended to include all of Europe. As for Russia, they insist, as they did at Genoa, that suitable guarantees must be supplied by the soviet government, and the memorandum of May 11 withdrawn before official relations are renewed.

It is probable that a proposal will be made to Russia that a commission be permitted to investigate economic condition there. If they maintain their present attitude, this will likely be rejected. The bolshevik leaders are quite unyielding, asserting that their attitude at The Hague will be the same as at Genoa, and that the only possible concessions to foreign capital will be on the basis of the recently enacted laws governing private property. Their publicity man, Karl Radek, said the conference at The Hague would prove a hindrance rather than a help, and continued:

"If we are not to consider the declarations of Hoover and Hughes and the memorandum of Poincare as empty threats, what they ask before the pourparlers with Russia is Russia's withdrawal of the memorandum of May 11 in which the principal position of Russia was expressed.

"The Russian government is not in such a low position as to allow itself to be treated with contempt either by France or even the United States, without whose economic co-operation the economics of the Russian state cannot be re-established. By her famine relief America has gained some sympathy in Russia, which she is going to forfeit if she wishes to play the role of dictator toward Russia by forcing upon her such base demands.

"Despite her poverty, Russia will enter into relations with foreign countries only on the basis of mutual esteem."

What a strange inversion of ideas in that allusion to America and the famine relief!

NECESSARILY the German reparations question will intrude itself in the present conference, and the friends of France are hoping that she will present a definite plan in this regard. Germany has paid the June installment, but cynically says, as to the sums due in July and thereafter, "there is no likelihood that we can pay them, and what are you going to do about it?"

Austria is attracting more sympathy than any other of the former enemy states, for obvious reasons. Her rulers are calling for material aid, which they say must be extended to save the country from bolshevism. Already France has agreed to make a large loan to Austria.

CHILE and Peru, through their representatives sent to Washington, have spent a month in futile attempts to reach a basis for settlement of the Tacna-Arica dispute, and now they have asked Secretary of State Hughes to help them. It is understood that he will not act officially as a formal arbitrator, but in an individual capacity in the role of a conciliator.

CUBA is in a mess again, owing to the delay of President Zayas in carrying out the pledges made to General Crowder to rid the government of alleged graft. The cabinet has resigned in order to aid the President in carrying out the desired reforms. Some members of the Cuban congress are talking of impeaching Zayas. The American government is watching developments closely, but is hopeful that intervention under the terms of the Platt amendment will not be necessary.

THE AMERICAN FEDERATION OF LABOR, in session in Cincinnati, once more turned down the idea of the "one big union" plan, which Gompers and his supporters have so far successfully combated. The Chicago Federation of Labor was leading in the effort to put over an amalgamation of allied unions so that there would be only one union in each industry. The delegates to the convention decided that the whole force of the federation shall be directed toward the elimination of child labor in the United States, a crusade in which they will find few to oppose them outside of the southern states. They also adopted a resolution declaring that the ship subsidy bill should be condemned as inimical to the public interests and destructive to the nation's hopes and aspirations for sea power. In an address to the convention Senator La Follette of Wisconsin made a warm attack on the Supreme court and some of its recent decisions. He proposed an amendment to the Constitution denying the power of lower courts to set aside a federal law as unconstitutional, and providing for the nullification of any such decision by the Supreme court by re-enactment of the statute.

IRELAND'S dail elections took place Friday, but at this writing no returns have been received. The winding up of the campaign and the vigorous measures of the British soldiery served to quiet somewhat the warfare on the Ulster border, but there were daily outrages in Belfast, including an incendiary fire that destroyed a large block of business houses.

In London the constitution of the Irish Free State, as revised, was made public. It places the relation between Ireland and the empire on the same basis as Canada and the other dominions. The instrument is quite up to date, including female suffrage, proportional representation and the referendum and initiative. Free schools and freedom of religion are provided for.

News Briefs from All the State

Condensed Stories of Happenings of the Week in Minnesota

Montevideo—Mr. and Mrs. Andrew Estling celebrated their golden wedding anniversary at their home here.

Waseca—Charles Root, aged 58, a farmer of Byron township, dropped dead here while pulling in a tug of war.

Ellendale—Members of the Royal Neighbor camps in Steel, Waseca and Dodge counties conducted their district convention in Ellendale.

Paynesville—The annual dairy picnic of the Stearns county Jersey Breeders was conducted at the L. J. Foreman farm, four miles east of here.

Minneapolis—A conference of state prohibition directors of Minnesota, North and South Dakota, Iowa and Nebraska, was held here at the summons of Emerson E. Hunt.

Springfield—At a special election the bond issue for the purpose of extending the city waterworks system was carried by a vote of 160 to 25.

Albert Lea—After electing officers for the coming year at a business session, the annual state convention of the Veterans of Foreign Wars closed with a banquet.

Austin—R. O. Worrell arrested at the farm bureau picnic here on the charge of stealing seven head of cattle and disposing of them at the Hormel packing plant, has confessed.

Minneapolis—Sixteen nurses were graduated from St. Barnabas hospital. The class was the twenty-fifth class to be graduated from the hospital since its foundation.

Austin—The board of county commissioners has passed a resolution calling on County Treasurer Smith to resign his office, who is alleged to be short in his accounts to the amount of $3,779.84.

Minneapolis—Every weed in the world that will flourish in the climate of the temperate zone may be found in the town of St. Anthony in the Second ward, according to K. A. Kirkpatrick, county agricultural agent.

St. Charles—Installation of a sewage system is assured for this place, as the result of the action of the citizens in voting, 214 to 119, to bond the city for $20,000 to finance to project. The vote ends a long fight.

St. Paul—Deaths due to automobile accidents increased 25 per cent last year, according to a report issued by Miss Gerda C. Pierson, director of the division of vital statistics, Minnesota state board of health.

Hutchinson—Demand for payment of $2,333 has been made by Emil Wegner, owner of the Hutchinson Flour mill, for water furnished the city from an artesian well on his property since March, 1920.

Thief River Falls—Thirty-three head of pure bred and grade cattle were sold at the annual picnic and consignment sale of Red River Valley Dairymen's association at the Pennington county fair grounds.

Waseca—Business in Waseca and Waseca county was almost entirely suspended while the residents attended a picnic under the auspices of the Waseca County Farm bureau at the state agricultural farm here.

Winona—Commencement exercises were conducted here at two schools. Ninety students, constituting the largest class in the history of Winona high school, were graduated in exercises at the opera house.

Waseca—The city council has passed an ordinance providing for the establishment of a commission of five to conduct the municipal fuel yard which was declared legal by a recent decision of the state supreme court.

Bemidji—The Bemidji association have authorized the secretary to sign a contract with the Minnesota State Fair to have the Bemidji Juvenile band appear for five days at a fixed compensation of $800.

Cass Lake—M. N. Knoll, of this city, secretary of the Notrhern Minnesota Development association, in connection with John T. Naughtin, of Keewatin, president, has finished the program for the two day session to be conducted at Hibbing.

Winona—Six hundred employes at the division shops of the Chicago & Northwestern railway here returned to a normal schedule of six days' work a week, after having been on a curtailed schedule for seven months.

Red Wing—A large bird on display here is about as big as a small size turkey, and has a wing spread of seven feet. Two of them lit in a farmer's yard in Wisconsin and the farmer managed to wing one. It is said to be a vulture from Arizona.

Owatonna—Another legal battle will take place before the status of the recently consolidated school district at Ellendale is finally settled. This will be the result of action by the county commissioners in granting petitions of objectors to the consolidation who seek permission to reorganize the old school district from the territory included in the consolidated district.

Red Lake Falls—C. G. Selvig, superintendent of the Northwest School of Agriculture at Crookston, delivered the principal address at the annual picnic of the Cloverland Farmers' club of Emardville at the James Gilbertson farm.

Fairmont—Seventy-two women of Waverly township have called upon Martin county's three candidates for county attorney to make known their stand with regard to Sunday dances. All pledged themselves to vote against candidates for prosecutor who uphold what they termed desecration of the Sabbath

Fergus Falls—The Erhard Co-operative creamery at Erhard, this county, was destroyed by fire. Most of the butter was saved.

Moorhead—Selection of property along the Red river at the end of Front street for a tourist camp was announced by the park board.

St. Paul—North Oaks, the James J. Hill farm, may be worth more than contestants of the will of Mrs. Hill ever dreamed. It is thought oil underlies the property.

Owatonna—Breeders of the milking Shorthorn strain from all parts of southern Minnesota gathered at Mineral Springs, near here, for a picnic.

Virginia—More than 200 garden plots, covering an area of approximately two acres, have been given school children of Virginia.

Austin—The Mower County Red Cross chapter will continue to support the county nurse, paying all expenses out of the society's treasury.

Crookston—A. E. Palmer, of Euclid, was elected president of the Polk County Farm Bureau Federation, at the annual meeting and picnic here.

Minneapolis—Getting the indifferent man and woman out to vote is one of the biggest problems of the country today, Mrs. Anna Steese Richardson of the Woman's Companion said.

Moorhead—Advance registration for summer school classes at the Moorhead State Teachers' college, indicated that last year's record of 815 students will be reached or bettered.

Minneapolis—There are 92,440 Minneapolis voters registered and eligible to vote in the primary election for nomination of state, congressional, judicial, legislative and county office candidates.

Mankato—Thirty years in the state prison at Stillwater was the sentence given John E. Carpenter, a farmer, living near here. He was charged with a crime against three of his daughters.

Crookston—A free employment bureau will be established at Crookston by the state industrial bureau to help in furnishing farm labor to this section of the state.

Rochester—Latest methods of fire fighting and fire prevention were demonstrated at the opening of the 50th annual convention of the State Fire Department association.

Crookston—The sugar beet growers of this section are shipping in Mexican labor to work in the sugar beet fields this summer. Between 40 and 50 men have arrived here from Omaha and Des Moines.

St. James—Representatives of 32 co-operative creameries of Brown, Faribault, Martin, Jackson and Watonwan counties met here to discuss methods of standardizing butter production and marketing it in carlots.

Austin—Attorneys and voters have been aroused to a high pitch of interest by the declaration of Alfred Green of Pleasant Valley, that, if elected county treasurer, he will turn 25 per cent of his salary back into the county treasury.

Winona—The Kiwanis club is to stage a "building bee" at the tourists' camping grounds here. The club members will erect a shelter house and install other conveniences for the use of tourists passing through Winona.

Alexander—A special trainload of railroad men arrived here as a vanguard of delegates to the annual meeting of the Traffic club, composed of officials of practically every railroad in the United States.

St. Cloud—What is pronounced the most largely attended gathering of farm bureau members and their families in Central Minnesota was held at the Benton county fair grounds, under the auspices of the Tri-County Farm bureau.

Belgrade—Business men of this town and farmers adjacent to Belgrade have organized a commercial club. William Koeppers was elected president and Walter Sill secretary. There are 66 charter members.

Minneapolis—With nearly two thousand delegates and thousands of visitors from all over the Northwest in attendance, a special general convention of the Norwegian Lutheran church of America opened for a seven-day session in the Auditorium.

Hallock—Out of the five teams in bread making, cake baking and garment making that will represent the northwestern Minnesota district, comprising 15 counties, at the 1922 Minnesota fair, three will be from Kittson county.

Watonwan—In a debate here by a community club on the question, "Resolved, that the dishrag is more useful in the home than the broom," the advocates of the broom won the verdict, which was reached by vote of the audience.

Crookston—The Spirit of the Red River Valley has communicated with Mayor Charles P. Booth of Crookston, that she and her faithful children will be present at the banquet to be given the delegates attending the Minnesota League of Municipalities at the Northwest School of Agriculture.

Minneapolis—With Minnesota rapidly becoming the summer playground of America and tourists flocking here by thousands, a state constabulary is necessary both to protect them and safeguard the people of the state, Governor Preus told the Minneapolis Lions club.

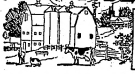
Minneapolis—On the University of Minnesota campus at the right of the arched entrance there stands a permanent memorial to the 132 Marines from Minnesota who gave their lives in the World war.

St. Paul—Eastern states with large bond issues at their disposal for highway improvements and intensive road maintenance, are outdistancing Minnesota as a good roads state, but Minnesota continues a leader for better highway grades and superelevated and widened curves, Commissioner C. M. Babcock, state highway commissioner, said.

The Farmer's Own Page

Timely Comments on Agricultural Topics for Our Readers

PERTINENT POINTERS for MODERN FARMERS



Prepared Under Direction of
North Dakota Agricultural College

DAIRY FUTURE DEPENDS UPON BOYS AND GIRLS

Boys and girls of North Dakota are determined to put the dairy industry into practical and scientific operation through the boys' and girls' club activities of the state, according to H. E. Rilling, their state leader. North Dakota's dairy judging team won first place over 16 competing teams at the dairy show at St. Paul last fall, and plans are under way to continue progress in club dairy projects this year.

Facilities for handling, care, and management of the stock and the sympathy of the parents are requirements that the county club leaders develop before they recommend the placing of the dairy stock among the young folks. Unless these factors are present with the boy or girl the project is doomed to failure, say club leaders, and will demonstrate the failure of the dairy industry instead of its success.

Success in the dairy work is dependent upon knowledge of the care of dairy cattle, says Mr. Rilling. Many grain farmers fail to realize that a cow bred for high production will not give good results without proper care and when they purchase such valuable animals they overlook the importance of good care and management. The young dairymen learn the art of caring for the animals easier than their parents. Successful demonstration by the boys and girls serve as a most effective demonstration to the fathers and the knowledge and skill is encouraged among older dairymen through the activities of the boys and girls.

Dairy project work among the boys and girls in this state is yet very young but there are at the present time more than 100 projects in operation in seven counties. Club members will be represented this year with a judging and demonstration team for the dairy show.

There are three classes of dairy projects in practice in North Dakota. The first is known as the heifer calf project and this is the class of the beginners. The following year the heifer calf grows and they have what is known as the heifer class of project. Later the same animal develops into the cow and calf project. This plan allows for a three or four year progressive project and the three class plan tends to avoid unequal competition due to difference in age.

George Eckert, age 13, of Foxholm, N. D., is one of the successful dairy club members of the state. In his report of his trip to the national dairy show, which he won as an award from the American Guernsey cattle club for his dairy project work, he says, "Naturally, I was interested in studying what I consider the best breed of cattle—the dairy breeds and especially the Guernseys. It was interesting to see America's best Guernsey cattle competing for prizes and especially interesting when Major E. S. Person's bull of Minot, took second prize. Another great feature of the show was when the North Dakota judging team was given first prize."

Test for Canning Rubbers.

Old or poor canning rubbers can be detected, according to the specialists at the A. C., and some fruit and vegetables thus saved from spoiling, by two simple tests. Poor rubbers spoil more canned stuff than any other one cause, they say.

A good can rubber returns it its original shape after it has been stretched out by pulling like a rubber band. Neither will good live rubbers crack when they are folded double into the shape of a half circle.

Don't use any rubbers that won't withstand these tests for your fruits and vegetables if you expect them to keep well, is the advice of the college specialists.

Look Out for Lettuce Drop.

One of the mishaps that can befall lettuce is lettuce drop or rot, a disease which affects the plant so that the lower leaves look as if they had been scalded and later fall off. This disease is very infectious and should be checked immediately. As soon as the disease is detected, pull and burn or bury the infected plant. When an outbreak occurs in a large bed, it is well to practice crop rotation and sterilize the soil against future outbreaks. Other vegetables subject to the diseases are celery, cucumbers and radishes.

PIGS, LIKE SOME FOLKS, ARE TEMPERAMENTAL

None of the pigs of nursery rhymes had more definite personalities or amusing adventures than the pigs of the North Dakota Agricultural college and no high salaried moving picture stars ever had more "temperamental" disposition than the mothers of these pigs, according to a bulletin which J. H. Shepperd, in charge of animal husbandry at the college, has recently written.

Professor Shepperd's bulletin, while it is crammed with valuable information for the farmer who raises pigs, gets away from the usual dry bulletin style and is told throughout in an entertaining story form.

Different Dispositions.

"Some of the swine are good-natured, others are malcontents; some are sissies and some are born thieves," Mr. Shepperd says. His treasury of hog lore is drawn from observation and from the sage remarks of "Daddy" D. J. Geiken, herdsman at the college, who is quoted frequently throughout the bulletin.

Here are some of the things which Messrs. Shepperd and Geiken have found out about swine.

"Thump Their Ears."

If pigs get into a quarrel or otherwise misbehave, thump their ears. It does not hurt them, but they do not like it and it makes them behave.

Humor the brood sow. Unnecessary noise, being moved from one place to another, in fact any disturbance of any kind tends to stop the flow of milk and cut it off altogether. This means stunted pigs. Mr. Shepperd says that Mr. Geiken is so strict about this point that he has to put on his "pig barn manners" whenever he ventures in to look the swine over.

Pigs should not be weaned too suddenly. This may be prevented by arranging a small bed for the mother and another for the pigs so that they will not sleep with her. "They wake up just the same," says Mr. Shepperd, "but the mother is not right there so handy." Thus they get over the habit of having midnight lunch. Meanwhile the mother is fed as much alfalfa hay as she will eat and in four or five days the weaning is accomplished.

Don't make a sudden move that will frighten a bunch of feeding hogs as they will run off pounds of fat before they quiet down again.

GUARD AGAINST DISEASE CALLED "DAMPING OFF"

"Damping off" is the common name for a fungous disease which is no respector of plants. It attacks the seedlings at the surface of the soil and causes them to wilt, fall, and die, being particularly troublesome in rich earth. This is due to the fact that fungi causing the rot live best on manure and decaying vegetable matter generally. Almost any vegetable is subject to attacks from this disease.

Prevention, as usual, is the most effective means of control. Here are a few of the precautions:

Remove and destroy diseased plants and soil in which they are grown.

Avoid excess of water.

Sterilize the soil (by using steam or formaldehyde.

Hot sand or a weak solution of Bordeaux mixture applied to the diseased area will often kill the disease organisms. Care must be taken, however, not to kill the plants.

More Lime Would Help Clover.

Clover which doesn't come well is in most cases hindered by lack of lime. Also several other causes are cited, among which are winter-killing of southern grown seed, inadequate drainage, and too heavy seeding of the nurse crop.

One secret of success in canning is to use the best of can rubbers and those only once.

Asparagus canned fresh from the garden brings the garden to the table all the year round.

Crinkled crepe bedspreads are becoming popular for summer use; they launder remarkably easily.

Successive plantings of corn in the garden every 10 days keep the juicy ears on the table most of the summer.

POULTRY

SELL POULTRY TO CONSUMER

Specialists Believe It to Be Most Profitable Method of Disposing of Best Fowls.

(Prepared by the United States Department of Agriculture.)

There are three general ways of selling poultry—direct to the consumer, direct to the retailer, or to commission merchants for selling on the open market. Selling direct to the consumer is believed by poultry specialists of the United States Department of Agriculture to be the most profitable method of disposing of high-grade goods, for the charges of the middlemen are eliminated. Very often the producer is situated so that he can build up a retail trade among the families of a neighboring town or city, delivering his goods once or twice a week, or oftener if desired. In this way he can obtain a substantial increase over prices paid in the open market. Especially is this true in the case of strictly fresh eggs. Often it is possible to find customers in a town or city within reasonable hauling distance, taking eggs and poultry to them at regular intervals. Hotels, restaurants and clubs are good customers which can be supplied in this way by contract.

Often there are grocery and provision dealers catering to a select trade to whom the producer can sell regular supplies of eggs and poultry. Of course, the simplest way to sell produce is through the commission merchant. It does away with expense and trouble of private trades, but the returns usually are not so large, except when dealing with certain commission houses that have built up a fine trade along certain lines. The Department of Agriculture has several bulletins covering the subject of marketing poultry. Farmers' Bulletin 830, Shipping Eggs by Parcel Post, may be had free upon application to the division of publications; Farmers' Bulletin 528, Hints to Poultry Raisers, 5 cents; Department Bulletin 561, Feed Cost of Egg Production, price 10 cents, may be ordered of the superintendent of documents, government printing office, Washington.

Plucked and Ready for Consumer.

BOWEL TROUBLE IN POULTRY

One Good Way to Prevent Ailments Is Not to Feed Anything Solid for Seventy-Two Hours.

"To prevent white diarrhea and bowel trouble, chicks should not be fed any solid feeds for at least 72 hours after hatching," says Harry Embleton, head of the poultry department of Oklahoma A. and M. college. "During this period, however, they should receive sour, skim milk when taken from the incubator, and this should be kept before them all the time. In addition to the milk they should receive some fine sand which acts as a grit.

"When beginning to feed solid feeds, feeding should be little and often. A commercial chick feed scattered in a finely cut litter accompanied with some rolled oats or johnny cake or a mixture of these feeds with hard-boiled eggs makes a very good feed for starting young chicks. Care should be taken not to overfeed them."

Don't Hatch Late.

Don't hatch late chicks. It takes around seven months to develop a pullet, and you want them to come into production around November, when eggs are high.

IMPORTANCE AND IMPROVEMENT OF VARIOUS NATIVE NUT TREES

(Prepared by the United States Department of Agriculture.)

Native nut trees, such as the black walnut and members of the hickory group including the pecan, have a potential value not generally realized. Aside from the well-known value of the timber of the walnut in the making of furniture, gun-stocks, and airplane propellers, and of the white hickories in the manufacture of automobile wheels, tool handles, and many other articles, and even of pecan wood in its variety of uses, particularly for harness hames, these trees, when rightly selected and placed, form most attractive ornamentals. But, in addition to these uses, which alone are of enough importance to justify the careful preservation of existing trees and the planting of others, they have an economic value in the nuts produced.

These native nuts, even though uncultivated and unimproved, and, perhaps, inferior in shell thickness and cracking quality, are preferred by many to any of the cultivated kinds from Europe and Asia.

Nut Crop Adds to Income.

On many American farms by-products or small crops make important additions to the income, and in many localities nut trees planted about the farm buildings, along the highways, or in other unoccupied spaces, or old trees that have been left in the clearing away of the original forest, are depended upon to add noticeably to the bank account. Forward-looking farmers want to make their trees produce the best nuts and in the greatest possible quantity.

First of all, every tree intended to bear nuts in quantity needs ample space, 60 feet being none too great an interval between trees of equal rate of growth, and larger trees, unless on the shady side, should be 100 feet apart. A fertile soil that is reasonably moist is best for nut trees, well-drained clay loam being the most desirable.

Variety is next in importance to soil and location. Experienced observers know that nut trees do not come true to seed, and that the only way to reproduce a variety or an identical type is by grafting or budding, as is done with apples, peaches, pears, and other fruits. Nurseymen in the northern part of the country are now propagating several varieties of black walnuts, pecans, hickories, and butternuts by these methods, but due to the fact that active interest began only a decade ago, none of these varieties has been given much opportunity to demonstrate its usefulness as a money-crop producer. However, several varieties are promising.

Well Developed Black Walnut, Highly Prized for Its Ornamental Value and the Nuts It Produces.

Mature native trees that are well situated may be made more valuable by top-working. By "top-working" is meant the replacing of the original top with a new top of another variety. It has been practiced for a long time by fruit growers to increase the value of seedling trees and trees of inferior varieties, and owners of nut trees are now adopting the method. The steps to be taken are: (1) The selection of trees, taking into account the things just mentioned; (2) the choice of varieties to be used, and the making sure of scions or bud sticks at the proper time; (3) the cutting back of the tops during the latter part of the dormant period or very early in the spring; (4) the actual process of grafting or budding; and (5) the subsequent care of the new growth.

Cutting Back the Tops.

In cutting back the tops preparatory to budding or grafting, certain rules should be rigidly followed: (1) No cut should be made where a limb is more than six inches in diameter, and a limit of three inches is preferred; (2) all cuts should be made so they will heal of themselves if, by chance, they receive no further attention; (3) cuts should be made in late winter while the trees are still dormant, or, at the latest, just before the leaves appear; (4) cuts should always be made slightly above a bud, which will assure renewal in case the graft should fail.

Grafting may be done by the common cleft method or the slip-bark method. The former is usually employed when the tree is still dormant and the latter at any time during the growing period, but the scions used must always be dormant, and as scions in that condition are seldom available after the first of April neither method is of much interest just now. It is now too late to top-work trees this season, but those that have been cut back and small trees that may be budded without cutting back may be left until late summer or autumn, so that scions (then called bud sticks) of the better varieties may be obtained and buds from them inserted in the bark of the new shoots.

Specially devised tools for removing the buds from the bud sticks and for removing pieces of bark of identical size from the stock are on the market. Several are illustrated in Farmers' Bulletin 700, Pecan Culture, which contains much information of interest to nut propagators, and which may be obtained by writing to the Department of Agriculture, Washington, D. C. Budding by the "patch bud" method may be done at any time when the bark of the stock slips readily. On trees of rapid growth the bark will slip at almost any time in the summer. On young trees not cut back budding may be done in the first half of the growing season, whereas new shoots grown from below cut-off tops should be of sufficient size for budding during the latter half of the season. Dry spells frequently cause the bark to tighten, but rains will loosen it later. The season for budding sometimes extends until the trees begin to go dormant. During the latter half of the season buds may be selected from those formed at the base of the present season's growth. Most of them will remain dormant until the following spring.

Second-Growth Black Walnut Trees, Well Spaced to Permit Nut Production.

COLLAR OF BIG IMPORTANCE

Should Fit Neck and Shoulders of Horse to Prevent Sores—Bathe in Salt Water.

Since the power of a horse is applied through the collar, it is of utmost importance that the collar should fit the neck and shoulders. Carelessness in using badly fitting collars not only develops sores and ugly scars but many times causes horses to become balky. Horses' shoulders should be bathed in salt water every evening in order to harden them.

Prevents Hog Cholera.

Sanitation in the hog lot prevents cholera.

Best for Hog Pasture.

Alfalfa, clover and rape seem to be the best crops for hog pasture.

THE DAIRY

CO-OPERATIVE BULL SOCIETY

Saunders County, Nebraska, Winner of Offer by Breeder of Purebred Cattle.

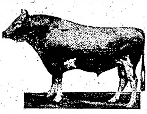
(Prepared by the United States Department of Agriculture.)

The bull offered by a breeder of purebred cattle near Lincoln to the first co-operative bull association to be organized in Nebraska was won by Saunders county, where an association has been formed, through the efforts of the county agent and a state dairy extension specialist, assisted by a field man of the United States Department of Agriculture.

As in other associations of this character, the members will be arranged in several groups or blocks, those in each block having about the same total number of cows and all using the same bull. This association has five blocks to start with, and as many more are planned. The separate blocks do not own the bulls, but the animals are joint property of the association, and every two years they are shifted from one block to another.

It is planned to have a novel feature in this association. The blocks will be arranged in two or more circuits, each circuit made up of three or more blocks, and paying for the bulls it uses and owning them; the biennial exchange of bulls will also be confined to the circuit; but there will be one set of officers and board of directors for the whole association, the secretary-treasurer keeping record of the receipts and obligations of each circuit. The circuit system seems to combine the advantages of small associations and a large association all in one.

When the Saunders County Bull association is ready for business, it will be given the prize bull. The association will have to pay for its other bulls, but it can well afford to do so, for this method of co-operation has been found highly profitable in many other parts of the country. Its advantages are: (1) Providing high-class bulls at low expense, and thus proving the character of the dairy herds; (2) keeping proved bulls in service for many years; and (3) making financial interest and public sentiment combine to sweep a community entirely clean of inferior sires.



Only Purebred Bulls Should Be at the Head of Any Herd.

The United States Department of Agriculture has given a good deal of effort to the introduction of co-operative bull associations, and stands ready to supply information thereon to anyone desiring it.

ABNORMAL TASTES IN MILK

There Are Several Factors That Impart Peculiar Flavor Besides Grazing Crops.

There are a number of plants which when eaten by the dairy cow, will transmit an unusual taste to her milk. Some of them are fed to her injudiciously by the dairymen, and others are eaten by the animal while grazing. Plants known to possess such properties are beet and turnip tops when fed in large quantities; excessive feeding of chopped roots; garlic, rape, lupines, orchids, kale, rutabagas, chicory, sorrel and pasturage on areas which have been inundated.

There are many other factors sometimes responsible for a peculiar taste in milk, such as improper sterilization of utensils, spoiled foods, brewers' grains, potato slops, fish meal, rape cake, flaxseed meal, poor straw, and, occasionally, medicinal agents administered to the animal.

CARING FOR SPRING CALVES

Necessary That Youngsters Be Kept Thrifty and Free From Disease and Sickness.

The good dairy calves born this spring are needed as milk cows two years from now, so the dairyman should do his part by giving these animals a chance to live and develop. Spring calves are usually harder to raise than fall calves, and since the dairyman has less time usually during this busy season to care for the calves, it is very necessary that the attention given be that most needed to keep them thrifty and free from disease and sickness.

EDITORIAL

MAKE IT WORTH WHILE

A farmer said the other day: "Goodridge is a poor town for the farmer. I like to come to this town because I consider it my home town, but on the other hand, what is being done to acquaint us and welcome the farmer in Goodridge."

Whether this man is right or not is a question upon which a decision should not be too hastily reached. Without doubt, however, he is right on one thing and that is that Goodridge, leading city of eastern Pennington county, should put forth every effort to make this village attractive to the farmer.

Not a week passes but what outside business institutions flood Goodridge territory with advertising literature with a view of securing at least a share of the business of each individual which the advertising matter reaches—and it is only fair to assume that these outside business concerns actually do secure a part of it as a direct result of making a bid for the business.

We cannot stop outsiders from reaching into Goodridge territory in an effort to attract buyers to their stores, but we should at least make an effort to counteract it and make a genuine attempt to allow as little of it as possible get away from us. It is natural for folks to do their trading at points that are inviting them to their places of business and if we are not willing to meet the buyer on common ground, we should not feel oppressed if folks go elsewhere to secure every-day necessities.

Why not inaugurate a market day, at which time we could furnish entertainment consisting of band concerts, baseball games, [illegible] er forms of amusement [illegible]. If we expect to have outsiders [illegible] us from time to time we must at least demonstrate to them that we are sociable and really wide awake to the fact that folks go where the welcome is genuine and the handshake the heartiest.

We may be on speaking terms with our friends and neighbors, but if we don't renew it at regular intervals, they may seek other friendships and acquaintances, something none of us could possibly wish for. Now is a good time to get acquainted again.

GO TO CHURCH

A man and his wife have lived happily together in the Pacific Northwest for nearly a quarter of a century. Their children are becoming young men and women.

Both the man and the children are accustomed to acknowledge that the mother is an unusual woman. Her outlook on life is wholesome and cheery. Her ideals about right and wrong are clearly and often epigrammaticaly defined. She has taught wisdom, prudence, hospitality—and church attendance.

Not long ago the man was congratulated on the possession of such a wife. She is better than a fortune, he was told. "Where did you find her?" asked a friend.

The reply was very prompt. "I found her at church. That is where you will find all good girls."

The answer was a trifle broad. But it converys an impression.

In a day of jazz and jazz femininity, of rolled stockings, rouged knees and abbreviated apparel, the girl at church is likely to embody qualities of modesty, womanliness and charm. She is apt to realize in her own personality the ideal which we cherish as the "old fashioned girl."

It is likely an excellent sign when a young man puts himself in the way of finding "go-to-church-girls" by his own attendance.

Church attendance is bound to exercise the best influence upon every life. It should begin early, and if the habit of church attendance is formed in youth it will continue to leave its impression on character and integrity while life lasts.—Portland Press.

BANKS ARE INTERESTED

An investigator sees four reasons why bankers are showing unusual interest in the approaching convention of the Associated Advertising clubs of the world. At least 1,000 banks and trust companies will be represented in the discussion of advertising as applied to banks when the convention opens in Milwaukee.

The first reason advanced is that many bankers still see an element of the novel in the idea of advertising their banks as frankly as a department store advertises gingham aprons. In the second place they have learned that advertising brings new depositors to bank. A third reason is the large part advertising now plays in business, and bankers must have the knowledge on which to judge how large an appropriation for advertising is justifiable in a given case. A final fact noted by the investigator is that advertising has humanized the banking business. It has brought the bank closer to the people and to the affairs of its community.

THE COW AND PROSPERITY

There is a marked tendency on the part of eastern Pennington county farmers to enter the dairy business on a larger scale. This may be gathered from the available figures on the crops that have been planted this spring. Communities where dairying is the principal type of farming were less handicapped by the stringent financial conditions out of which we now seem to be passing. For we surely are passing out of it as is evidenced by the extreme letup in money credits and the general building activity that is taking place within the nation.

The men who earnestly take up dairying will be happiest and securest farmers of all, independent of the fluctuations of the elements, assured of steady income, larger checks for products of the farm and the comforts that money will buy.

TWO SOURCES OF DANGER

A strong campaign is now under way in most of the cities and towns of Minnesota to prevent automobile accidents. Five deaths in one day have aroused the people of Minneapolis and from now on there may be expected a concerted effort to eliminate and cut down automobile accidents. The first effort is to bring the speed of the motorist to a reasonable limit. An automobile going over thirty miles an hour is beyond the control of the driver. It will probably be accepted as a rule, that the motorist who drives above that speed is performing an act which makes him liable without question for the accidents which he may cause. Another factor in increasing accidents is the intoxicated driver. No punishment is too big and authorities can not take too much care in eliminating this source of danger.

The young newspaper man starts out with the notion that he can write to please everybody. Bless his trustful heart, he is in great luck if he can please anybody. He must expect opposition and abuse and learn to thrive by it.—Doc Bixby in Lincoln Journal.

Whether or not the election results suits us, they are apparently satisfactory to the majority. So why worry?

MISS AGNES BAKKE WEDS HENRY WENDT

Marriage Solmnized at Middle River Sunday Evening

A very pretty wedding took place at the Zion Lutheran church at Middle River Monday evening when Henry Wendt, a brother of Mrs. George Johnson of Goodridge and Miss Agnes Bakke were united in marriage. The wedding took place at 7:00 The marriage vows were spoken under an arch of wild roses, and the altar was banked with various kinds of flowers, peonies, American beauties, lady slippers, and ferns. The aisle was covered with white cheese cloth, and strewn with fern leaves. Miss Dora Holmes of Thief River Falls sang "I Love You Truly," Mrs. Gaston Ward of Thief River Falls, a cousin of the bride, played the wedding march. The bride and groom were attended by Mr. and Mrs. Dr. Spink of Middle River. Mrs. Spink is a sister of the bride. Little Miss Spink and Miss Dokken acted as flower girls. They carried small baskets of yellow rose buds which they scattered over the bridal path.

The bride wore a gown of white satin, with a covering of silk net embroidered in beads and spangles. A long satin train hung from her shoulders, over which was drapped a long bridal veil, which was fashioned in a cape with orange blossoms. She carried a large bouquet of American beauty roses. The double ring ceremony was used. The maid of honor wore a pink crepe de chene gown and a white hat with a pale pink facing, and carried an arm bouquet of pink roses. William Bakke and Ben Dokken acted as ushers.

The bride was very popular among the young people of Thief River Falls. She is the daughter of D. B. Bakke who now makes his home at Boulder, Colo. The grooms parents reside near Holt, while he is manager of the general store at Middle River. After the ceremony a reception was given at the home of Mr. and Mrs. Dr. Spink.

Out of town guests were Mrs. R. Halvorson, of Hillsboro, N. D.; the parents, a sister and two brothers of the groom; Mr. and Mrs. Halgrin, and Mr. and Mrs. Ben Dokken, all of Holt; Mrs. Hoglum, Mrs. Gaston Ward, Miss Dora Holmes, Ole Granum, Mrs. Lars Bakke and Ole Nesha of Thief River Falls; Theodore Tandberg of Goodridge. The happy couple left Tuesday [illegible] their many friends join in wishing them a happy and prosperous life. They will make their home at Middle River.

Potato Association to Meet Saturday, June 24

The Penningto County Potato association will hold their annual meeting in the Commercial club rooms Saturday, June 24th at 8:00 P. M. This is the important meeting of the year and all members are expected to be present.

The marketing plans for the fall of 1922 will be taken up at this time and all claims through the Potato association will be fully explained during the meeting.

The best a person can do is the least he should do.

Are You Ready For the Hot Weather That Is On Its Way?

Operating a cook stove during the summer months is not only mighty uncomfortable, but is expensive. An oil stove makes the kitchen livable even on the hottest days, and only costs a few cents for fuel—where it costs $$$$$$$$ to use a range.

SATVATION--BY FAITH OR WORKS?

By Rev. Henry Lutz,
Pastor Lutheran Church, Missouri Synod.

Text: Romans 3, v. 28. "Therefore we conclude that a man is justified by faith without the deeds of the law."

Every now and then someone makes the statement that man must earn his way into heaven by his own works, or something to that effect. Just recently Prof. H. L. Osborn, dean of Hamline university, declared before the minister's union that Theology teaches folks "how to work their way into heaven." This doctrine, the doctrine of salvation by works is the religion of the heathen, the religion of the lodge, it is the religion of natural man, and even of most so-called Christian church denominations. But it is not the religion of the Bible, the Word of Truth. The verse quoted above says expressly: "A man is justified by faith without the deeds of the law." Now that does not mean that a Christian should not do the deeds of the law, that he should not lead a godly life. The Scripture repeatedly and earnestly exhorts us to do this. "This is the will of God, even your sanctification." 1. Thess. 4,3 "Be ye therefore perfect, even as your father which is in heaven is perfect." Matth. 5,28; "Thou shalt love Thy neighbor as Thyself" Matth. 22,39.

All these passages command that children of God do good works, but in not a single case do they state that thereby they should earn or try to earn heaven [illegible] Savior said [illegible] and thou shalt live [illegible] namely the commands of the law if done will bring us into heaven. But mark well the Savior says "this do" not "do the best you can, or try to do this." So if a man wants to be saved by his works he must do the law, all of it. And there the question arises, do we keep the whole law? Can anyone keep it as he should? Not if the word of God is true, which says: "There is not a just man upon earth that doeth good and sinneth not" Eccl. 7,21.

And there are dozens of passages which tell us that we cannot earn heaven by our own deeds. "Therefore by the deeds of the law shall no flesh be justified" Romans 3,20. "Christ is become of no effect unto you, whosoever of you are justified by the law; ye are fallen from grace" Gal. 5,4. "By grace are ye saved through faith, and that not of yourselves; it is the gift of God, not of works, lest any man should boast" Ephesians 2,8.8. "And if by grace, then it is no more of works; otherwise grace is no more grace. But if it be of works, then it is no more grace, otherwise work is no more work" Romans 11,4. "But that no man is justified by the law in the sight of God it is evident: for, the just shall live by faith" Galatians 3,11.

So then we are not saved by our own works. There must be a different way of salvation, or we are all lost and will be everlastingly damned. Thank God the Bible shows us a different way of salvation: "I am the way and the truth and the life, no man cometh unto the Father but by me." John 14,6. Jesus, the Savior is the only true way to life. But alas there are some who tell us that He is the way only in this sense that He has by His example shown us how we are to earn heaven for ourselves. If that were the case we would again have salvation by works. But this is a plain falsehood. The Bible clearly tells us that Jesus came into the world to save the world. This He did by perfectly fulfilling the law and by suffering and dying as all men's substitute.

So then how are we saved? Paul says: "The just shall live by Faith". To the Jews who in their terror over their sins asked: "Men and brethren, what shall we do?" Peter said: "Repent and be baptized, every one of you, in the name of Jesus Christ, for the remission of sins" Acts 2,37.38. To the penitent prison keeper at Philippi, who had asked: "What must I do to be saved?" Paul said: "Believe on the Lord Jesus Christ, and thou shalt be saved and thy house" Acts 16,30.31. To the penitent malefactor on the cross, who trusted only in the mercy of the Savior, and not at all in his own deeds, Jesus said: "Verily I say unto Thee, today Thou shalt be with me in Paradise."

Now, then, you selfrighteous Pharisee, who think that you are perfectly good in the sight of God, who trust in your own works, know this, that unless you repent and confess before God that you are a wretched damnable sinner and ask for forgiveness through Christ Crucified, you cannot hope to reach heaven. And you, who know that you have sinned, who have repented with bitter tears, who realize that if left to yourself you would be cast into hell forever, know this: Jesus came to take your place, He kept the law for you, He suffered the punishment you have deserved. Believe that and your sins, all of them, are forgiven. Therefore say:

Just as I am without one plea, but that Thy blood was shed for me and that Thou bidst me come to Thee, O Lamb of God I come I come.—Amen.

FOR SALE

We have feed oats for sale at 45 cents per bushel in elevator. Apply at Hanson & Barzen Eelevator.—adv. tf.

NOTICE FOR BIDS.

Bids will be received by the undersigned clerk of Consolidated School District No. 8, at his office in Goodridge up to July 8th at 8 o'clock P. M. for the carrying of children to and from the Goodridge schools during the ensuing school year in accordance with the following schedule:

Legally bonded drivers on Route No. 1—Mr. Gunder Erickson.

Legally bonded drivers on Route No. 2—Mr. E. H. Besancon.

Legally bonded drivers on Route No. 3—Mr. O. N. Urdahl.

Legally bonded drivers on Route No. 4—Mr. Noble Urdahl.

Legally bonded drivers on Route No. 5—Mr. L. P. Poppenhagen.

Drivers' Schedule.

Route No. 1.

M. Mutanskey	7:20 A.M.	5:10 P.M.
John Kusmak	7:40 A.M.	4:50 P.M.
John Markuson	7:55 A.M.	4:35 P.M.
Casper Iverson	8:20 A.M.	4:15 P.M.
M. O. Seavey	8:30 A.M.	4:08 P.M.
Henry Iverson	8:40 A.M.	4:00 P.M.
School Building	8:50 A.M.	3:50 P.M.

Route No. 2.

Melsan—

E. H. Besancon	7:20 A.M.	4:55 P.M.
Edwin Hanson	7:30 A.M.	5:10 P.M
John Dahlen	7:35 A.M.	5:05 P.M.
Peter Lovly	7:36 A.M.	5:04 P.M.
Gunder Erickson	8:25 A.M.	4:15 P.M.

Route No. 3.

Carlson—

C. T. Thompson	8:20 A.M.	4:20 P.M
Knute Hagen	8:30 A.M.	4:10 P.M.
O. N. Urdahl	8:37 A.M.	4:00 P.M
School Building	8:50 A.M.	3:50 P.M.

Route No. 4.

O. N. Urdahl—

T. Harms	8:30 A.M.	4:10 P.M
Morgan Vaughan	8:40 A.M.	4:00 P.M
School Building	8:50 A.M.	3:50 P.M

The members of the School Board reserve the right to reject all bids.

A. B. MANDT,
Clerk, Consolidated Dist. No. 8

[illegible]

The [illegible] at Highlanding [illegible] Wednesday was very well attended and a good time was reported by all. An interesting baseball game was played, Thief River Falls vs. Highlanding, the latter carrying off the laurels, as the scores were 16 to 6 in favor of Highlanding.

* * *

Mrs. Anton was a caller at the Crompton home Monday afternoon.

* * *

A large crowd was gathered at the polls June 19 to cast votes for their favorite candidates.

* * *

Mr. and Mrs. Henry Hilan were shoppers in Goodridge last Thursday.

* * *

Anton Johnson, Karl Narverson, Tom Jacobson and son, Hallie, were transacting business at Thief River Falls last Tuesday.

* * *

Mr. and Mrs. Vad of Erie were callers at Iner Jenson's home last Sunday.

* * *

Anton Johnson and Iner Jenson were business callers at Erie Sunday.

* * *

Mrs. Barbars Overum and family were callers at the W. H. Crompton last Sunday.

* * *

The Rolan baseball players were in Highlanding last Sunday trying their best to win a game off the Highlanding nine but failed. The scores were 21 to 16 in favor of Highlanding.

* * *

Nels Nelson is home for a few days' visit.

* * *

The Aakre Bros. of Reiner were guests of Oliver Howard Sunday.

* * *

Ole Halvorson is back in Highlanding again. He has been employed in Dakota for the past three or four months. Mr. Halvorson reports the crops in first rate condition.

* * *

Ole Halvorson, Mrs. Sigerdson and her grandson, Lenard Hudson, were visitors in Grygla last Tuesday.

* * *

Messrs. Leo and Clarence Ellingson attended the big circus at Thief River Falls last Wednesday.

* * *

Miss Francis Homme returned home last week from a week's visit at Kenyon, Minn.

* * *

A number of young folks from Hazel took in the ball game at Highlanding last Sunday.

R. H. McDonald Pitches No-Hit Game for Six Innings

Goodridge was the scene of an exciting baseball game Sunday when a picked aggregation representing Thief River Falls clashed with the Goodridge nine, and defeated the locals with a score of 19 to 12.

The game was characterized by loose playing and much fumbling on both sides. Thief River took the lead at the very outset and at the end of the sixth the tally showed the visitors with a lead of 6 to 0. The locals rallied in the seventh and counted twelve runs in the last three innings while Thief River netted 13 counts in the eighth and ninth making the final score 12 to 19 with Thief River on the long end.

R. H. McDonald was on the mound for Goodridge during the first six innings and held the visitors down to no hits. Joseph Christianson who appeared on the diamond for the first time since the injuries he received in in a recent game, pitched the last 3 innings and did yoeman service. Ed. Halvorson in the catchers box left nothing to be desired. The Thief River battery played splendid ball but the support both batteries received accounts for the scores.

The game was originally scheduled

[illegible]

There is nothing more pleasing to the ear on a summers evening than the music of a good band. The Banner regrets that our former leader, John Nystal, will in the near future take up his new duties in one of our neighboring cities and admits that his shoes will be hard to fill, but we have got to do our best under the circumstances and not allow our band organization go to seed. Let's, by all means, keep the band together and provide for our citizens and visitors free summer musical entertainment.

BIG MELON CROP.

A crop of watermelons plentiful enough to make more than 400 wagon loads is expected as a result of the expeirment of G. W. "Watermelon" Smith in planting 80 acres to watermelons on a farm near St. Cloud. Mr. Smith, who for almost 40 years has been known as "Watermelon" Smith in South Dakota, came to Minnesota this spring for the purpose of testing the possibility of Stearns county soil in the production of the melons. He has 150 acres in melons this year on his farm near Mitchell, the seed used in South Dakota and Minnesota being of his own production. The soil is ideal for watermelon raising, according to Mr. Smith.

When you see a young man taking the corners at forty miles an hour it is about time to give the florist an order.

Fourth of July
Celebration
and Church Picnic

There will be a Grand Celebration July 4th at the home of William Jones, five miles north of Goodridge, under the auspices of the Lutheran Church.

A FINE PROGRAM HAS BEEN ARRANGED.

There Will Be Several Speakers, a Baseball Game, Races and All the Sports and Other Amusements Customary on That Day.

SOFT DRINKS, ICE CREAM AND LUNCHES WILL BE SERVED ON THE GROUNDS.

—COMMITTEE.

"MIDNIGHT MASQUER!"

SYNOPSIS—During the height of the New Orleans carnival season Jachin Fell, wealthy though somewhat mysterious citizen, and Dr. Ansley, are discussing a series of robberies by an individual known as the Midnight Masquer, who, invariably attired as an aviator, has long defied the police. Joseph Maillard, wealthy banker, is giving a ball that night, at which the Masquer has threatened to appear and rob the guests. Fell and Ansley, on their way to the affair, meet a girl dressed as Columbine, seemingly known to Fell, but masked, who accompanies them to the ball. Lucie Ledanois, recently the ward of her uncle, Joseph Maillard, is the Columbine. At the ball, Bob Maillard, son of the banker, again proposes to her and is refused. He offers to buy some of her property. A Franciscan monk interests her.

CHAPTER II—Continued.

—3—

"So," the girl smiled a little, "you would betray your business friends in order to make a bit of money for me?"

Maillard stared at her. "Well, if you put it that way, yes! I'd do more than that for——"

"Thank you," she interrupted, her voice cold. "I don't think I'd trust your sagacity very far, Robert. Good-night."

She turned from him and was gone, dancing through the great rooms like a true Columbine.

Midnight neared, and brought a concern to many; the Midnight Masquer had gained his name by invariably appearing a moment or two before the stroke of twelve. Jachin Fell, who divided his time between enjoying the smoking room and wandering about among the masquers, perceived that Joseph Maillard was watching the time with anxiety.

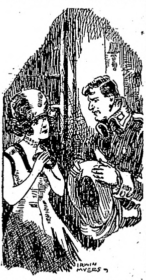
A large man, stern and a bit scornful of look, Maillard was imposing rather than handsome. He appeared the typical banker, efficient, devoid of all sentiment. Amused by the man's evident uneasiness, Jachin Fell kept him in view while the moments dragged. One might have thought that the little gray man was studying the financier as an entomologist studies a butterfly on a pin.

Shortly before twelve Columbine pirouetted up to Fell and accepted the arm he offered her. They were for the moment alone, in a corner of the ballroom.

"I must see you tomorrow, please," she breathed.

"Gladly," he asserted. "May I call? It's Sunday, you know——"

"If you will; at three. Something has happened, but I cannot speak of it here. Does any one else know that you—that you are interested in my affairs?"



"So," the Girl Smiled a Little, "You Would Betray Your Business Friends in Order to Make a Bit of Money for Me?"

The pale gray eyes of the little gray man looked very innocent and wondering.

"Certainly not, my dear! Why?"

"I'll tell you tomorrow." Then she broke into a laugh. "Well, it is midnight—and the Masquer has not appeared. I'm almost sorry."

The lights flickered off for a moment, then on again. The signal for unmasking!

The dancing ceased. From the whole room arose a babel of voices—cries of surprise, exclamations, merry laughter. Columbine removed her mask. An instant later Joseph Maillard approached them, chuckling to himself and looking hugely relieved.

"Ha, Lucie! I guessed you beneath the Columbine daintiness! Have you examined your favor yet?"

Remembering, the girl caught at her corsage. Cries of delight were arising on all sides as the favors were revealed—most handsome favors, even for Mardi Gras! From the heart of the rosebuds in her hand Lucie removed a brooch of old filigree work set with a group of pearls. She glanced about for Jachin Fell, but he had vanished with Maillard. A voice rose at her elbow:

"Mademoiselle, you are not less lucky than beautiful! Pearls to the pearl!"

She turned to see the Franciscan—no longer masked, but now gazing at her from a frank, laughing countenance, still partially veiled by the brown cowl that was drawn up close about his head.

"Henry Gramont!" she exclaimed. "Oh, I half suspected that it was you——"

"But you were not sure?" he chuckled. "You're not offended with me, Lucie?"

"I should be." She tossed her head. "You were impertinent, M. le prince!"

He made a distasteful gesture. "None of that, Lucie! You know I don't like it——"

"Oh, la, la!" she mocked him. "M. le prince is seeing America, n'est ce pas? He has come to America to find a rich wife, is it not?"

Gramont's face lost its smile, and suddenly became almost harsh.

"I shall call upon you at four tomorrow, Lucie," he said, abruptly, and turned. Nor did he pause to get her reply. An instant afterward Lucie was surrounded by a merry group of friends, and she saw no more of Henry Gramont.

About five minutes later those in the ballroom distinctly heard, through the open windows, the heavy pulsations of an airplane motor.

CHAPTER III.

The Bandit.

Joseph Maillard's library was on the ground floor of the house; it was a sedate and stately room, and was invariably shut off to itself. Not even tonight, of all nights, was it thrown open with the remainder of the house.

Here Maillard summoned half a dozen of his particular cronies and friends, after the stroke of midnight had assured him that there was no danger to be expected from the bandit. His son was not among the number. The half dozen were nearly all elderly men, and, with the exception of Jachin Fell, all were men of prominent affairs.

About the table grouped Maillard and his guests. Maillard, standing before a small wall safe that flanked the open hearth, lifted his silver goblet, asteam with beads. The moment for which he had been waiting was here; he launched his little thunderbolt with an air of satisfied importance.

"My friends, I have a confession to make!" he announced. "Today I received a note from the Midnight Masquer stating that he would be with us this evening, presumably at the hour of midnight, his usual time."

These words brought an instant silence. The half-dozen men were tense, watchful, astonished. But Maillard swung up his silver cup and laughed gaily.

"I took full precautions, gentlemen. The hour of danger is past, and the notorious bandit has not arrived—or, if he has arrived, he is now in the hands of the law. So up with your cups, my friends—a lifelong health to Mardi Gras, and damnation to prohibition and the Midnight Masquer!"

From everyone broke a swift assent to the toast, a murmur of relieved tension. The silver goblets were lifted, touched in a musical clinking of edges, and the aromatic breath of juleps filled the library as the drinkers, in true southern fashion, buried noses in the fragrant mint. Then, as the cups were lowered, from the recess of the curtained windows at one end of the room came a quiet voice:

"I thank you, gentlemen! But I must remind you, Maillard, that there was not a time limit set in the note."

With a simultaneous gasp everyone turned. Maillard staggered; his face went livid. Every eye was fastened upon that amazing figure now advancing from the shadows of the recess.

It was the figure of an aviator, clad in leather from top to toe, the goggles and helmet shield completely masking his head and features from recognition. In his hand he held an automatic pistol, which covered the group [illegible] his mouth.

"Not a sound, if you please," he warned, his voice thin and nasal—obviously disguised. "I trust that none of you gentlemen is armed, because I am very quick on the trigger. A very pleasant surprise, Maillard? You'd given me up, eh?"

For an instant no one spoke. Then Maillard moved slightly, moved his hand toward a button set in the wall near the safe. The voice of the bandit leaped out at him like thin steel:

"Quiet, you fool! If you touch that button——"

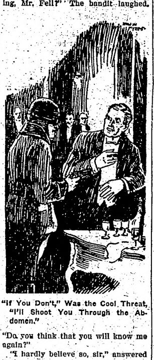
Maillard stiffened, and gripped the table edge with his shaking hand.

The bandit bowed slightly, and addressed the gathering in a tone of dry raillery:

"The rights of property are to me far more sacred than human life; there I agree with the law. So, gentlemen kindly empty your pockets on the table." His voice became crisp. "The jeweled scarfpins which you received as favors this evening may be added to the collection; otherwise, I shall not touch your private possessions. No watches, thank you. Maillard, kindly begin! I believe that you carry a wallet? If you please."

The banker could not but obey. His hands trembling with fear and rage, he took from his pocket a wallet, and emptied a sheaf of bills upon the table. One after another, the other men followed his example. When it came his turn, Jachin Fell drew a single bill from his pocket, and laid it down.

"You put some faith in that warning, Mr. Fell?" The bandit laughed. "Do you think that you will know me again?"



"If You Don't," Was the Cool Threat, "I'll Shoot You Through the Abdomen."

"I hardly believe so, sir," answered Fell in his apologetic fashion. "Your disguise is really excellent."

"Thank you." The bandit's voice held a thin mockery. "Coming from you, sir, that compliment is most welcome."

"What the devil does the fellow mean?" exploded Judge Forester.

"Then you are not aware that Mr. Fell is a man of large affairs?" The bandit's white teeth flashed in a smile. "He is a modest man, this attorney! And a dangerous man also, I assure you. But come, Mr. Fell, I'll not betray you."

Jachin Fell obviously did not appreciate the pleasantry. His shy and wondering features assumed a set and hardened look.

"Whoever you are," he responded, a subtle click of anger in his tone, "you shall be punished for this!"

"For what, Mr. Fell? For knowing too much of your private affairs?" The bandit laughed. "Fear not—I am only an amateur at this game, fortunately! So do your worst, and my blessing upon you! Now, gentlemen, kindly withdraw a few paces. All but you, Maillard; I'm not through with you yet."

The automatic pistol gestured; under its menace everyone obeyed the command, for the calm assurance of the bandit made it seem extremely likely that he would use the weapon without compunction. The men withdrew toward the far end of the room, where a word from the aviator halted them. Maillard remained standing where he was.

The Masquer advanced to the table and gathered the heap of money and scarfpins into the leathern pocket of his coat. During the process his gaze did not waver from the group of men, nor did the threat of his weapon lift from the banker before him.

"Now, Maillard," he quietly ordered, "you will have the kindness to turn around and open the wall safe behind you. And don't touch the button."

Maillard started.

"That safe! Why—why—d—n you, I'll do nothing of the sort!"

"If you don't," was the cool threat, "I'll shoot you through the abdomen. A man fears a bullet there worse than death. It may kill you, and it may not; really, I care very little. You—you financier!"

Scorn leaped into the quiet voice, scorn that lashed and hit deep.

> "It was natural then that Lucie should take Jachin Fell into her confidence."

(TO BE CONTINUED.)

RADIO

THIRD ELEMENT IN THE VACUUM TUBE

Grid Added to Fleming Valve by Dr. Lee DeForest Was a Big Improvement.

Any device which will pass electricity in one direction and will wholly or partially obstruct the flow in the opposite direction is termed a rectifier, because when connected in the path of an alternating current it will suppress one-half of each cycle and therefore the circuit will be traversed by pulsating direct current. A rectifier also is said to possess unidirectional conductivity, meaning, of course, that it will conduct electricity in one direction only. Its ability to rectify currents of extremely high frequency determines its application in radio.

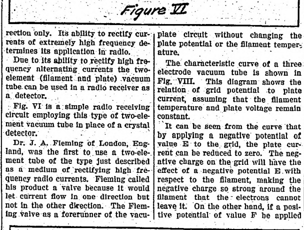


Figure VI

Due to its ability to rectify high frequency alternating currents the two-element (filament and plate) vacuum tube can be used in a radio receiver as a detector.

Fig. VI is a simple radio receiving circuit employing this type of two-element vacuum tube in place of a crystal detector.

Dr. J. A. Fleming of London, England, was the first to use a two-element tube of the type just described as a medium of rectifying high frequency radio currents. Fleming called his product a valve because it would let current flow in one direction but not in the other direction. The Fleming valve as a forerunner of the vacuum tube of today marked a very important step in the progress of the radio art. The Fleming valve, however, in its original form was not much better than other forms of rectifiers then in use and, owing to the greater ruggedness and ease of manipulation of the latter, did not come into general use as a detector.

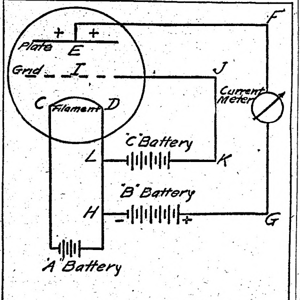

Figure VII

Dr. Lee DeForest, an American, greatly improved the Fleming valve by adding a third electrode called the grid, which served the function of a control element and thus made it possible to utilize the feeble incoming signal currents to control more powerful local currents. The three-electrode vacuum tube of DeForest is the tube used so extensively today.

The third element which is called a grid and from which the three-electrode vacuum tube derives its name was placed by DeForest between the filament and the plate in the path of the electrons. The grid is a perforated plate or mesh of fine wire through the openings of which the electrons must pass in their journey from the filament to the plate.

Fig. VII is a diagrammatical sketch of the circuits of a three-electrode vacuum tube and is identically the same as the sketch in Fig. III for a two-element vacuum tube with the ad- [illegible]

As a start let us suppose that "C" battery voltage is zero. The operation of the three-electrode tube would then be exactly like that of a two-electrode tube, just as though there were no grid. Like a two-electrode tube when the filament C-D is brought to incandescence by the "A" battery a steady stream of electrons will be given off, which will be drawn over to the plate E. Plate E is maintained at a positive potential with respect to the filament by the "B" battery.

Now if the grid is made positive with respect to the filament, it is possible to accelerate the flow of the electron stream from the filament to the plate; if the grid is made negative with respect to the filament, the flow of the electron stream from the filament to the plate will be retarded. Or in other words, by making the grid positive or negative with respect to the filament, it is possible to increase or counteract the space charge. The third electrode or grid thus offers a means of controlling the current in the plate circuit without changing the plate potential or the filament temperature.

The characteristic curve of a three electrode vacuum tube is shown in Fig. VIII. This diagram shows the relation of grid potential to plate current, assuming that the filament temperature and plate voltage remain constant.

It can be seen from the curve that by applying a negative potential of value E to the grid, the plate current can be reduced to zero. The negative charge on the grid will have the effect of a negative potential E with respect to the filament, making the negative charge so strong around the filament that the electrons cannot leave it. On the other hand, if a positive potential of value F be applied to the grid with respect to the filament, the maximum or saturation current will flow in the plate circuit. Applying a greater positive potential than F to the grid with respect to the filament will not cause an increase in the plate current because the electrons given off are being attracted to the plate and grid.

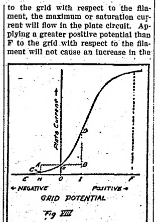

Fig VIII

When the grid is maintained positive with respect to the filament a small current will flow in the grid circuit. Because of its being positive it will attract the electrons and have a charge given up to it by them.

GRAIN PRICES LOWER

Hogs Closed Few Cents off For Week—Beef Stronger.

U. S. Bureau of Markets, Washington, D. C., for week ended June 16, 1922.

GRAIN — Prices unsettled and closed lower for week; Chicago July wheat down four cents net; Chicago July corn unchanged. Sentiment mixed and largely bearish. Highest prices made first of week on short covering and there was firm undertone on 14th on bullish crop news. Declines mainly on liquidation. Weakness in stock market was factor on 15th. Minneapolis July wheat down 4¼c for week; Kansas City July wheat down 3¼c; Winnipeg July wheat down 2½c. Market unsettled on the 16th with prices fluctuating within three cent range. Prices advanced later on more favorable local sentiment. Removal hedges against export sales main factor in July. Northwest crop reports very favorable but further claims of heat damage in soutrwest. Closing prices in Chicago cash market: No. 2 red winter wheat $1.14; No. 2 hard winter wheat $1.15; No. 2 mixed corn 62c; No. 2 yellow corn 62c; No. 3 white oats 35c. Average fram prices: No. 2 mixed corn in central Iowa about 48c; No. 1 dark northern wheat in central North Dakota $1.19¾; No. 2 hard winter wheat in central Kansas $1. Chicago July wheat closed at $1.11; Chicago July corn 62c; Minneapolis July wheat $1.31⅛; Kansas City July wheat $1.04⅝; Winnipeg July wheat $1.24⅛.

HAY—Market generally weak. Buyers not anticipating their wants expecting lower prices. Bulk of arrivals low grade. Not much top grade arriving but apparently enough to meet demand.

LIVESTOCK AND MEATS—Chicago hog prices declined 5-10c net for the week. Medium and good beef steers generally 5-15c higher with butcher cows and heifers 25-50c lower. Feeder steers were 15-40c lower; light and medium weight veal calves $1.75-2.25 lower. Lambs ranged from $1.75-2 lower while fat ewes were generally fifty cents lower. Hogs closed firm on the 16th on good grades and mostly 5-10c higher than Thursday's average. Pigs, 25-50c lower. Beef steers and better grades of butcher cows and heifers were steady. Veal calves 25c lower. Better grades of sheep and lambs about stead, others weak to lower. June 16th Chicago prices: Hogs, top, $10.80; bulk of sales $10.05-10.75; medium and good beef steers $8-9.20; butcher cows and heifers $4-8.50; feeder steers $5.75-8.75; light and medium weight veal calves $7.75-9.25; fat lambs $11.50-12.75; yearlings $8.25-11.25; fat ewes $2.50-6.50.

Stocker and feeder shipments from 12 important markets during the week ended June 9th were: Cattle and calves 30,927; hogs 11,998; sheep 22,991.

VEGETABLES — Potato market weaker.

FEED—Wheat feed market continues weak. Considerable pressure to sell principally bran.

DAIRY RODUCTS—Butter markets steady to firm. Demand active. Bulk of buying is from current consumptive demand although considerable buying for storage has occurred; over o million pounds daily having moved into storage in the four markets the past week. Closing prices 92 score: New York 36c; Philadelphia 36½c; Boston 37c; Chicago 35¾c.

Cheese markets steady with trading quite active on all except small styles. Sales included numerous lots for storage although the into-storage movement is relatively slow.

Minneapolis Closing Cash Prices.

"This Can't Be True."

A traveling man had missed his train and went back home. He took his keys out of his pocket, opened the door, and to his great surprise his wife was sitting on his best friend's lap and kissing him.

"Smith, I've set a trap for you and caught you!" shouted the husband.

Smith replied: "With bait like this you can catch me any time."—Exchange.

Only Remaining Despot.

The only despotic monarch left in the whole world is the amir of Afghanistan, who rules his country absolutely, ordering the coming and going of his people in all matters. He personally runs the country's religion, commerce, foreign affairs and domestic relations.

A Lot of Practice.

His sweetheart clung to him.

"Oh, I'm so glad you're back from New York!" she said. "And now, tell me, did you remember all the beautiful things you said to me—even among the fascinating New York girls?"

"Remember them?" said he. "Why, I kept on repeating them, dearest."

OBJECTED TO SHOW PILLOWS

Usually Amiable Bachelor Had Reason for Returning From Week-End Visit With Grouch.

"Did you have a nice week-end?" inquired the sweet young thing brightly of the popular bachelor.

'O, I suppose you might say so," he grumbled, with unexpected ill humor. "But I'd like to know how anybody can have a nice week-end when he can't sleep."

"What was the matter?"

"O, the usual thing—the guest pillow. How many times have I had a good night in an otherwise pleasant and comfortable room ruined by an elephantine pillow. If you lay just your head on it you break your neck; if you try to ease the slant by moving it down under your shoulders you might as well be sitting up.

"For themselves people have decently low, soft, comfortable things which are tucked out of sight in the daytime. But in the guest room the show pillows are the only pillows provided."—New York Sun.

Part of the Training.

"She's having her voice trained."

"Why doesn't the teacher train it to stop now and then?"

FOR BIG "STRIKE"

Aged Mining Prospector Takes One More Chance.

Sam Conger, Eighty-Nine Years Old, Still in the Harness and Confident He Will Win.

Recently news came that the oldest active mining prospector in the world, Sam Conger, eighty-nine years old, was going back to the Rockies, determined to make his last big strike.

"Sam Conger," the story said, "is the 'Grand Old Man of the Mountains'—he has prospected in the Rockies for more than seventy years. In addition to locating many of the best paying gold and silver mines in the state, he discovered tungsten, the rare metal of Colorado. He is known to every old mining man and, despite his eighty-nine years, Sam Conger, game to the backbone, is going to the mountains, laden with pack, pick, pan and shovel, resolute in the faith that he will make one more big strike."

It was in Boulder county that he made his first big strike with his discovery of the Buckeye lead in 1862, while the battle of Antietam was being fought. Since then he prospected in California, Oregon, New Mexico, Arizona, and studied leads and veins and strata in every mining section of Colorado. But it was always to Boulder county that he returned to make the big strike. One time it was the Caribou mine, later sold to capitalists of Holland. Then, after long prospecting in other sections, he came back to Boulder and discovered the Poor Man mine, where the ore ran $10,000 to the ton. There were the Fourth of July and the Diantha and many others.

Near Boulder City in the middle '90s he came on a strange black mineral. Sam Conger did not then know that he had discovered tungsten. In Oregon he learned the great value of the mineral. He hurried back to Colorado and, in the streets of Denver, met his old partner, who in Arizona had also learned that the black ore was tungsten.

Sam Conger's tungsten claim was offered to the Allis company of Milwaukee and turned down. "There is not a great demand for tungsten," an official said, "and if it should be found in such quantities as Conger says, the price will fall to the lowest point." Conger's option expired. Then Andrew Carnegie took over the tungsten claims. Each year since they have produced their millions.

Conger was born in Ohio. As a lad of seventeen he heard that the lead mines of southwestern Wisconsin were the places for big stakes, but in Wisconsin all the talk was of the richness of the lead deposits of Missouri. And in Missouri he heard of the recently discovered gold at the junction of Cherry creek and the Platte river, out where the Ute Indians lived, across the Great American desert.

Sam Conger was one of a party to drive across the Great Plains with "Pike's Peak or Bust" on the wagon canvas and then began his 70 years of prospecting for the precious metals.

Later Sam Conger went to New Mexico. He read how mutiny smouldered among the Indians, how they arose, murdered both Spanish conquerors and Franciscans and filled up the mines.

Sam found one of these mines—the St. Lazarus. And until the body of gold ore was worked out it was a good producing mine.

Sam has always wanted riches—not thousands, but millions. Then he could "fix everybody up," and he has notions of "en-dow-ing" something.

Sam is the last of the old prospectors—simple, kindly, brave. And at eighty-nine he is still walking over the mountains in paths he trod when he was a lad.—Milwaukee Journal.

College Receiving.

A disastrous fire in one of the buildings Princeton university recently destroyed a part of the radio equipment. While the loss was amply covered by insurance, it was an unfortunate accident, since the matter of arranging for a broadcasting service was just about completed. The idea of a broadcasting originated with L. S. Gatter (1912) anl was taken up at once by those in charge of the station. The University of Wisconsin and the University of Minnesota already have established broadcasting stations for general university news, says Scientific American, as well as for results of athletic contests. The set to be installed will have a sending range of 1,000 miles and will operate on 300-meter wave length.

In New England.

The Taconic range along the western border of Massachusetts is the link that connects the Catskills of New York with the higher peaks of northern New England, says the American Forestry Magazine. Greylock — the Saddleback of earlier days—3,535 feet, in the northwestern corner of the state, is the highest in the commonwealth, and Mount Everett, "the Dome of the Taconics," 2,624 feet, in the southwestern corner, the next loftiest. Both are state reservations.

Where X-Rays Are Fatal.

Roentgen rays over the abdomen prove fatal in a large number of experiments on dogs, while the same rays over the thorax produce no ill effects. This important fact has been learned by many experiments made at the University of California medical school by S. L. Warren and Dr. G. H. Whipple, who report details for the Journal of Experimental Medicine.

GAINS 8 POUNDS IN TWO WEEKS' TIME

Dyspepsia Entirely Overcome and She Eats, Sleeps and Feels Better Than in Years, Says Boston Resident.

"I have actually gained eight pounds in two weeks' time and am now eating better, sleeping better and feeling better than I have in three or four years," said Mrs. Celesta Fell, 32 Prince street, Boston, Mass., recently, in telling of the great benefits she has derived from the use of Tanlac.

"My stomach was in such a bad fix before I took Tanlac that I did not dare eat much of anything, for if I did I would have so much pain and distress from indigestion that I felt like I was going to die. I was so run down and weak from lack of nourishment that I could not do my housework.

"I was so nervous I couldn't keep still during the day nor sleep at night. I can see now if it had not been for Tanlac I would have had to give up entirely. I am now feeling strong and healthy and all the credit belongs to Tanlac."

Tanlac is sold by all good druggists.

Well Said.

Some one was urging Martha to tell her secret, when she sagely remarked: "A secret isn't a secret after it is telled."

When a woman expresses a wish her husband generally has to pay the charges.

Fred Smith was badly crippled physically, but his indomitable spirit kept him on a par with other lads of his age. He joined the pig club and took care of his pig with great skill and enthusiasm.

One day I overheard Fred talking to his crony, and this is what he said:

"John Mitchell says his pig is bigger'n mine!"

And then in a tone of great scorn, he added:

"I'll bet if we swapped he'd still say his was the biggest!"—Farm Life.

Cuticura for Pimply Faces.

To remove pimples and blackheads smear them with Cuticura Ointment. Wash off in five minutes with Cuticura Soap and hot water. Once clear keep your skin clear by using them for daily toilet purposes. Don't fail to include Cuticura Talcum. Advertisement.

Not Custodians.

At the town meeting of a small place "up country" a citizen made a motion that was seconded in an astonishing way.

"Mr. Moderator," he said, "I move that the town set aside money for three cuspidors to be stationed at proper places."

At that an old fellow in the rear of the hall who was hard of hearing rose stiffly to his feet. "I second the motion," he said, "and I move that Jack Davis be made one of 'em!"

Up-to-Date.

First Little Girl—"What's your last name, Annie?" Second Little Girl—"Don't know yet. I ain't married."

FROM GIRLHOOD TO WOMANHOOD

Woman Relied Upon Lydia E. Pinkham's Vegetable Compound

Emporia, Kansas.—"I began using Lydia E. Pinkham's medicines years ago when I was a girl. For several years I had severe pains at menstrual periods, making me very weak and interfering with my regular duties. I tried several remedies without obtaining relief. I was induced to try Lydia E. Pinkham's Vegetable Compound by friends and it restored me to normal health. I often have occasion and do recommend your Vegetable Compound to my friends who have troubles similar to my own. You may use these facts as a testimonial."—EVA ALDRICH, 218 Union St., Emporia, Kansas.

There are many women who first used our Vegetable Compound during their girlhood days. They found it a valuable help during trying periods. In later years they use it whenever they feel those annoying symptoms which women often have.

Lydia E. Pinkham's Vegetable Compound is a woman's medicine. It is prepared carefully from the best quality of medicinal plants, whose properties are especially adapted to correct the troubles women have.

Children Cry For Fletcher's CASTORIA

Special Care of Baby.

That Baby should have a bed of its own all are agreed. Yet it is more reasonable for an infant to sleep with grown-ups than to use a man's medicine in an attempt to regulate the delicate organism of that same infant. Either practice is to be shunned. Neither would be tolerated by specialists in children's diseases.

Your Physician will tell you that Baby's medicine must be prepared with even greater care than Baby's food.

A Baby's stomach when in good health is too often disarranged by improper food. Could you for a moment, then, think of giving to your *ailing* child anything but a medicine especially prepared for Infants and Children? Don't be deceived.

Make a mental note of this:—It is important, Mothers, that you should remember that to function well, the digestive organs of your Baby must receive special care. No Baby is so abnormal that the desired results may be had from the use of medicines primarily prepared for grown-ups.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

WHO SAID "WEAKER VESSEL"?

Little Incident Shows How Much Chance Mere Man Has With Real Mistress of Finance.

Mrs. Norman Whitehouse, the patrician ex-suffragist who has gone into the leather business, said at a tea in New York:

"Woman should succeed magnificently in business, she is such a past grand mistress of finesse.

"I know a pretty girl who once took the part of palmist in a gypsy tent at a fair. A young man came in to have his fortune told, and the pretty girl, holding his hand in hers tenderly, said:

"'You have an extraordinary character. Your most remarkable quality is generosity. You hate skinflints, you despise the money hoarder, and you look on avarice as a shameful vice. A large and almost reckless liberality marks your path through life.'

"'Thank you,' said the young man, blushing and giggling. 'You are flattering me, I'm afraid.'

"'Not at all,' said the pretty girl, 'and now I'm going to wrap you up these three dozen tickets for our turkey raffle. They're only a simoleon apiece. Three tens, a five, and a one. Thank you; that's just right.'"

Bug's Eggs.

Superintendent Comer of the Whitetown schools took some figs, which his mother intended for cooking, without her knowledge. The following conversation ensued:

"Did you get some of the figs, Philip?"

"Yes."

"What did you do with them?"

"I threw them away."

"What did you do that for?"

"Well, mother, I bit into one and it had bug's eggs in it, and I wasn't going to eat bug's eggs, was I?"—Indianapolis News.

Disbelief sometimes gets human society along as fast as belief.

A Threatened Strike.

Bobbie—Pop, you gave me a nickel to keep quiet an hour and the hour's up.

Pop—Here's a nickel for another hour. Don't bother me.

Bobbie—Double pay for overtime.

ALLEN'S FOOT=EASE FOR THE FEET

Sprinkle one or two Allen's Foot=Ease powders in the Foot Bath and soak and rub the feet. It takes the sting out of Corns and Bunions and smarting, aching feet. Then for lasting comfort, shake Allen's Foot=Ease into your shoes. It takes the friction from the shoe, rests the feet and makes walking a delight. Always use it for dancing parties and to break in new shoes. Over One Million Five Hundred Thousand pounds of Powder for the Feet were used by our Army and Navy during the war.

In a Pinch, Use ALLEN'S FOOT-EASE

AUTOMOBILE GOES OVER BANK IN RIVER

T. M. Thoreson Family of Highlanding Have Narrow Escape Friday.

While on an automobile trip to Thief River Falls Friday evening, the T. M. Thoreson family of Highlanding had a narrow escape from drowning when their automobile, containing Mr. and Mrs. Thoreson, their two children, and Peter Raffness, went over the bank near the Squaw Point bridge, a half mile west of the city.

The occupants of the car were on their way home and just after crossing the bridge another car was approaching from the opposite direction. The glare from the headlights of the incoming car were so bright that Mr. Thoreson, who was at the wheel, was temporarily blinded and his car was plunged over the 10-foot embankment and into the river.

The side curtains on the Thoreson car were up at the time and this added to the difficulty the driver had of seeing the road. How all escaped serious injury is considered by many who later viewed the position of the car as miraculous, as outside of Mr. Raffness, who suffered slight lacerations of the face, all escaped with but a soaking in the river.

The accident of Friday night is the fourth that has occurred at this particular bridge approach within the past year, it is said, one of which proved fatal to a motorist last fall. It is now understood that the county board is surveying and plan to erect guard rails to prevent further occurrences of the kind.

LOCAL FISHERMEN TAKE GOOD CATCH AT RED LAKE

V. C. McLeod, R. H. McDonald and son, Harry, John Sund and Curtis Francher drove to Red Lake Saturday evening on a fishing tour. They camped that night and returned late Sunday night.

The boys had good luck and said fishing was good. However, it was too cold for conditions to be ideal, as in order to take advantage of the best fishing, they were compelled to wade out some distance and it was pretty cold for that, so the boys had to be content with what they could catch nearer the shore. Anyway, they brought home a nice catch.

POULTRY COMMUNITY HELPED BY "CIRCLE"

The egg circle founded and fostered at Orchard Gardens, Dakota county, by agricultural extension people of the university, shipped as many eggs in April, 1922, as it did in all the first five months of its existence, June 1 to Nov. 1, 1921. Shipments of last April amounted to 1,200 dozen. The five months period showed a total shipment of 1,205 dozens. Have you an egg circle in your community?

Mr. and Mrs. Anton Lien Visit.

Mr. and Mrs. Anton Lien returned Wednesday evening from an extended trip. They visited at Mr. Lien's parental home, Naples, Minn. They also visited other points on their way.

Mr. and Mrs. Nick Bundhund visited at the Hayner home near Thief River Falls Sunday.

HIGHLANDING HEWS PATH TO VICTORY

Thief River Falls Helpless Before Onslaught of Vicious Swats

Highlanding defeated a "tried-and-found-wanting" aggregation of Thief River Falls balltossers on the Highlanding diamond Sunday when the county seat visitors fell to the short end of the score, 13 to 12.

Thief River Falls had assembled a formidable looking bunch and they looked promising, indeed, for an inning or two, but that's about all that can truthfully be said about them from an athletic standpoint. They burned up the dirt at practice and done their utmost to burn up the paths—and actually did for the first inning—when Highlanding stepped on their tails and held them safely all through the game, except for the last inning when they came perilously close to taking the lead—and the game—and tucking it under the arms and starting for home.

A batting rally, however, in the last of the ninth, clinched the game for Highlanding. The first two men up for Highlanding in the last half were out on easy grounders. The next three hit safely and filled the bases, when a long fly was hit to Harold Arneson, deposed pitcher who was shifted to left field by the management, which was spilled from his mitt and the winning run came over for Highlanding.

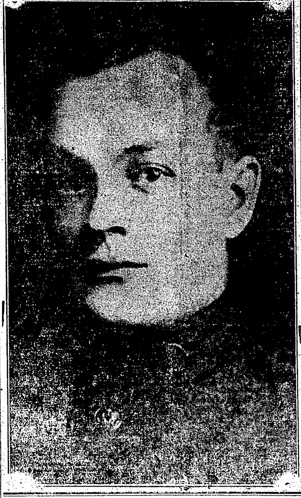
Nelson for Highlanding pitched the first six innings and he worked like a big leaguer. Outside of Larson, capable second baseman for the visitors, none others solved his delivery, unless it was Stanton Dahlen, heavy-hitting, smashing, dashing right fielder, who, in two trips to the plate, pounded Nelson for two hits. Dahlen's batting average showed up in the box score with being 1.000 per cent, but his fielding average fell 1.000 below, and it is thought that he is being kept on the club for his hitting ability alone—and the Thief River management is perhaps right in so doing inasmuch as baseball games are generally won by the team with the biggest bats.

The visitors tried out two pitchers in their eagerness to stay the terriffic swats of Highlanding without success. Harold Arneson started off in fine shape until an opposing batsman nearly destroyed him when the two collided along the first base line. Arneson demonstrated that he had a reasonable hook with the proper amount of seasoning, but these two attributes didn't prove sufficient and he was "yanked" in favor of "The Pickerel," touted far and near as a stopper of all heavy hitting, who went to the mound to draw the curtains on Highlanding. But the curtains shut out the light for Thief River Falls when everything and anything that came near the plate was hit out over the pastures.

It is planned to have the two teams play on the Goodridge diamond next Sunday in the event an open date can be had. A spirited game is looked for as Thief River Falls still feels they have a man-sized baseball club and are willing to prove it before a neutral lot of fans.

Will Wayne visited here Monday.

Fred Borgen, Victim of North Dakota Bank Robbers, Buried at Thief River Falls With Military Honors



CROP OUTLOOK NEVER BETTER

All Small Grains Have Good Stand With Ideal Growing Weather.

Not in several years have the crop prospects for Eastern Pennington county presented a more promising outlook and it is not thought that any contingency can prevent farmers of this section from harvesting a good yield, outside of hail or unusually heavy rains.

Rye this year is looking exceedingly well and stands from five and five and one-half feet are not unusual. The heads are filling in good shape. Potatoes also are doing very well and many farmers have from five to 20 acres under cultivation. While the rains so far this season have been too severe for the best growth of spuds, it seems that the proportionate sand soil has alleviated the great amount of moisture which fell earlier in the season.

Seeding was somewhat late, due to the heavy rains, but the generous amount of moisture gave this late seed a good start and most all of it is now away out of the ground. There has not been a large acreage of wheat planted in eastern Pennington county this year, largely due to the lateness of the season. What there is of it, however, is in a healthy condition and promises to turn out well.

WILL CELEBRATE JULY FOURTH AT HIGHLANDING

A Fourth of July celebration will be held at Highlanding this year and those in charge of arrangements promise visitors there for the day one of the best times they ever had. A complete program has been provided, consisting of baseball games, sports of all kinds and a big bowery dance to be given during the afternoon and evening.

Highlanding considers itself an ideal spot for a Fourth of July celebration, there being fine bathing facilities and excursions up and down the river during the day, for which a nominal charge will be made. Speakers have been arranged for and there will be plenty of amusements for young and old alike, according to the promoters.

The Goodridge band will furnish the music and a well-known orchestra will play at the dance.

Gretta Gulrud, Mable Tweeton and Mrs. J. Josephson went picking wild strawberries Tuesday afternoon.

FORMER TEACHER HERE IS BRIDE

Miss Teresa Giefer Marries George Werstlein of Thief River.

Last Wednesday morning at 9 o'clock occurred the marriage of Miss Teresa Giefer to George Werstlein at the St. Bernard's church of Thief River Falls.

Miss Giefer is the daughter of Peter Giefer of Thief River Falls and has been connected with the Goodridge schools for the past six years. Mr. Werstlein is connected with the First National bank of Thief River Falls.

The wedding was a very pretty and simple affair and was followed by a wedding dinner at the home of the bride. There were 30 guests present, most of whom were relatives of the bridal couple. They were attended by Miss Christine Giefer, sister of the bride, and Gregory Werstlein, brother of the groom.

The home was very artistically decorated in pink and white. Two large tables were laid for the guests and a large wedding cake formed a centerpiece for the bridal couple. A bouquet of pink roses formed a centerpiece for the second table.

Guests from Goodridge were: Mr. and Mrs. R. H. McDonald, Mr. and Mrs. P. O. Tvedt and Mr. and Mrs. Theodore Tandberg.

The bride wore a beautiful gown of crepe du chene with hand-made flowers of the same material with yellow centers and hat to match. She carried a bouquet of white roses and lilies-of-the-valley. The maid of honor wore a gown of organdie with hat to match in tea rose.

The happy pair left for Bemidji in the afternoon and are spending a part of their honeymoon at Itasca State Park. They will visit Duluth and the twin cities before returning and will make their home in Thief River Falls.

HIGH GRADE CATTLE ON SALE HERE JULY 7

U. N. Urdahl to Hold Big Auction Sale and Dispose of His Property.

C. N. Urdahl, who for a number of years has conducted a farm a short distance west of this village, will on Friday, July 7th, place all his personal property on sale, as he has definitely decided to discontinue active farming operations.

In an advertisement on another page of The Banner appears a list of the property for sale, which includes all of the horses, cows, steers, bulls and farm machinery of the Urdahl farm. In connection with this it must be said that all of the full-grown cattle for sale have twice been tested for tuberculosis and are of a blooded variety.

It is thought that local dairymen will avail themselves of the excellent opportunity afforded at this sale for the purchase of dairy cattle, as the grade Mr. Urdahl offers are of a well-known quality, among which are a number of full-blooded cows.

There is also a large list of farm machinery, etc., offered for sale, including a Studebaker automobile, haying tools, etc.

The sale will start promtply at 10 o'clock in the forenoon of July 7th and a free lunch will be served those attending.

It is not known what line of endeavor Mr. Urdahl intends to follow after severing his farming connections although it is thought that he will continue to make this section of Minnesota his home in future.

YOUNG PEOPLE'S SOCIETY HOLDS BUSINESS MEETING

The Young People's Society of the Lutheran Church met Wednesday evening for the purpose of reorganizing. A fairly large crowd was present and a short program was given by the young folks, after which they held a business meeting.

Officers elected were: Rev. Aakre, president; Nellie Wiseth, vice-president; Harry Halvorson, treasurer, and Thelma Gilbertson, secretary.

Vivian Thoreson and Harry McDonald were appointed to act on the next program committee.

The next meeting will be held July 12th, and meetings will be held every three weeks thereafter. The young people are urged to attend by the new members and also by the program committee, as they have a fine program under way and a pleasant evening is promised to all who attend.

DRIVE FROM CALIFORNIA

Oscar Gran and Mrs. John Gran of Flagstaf, Arizona, were here Monday visiting the Ole Kirkelie family. They drove from that point in a racer, and came by way of California making a stop at San Diego. They have quite a number of relatives at Thief River Falls, and were here Monday visiting among friends. Oscar worked with Carl Lindstrom in his garage when Goodridge was quite new, so he has many old friends to renew acquaintances with around here. Mrs. John Gran is Oscar's mother.

FARMERS WIN OPEN MARKET

Supreme Court Decision Marks Sweeping Victory in Farm Bureau Fight

Minnesota farmers have won a decisive battle in their fight for public regulation of the markets where their products are sold.

The state supreme court has handed down a decision upholding the law by which Minnesota declared the South St. Paul livestock exchange to be an open market.

The decision affirms the right of the people to exercise the police powers of their state government in regulating the livestock exchange. "An association of commission men, dealing in livestock at public stockyards, may be required to observe such reasonable regulations as the state sees fit to impose in the exercise of its police power," the supreme court ruled.

The decision of the high court was handed down in the case of Grisim against the South St. Paul livestock exchange. George Grisim, a member of the exchange, traded with a non-member in violation of rules of the exchange. The exchange attempted to fine him $250 for breaking its regulations. Mr. Grisim brought court action against the exchange.

Under the "open market" act passed by the state legislature last year as part of the Minnesota Farm Bureau federation's legislative program, the district court issued an order restraining the exchange from collecting the fine. On an appeal to the supreme court, the decision of the lower court was sustained.

The ruling of the supreme court on the open market law is one of the most important decisions ever handed down in Minnesota in a case directly involving the farmers' business interests and public welfare. It upholds one of the outstanding laws enacted by the last legislature in response to an overwhelming demand from Minnesota farmers, through their county farm bureaus, for recognition of the people's right to supervise the markets where their food is bought and sold.

It means that a livestock exchange cannot prevent its members trading with men who are not members. It means that a livestock exchange cannot prevent members from dealing with a co-operative commission association, established on the terminal market by Minnesota farmers in an effort to reduce the cost of distribution and to stabilize prices in the interest of both producer and consumer. It means that an organized boycott against a farmers' co-operative sales agency by a livestock exchange is unlawful.

The Minnesota supreme court, in its opinion, referred to court decisions involving the Kansas City exchange, quoting a statement that the traders who were members of the exchange had never been able to resist the temptation to grasp the reins of the market and sit in the seat of monopoly." The record in the South St. Paul case, the opinion goes on, discloses no abuses of the defendant's potential power over the livestock business at the South St. Paul market. The exchange may render useful services to the public by its control over its members, the court stated, "but the power it wields over them is capable of abuse."

Mr. and Mrs. V. C. McLeod and Mrs. A. McLeod and son, Stewart, drove to Thief River Falls Tuesday afternoon.

Things You Want

There is usually quite a gap between the things you WANT and the things you GET. One reason we do not get all the things we want is because we do not want them hard enough.

The things you really want and bend every energy to attain, are usually secured. Work, plan, save and see if our prediction is not true. Above all, put your savings in our bank where they will be secure. You will then get more of the things you really need. We will help you.

Mr. and Mrs. V. C. McLeod and Mrs. A. McLeod and son, Stewart, drove to Thief River Falls Tuesday afternoon.

Things You Want

There is usually quite a gap between the things you WANT and the things you GET. One reason we do not get all the things we want is because we do not want them hard enough.

The things you really want and bend every energy to attain, are usually secured. Work, plan, save and see if our prediction is not true. Above all, put your savings in our bank where they will be secure. You will then get more of the things you really need. We will help you.

NEWS REVIEW OF CURRENT EVENTS

Union Leaders Warn That They Will Order Rail Strike if Men Vote for It.

GOVERNMENT TO COMBAT IT

President Harding Gives Labor Board Full Support—Tariff Precedes Bonus in Senate—Conference on Russia at The Hague—De Valera Is Irreconcilable.

By EDWARD W. PICKARD

IF THE railway maintenance of way workers, shop men and members of other unions that are balloting on the question of a walkout, vote for a strike on July 1, the officials of the unions will sanction it. In that case the unions will find themselves in direct conflict with the government, for President Harding has let it be known that he will, to the full extent of his power, back up the federal railway labor board, whose adjustments of wages as provided by the transportation act have brought on the crisis. The President and the cabinet are keeping in close touch with the developments, and all agencies of the government will be employed to prevent a strike if possible and to render it ineffective if it does come.

The stand of the union leaders was set forth in a long statement to the labor board in which the decisions of that body were denounced and warning was given that the strike would be called if the men so voted. Ben W. Hooper, chairman of the board, replied to this with charges that the union officials had distorted and misconstrued the board's decisions in a manner to misled the men, and he cited instances of this distortion.

"A strike of railway employees," said Mr. Hooper's letter, "involving their wages, their employment and their welfare, based upon such misleading statements of this board's sentiments and declarations, would be unjust to the men and to the public."

So far as the shop crafts are concerned, one of the three reasons for desiring a strike may be removed within a few days. This is the practice of farming out shop work under the contract system. The labor board has been considering 17 complaints filed against various roads and its findings are said to be almost ready for announcement. Hearings in 30 other cases are now being held. Early in May the board decided such a case against the Indiana Harbor Belt railroad, the principles it enunciated then being, briefly, that such contracts "violate the spirit and purpose of the transportation act, and in effect set aside the wage decisions of the railroad labor board to which the carrier was a party and which the carrier put into effect."

Railway executives generally are of the opinion that, though the men probably will vote for a strike, it will not be ordered; and they say that if it is, transportation will not be seriously crippled. The train handling forces, including engineers, firemen, conductors and switchmen, are not involved in the controversy.

IN THE American Federation of Labor convention in Cincinnati a resolution was introduced calling for the repeal of the Cummins-Esch transportation act, with an amendment favoring government ownership of the railways. At the request of the rail union chiefs the resolution was laid aside. W. H. Johnston, president of the machinists, said: "Not for a single moment have we abandoned the program of government ownership. But the present administration is unfriendly to us and we thought that it would be inadvisable to press the matter at this time. Our enemies would charge that the forthcoming strike was called to force the government to take control of the railroads. We want that issue to be clean cut."

The special committee of the A. F. of L. convention appointed to consider recent United States Supreme court decisions affecting labor cases recommended amendments to the Constitution prohibiting the labor of children under 16; prohibiting the enactment of any law or the making of judicial determination which would deny the right of workers to organize, to deal collectively with their employers, to collectively withhold their labor and patronage and induce others to do so; providing that if the Supreme court decides that an act of congress is unconstitutional, or by interpretation asserts a public policy at variance with the statutory declaration of congress, then if congress by a two-thirds majority repasses the law it shall become the law of the land.

The committee also recommended that congress be urged to enact a child labor law to overcome objections raised by the Supreme court to previous laws.

ONE of the worst labor clashes in the history of Illinois occurred last week at the strip mine of the Southern Illinois Coal company in Williamson county. A gang of steam shovelers was at work there, and after President Lewis of the United Mine Workers had declared they were to be treated as "common strike breakers" they were surrounded and attacked by a crowd of striking miners armed largely with stolen weapons. The nonunion men, after a long battle, surrendered and many of them were murdered in cold blood by their captors. The number of dead is uncertain at this writing, but probably is as high as 40, and perhaps much higher. Governor Small ordered 1,000 members of the state national guard mobilized at Chicago. Though the miners quieted down somewhat after their orgy of slaughter, there was great danger of recurrence of the disorders. It is too early now to attempt to place the actual blame for the disgraceful affair.

YIELDING to the request of the administration, the Republican senators agreed to get through with the tariff before taking up the soldiers' bonus bill. Then the senate, by a vote of 51 to 22 rejected Senator Walsh's motion to sidetrack the tariff for the bonus, and, after a long wrangle, voted almost unanimously to make the bonus bill the special order of business immediately following the passage of the tariff measure. During the debate some of the Democrats severely assailed the President and the majority party for delaying the adoption of the bonus bill, but Senator Lenroot retorted that the matter of speeding it up was now in their own hands, and that if they would cease filibustering against the tariff, both measures could be passed before August 1.

Consideration of the ship subsidy bill also has been deferred, President Harding consenting to postponement until the house has sent the tariff bill to conference. When his letter to this effect was read in the house a partisan debate arose over the matter of selling liquor on American vessels. The Democrats again made it clear that they will keep this issue alive. Meanwhile the row over Chairman Lasker's policy has been temporarily quieted by the issuance of new Treasury department rulings declaring that the Volstead law does not apply on vessels outside the three mile limit.

PROVIDING for an enlisted personnel of 86,000 and carrying about $295,450,000, the naval appropriation bill was passed by the senate and sent to conference with the house. The action on the personnel is final. Amendments providing for withdrawal of American marines from Haiti, the Dominican republic and Nicaragua were defeated after long debate.

SOVIET RUSSIA, whose affairs are being considered this week by the international commission at The Hague, thinks she has so modified her economic plans that the other powers must be satisfied. According to Litvinoff, assistant commissar of foreign affairs, the all-Russian central executive committee recently has enlarged the scope of its new economic policy, making new decrees defining private property rights, regulating contracts, reintroducing lawyers and public prosecutors, and re-establishing civil law, until now the government regards the guarantee problem as practically settled.

He also says Russia is willing to demobilize 50 per cent of its army if Poland, Lithuania, Latvia and Esthonia will reduce their armies in proportion. The success of the conference at The Hague, he asserted, depends mainly on France, and he added that if it failed, Russia hoped to conclude separate treaties with England, Italy and other powers.

Japan's delegates to the conference have decided that France's Russian program is futile and unreasonable, and now it looks as though France and Belgium stand alone. It may be that one or two other countries will support their demand that, as a prior condition to discussion, Russia agree to recognize the rights of private property. The British and their followers wish to omit all discussion of the principles of communism and deal with concrete cases.

IF IRELAND is pacified it will not be with the consent and aid of Eamon de Valera. Though beaten in the Dail Eireann elections by a considerable majority, he still persists in his implacable opposition to the treaty which establishes the Irish Free State; and he declares he does not believe the Dail will pass the new Irish constitution in its present form, which he says is "well composed in all its parts and peculiarly fitted to the end in view, the degradation of the people." He adds that it would exclude from public service and practically disenfranchise every honest republican.

Directly connected with the Irish trouble was the assassination in London on Thursday of Field Marshal Sir Henry Wilson, late chief of the imperial general staff of the British army. He retired from this post last February and was elected a member of parliament from an Ulster district. He also was appointed military adviser to the Ulster government and was a leader in plans for pacification. He was shot to death by two men.

BETTER, perhaps, are the prospects for pacification and unification of China. Acting as an agent of President Li Yuan-hung, General Chen took possession of Canton, defeating the troops of Sun Yat Sen, who later was taken prisoner and held on a Chinese cruiser. Chen set up a provisional government pledged to support the central government at Pekin, and decided that Doctor Sun should be permitted to resign. President Li even formally invited Sun to go to Peking and assist him in reorganizing the general government. Meanwhile General Chang, the defeated Manchurian leader, and General Wu signed an armistice. Of course there is still a lot of fighting going on in China. In Kiangsi province some ten thousand of Wu's troops mutinied, killed many natives and started on a march toward Nanchang. British and American gunboats hurried to the protection of foreigners in that region.

APPROVAL was given to the Yap treaty with the United States by the Japanese privy council and letters of ratification will soon be received in Washington. The other treaties of the Washington conference will be ratified early in July, according to advices from Tokio.

J. MORTON HOWELL of Ohio has the distinction of being the first American minister to Egypt. He was nominated by President Harding and promptly confirmed by the senate. The selection of Mr. Howell for this position would seem to be especially wise, as he has been the American diplomatic agent and consul general in the land of the Pharaohs.

SENATOR FRANK KELLOGG was nominated for another term by the Republicans, and his opponent in the Minnesota fall campaign is to be the first woman ever nominated by a major party for a seat in the upper house. She is Mrs. Anna Dickie Olesen, winner in the Democratic primaries. She beat her nearest competitor, Thomas Meighen, by several thousand votes. Mrs. Olesen was one of the McAdoo floor managers in the Democratic convention of 1920. Another woman who came to the front in that convention, Mrs. Isetta Jewell Brown of West Virginia, announces her candidacy for the senate subject to the Democratic primaries of August 1.

News Briefs from All the State

Condensed Stories of Happenings of the Week in Minnesota

Austin—Senator W. A. Nolan was elected president of the Mower County Auctioneers' association at the annual meeting held here.

Pipestone—With the opening of a mile of new concrete paving in this city, Pipeston's total paving it brought up to 14½ miles.

Hibbing—More than 5,000 Finnish men and women attended the midsummer festival here. Congressman O. J. Larson delivered one of the principal talks.

Minneapolis — The Transportation National bank of Minneapolis, one of the few railroad brotherhood banks in the United States, is to be opened here.

St. Paul—The Minnesota Music Teachers' association brought the three-day convention to a close.

Red Wing—Several hundred men and women from northwestern states are here for the annual meeting of Mjosenlaget.

Brainerd—Beginning Monday, July 3, and continuing all the week, Brainerd will celebrate the semi-centennial of its founding.

Luverne—Three Luverne girls who disappeared during the week and were believed to have been kidnaped, returned to their homes in company of the father of one of them.

Winona—Harvesting of one of the biggest rye crops in years will be started the lather part of next week, according to the weekly crop report issued by H. J. Wagen.

Austin—A good many Austin boys who had arranged to work and earn some money during vacation find they cannot because of the restrictions enforced by the Industrial commission of Minnesota.

Albert Lea—The Young People's league of the Minnesota district of the Danish Lutheran church opened its convention here with about 100 delegates in attendance.

Crookston—A sharp fight on a state advisory police bureau was waged on the floor of the convention of the Minnesota League of Municipalities in final session here.

St. Paul—A considerably lower level of prices for the various items entering into highway construction is reported by the bureau of public roads of the United States Department of Agriculture.

Owatonna—Osman Temple Shriners from St. Paul found Owatonna dressed in the Shrine colors, green, yellow and red, when they arrived here, 250 strong, and marched through the principal streets headed by their band, drum and bugle corps.

Minneapolis—Four New York city girls, hiking from the Atlantic coast to the Pacific, reached Minneapolis, after stopping at the capitol in St. Paul to bring greetings to Governor Preus from Mayor Hylan.

Minneapolis—A fight for a new trial will be made by Dr. W. H. MacNeil, Minneapolis dentist, who has been convicted by a jury in district court of receiving a bribe while a member of the State Dental board.

Minneapolis—An estate valued at approximately $500,000 was left by Mrs. Josephine O. Koon, widow of Judge Martin B. Koon, who lost her life in the fire which destroyed the Lafayette club.

St. Paul—When the steamer "Red Wing" leaves the dock at the foot of Jackson street, several hundred Minneapolis real estate men, members of the Minneapolis Real Estate Board, will be passengers, together with their wives and families.

Grand Rapids—The fourteenth annual meeting of the Guernsey Breeders' Association of Notrhern Minnesota and Wisconsin at North Central experiment station was attended by hundreds of farmers from several counties, some driving in 90 miles.

Minneapolis—With the seizure of a large shipment of alcohol at the Milwauke freight station, fedral prohibition agents declared that they have uncoveerd an interstate liquor ring, with representatives in nearly every city in Minnesota, the Dakotas, Nebraska and Iowa.

Moorhead—Joining with the University of Minneosta tour from Moorhead to Itasca park, the annual Minnesota Red River valey tour will start from Moorhead July 20, the state immigration department learned. Crookston, Mahnomen and the famous Schermerhorn farm will be visited.

St. Cloud—To have Central Minnesota recognized as a tobacco producing section and to establish a reputation for Minnesota-grown tobacco is the object of a movement launched at a meeting of the Central Minneosta Tobacco Growers' association.

Canby—While the body of his companion, Joe Wenton of Omaha, lay at the morgue here, August Ernest, also of Omaha, is in the Yellow Medicine county jail at Granite Falls, charged with transporting liquor as the culmination of a "wild" automobile ride.

Minneapolis—Two thousand five hundred day-old chicks were shipped by parcel post through the Minneapolis postoffice in one day.

St. Paul—Recently naturalized citizens will be guests of honor at St. Paul's municipal Fourth of July celebration which the mayor's committee decided to conduct at Phalen park.

Minneapolis — Building contracts awarded in Minneosta in May totaled $9,221,200 in value, 22 per cent more than the previous month, and 53 per cent over May, 1921, acording to a report issued by the F. W. Dodge company.

Kimball—A Duroc hog futurity show is the latest additional feature for the annual tricounty fair here this fall.

Lake Benton—Extensive preparations have been made here for the annual reunion of the old settlers of Lincoln county.

Alexandria—Two hundred graduates of the University of Minnesota farm school will arrive here Sunday for a picnic. A large band and speakers will accompany the picnickers.

Willmar—The Old Settlers of Kandiyohi county had their 25th annual reunion in the new Sibley State park at Lake Andrews.

Olivia—The Olivia roller mill, idle for some time, has been purchased by W. L. McPeak of Waseca, Minn., and will be immediately reopened.

Milaca—The proposition to issue bonds for the erection of a new courthouse for Mille Lacs county carried at the special election on the question by 700 majority.

Red Wing—Several surprises were sprung in the voting in this county Monday, but the greatest was the defeat of County Attorney Arthur E. Arntson for renomination.

Minneapolis—Two boys, one of them the son of Mayor and Mrs. Jacob Werner of St. Louis Park, lost their lives in a cave-in while playing in the municipal sandpit near the Monitor Drill Works at St. Louis Park.

Mora—Mora will continue to have its Sunday movies as the result of the election here.

Alexandria—Scenes of the conflict between the Goths and Indians in the 14th century will be presented in a historical pageant to be staked at the Athletic park here.

Worthington—At a mass meeting of the ictizens of Storden the village council was asked to obtain plans and estimates on the cost of a waterworks system for the town.

St. James—Andrew Blaha, a farmer living three miles from here, reports he has lost the first planting of corn on a 40 acre tract from the destructive activity of cutworms.

St. Paul—Minnesota is the richest state in the union, Governor J. A. O. Preus told members of the Minnesota Bankers association at their annual convention at the Saint Paul hotel.

Windom—At the annual meeting of owners of the central heating plant here, 20 per cent of the outstanding stock was paid off, as well as a dividend on all stock.

St. Paul—Contracts for 300 miles of grading and graveling in Minnesota will be entered into immediately, C. M. Babcock, state highway commissioner, said, on receipt of word that the 1923 federal aid appropriation would become available July 1.

Austin—The true value of all property in the city of Austin subject to personal property taxation this year is $8,120,095, which is approximately $1,500,000 more than the true value as assessed in the year 1920.

Minneapolis—Dangerous grade crossings and bridges throughout the country will be studied with a view toward their elimination by the members of the Hennepin County Planning commission and the state railroad and warehouse commission.

Luverne—More than 200 citizens who hold the Luverne city council have an unjust distribution of paving assessments, appeared before Judge L. S. Nelson in district court here to ask relief.

Fairmont—Commander Allen Moore of the American Legion post has received from National Commander MacNider of the American Legion the citation awarded to Fairmont for giving work to all service men during national employment week in April.

St. Cloud—The annual picnic of the Minnesota State Association of Tobacco Growers was conducted on the C. D. Schwab Elm View farm. There are 150 members of the association living in Stearns, Benton and Sherburne counties.

Winnebago—Faribault county bureau and the rural schools of this county had a joint picnic at the Parker college campus. There was oral and written spelling contests and graduating exercises.

Madelia—More than 2,500 people attended the fifth annual picnic of the Minnesota Hereford association, held at the C. E. Brown farm, with officers of the Watonwan County Hereford association in charge.

Alexandria—On account of the great number of automobile speeders passing through Alexandria, an extra motorcycle policeman has been added to the Alexandria police force in an attempt to cure speeding within the city limits.

St. Paul—Liquor prescription blanks now in use in Minnesota were called in under instructions from S. B. Quale, federal prohibition director, and a new blank made from an engraved plate, on water marked paper, is to be substituted.

Minneapolis—The University of Minnesota department of agriculture has invited the editors of the leading agricultural papers in the Northwest to be guests on a tour of inspection which will be made to substations and branch schools between July 15 and 26.

Fairmont—D. W. Webster, assistant construction engineer of the Minnesota highway commission, has notified city authorities that taxpayers on Blue Earth avenue here are slated for a refund of $27,306.17 from the state on the paving of that street.

St. Paul—If present prices of farm products maintain through the harvest, the northwest will surpass by $55,000,000 the 1921 value of farm products, placed at $172,000,000, and livestock should realize $15,000,000 more this year than in 1921, said Gov. J. A. O. Preus.

Minneapolis—Five women inspectors have been brought to Minneapolis by the postal inspection department to aid in running down accomplices of the thieves who looted a New York mail truck of $2,000,000 in bonds and who have disposed of a large amount in the twin cities.

SUCCEEDS WHERE DOCTORS FAIL

Lydia E. Pinkham's Vegetable Compound Often Does That.—Read Mrs. Miner's Testimony

Churubusco, N. Y.—"I was under the doctor's care for over five years for backache and had no relief from his medicine. One day a neighbor told me about your Vegetable Compound and I took it. It helped me so much that I wish to advise all women to try Lydia E. Pinkham's Vegetable Compound for female troubles and backache. It is a great help in carrying a child, as I have noticed a difference when I didn't take it. I thank you for this medicine and if I ever come to this point again I do not want to be without the Vegetable Compound. I give you permission to publish this letter so that all women can take my advice."—Mrs. FRED MINER, Box 102, Churubusco, N. Y.

It's the same story over again. Women suffer from ailments for years. They try doctors and different medicines, but feel no better. Finally they take Lydia E. Pinkham's Vegetable Compound and you can see its value in the case of Mrs. Miner.

That's the truth of the matter. If you are suffering from any of the troubles women have, you ought to try this medicine. It can be taken in safety by young or old, as it contains no harmful drugs.

Pattern for Husbands.

"Young women nowadays," remarks an ornithologist in the employ of the government, "take too light a view of marriage. While in the West last summer I was induced to lecture to a summer school. During the course of this lecture I chanced to remark:

"'The ostrich sees very little; on the other hand, it digests everything.'

"Whereupon a girl on the front bench exclaimed, sotto voce, to her neighbor: 'Gee! What an ideal husband an ostrich must make!'"

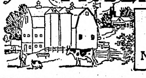
The Farmer's Own Page

Timely Comments on Agricultural Topics for Our Readers

PERTINENT POINTERS for MODERN FARMERS



Prepared Under Direction of

North Dakota Agricultural College

SYMPTOMS AND TREATMENT OF COMMON DISEASES OF SWINE

Paralysis of sows, a common afflictions after farrowing, has been reported by several farmers in Walsh, Pembina and Grand Forks counties. This disease is caused by a lack of mineral food during gestation and the nursing period. The sow may be completely paralyzed and unable to lift herself from the ground, or there may be a paralysis of only the hind legs, in which case she can drag herself around. This condition can be corrected by feeding alfalfa, sweet clover or other legumes or grasses, all of which contain a large amount of mineral matter.

Other common diseases of swine are as follows:

Cholera.

Cholera is an extremely contagious germ disease, favored by unsanitary quarters and improper feeding. Symptoms are fever, loss of appetite, dry cough, constipation and diarrhea, black droppings, purplish spots on skin, with increased secretions. The only highly contagious, rapidly fatal disease of swine of all ages. Quarantine premises; isolate infected animals, burn carcasses, disinfect lots, inoculate the healthy hogs not showing temperature with serum and virus. Clean quarters thoroughly.

Hemorrhagic Septicemia

Hemorrhagic Septicemia is a specific germ disease resembling hog cholera and distinguished from this disease in many instances with difficulty; often occur together in same herd. Symptoms are coughing, unthrifty appearance, chronic in character, generally confined to the younger animals. Treat with hemorrhagic septicemia bacteria indicated. Disinfection of quarters. Isolation of affected animals. W N U—N D Agri—June 23 ..... Two Best results have been obtained if hog cholera has been eliminated by the injection of serum or virus.

Diarrhea.

Diarrhea in young pigs (Scours) is caused by sour, spoiled or unbalanced rations together with overfeeding and sudden change of feed, damp, chilly, or dirty quarters. Symptoms are weakness; watery, foul-smelling, yellow or gray bowel discharges. Treatment: Correct diet, clean and disinfect quarters, feed one-quarter to one-half a pound blood meal daily to dam. Avoid sudden change in feed.

Sows Eating Pigs.

Pig-eating sows are in extremely feverish state and abnormal appetite after farrowing, usually due to improper feeding. Treatment: Balance ration with meat scraps, or tankage during pregnancy. Remove pigs from sow for few days except at suckling time; if habitual, dispose of sow.

Lice.

Lice are external parasites favored by unclean sheds and bedding. Symptoms are scratching and rubbing; restlessness; lice and eggs in region of abdomen, back of ears and inside of legs. Dip, spray and brush pigs and quarters with crude oil, coal tar, or petroleum dip. Repeat in ten days. Crude oil is preferred.

Poisoning.

Poisoning may originate from overfeeding of common salt or from feed-cotton-seed meal in excessive quantities. Intense thirst, restlessness and prostration are symptoms of the first; loss of appetite, weakness, blindness and other nervous manifestations of the second. Pigs poisoned from common salt should be given a strong emetic, then castor oil. Poisoning from over-feeding of cotton-seeding is seldom cured, but can be prevented by exercise, wood ashes and green feed.

The piano needs airing just as much as the bedroom; open it up occasionally.

The window-glass area of a kitchen ought to be at least a fifth of its floor area.

Remember that farm animals as well as humans appreciate plenty of clean, cold water on a hot summer day.

Fashions in sin seem to change, but the good old qualities of loyalty, kindness, truth, and service are always in style with the best folks.

FARMER BROWN GETS ALL HET UP AT FARM MEETING

A prominent farmer whom we will call Farmer Brown shouted in a speech at a recent farmers' meeting: "The damning sin of our people is ignorance." He continued by saying: "A lot of my farmer friends and neighbors are not at this meeting because they belong to the class that will never find out that they don't know anything. They will condemn everybody from the president to the merchant and weather man when prices and conditions are unfavorable, without considering their individual strength. I can afford to say these things because I am a would-be farmer and dairyman, and I know what I'm talking about. Much has been done to encourage better dairy cattle and dairy products, but we have not made a start yet except in sections. The start is in the use of purebred sires. The extent of this ignorance is astounding and is by no means confined to the generally ignorant class.

"Hugh G. Van Pelt; who is known to all breeders and dairymen, defines a 'scrub' bull as an inferior individual, whether he be registered, grade, or scrub breed. He says that it is inconceivable that a man will milk an unprofitable cow 700 times a year, but that the strangest blunder of all is the use of a scrub sire, and that there is not a man on earth whose brain is hitting on all cylinders that will attempt to contradict this. On the Jersey island, bulls are so severely culled that only the outstanding animals are saved, though they are all subject to registration and highly bred.

"Yet, with the average cow owner here, any old scrub will do if he is here and free or cheap. With each generation cattle either grade up or down. One of the worst enemies to grading is the 'pretty' grade bull that is 'just about as good' as the purebred and belongs in the scrub class, fit only for the butcher, and suggests:

ODE TO A SCRUB BULL.

A farmer called Henry H. Peck
Took his old scrub bull by the neck,
And said, you're the one,
You son of a gun,
That mortgaged my dairy, by heck.

So now to the block you retire,
To eat you is my great desire,
No more you'll disgrace
The dairy cow's race,
For I've purchased a pure Jersey sire.

"The cow that is not good enough to breed to a purebred sire should go to the butcher. She should be replaced by a producer and then developed by proper feeding and care. One good cow will eat less and produce more than three ordinary scrubs, but it is strange and touching to see how fondly the farmer will cling to the scrub cow, which suggests the following from Hoard's Dairyman, 'I love my cow. I love my scrub cow. She gives me employment every day in the year. She consumes my hay and grain, and grows fat and sleek. She is a thing of beauty, though a burden forever. To produce milk and butterfat would detract from her physical beauty; therefore, it is unreasonable to expect it of her. She helps to reduce my income tax. I love my scrub cow. She is a luxury. Dairymen are entitled to luxuries as well as other people. My neighbor tells me to sell her to the butcher, but my neighbor is a hard-hearted man, so is the butcher. The official tester says that the profits from my three best producers will keep her in comfort, so why should I worry? I love my scrub cow.

"'It requires much time to feed her, but very little time to milk her. My banker says that the small amount of milk she contributes can justly be called 'the milk of human kindness,' for it is human kindness that allows her to live. Even Parson Jones was heard to remark, 'A greater love hath no man than he who wears his young life away to support a scrub cow, expecting no reward, not even the respect of real dairymen.' I love my scrub cow. Who can doubt it?"

Says Sam: Nobody knows the joy of loafing like the man who work for it.

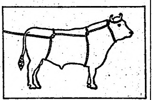
DAIRY HINTS

PLAN FOR THROWING ANIMAL

Necessary at Times to Have Cow or Bull on Ground to Perform Necessary Operations.

For performing surgical operations, dehorning, ringing or castrating, it is often necessary or desirable to throw a bull and hold him on the ground.

The accompanying sketch shows a very effective method to use in casting a cow or bull. It requires 35 or 40 feet of rope. With hornless animals the first loop will need to be around the neck instead of the horns, as illustrated. The next step is a half hitch just back of the forelegs and another in front of the hind quarters. Pulling on the main rope to the rear and toward the side on which it is desired to have the animal lie will get results. Pregnant cows should not be so thrown. Once the animal is down turn its head back, nose up, with poll to the ground. A hand hold on the side of upper lip will usually enable one man to hold the animal down, another man keeping taut the casting rope.—Dairy Farmer.



Effective Method in Casting Bull.

ECONOMICAL FEED FOR HERD

Most Important Item That Enters Into Cost of Milk Production—Analysis of Figures.

(Prepared by the United States Department of Agriculture.)

How to feed his herd economically and profitably is an important thing for a dairyman to know. In all sections of the country where investigations have been carried on, the United States Department of Agriculture has found that feed is the most expensive item that enters into the cost of milk production; and intelligent feeding, in either summer or winter, offers the biggest opportunity to reduce costs.

The analysis of many figures by the department shows that in Vermont the winter costs of keeping a herd were made up of 63.1 per cent feed and bedding, 17.5 per cent labor and 19.4 per cent other costs. In summer, feed and bedding represented 41.6 per cent of the total expense, labor 26.7 per cent and other costs 31.7 per cent.

In the South the costs are distributed somewhat differently. Figures obtained in Louisiana show that in winter 56 per cent of the expense is for feed and bedding, 22.4 per cent for labor and 21.6 per cent other costs. The summer costs in that region do not differ from the winter costs so much as they do in the North. The figures for summer in Louisiana show that 50.5 per cent of the total cost of milk is for feed and bedding, 26.2 per cent for labor and 23.3 per cent for other costs.

Although it is advisable for a farmer to economize wherever he can wisely do so, these figures show that the dairyman who studies feeds and feeding has an excellent opportunity to increase the profits of his dairy herd.

SOY BEANS FOR DAIRY COWS

According to Tests at Iowa Station Plant Furnishes Most Palatable Protein Feed.

Soy beans as a feed for dairy cattle have shown their value in replacing oil meal in the ration, according to a recent experiment conducted by the Iowa agricultural experiment station. Cracked soy beans, it was found, made a palatable protein feed worth one-third more than the same amount of oilmeal.

Two years' experiments were conducted with the soy beans in replacing protein supplements, and the results show that dairy farmers can produce this supplement to advantage.

BALANCED RATION IS URGED

Corn Fodder Is Not Satisfactory for Dairy Cow Because It Is Lacking in Protein.

A cow may consume large quantities of feed, and still lack the essential elements for milk production. This is why the use of a balanced ration is both economical and satisfactory. Corn fodder, fed alone, for example, is not a satisfactory feed, because the ration lacks protein, and hasn't sufficient succulence to promote a satisfactory flow of milk.

CONTROL OF ALFALFA WEEVIL BY SPRAYING POISON OVER FIELDS

(Prepared by the United States Department of Agriculture.)

Farmers in regions newly infested by the alfalfa weevil will be interested in knowing that an unusually effective method of control has been worked out by the United States Department of Agriculture. Specialists of the department say that rarely has any method of insect control been so thoroughly safeguarded against failure as alfalfa-weevil spraying. It has been tested every season for seven years. The cost of the operation—about $1 an acre—is trifling compared with the returns, and no farmer in the territory infested or threatened can afford to overlook it, the specialists say. There is no control measure, however, which can be applied advantageously this late in the season. Effective work must be delayed until next spring.

Control by Poison Spray.

Control is effective by spraying poison over the fields so that it will cover the growing parts on which the weevils mostly feed. Arsenate of lead and arsenite of zinc have been mostly used, but other arsenicals recommended for orchard spraying are thought to be about as good. There is practically no danger of burning the foliage of alfalfa, and therefore the range of suitable poisons is larger than in fruit-tree spraying. Arsenate of lead is said to be, everything considered, the best poison to use, principally because it sticks to the leaves more readily and costs less than most of the others.

The poison is weighed or measured at the rate of two pounds of powder or four pounds of commercial paste for each 100 gallons of water, is stirred with a little water in a pail until it becomes a thin paste without lumps, is diluted and strained into the sprayer tank. Two pounds of laundry soap for each gallon should be added, in order to make the liquid stick to the leaves properly. The dry, powdered form of the poison is better than the paste. There is no danger of stock being poisoned by hay cut from sprayed fields where the poison is applied at a rate of not greater than 100 gallons of spray mixture per acre.

Simple Outfit Sufficient.

The essentials of the spraying outfit are: A truck or other vehicle, a tank with an agitator to keep the poison from settling to the bottom, a pump, a pressure gauge, an engine and pumping jack, unless the pump is to be driven by hand, a strainer, a pipe for distributing the liquid from the pump, and as many nozzles as are required by the capacity of the pump. These essentials may all be contained in a barrel-pump outfit carried in a wagon. The pump must be capable of delivering four-fifths of a gallon or more a minute and maintaining a pressure of at least 75 pounds. If the pressure is less than that, the mist spray will not be fine enough to prevent the liquid from gathering in drops and running to the ground instead of drying on the tops of the plants.

The number of nozzles used should be sufficient to take up the capacity of the pump. At the average walking gait of a team, each nozzle should deliver nine-tenths of a gallon a minute. Therefore, a pump of nine-gallon capacity per minute will supply ten nozzles, each of which covers a strip two feet wide. By an arithmetical calculation of the cubical content of the pump cylinder and the number of strokes per minute, the capacity of the outfit can be determined. The spray should be applied at the rate of 100 gallons of spray mixture per acre.

Nearly any kind of spraying outfit can be adopted for this purpose. However, modern orchard spray outfits are usually designed to give a comprehensively small flow and high pressure, and are less suitable for alfalfa spraying than the older pumps, with larger cylinders and longer strokes, designed for larger flow and lower pressure.

The spraying outfit should be mounted on the wagon or other vehicle used so that the nozzles will be about two feet above the tops of the alfalfa plants. Four 50-gallon barrels with an engine and pump mounted on an ordinary wagon, or, for a hand-pump outfit, an express wagon and fewer barrels constitute a satisfactory outfit. A paddle, dasher, or some other form of agitator must be provided to keep the liquid stirred. A strainer of 20-mesh brass or bronze screen should be fitted to the opening through which the water enters the tank and another over the outlet leading to the pump. The parts of the pump in which close fitting is required should be of brass, bronze, porcelain, or some other substance less rapidly corroded by the chemicals than iron and steel. All commercial spray pumps are built in this way, but pumps which were intended for other purposes should be refitted when used for spraying.

An engine-driven outfit must have a relief valve near the pump, permitting the surplus flow to return to the tank. The pump must have an air-pressure chamber large enough to keep the flow steady and insure even distribution of the poison. Even pressure, indispensable for uniform spread of the poison, cannot be maintained without a pressure gauge. This gauge should be attached to the pressure chamber or near it and at a distance from relief-valve and nozzles.

The boom or pipe which carries the nozzles and supplies them with liquid from the pump is made of two-foot pieces of one-half inch galvanized iron pipe joined by T's, each of which affords an opening for the attachment of a nozzle. The boom is connected with the pump by a one-half inch pressure hose. The boom should be supported by a piece of timber, two by four, clamped or hinged to the truck with the boom stapled, bolted, or wired to it. Plain misty nozzles without strainers or other complications, should be used.

Spray in Warm Weather.

The best time for spraying is at what the specialists call the turning point of weevil infestation—from one to two weeks before the first crop is ready for cutting, when the young larvae become so numerous that they completely destroy the growing tips. After that point is reached the weevils, if left alone, consume the leaves until nothing is left but the woody fibers. If spraying is done at this time the crop recovers quickly. Spraying yearly in the spring sometimes entirely prevents damage, but it is uncertain. On the other hand, plants sprayed after they were entirely stripped of their foliage have been able to recover and bloom, but this allows destruction to go too far and makes recovery too slow.

Spraying at the "turning point" not only protects the first crop but confers an even larger benefit on the second crop, which sprouts and grows without delay, and no treatment of the stubble is necessary.

Stubble spraying, after the cutting of the first crop, has been successfully done, but it requires getting into the field immediately after cutting and a much larger quantity of liquid is required than if it were applied to the first crop. Stubble spraying, therefore, is advised only when earlier spraying has been impossible.

Spraying should be done, if possible, at the beginning of a warm spell. The weevils do not feed so voraciously in cool weather, and if the poison is applied at the beginning of a cool spell it may become largely impotent before the weevils resume feeding freely. When spraying is done under favorable weather conditions most of the weevils are killed within four or five days.

There are other control measures, but none of them promises much more unless applied before or immediately after the first cutting. One method is to pasture the alfalfa field until most of the eggs and young larvae have been destroyed. Another is to use the alfalfa as a soiling crop, cutting it green two or three times during the season. These methods, however, must be practiced before the turning point of infestation, as after that time the weevils destroy the plants so completely that there is not enough growth for either pasture or soiling. Another method is to cultivate the field with a harrow or other implement, immediately after the first cutting, in such way as to cover the field with a dust mulch, thus exposing the entire surface of the field to the sun and killing most of the weevils. In some instances, the second crop has been protected by dragging the stubble, while it is still wet from irrigation, with the land leveler or the clod breaker. This causes the insects to perish by embedding them in the mud, but it is harmful to the soil and is not recommended.

SOY BEANS USED WITH CORN

Where Planted for Hogging Off at Maturity Early or Medium Yellow Is Best.

Where soy beans are used with corn for hogging off at maturity, a variety should be used that will mature with the corn, such as the early or medium early yellows. But later maturing kinds of soy beans may be used in this mixture where the crop is to be pastured with sheep or lambs, as the later soys make large growth of plant and leaves, which sheep and lambs prefer, but no seed till very late.

Prepare for Harvest.

Be sure that the binder or header is in good shape for harvest. A day's delay in the middle of the harvest may mean a loss.

Clean Utensils.

All utensils which come in contact with milk and cream should be kept clean at all times.

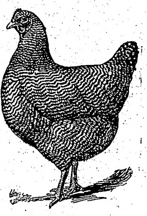
POULTRY

FIXED EGG-LAYING RATIONS

Poultry Keeper Should Determine on Feeds Best Suited to Conditions and Prices.

(Prepared by the United States Department of Agriculture.)

All the following rations have been used with good results at the experimental farm at Beltsville, Md., conducted by the United States Department of Agriculture, but the poultryman should choose the ration best adapted to local conditions and prices. Feeds not included here may be added or substituted on the basis of their comparative analysis, provided the meat scrap or animal-protein feeds are not replaced by cottonseed meal or other high vegetable-protein feeds. All changes in the feed should be made gradually, as sudden changes may decrease egg production materially.



Young Plymouth Rock.

Ration No. 1, Mash.—16 lbs. cornmeal, 6½ lbs. meat scrap, 1 lb. bran, 1 lb. middlings. Scratch mixture: 1 lb. cracked corn, 1 lb. wheat, 1 lb. oats.

Ration No. 2, Mash.—2 lbs. cornmeal or barley meal, 1 lb. bran, 1 lb. middlings, 1 lb. meat or fish scrap. Scratch mixture: 2 lbs. cracked corn, 1 lb. oats, 1 lb. wheat or barley.

Ration No. 3, Mash.—3 lbs. cornmeal, 1 lb. meat scrap. Scratch mixture: 2 lbs. cracked corn, 1 lb. oats.

Ration No. 4, Mash.—9 lbs. cornmeal, 5 lbs. middlings, 4 lbs. bran, 2 lbs. cottonseed meal or gluten meal, 2 lbs. meat scrap, 2 per cent bone meal. Scratch mixture: 2 lbs. cracked corn, 1 lb. wheat, 1 lb. oats, 1 lb. barley.

Ration No. 5, Mash.—1 lb. cornmeal, 1 lb. bran, ¾ lb. meat scrap, 1 lb. middlings, 1 lb. ground oats. Scratch mixture: 2 lbs. cracked corn, 1 lb. wheat, 1 lb. oats, 1 lb. barley.

Ration No. 6, Mash.—3 lbs. cornmeal, 1 lb. bran, 1 lb. middlings, ½ lb. meat scrap. Scratch mixture: 2 lbs. cracked corn, 1 lb. wheat, 1 lb. oats. Feed with table scraps or cooked vegetables.

Ration No. 5 is adapted especially for yearlings or old hens of breeds inclined to get too fat, such as the Plymouth Rock, Orpington and Wyandotte. As cornmeal, fed with meat scrap, is very fattening, these two feeds are cut down in the rations.

With ration No. 6 feed all table scraps available, or vegetables at the rate of 5 pounds daily to 30 hens.

Five per cent bone meal may be used in any of these mashes, and the quantity of meat scrap reduced accordingly, or 2 per cent of bone meal may be added without changing the mashes.

FEEDS FOR BREEDING GEESE

Equal Parts of Bran, Middlings and Ground Oats Mixed With Milk Is Excellent.

A good mash for breeding geese consists of equal parts or bran, middlings and ground oats mixed with milk. This can be given in the morning. Corn should be fed at night. Breeding geese may become too fat on a diet limited to corn. Their digestive system is better adapted to mash than to whole grain. If geese become too fat it injures the hatchability of the eggs. A mash consisting of equal parts by weight of cornmeal, ground oats and bran is also recommended for geese.

POULTRY NOTES

Straw and hay make good nesting material.

* * *

Provide roosts and dropping boards in the henhouse.

* * *

Some method must be found of keeping the chicks comfortable.

CROOKS IN SERVICE.

The disgraceful truth, is succinctly stated by Congressman Reavis of Nebraska, when he says: "No crook outside ever robbed the government without the assistance of some crook inside."

From time to time, throughout its history, the United States government has been the victim of swindling operations of trusted employees. Often these dishonest servants were working in' partnership with scoundrels not connected with the federal service. Outsiders have reaped big gains from cheating the government, and the fact that they were aided by employees of the United States has not always developed. Invariably, however, they had much assistance.

Large portions of the present vast national debt resulted from transactions during the war—usually under the guise of contracts. The excitement of the times, the high pressure at which everything had to be done, the fastening of the badge of patriotism upon every project and every proponent of a scheme having any resemblance to effort for the country's welfare—all these conditions and practices made detection of dishonesty difficult for even the suspicious, and more difficult yet was any endeavor at proving dishonesty to be in progress.

It is not possible to reach the incompetents now. The country must for years suffer from their work. But surely the thieves inside and outside government service can be punished. Representative Reavis is to quit Congress in order to give all his time to the task of running these fellows down. No aid which the country can give to such undertakings must be spared.—Bluefield (Va.) Daily Telegraphy.

The cost of living will always be high to those who live that way.

After the heat of the battle is over, a man often wonders why there was a battle.

Here is a rule that doesn't work both ways: When a fellow boasts of his kin folks they seldom boast of him.

A fashion magazine declared the other day that it costs $250 a year to dress a girl properly. Whereupon the Arkansas Gazette exlaimed: "For goodness sake, give one of them $250! It would be worth it to see one of them dressed properly."

COAL BUSINESS HOOVERIZED

Will Hoover worshipers insist on making him a presidential candidate two years hence, basing their claims on his wonderful record in getting an adjustment in the coal controversy, resulting in an advanced retail price from 1 to $2 per ton.

For two years the retail price of coal has been a swindle on the public, and it now looks as though Hoover has added by his miraculous maneuver, a further advance and burden.

If he can bring about an adjustment this year with an advance of say $2, he may be able next year to add an extra $5. The larger the advance the more money will there be that can be used in a divy.

Possibly the administration is helpless in the matter, possibly Hoover could not reduce the price of coal if he wished to, possibly there can be no legal restraint on the advance of gasoline, possibly we are at the mercy of commercial swindlers, any way it is not safe to bank on Hoover.—Anoka Herald.

On a farm a few miles west of Austin there is a cow that has produced eight hundred pounds of butter fat in six months. At the present rate, she is going to beat the world's record. There is an electric fan above her to keep her comfortable, and she lives on the fat of the land. The only thing lacking in the equipment of the paltaial barn in which she lives is J. Adam Bede's proverbial phonograph. The Austin-Albert Lea community has probably developed dairying to a higher degree than any other in the state, and the generally prosperous appearance of the country demonstrates that cows are making the farmers wealthy. It would be well if every man in Lac qui Parle county could take a drive through Freeborn and Mower counties.—Dawson Sentinel.

NOTHING BUT THE TRUTH

With so many radio outfits springing up around town, funny things are happening. Some sensitive persons are having an awful time getting to sleep because of the bedtime story catching on the springs of their beds. A row of iron dish rags at Hanson's Five and Dime frightened lady clerks out of a week's appetite by giving a lecture on careless husbands by Larry Loose Coupler of Pittsburg. Another lady whose boy is installing a radio outfit, was talking to a neighbor with a potato masher in her hand, when all of a sudden the masher joined in the conversation; both ladies fainted and the potato masher quit after giving the weather report and singing a song. If these things aren't true we're a liar.—Port Allegheny (Pa.) Reporter and Argus.

STILL THERE'S TIME TO PUT DOWN EGGS

There is still time to preserve good eggs for next winter's use. Prices are comparatively low, and eggs put down now will be just as good for next winter's cooking as the high priced eggs of the cold weather period.

"Eggs are best preserved in waterglass and should be strictly fresh for [illegible] keeping," says [illegible] poultry specialist in the university's extension service.

Miss Cooke advises against the use of metal containers because there is a chemical action detrimental to both container and eggs. "Either wooden pails or butter tubs make fine containers and they are much cheaper than stone jars," she says.

NOTICE!

No minors allowed at the Highlanding Pavilion.

[illegible] KILLS POCKET GOPHER

Prof. F. L. Washburn of the division of entomology and economic zoology, University of Minnesota, has been experimenting this spring with a low grade of cyanide coming in the form of thin flakes under the name of rodent exterminator. He finds that this material when placed in the bottom of a branch or main burrow of a pocket gopher and the opening closed, is very effective in clay and loamy soil, but apparently not so much so in sandy soil. The material is cheap, each dose only costing a few cents. [illegible]

CARD OF THANKS

I desire hereby to express my sincere and heartfelt thanks and appreciation to the voters of Pennington county for their loyal support at the late primary election. Thanks.

E. A. MOSTUE.

Attention, Livestock Shippers!

Farmers and others who have stock to ship will find it worth while to notify Oscar Stenvick. Direct 'phone from Goodridge. OSCAR STENVICK, Manager, Reiner Shipping Assn. 4t

GOODRIDGE BUILDERS ATTENTION!

PUBLIC SALE

Having rented my farm, I will therefore sell at Public Auction to the highest bidder, on

Friday, July 7, '22

on my farm, the NORTHEAST QUARTER (NE 1-4) of Section Nineteen (19), Town of Goodridge, being one mile west of the Village of Goodridge, Stop 15 on the Electric Line, all my personal property, to-wit:

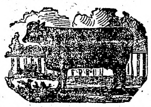
5 Work Horses

One bay horse 9 years old, weight 1300.
One bay horse 15 years old, weight 1100.
One grey horse 5 years old, weight 1200.
One bay mare 7 years old, weight 1100.
One bay mare 11 years old, weight 1100.

FIVE PIGS, Four Months Old

LIVESTOCK

22 MILCH COWS 22



Four red cows 7 years old, grade Shorthorn.
Six red cows 6 years old, grade Shorthorn.
Five red cows 4 years old, grade Shorthorn.
Five red cows 3 years old, grade Shorthorn.
One black and white cow 8 years old, grade Holstein.
One black and white cow 4 years old.

All milking and coming fresh in November, December and January.

All Full-Grown Cattle Have Been Tested Twice for Tuberculosis, and Are Free From Same.

26 SHROPSHIRE SHEEP 26

21 ewes. 3 ewe lambs.
1 buck. 1 wether lamb.

21 HEIFERS 21

Five red heifers 2½ years old, grade Shorthorn.
Seven black and white heifers 1 year old, grade Holstein.
Four heifers 2½ years old, grade Shorthorn.
Five heifers 1½ years old, grade Holstein.

17 STEERS 17

Twelve steers, ages (1) to three years old.
Three steers 2½ years old, grade Shorthorn.
Two steers 1½ years old, grade Shorthorn.

2 BULLS 2

One roan Shorthorn bull 3 years old.
One white Holstein bull 3 years old.

Farm Implements and Machinery

One Avery 12-25 H. P. tractor.
One 32-Avery separator (both in fine condition).
One 22 H. P. steam engine.
One Hart-Parr 30-60 oil burner tractor.
One eight bottom engine stubble gang plow.
One eight breaker.
1 7-passenger Studebaker touring car.
One Keystone 18-disc drill.
One Stoughton wide tire wagon.
One three bottom plow.
One Deere gang plow.
One 4-horse drag.
One 8-ft. Deering binder.
One 5½-ft. Deere mower.
One Osborne 5½-ft. mower.
One hay rake.
One bob sleigh.
One Great Western manure spreader.
One 18-in. walking plow.
One 14-in. walking plow.
One 14-in. breaking plow.
Two Osborne discs.
One International hay stacker.
And a lot of other articles too numerous to mention.

Sale Starts at 10:00 o'Clock A. M. Sharp; Free Lunch at Noon

TERMS OF SALE---All sums of $10 or under, cash; over that amount approved bankable paper due December 1st, 1922

ANTS FLEE BEFORE TARTARIC BARAGE

A small amount of moistened tartar emetic and powdered sugar in equal parts will drive ants away if placed near their haunts. The mixture should not be thrown out when no longer required, says Mary L. Bull, university specialist in household management, but should be set aside for another emergency. Add a little water and the mixture can be used as before. Care should be taken to keep it out of the reach of little children.

RANDOM THOUGHTS

Good advice is the kind that is seldom taken.

* * *

Most fat men emphatically believe in exercising—by proxy!

* * *

The fellow who is self-satisfied is usually pleased with very little.

* * *

A lot of girls try to imitate the ball plaersy by making a good catch.

* * *

The chap who succeeds is the one who doesn't care who or what his ancestors were, but tries to be a pretty good ancestor himself.

* * *

What has become of the old fashioned man who used to mop up a plate of ham-and-eggs, oatmeal and cream, a stack of wheatcakes and three cups of coffee for breakfast?

* * *

Generally, the fellow who sees her twenty years after he was jilted is glad he was.

* * *

Many married women are more worried about his outgoings than his shortcomings.

* * *

A man begins to achieve wisdom when he comes to a realization of how little he knows.

* * *

The honeymoon usually ends when hubby has to arise at 5 A. M. to help with the washing.

* * *

Campers out west don't have to take stoves along because there is always a mountain range handy.

* * *

The average small boy would trade his chance of becoming president for a job as clown in the circus.

* * *

After election, the candidate suddenly discovers that a lot of voters wouldn't take his word for it.

* * *

Some fellows are so unlucky that if it was raining gold all they'd have on would be their B. V. D.'s.

* * *

A man will sit on a board for two hours at a circus—but he complains that the church pews are too hard.

* * *

Perhaps the reason why some men are against women jurors is because their wives always think them guilty.

* * *

They now say that it is possible to communicate with the departed spirits. Will some one please page Johnny Walker?

* * *

The small boy who was asked to use the word "gruesome" in a sentence replied: "Pa planted a bush, and it sure grew some!"

* * *

Whenever you meet a man who has no enemies you'd better walk right on and talk to someone who amounts to something.

* * *

A lot of fellows who kick strenuously if butter goes up a cent a pound keep right on trying to win with a pair of nines.

GRAMONT AND FELL

SYNOPSIS—During the height of the New Orleans carnival season Jachin Fell, wealthy though somewhat mysterious citizen, and Dr. Ansley, are discussing a series of robberies by an individual known as the Midnight Masquer, who, invariably attired as an aviator, has long defied the police. Joseph Maillard, wealthy banker, is giving a ball that night, at which the Masquer has threatened to appear and rob the guests. Fell and Ansley, on their way to the affair, meet a girl dressed as Columbine, seemingly known to Fell, but masked, who accompanies them to the ball. Lucie Ledanois, recently the ward of her uncle, Joseph Maillard, is the Columbine. At the ball, Bob Maillard, son of the banker, again proposes to her and is refused. He offers to buy some of her property. A Franciscan monk interests her. He turns out to be Prince Gramont. In his library Joseph Maillard and a group of his friends are surprised by the Midnight Masquer.

CHAPTER III—Continued.

—4—

"You money trickster! Do you think I would spare such a man as you? You draw your rents from the poor and destitute, your mortgages cover half the parishes in the state, and in your heart is neither compassion nor pity for man or woman. Bah! I could shoot you down without a qualm!"

In his voice was so deadly a menace that Maillard trembled.

"There is nothing of mine in that safe," he said, his voice a low growl. "I have given it to my son to use. He is not here."

"That," said the Masquer calmly, "is exactly why I desire you to open it. Your son must make his contribution, for I keenly regret his absence. If you are a criminal, he is worse! You rob and steal under shelter of the law, but you have certain limitations, certain bounds of an almost outgrown honor. He has none, that son of yours. Why, he would not hesitate to turn your own tricks back upon you, to rob you, if he could! Open that safe or take the consequences; no more talk, now!"

The command cracked out like a whiplash. With a shrug of helplessness the banker turned and fumbled with the protruding knob of the safe. With one exception all eyes were fastened upon this amazing Masquer. The exception was Jachin Fell, who, suddenly alert and watchful, had turned his attention to Maillard and the safe, a keen speculation in his gaze as though he were wondering what that steel vault would produce.

All were silent. There was something about this Midnight Masquer that held them intently. Perhaps some were inclined to think him a jester, one of the party masquerading under the famous bandit's guise; if so, his last words to Maillard had removed all such thought. That indictment had been deadly and terrible—and true, as they knew. Bob Maillard was not greatly admired by those among his father's friends who best knew him.

Now the door of the safe swung open. The compartments appeared empty.

"Take out the drawers and turn them up over the table," commanded the Masquer.

Maillard obeyed. From the last drawer there fell out on the table a large envelope, sealed. The Masquer leaned forward, seized upon this envelope, and crushed it into his pocket.

"Thank you," he observed. "That is all."

"D—n you!" cried Maillard, shaking a fist. "You'd try blackmail, would you?"

The bandit regarded him a moment, then laughed.

"If you knew what was in that envelope, my dear financier, you might not speak so hastily. If I knew what was in it, I might answer you. But I don't know. I only suspect—and hope. And now, my friends—au revoir!"

The Masquer sprang backward into the hall. The door slammed, the key clicked. He was gone!

Maillard was the first to wake into voice and action. "The other door!" he cried. "Into the dining room—"

He flung open a second door and dashed into the dining room, followed by the other men. Here the windows, giving upon the garden, were open. Then Maillard came to a sudden halt, and after him the others; through the night was pulsating, with great distinctness, the throbbing roar of an airplane motor! From Maillard broke a bitter cry:

"The detectives—I'll get the fools here! You gentlemen search the house. That fellow can't possibly have escaped—"

They hastily separated. Maillard dashed away to summon the detectives, also to get other men to aid in the search.

The result was vain. No one had been seen to enter or leave the house, and certainly there had been no airplane about. The Masquer had not appeared except in the library, and now he was most indubitably not in the house. By all testimony, he had neither entered it nor left it!

"Well, I'm d—d!" said Maillard, helplessly, to Judge Forester, when the search was concluded. "Not a trace of the scoundrel! Here, Fell—can't you help us out? Haven't you discovered a thing?"

"Nothing," responded Jachin Fell, calmly.

At this instant Bob Maillard rushed up. He had just learned of the Masquer's visit. In response to his excited questioning his father described the scene in the library, and added:

"I trust there was nothing important among those papers of yours, Robert?"

"No," said the younger man. "No. Nothing valuable at all."

Henry Gramont was passing. He caught the words and paused, his gaze resting for an instant upon the group. A faint smile rested upon his rather harshly drawn features.

"I just found this," he announced, holding out a paper. "It was pinned to the outside of the library door. I presume that your late visitor left it as a memento?"

Jachin Fell took the paper, the other men crowding around him.

"Ah, Maillard! The same handwriting as that of your letter!"

Upon the paper was penciled a single hasty line:

"My compliments to Robert Maillard—and my thanks."

Bob Maillard sprang forward, angrily inspecting the paper. When he relinquished it, Fell calmly claimed it.

"Confound the rogue!" muttered the banker's son, turning away. His features were pale, perhaps with anger. "There was nothing but stock certificates in that envelope—and they can be reissued."

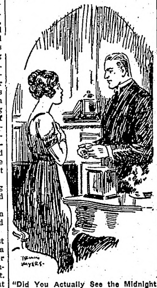
The festivities were not broken up. News of the robbery gradually leaked out among the guests; the generally accepted verdict was that the Masquer had appeared, only to be frightened away before he could secure any loot.

It was nearly two in the morning when Jachin Fell, who was leaving, encountered Henry Gramont at the head of the wide stairway. He halted and turned to the younger man.

"Ah—have you a pencil, if you please?"

"I think so, Mr. Fell." Gramont felt beneath his Franciscan's robe, and extended a pencil.

Jachin Fell examined it, brought a paper from beneath his domino, and wrote down a word. The paper was that on which the farewell message of the Midnight Masquer had been written.



"Did You Actually See the Midnight Masquer Last Night?"

"A hard lead, a very hard point indeed!" said Fell. He pocketed the paper again and regarded Gramont steadily as he returned the pencil. "Few men carry so hard a pencil, sir."

"You're quite right," and Gramont smiled. "I borrowed this from Bob Maillard only a moment ago. Its hardness surprised me."

"Do you know, a most curious thing—"

"Yes?" prompted Gramont, his eyes intent upon the little gray man.

"That paper you brought us—the paper which you found pinned to the library door," said Fell, apologetically. "Do you know, Mr. Gramont, that oddly enough there were no pin holes in that paper?"

Gramont smiled faintly, as though he were inwardly amused over the remark.

"Not at all curious," he said, his voice level. "It was pinned rather stoutly—I tore off the portion bearing the message. I'll wager that you'll find the end of the paper still on the door downstairs. You might make certain that its torn edge fits that of the paper in your pocket; if it did not, then the fact would be curious! I am most happy to have met you, Mr. Fell. I trust we shall meet again, often."

With a smile, he extended his hand, which Mr. Fell shook cordially.

Upon gaining the lower hall Fell glanced at the door of the library. There, still pinned to the wood where it had been unregarded by the passers-by, was a small scrap of paper. Mr. Fell glanced at it again, then shook his head and slowly turned away, as though resisting a temptation.

"No," he muttered. "No. It would be sure to fit the paper in my pocket. It would be sure to fit, confound him!"

A little later he left the house, striding briskly down the avenue. When he approached the first street light he came to a pause, and began softly to pat his person as though searching for something.

"I told you that you'd pay for knowing too much about me, young man!" he said, softly. "What's this, now—what's this?"

A slight rustle of paper, as he walked along, had attracted his attention. He passed his hands over the loose, open domino that cloaked him; he detected a scrap of paper pinned to it in the rear. He loosened the paper, and under the street light managed to decipher the writing which it bore.

A faint smile crept to his lips as he read the penciled words:

"I do not love you, Jachin Fell,
The reason why, I cannot tell;
But this I know, and know full well,
I do not love you, Jachin Fell!"

"Certainly the fellow has wit, if not originality," muttered Mr. Fell, as he carefully stowed away the paper. The writing upon it was in the hand of the Midnight Masquer.

CHAPTER IV.

Callers.

The house in which Lucie Ledanois lived had been her mother's; the furniture and other things in it had been her mother's; the two negro servants, who spoke only the Creole French patois, had been her mother's. It was a small house, but very beautiful inside. The exterior betrayed a lack of paint or the money with which to have painting done.

The Ledanois family, although distantly connected with others such as the Maillards, had sent forth its final bud of fruition in the girl Lucie. Her mother had died while she was yet an infant, and through the years she had companioned her father, an invalid, during the latter days. He had never been a man to count dollars or costs, and to a large extent he had outworn himself and the family fortunes in a vain search for health.

With Lucie he had been in Europe at the outbreak of war, and had come home to America only to die shortly afterward. Once deprived of his fine recklessness, the girl had found her affairs in a bad tangle. Under the guardianship of Maillard the tangle had been somewhat resolved and simplified, but even Maillard would appear to have made mistakes, and of late Lucie had against her will suspected something amiss in the matter of these mistakes.

It was natural, then, that she should take Jachin Fell into her confidence. Maillard had been her guardian, but it was to Fell that she had always come with her girlish cares and troubles, during even the lifetime of her father.

At precisely three o'clock of the Sunday afternoon Jachin Fell rang the doorbell and Lucie herself admitted him.

"Tell me quickly, Uncle Jachin!" eagerly exclaimed the girl. "Did you actually see the Midnight Masquer last night? I didn't know until afterward that he had really been downstairs and had robbed—"

"I saw him, my dear," and the little gray man smiled. There was more warmth to his smile than usual just now. Perhaps it was a reflection from the eager vitality which so shone in the eyes of Lucie. "I saw him, yes."

A restful face was hers—not beautiful at first glance; a little too strong for beauty, one would say. The deep gray eyes were level and quiet and wide apart, and on most occasions were quite inscrutable. They were now filled with a quick eagerness as they rested upon Jachin Fell. Lucie called him uncle, but not as she called Joseph Maillard uncle; here was no relationship, no formal affectation of relationship, but a purely abiding trust and friendship.

Jachin Fell had done more for Lucie than she herself knew or would know; without her knowledge he had quietly taken care of her finances to an appreciable extent. Between them lay an affection that was very real. Lucie, better than most, knew the extraordinary capabilities of this little gray man; yet not even Lucie guessed a tenth of the character that lay beneath his surface. To her he was never reserved or secretive. Nonetheless, she touched sometimes an impenetrable wall that seemed ever present within him.

> "When I have finished with the Masquer I shall take up his trail."

(TO BE CONTINUED.)

Silver Tongues.

Rev. Ernest F. Tittle of Evanston, Ill., says it's a great to be a distinguished orator, but that it is greater to tell the truth!

LIVES IN HISTORY

Old St. John's Church a Reminder of Brave Days.

Graveyard Holds Tombs of Patriotic Americans, and Its Walls Echoed Henry's Immortal Words.

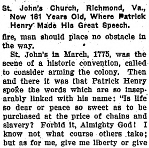
Visitors rarely leave Richmond before journeying across the viaduct to take a look at old St. John's church. It is not only a pleasure to walk in the spacious churchyard and, in summer, to enjoy the trees and flowers, but a certain thrill must come to all who gaze on the last resting places of so many men and women who have helped to found this capital of the Old Dominion, and to stand within the historic edifice where democracy had its birth.

William Byrd gave the acre of ground for the church.

Records show that Richard Randolph, gentleman, built the church, which is thought to have been completed June 10, 1741, 181 years ago. The structure then was 60 feet long and 20 feet wide, but in 1772 was enlarged.

The original cost was £317 ($1,550), which sum was paid to Richard Randolph "by the amount of the sales of 20,000 pounds of tobacco annually to be levied on the parish and sold until the whole payment be complete."

It was about the time that lightning rods came into vogue when the building was enlarged, and a man is said to have called on the vestry with the idea of selling rods for the safety of the remodeled edifice. With the exception of John Enders, one of the pillars, and senior warden, the vestry was eager to adopt the new device. But he was bitterly opposed. Having supplied most of the money for the improvements, his opinion carried, and the reason he gave was that he had enlarged the church for the worship of God and it had been duly consecrated to Him. Therefore, if the Lord wanted to destroy His church with fire, man should place no obstacle in the way.



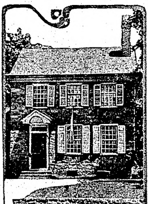
St. John's Church, Richmond, Va., Now 181 Years Old, Where Patrick Henry Made His Great Speech.

St. John's in March, 1775, was the scene of a historic convention, called to consider arming the colony. Then and there it was that Patrick Henry spoke the words which are so inseparably linked with his name: "Is life so dear or peace so sweet as to be purchased at the price of chains and slavery? Forbid it, Almighty God! I know not what course others take; but as for me, give me liberty or give me death!" Thereupon the convention took steps to arm the colonies.—Vera Palmer, in Richmond Times-Dispatch.

DEAR TO AMERICAN HEARTS

Washington's Headquarters at Valley Forge Will Forever Remain a National Shrine.

In this building General George Washington made his headquarters during the terrible winter when the half-clad American Continental army shivered on scant rations and hoped for spring.



Relic of Bunker Hill.

A shotgun used in the battle of Bunker Hill in 1775 and the battle of New Orleans in 1815 has been presented to the State Historical society at Columbia by P. J. Hainey of Barnard, Mo. It is an old model muzzleloader, 59 inches long with a 43-inch barrel. It has the same lock, stock and barrel used at Bunker Hill, and though much worn can still shoot. On the stock is attached a tallow and patch box which was used to grease the balls when they were loaded in the gun.—Kansas City Times.

The Blessed Fourth

By MARY GRAHAM BONNER

Cartina Willis was her name, Cartina of the fair golden hair and the blue eyes, the small, slightly tilted nose and the rather generous mouth. Cartina was generous, too. Generous with her time and with her small amount of money. She had turned down a week-end invitation for over the Fourth because she had promised some small children who were stopping at a summer seashore camp that she would spend the day with them.

The camp was near a crowded resort. She went through the resort on her way to the camp, passing by fat women eating "hot dogs" and walking under the blazing summer sun.

At this camp were mothers and children who were not able to afford their own vacations. Some of their vacations had been before claimed by sickness which had come to them and had demanded its own peculiar homage.

Never Before Had He Seen Anyone Like Cartina.

Cartina played with the children, she showed some of the new arrivals over the house, where were rows and rows of neat little cots where at night small boys and girls would find rest and over whom the great sea breezes would blow so that color would be put into otherwise wan, drawn faces.

In the dining rooms were tables and tables, all fixed with flowers for the special Fourth of July dinner. Over six hundred quarts of milk had arrived for the children to drink that day. No wonder, thought Cartina, that cows could chew so placidly and excite themselves so little when they were able to do so much good without any excessive exertion.

Cartina told the children stories. She listened to them as they told her how good the food was and the teachers, too—mentioning the food first in a very human way. And they told of the lights they could see at night, which made the nearby resort look like a fairyland.

So Cartina spent her day with the children, reveling with them in the glories of the seashore. There old Mother Ocean and Mr. Wind were doing their part for the little boys and girls of the tenements and of the curbs just as they would for others with more advantages.

But though Cartina knew of the happiness she was giving and though it contented her, still from time to time she thought of the holiday party to which she had been invited. That afternoon, though, one of the doctors who attended these children came down. Immediately there sprang up between Cartina and Ralph Miner a curious understanding and sympathetic interest in one another. Never before had he seen anyone like Cartina, who had kept her promise to these little waifs and had given up something she had wanted to do.

And Cartina had never, she was sure, seen anyone such as Ralph. So attractive and young, so unselfish, too. All the men she had known had been so self-satisfied, and hard.

• • • • • • •

Of course you know the ending! This particular Fourth of July was three years ago! But every single Fourth that comes along finds Cartina saying:

"Blessed old Fourth! The best day in all the year. Though you did give up your Independence, husband mine."

And Ralph always answers, "Independence, indeed! Happiness is the true independence, and I have that!"

And then they laugh and remark that they always say the same every Fourth, and then—they hang out the Flag!

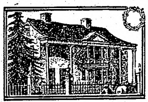
TREE PLANTED BY LAFAYETTE

Adjacent to Building in Which Washington Had His Headquarters at Yorktown, Virginia.

Washington's headquarters at Yorktown, Va. The tree at the left of the picture is the Lafayette elm, planted by Lafayette when he visited this country in 1824. It has been given a place in the Hall of Fame for trees, with a history by the American Forestry association.



JULY WHEAT ADVANCE

Hog Market Slightly Lower—Beef Cattle Up—Others Weak.

U. S. Bureau of Markets, Washington, D. C., for week ended June 23, 1922.

GRAIN: Prices unsettled first half of week but trended upward latter half and closed at net gains; Chicago July wheat advanced 3c; Chicago July corn up 2c. Principal market factors were removal of hedges against export sales, hot weather, and crop deterioration reports from Southwest and Canadian Northwest. All grains reached new high on the 23rd on present upturn but advances brought out heavy profit-taking and reaction followed. Dry weather reports continue from corn belt. High winds in Northwest; excessive heat in Southwest. Export demand improved. Closing prices in Chicago cash market: No. 2 red winter wheat $1.17; No. 2 hard winter wheat $1.17; No. 2 mixed corn 64c; No. 2 yellow corn 64c; No. 3 white oats 38c. Average farm prices: No. 2 mixed corn in central Iowa 51c; No. 1 dark northern wheat in central North Dakota $1.19; No. 2 hard winter wheat in central Kansas 96c. Closing future prices: Chicago July wheat $1.14; Chicago July corn 63¾c; Minneapolis July wheat $1.33¼; Kansas City July wheat $1.07¼; Winnipeg July wheat $1.26¾.

LIVESTOCK AND MEATS: Hog prices ranged from steady to 10c lower for the week. Better grades of beef steers and butcher heifers were firm to 40c higher, others weak to 25c lower, cows unchanged. Feeder steers were generally 10c lower; light medium weight veal calves down 75c. Fat lambs and ewes gained 25-50c; with yearlings up 15-25c. On June 23rd, good butcher hogs were steady to 25c lower than Thursday's average, other grades mostly 10-15c lower. Quality of cattle generally plain and the market was practically steady on all grades. Fat lambs up 15-25c with sheep and yearlings steady.

June 23rd Chicago prices: Hogs, top, $10.80; bulk of sales, $9.75-10.75; medium and good beef steers $7.75-9.40; butcher cows and heifers $4-8.90; feeder steers $5.65-7.75; light and medium weight veal calves $7-8.50; fat lambs $11.75-13.25; feeding lambs $10.50-12; yearlings $8.25-11.40; fat ewes $3-6.75.

HAY: Because of continued heavy receipts the markets were heavy and unsettled with a general decline in prices, demand not sufficient to absorb arrivals especially the lower grades. Quoted June 23rd: No. 1 prairie Minneapolis $18.

FEED: The cause of bran being freely offered eastern markets continue unsettled while central western markets report prices somewhat firmer due to recent heavy sales for future shipments. Demand for other feeds continues very light.

DAIRY PRODUCTS: Butter markets steady to firm during week, especially on fancy goods. Current trade requirements and demand for storing continue to absorb increased receipts so that no surplusses of importance have occurred. Closing prices, 92 score butter: New York 37½c; Chicago 36c; Philadelphia and Boston 38c.

Cheese market firm. Since advances on Wisconsin cheese boards Monday traders appear to have greater confidence in present price levels. Interest in buying for storage has increased. Cheese prices at Wisconsin primary markets June 22nd: Twins 18½c; Daisies 18¼c; Double Daisies 18⅛c; Young Americas and Longhorns 18½c; Square Prints 18¾c.

VEGETABLES: Potato prices lower during the week.

Minneapolis Closing Cash Prices.

Spring Wheat—No. 1 dark northern, 1.41@1.48; No. 1 northern, 1.40@1.43; No. 1 dark hard, 1.37@1.39; No. 1 hard, 1.32; No. 1 am. dur., 1.21@1.26; No. 1 durum, 1.16@1.21. Corn No. 2 yellow, 57¾@58¼c. Oats No. 2 white, 35@36c. Barley, choice to fancy, 55@57c. Rye No. 2, 85@87½c. Flaxseed No. 1, 2.51@2.53.

South St. Paul Live Stock.

So. St. Paul—Steers, $4.00@8.00; veal calves, $3.25@8.00; cows and heifers, $4.00@6.00; hogs, $7.75@10.50; sheep and lambs, $1.00@11.00.

Minneapolis Butter, Eggs and Poultry.

BUTTER—Extras, 35c; firsts, 31c; seconds, 25c; packing stock, fresh, sweet, 23c; state goods, 5c; grease, 1c.

EGGS—Country receipts, rots out, per case, $5.40; No. 1 candled, good extras, free from rots, small dirties and checks out, per dozen, 21c; small, dirty and held stock, rots and leakers out, dozen, 16c; quotations on eggs include cases.

LIVE POULTRY—Not advisable to ship turkeys under 7 pounds in weight. Hens, 4 pounds and over 20c; hens, under 4 pounds, 19c; cripples and culls unsalable; ducks, fat, 15c; geese, fat, 10c; turkeys, fat, over 8 pounds, 25c; turkeys, thin and small, 15@20c; cripples and culls unsalable, guineas, per dozen, $5.00; roosters, 12c; broilers, 1½ lbs. and up, per pound, 30c; Leghorns and small broilers, lb., 25c.

For Death Penalty.

Iowa City, Iowa—Iowa lawyers and judges, numbering 350, in their annual state convention, have gone on record as overwhelmingly opposed to the abolition of the death penalty in Iowa.

Grand Forks, N. D.—Fred Borgen of Whitman, N. D., was shot dead by robbers who blew open the safe of the Lamb National bank at Michigan, N. D., 50 miles west of here, and escaped with all cash and Liberty bonds it contained.

Lewis Confers With President Harding on Coal Strike—Would Have Operators Hold Conference.

Washington.—After conferences with President Harding and Secretary of Labor Davis, John L. Lewis, president of the United Mine Workers of America, announced that the union policy still was unalterable and unyielding in its insistence that a new wage scale must be set up for the strike-ridden mining districts by national or semi-national conferences with operators.

Last of Parleys.

The meeting between Mr. Harding, Secretary Davis and Mr. Lewis, which took place around the White House luncheon table, was the last of a series of conferences into which Secretary of Labor Davis took Mr. Lewis after his arrival from Cincinnati.

Officially no statement was forthcoming, though Secretary Hoover was also called to the White House for a word with the president about the situation immediately after Mr. Lewis left.

Lewis Was Invited.

"With relation to the present strike, we considered the matter of a joint conference of operators and miners, especially the merits of proposals to hold district joint conferences between operators and miners for wage settlements, as compared with a joint conference in the central competitive field, or a national conference of all fields, through representatives. No definite plans affecting the strike were decided upon. The strike situation is unchanged.

Sees Shortage Danger.

"I explained to the president the futility of attempting settlements in individual mining districts. There are no groups of operators willing to hazard their competitive relationship with other producing sections by fixing a wage scale until they know what their competitors are going to pay. The country will be facing a serious shortage of coal within a few weeks, and if the strike continues the railroads will be unable to transport enough to take care of industries and domestic consumers."

RAILROAD STRIKE CERTAIN

After Meeting of Railroad Employes, Strike Looks Certain.

Chicago.—The strike of 1,200,000 union railroad employes July 1 appeared certain as the policy committee of the shop crafts met here to canvas the strike votes.

The strike call will be sent out ordering men to walk out Saturday, according to the best available information. The vote of the 11 railroad unions affiliated with the railroad department of the American Federation of Labor was overwhelmingly in favor of a walkout in preference to acceptance of wage cuts and working rules revisions ordered by the United States railroad labor board.

The move by the board to avert one of the causes for a strike by ordering railroads to cease letting out work under contracts will not prevent the walkout, union leaders indicated. It was doubted whether the railroads would obey the order.

WOMAN SMUGGLER ARRESTED

Necklace Worth $100,000 Is Smuggled Into United States by Woman.

Chicago.—Mrs. Laura Kachelmacher of Fargo, N. D., is being held by federal authorities in connection with the smuggling into this country of a $100,000 pearl necklace, according to Chas. Salter, special treasury agent from Seattle, Wash.

From City to City.

Treasury officials in every large city have been looking for this necklace, which has been taken from city to city in an attempt to evade federal treasury agents, Mr. Salter said. The necklace is said to have been purchased in France and brought to this country by a circuitous route.

Mr. Salter left for New York where he is to appear in connection with the case before the federal grand jury in session there.

Husband Killed Self.

Mrs. Kachelmacher is the widow of Dr. Christian Kachelmacher, who killed himself in a Chicago hotel two years ago, following a nervous breakdown. She is the mother of two children.

Bonus Deal Nears Completion.

Bismarck, N. D.—Completion of the deal by which North Dakota soldiers' bonus certificates will be turned into cash was considered almost completed with the signatures of all state officials excepting Adjutant General Angus Fraser to the tentative agreement entered into before the matter was presented to the American Legion convention last week. Representatives of the Twin Cities financial firms who are willing to take the state paper are here to complete details.

DYSPEPSIA IS NOW THING OF THE PAST

St. Louis Citizen Eats Anything on the Table and Has Gained Several Pounds in Weight—Gives Tanlac Full Credit.

"The other medicines I tried before didn't even budge my troubles, but three bottles of Tanlac have fixed me up in fine shape," said H. Mohr, well-known citizen living at 112 S. Fourth St., St. Louis, Mo.

"Two years ago my stomach went wrong and my appetite failed me. Gas formed from what little I would eat and pressed on my heart until it palpitated so I could hardly breathe. I wasn't able to do regular work, because of pains in the back, bad headaches and dizzy spells.

"But I have gained several pounds now since taking Tanlac and eat just anything I want without any trouble. The pains and headaches never bother me any more, and I am only too glad to pass the good word along about Tanlac. It is simply wonderful."

Tanlac is sold by all good druggists.

ART TREASURES NOT INSURED

For One Reason, No Amount of Money Could Replace Those in British Storehouses.

The great national storehouses of art treasures are not insured, writes a correspondent of the London Daily Mail. No compensation would be forthcoming in case of fire or theft. The reason is that the premiums on the millions of pounds' worth of pictures in the National gallery, antiquities in the British museum, and exhibits in the Victoria and Albert museum, for instance, would amount to a very large sum.

"If art galleries and museums insured they would have to pay out far larger sums than they receive in admittance charges," said an official of the National Portrait gallery. "The latest apparatus for preventing and detecting fire is employed, and night watchmen are present."

An official of the British museum said: "We have very thorough systems of patrolling, and special firemen of our town, who formerly served in the London fire brigade."

The Illusions.

For years we have been searching high and low for that hero of the movies who appears always at the right moment and hoists the villain. The other day we found him selling collars at a shirt place.

We have wanted to meet the villain face to face—that black scoundrel of the plains, sinful, profane, death-defying. We found him the other day, too, carrying out dead dishes in a restaurant.

And the lovely girl, the creature of emotions and eyelashes, the dream of our summers, who is always sitting easily in a magnificent couch chair, taking tea from an obsequious butler. We found her, too. She was selling tickets through the window as we came out from the show.—Richmond Times-Dispatch.

A Youthful Logician.

Margaret is only seven years old, but sometimes quite naughty. On one of these occasions her mother, hoping to be particularly impressive, said: "Don't you know that if you keep on doing so many naughty things your children will be naughty, too?"

Margaret dimpled, and cried triumphantly: "Oh, mother, now you have given yourself away!"—Harper's Magazine.

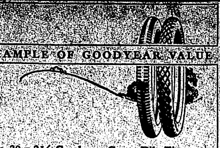
And Gets it In First.

"But suppose a soft answer fails to turn away wrath?"

"Then I try a hard punch."

Saint and sinner each think the other must envy him.

AN EXAMPLE OF GOODYEAR VALUE



The 30 x 3½ Goodyear Cross Rib Tire shown here alongside its companion, the 30 x 3½ Goodyear All-Weather Tread Clincher, is a conspicuous example of Goodyear value.

The Goodyear Cross Rib has in it the same high grade Egyptian cotton fabric that goes into the All-Weather Tread Goodyear.

It has a differently designed but long-wearing tread, and it sells for considerably less money.

In the past five years more than 5,000,000 of these Goodyear Cross Rib Tires have been sold.

They have everywhere given remarkable service.

Their fine performance and known value have convinced thousands of motorists of the folly of buying unknown and unguaranteed tires of lower price.

Ask your Goodyear Service Station Dealer to explain their advantages.

GOODYEAR

AND THAT'S HOW IT'S DONE!

No Need for Further Speculation as to Why Some Men Have Received Medals.

"Here is another list of medal recommendations, and I've worn out my blue pencil! What in the world shall I do?" the great official exclaimed in despair.

"I have sharpened another blue pencil for you, sir," the faithful secretary responded promptly.

"You are wonderful; you think of everything!" the great official declared, seizing the new pencil eagerly. "What would I do without you? But your services to your country shall not go unrewarded," he added, his face lighting up with a happy thought, and striking out the first name on the list before him, he wrote in its place that of the faithful clerk.—Milwaukee Sentinel.

Had Martha Beat.

Capt. Ed Thomas of Terre Haute was drilling his prize K. of P. drill team in the open the other evening when several visitors arrived and watched the proceedings. Among them were an old countryman and his wife. As the captain shouted "Left face—right face—three steps forward, march—backward, march," etc., the farmer watched him in amazement.

Finally he turned to his wife: "There's a fellow, Martha," he said, "who can beat you changing your mind."—Indianapolis News.

We Shall Double Our Efforts.

Labor worketh a harshness upon sorrow.—Montaigne.

UP AGAINST TOUGH PROBLEM

Small Jane's Scruples Prevented Her From Eating the Candy That Had Been "Lent."

Little Jane's mother brought home a box of candy given to her by an Episcopal friend shortly before Easter, and passed around some of its contents to her children, explaining that Mrs. Cox's children had given up eating candy until after Easter, "so they cannot eat any now, as it is Lent."

Little Jane's brothers promptly ate their pieces, but she stood looking at the candy in her hand with a puzzled air.

"Why don't you eat it, Jane?" her mother asked.

"Because," she explained, "then how could I give it back if it's just lent?"

About Flies.

"I wonder where all the flies come from," grumbled Mrs. Jones as she swatted around the dining room.

"Well, mom," said the young joker of the family, "the cyclone makes the house fly, the blacksmith makes the fire fly, the jockey makes the horse fly, and I heard you tell pa at supper last night that us children make the butter fly."

A Real Benefit.

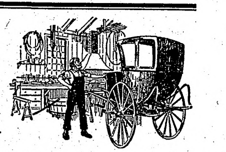
"How I envy you your group of children," remarked the bachelor to his long-married friend.

"Children certainly do brighten the home," replied the other, gratified.

"What? Oh, yes, yes, of course. But what I was thinking of—look at the tax exemption you can claim on them."

When I said I would die a bachelor I did not think I should live till I were married.—Shakespeare.

The Old Carriage Maker Had an Important Truth



"TO make each part as strong as the rest," was his way of "building a wonderful, one-horse chaise that wouldn't wear out till judgment day."

This illustrates a fact that is keeping many doctors busy these days—human bodies, like chaises, break down because some part isn't as strong as the others.

Very often it's because of ill-balanced food, lacking in some important element of nutrition. This is especially true of ills developed in childhood, and carried on through life.

Grape-Nuts, that world-famous, ready-to-eat cereal, brings the plan of building each part as strong as the rest—to serve human need. Grape-Nuts contains all the nutriment of those best of the field grains, wheat and barley, including the vital mineral elements, and it is a wonderful food for building and sustaining health and strength.

The delicious flavor and crispness of Grape-Nuts make it a welcome dish whenever you're hungry.

Gilbert Gunderson sold a team of mules to Ole Severson of Rugby, N. D., last week. Mr. Severson started back with his team and expects to make the trip in five days.

Mrs. Barsgaard, who has been the guest of her sister, Mrs. Ole Kirklie, for several weeks past, left Friday for Detroit to visit relatives at that place before returning to her home at Barnesville.

MAKE LONG AUTO TRIP

[illegible] and [illegible] Jordshaugen, brother to Mrs. H. Halvorson, arrived here Wednesday morning via auto from Spokane Falls, Wash., where they spent the past winter. They expect to spend the summer with their sister, and return to Washington late in the fall, in order to avoid the winter here in the north. The boys made the trip in two weeks, by way of Idaho and Montana. They have their car equipped so they could camp on the way, hence the trip made an ideal outing. The Jordshaugen boys once lived on a farm about four miles northwest of Goodridge.

TO THE VOTERS OF PENNINGTON COUNTY:

I want to assure you that I appreciate most highly the splendid vote given me in the Primary Election: I hope that I may continue to merit the confidence and high esteem that your votes express. Thank you.

Very respectfully,
OLE R. SANDE.

TO THE VOTERS:

I hereby wish to express my sincere appreciation to the voters for the splendid support given me at the Primary Election. If elected next fall, my aim will be to merit the confidence you have thus expressed.

Sincerely yours,
FRED D. LORENTSON.

To the Voters of Pennington County and the 14th Judicial District:

I desire at this time to thank the voters for the splendid vote given me at the Primary Election, which result was very gratifying and satisfies me that with your continued support I shall be elected Judge of District Court next fall, an honor which I shall cherish.

Yours respectfully,
G. HALVORSON.

(Prepared and ordered published under the direction of H. P. Rued, personal campaign committee for George M. Gunderson, candidate for re-election for the office of County Superintendent of Schools. Regular line rate to be paid.)

To the Voters of Pennington County:

I hereby wish to express my hearty thanks to you for the generous support given me at the past Primaries.

It is most encouraging to me to learn that I have, in all of my endeavors, proven of some value to our rural elementary schools and that through your support and vote I am nominated as one of the aspirants for the Office of County Superintendent of Schools.

Yours very truly,
GEO. M. GUNDERSON,
County Supt. of Schools.

VOLUME XVI. NO. 21. JULY 7, 1922. GOODRIDGE, PENNINGTON COUNTY, MINNESOTA $1.50 PER YEAR

DITCH PROJECT DISMISSED BY [illegible]DGE GRINDELAND

Judicial Ditch [illegible], Except Small Portion of Original Project, Per[illegible]ently Set Aside, Balance to Go Unless New Bond [illegible]rnished Within 60 Days—New Engineer and Ne[illegible] Viewers If Petitioners Want to Proceed

Expense of From $1,000,000 to $2,000,000 Is Deemed Too Great a Burden for Farmers—Judge Advises Appeal to Legislature for Assistance in Working Out Relief.

The big ditch project, known as Judicial Ditch No. 1, involving an immense area in Marshall county, started about three years ago and upon which a number of hearings have been held at Warren and upon which a hearing in Thief River Falls was set for Tuesday, July 18, has been permanently set aside and dismissed by Judge Grindeland.

In his statement, printed herewith, the judge advises the petitioners, attorneys and others interested of his intention to sign the order of dismissal upon the date of the last hearing at Warren on July 25th, thus rendering unnecessary the hearing set for July 18th in this city.

A portion of the project, namely the north end, which affects the Mud Lake lands, are withheld from the permanent dismissal, but with the express understanding that if the landowners desire further action in that portion they must furnish a new bond within 60 days, and for the purpose of assessing a greater portion of the cost of construction to the Mud Lake lands, the judge will demand a new set of viewers and will discharge the present engineer, Mr. Baugh.

The dismissal will cause no little surprise among the taxpayers of Marshall county, who would have been affected by the proceedings, and no doubt the action of the judge, coming just as the interested parties were getting ready for the fight of their lives at the Thief River Falls hearing, will occasion general rejoicing.

Judge Grindeland, in his appended statement, goes into every phase of the matter, and makes it plain that he is guided in his action by the feeling that additional ditch assessments at this time, regardless of the need for further drainage, would be an unbearable burden upon the farmers within the affected district. He thinks relief measures of some kind are needed but advises that an appeal be made to the next legislature for state assistance in the undertaking.

The appended statement by Judge Grindeland, fully discussing Judicial Ditch Project No. 1, setting forth his reasons for dismissing the same and thus doing away with the necessity for the Thief River Falls hearing on July 18th, are herewith set out in full:

STATE OF MINNESOTA
County of Marshall

DISTRICT COURT
14th Judicial District.

In the Matter of Consolidated Judicial Ditch No. 1 of Marshall and Beltrami Counties, State of Minnesota.

In the above entitled ditch matter, the adjourned hearing was set for July 18, 1922, at Thief River Falls, and for July 25, 1922, at Warren, but at this time the court is of the opinion that no hearing should be had thereon at Thief River Falls on July 18th and that the hearing at Warren on July 25th should be merely formal in character and to carry out the plan hereinafter set forth, and for no other purpose, and for that reason makes the following statement at this time so that the attorneys in said ditch matter may confer with their clients and save them a useless trip to either place.

After the flood of 1919, landowners whose lands were affected by the flood held meetings in the devasted district and started an agitation for more drainage.

As a result of these meetings the petition for Judicial Ditch No. 102 was filed with the court on October 7, 1919, and the same was signed by 100 farmers and landowners in the territory covered thereby. Another petition for Judicial Ditch No. 103 was filed on January 12, 1920, and was signed by some 25 farmers and landowners in the territory covered thereby. Upon the filing of these petitions the law required that the court designate an engineer to make a preliminary survey without a hearing, and in accordance with the law the court appointed J. H. Baugh as such engineer.

Shortly thereafter a petition for the consolidation of Judicial Ditches 102 and 103 was filed and the same was signed by the county board of Marshall county and others. A hearing was thereafter had on this Consolidation Petition and the court considered the question of consolidating Ditches 102, 103 and 30. Theo. Quale, the county attorney of Pennington county, at that time objected to No. 30 being consolidated and gave us as the principal reason therefore that the county board of Pennington county was anxious that No. 30 should be constructed as soon as possible, and that if it was consolidated with 102 and 103 considerable delay would be caused to No. 30. For this reason and others the court eliminated No. 30 from the consolidated proceedings. At this hearing the petitioners for both 102 and state drainage commissioner, and Mr. Baugh, the engineer of 102 and 103, and also George Walker, another engineer who was familiar with this territory. Other persons appeared and objected to the proceedings. The main contention, however, at the hearing was as to what courses the proposed ditch should take. Two systems or plans were urged at the hearing, one to enlarge the channel of Thief river and build some five or six laterals extending east and west and to build certain laterals in the vicinity of Thief lake; the other plan was to make a partial improvement of Thief river, do the work specified in the Thief lake neighborhood, and to construct a diagonal ditch running northeast and southwest between points in the town of Veldt, Eckvoll, Mud Lake and Grand Plain or Agder, or substantially in that location, and to empty the east and west laterals east of this diagonal ditch into the same as far as possible. It was deemed advisable by the parties interested, by Mr. Willard and by the Red Lake Drainage and Conservancy District that both routes be surveyed and reported upon. The recommendation of the Red Lake Drainage and Conservancy District reads as follows:

"Resolution adopted by Red Lake Drainage and Conservancy Board at Warren, Minn., on April 1, 1920, in relation to establishment of certain drainage ditches in Marshall, Beltrami and Pennington counties lying within the territory embraced by said district.

"Be It Resolved, First, that this Board recognizes that the drainage proceedings for the establishment and consolidation of Ditches 102, 103 and 30 are under the Judicial Ditch Act under proceedings begun before this Board was established, and that therefore it has no authority in this matter.

"Second, That the attendance of said Board at the preliminary hearing on March 31 and April 1 was for the purpose of ascertaining the facts in connection with this project.

"Third, That, as in the opinion of all of the members of said Board, the territory embraced by the proceedings as was shown by the testimony at the hearing, is in need of additional drainage ditches, particularly an adequate outlet; it is recommended that a plan to improve the drainage of this territory be carried out. The Board, however, feels it is unable to determine which of the two proposed plans is the better until a detailed survey is made, but it is of the opinion that the modified diagonal plan will best meet the needs of the area affected. Their final conclusion will be made at final hearing.

"Fourth, That in view of the fact that the Court has the power to direct this Board to assume the construction of this project if finally established, we believe it would be only fair to the board to have the plans for the project approved by the engineer selected by the Board before the final establishment of the ditch system and we request that such approval be had.

"Fifth, That Ditch No. 30 be not consolidated with Nos. 103 and 103.

Signed,
C. G. SELVIG, Crookston, Pres.
ED A. AUBOL, St. Hilaire.
ANDREW JOHNSON, Gonvick.
AXEL NELSON, Holt.
WM. PASKEWITZ, Grygla."

It will be noted that two of these commissioners reside in the territory affected by said consolidated proceedings.

After hearing all the evidence at this hearing the court was convinced that under the laws of this State a completed survey should be made, and so ordered.

I am well satisfied at this time that the petitioners have acted in good faith and that the territory involved needs better drainage and in particular a more efficient outlet. The territory involved is suitable for but not safe for agricultural purposes on account of spring floods and excessive rains in the summer, inundating the lands. We now have the completed plans and data for both of the recommended plans, the river and the diagonal.

When State Ditch No. 83 (being the Thief River improvement made by the State) was constructed, the county and judicial ditch systems east of Thief River paid to the State some $50,634.00 for such additional excavation as the then State Drainage Engineer, George A. Ralph in consultation with Mr. Hoag, the engineer on No. 11, stated would be necessary to so enlarge Thief River that the same would be adequate to take care of the waters of that territory, but subsequent events proves that Thief River is not adequate and the State of Minnesota did not give to the settlers of this territory what it promised thru its enginer to give.

I am further satisfied that under present existing conditions the settlers and land owners are unable to meet the additional taxation that would have to be imposed in order to carry out the proposed consolidated project in its entirety.

I would suggest that the matter be presented to the next legislature to see if the State of Minnesota can not give to the settlers of this territory some relief in this matter without imposing upon such settlers excessive taxation. The country is a good country and will develop into some of the best farm territory in the State, but it must be given a chance, and the settlers themselves are unable to stand the expense of doing this work.

Thief Lake bottoms consist of some 7,000 acres of land and at the present time under the present conditions is a menace to the surrounding country; it cannot be farmed with any degree of safety, being almost yearly subject to overflow, and if left in its present stage of development will be nothing but a weed bed. What relief can be granted thereto the Court does not at this time know nor does it attempt at this time to pass thereon. The court however is of the opinion that if the people owning the land in that vicinity want more drainage and are willing to pay for it they should have it, otherwise not.

When the court sits at Warren on July 25, 1922, the court will make its order that all that portion of Consolidated Ditch No. 1 lying south of a straight line drawn east and west and which would intersect the section line between sections 5 and 8 in the township of Whiteford be dismissed and that the proceedings as far as that territory is concerned be eliminated from these proceedings and forever at an end as far as this ditch proceeding is concerned. If the petitioners or others interested in the territory lying north of this point desire to take further proceedings in this ditch matter the court will order that the report of the engineer and viewers be referred back to another engineer and another set of viewers. J. H. Baugh, the engineer now serving on said ditch will be removed and some other engineer appointed in his place. This will only be done if the petitioners or others interested therein shall furnish to the court within 60 days thereafter a bond sufficient to protect the county in making such resurvey of the viewers and if such bond is not furnished then the proceedings will be dismissed in their entirety.

The court in conclusion will say that while apparently this ditch proceeding has dragged out for some time, yet it is not a small matter and was deserving of the most serious consideration by the court, both from the standpoint that it involved the expenditure of between one and two million dollars, if established, and would perhaps entail a loss of $35,000 to the petitioners and bondsmen if rejected in its entirety and most of the petitioners and bondsmen are farmers residing in the territory affected; the court has also thought that the financial ability of the people who have to pay for such an improvement should be of very high consideration, and has so considered it, and in fact that is one of the controlling facts which induces the court to take the position set forth in this order. The court is of the opinion, and I do not think it can be disputed, that no matter how worthy the enterprise is or how necessary it is to the community, the people are in no position to pay for it, and their prayer that the proceedings be dismissed should be granted as herein set forth as to the south portion of said ditch.

It will not be necessary for either attorneys or clients or people assessed to be present at Warren or Thief River Falls on the dates set, as the court will make its order as herein set forth without any further evidence being offered and before any hearing is had upon that portion of the territory in the vicinity of Thief lake is had another published and mailed notice will be given to all parties interested therein, as provided by law.

In view of the present financial stringency and in view of the already heavy taxation in the south territory, the court is of the opinion that the market value of the lands in this territory will not be increased in the sum found by the viewers as benefits and for that reason the court will make a finding as a matter of fact under the present report of the engineer and viewers the benefits do not exceed the cost of construction of the ditch at this time as to the entire territory, but that certain portions thereof, to-wit: The Thief Lake bottoms, by reason of the fact that the Thief lake bottom has never been assessed for any ditch improvements and the territory adjacent thereto is not now as heavily taxed for ditch construction as the territory herein dismissed from these proceedings, such Thief lake bottoms and territory adjacent thereto may be benefited to an amount greater than the cost of the construction of a ditch which would afford relief thereto, the court is of the opinion that if the conditions of this order as to the giving of the bond referred to herein is complied with, it would be justified in referring that portion of said ditch back to another engineer and another set of viewers for amended reports with respect to said Thief lake bottoms and the territory adjacent thereto.

Dated at Warren, Minnesota, July 3, 1922.

ANDREW GRINDELAND,
District Judge.

Mrs. Bennie Johnson was a shopper in Thief River Falls Wednesday. She was accompanied by Ruben Gunderson.

HIGHLANDING HOST TO FOURTH CROWDS

Program—Speeches, Sports and Dancing as Scheduled

A crowd, estimated at from 700 to 1,000 persons, took in the big Fourth of July celebration Tuesday at Highlanding and, although intermittent rains throughout the afternoon drove the crowd under shelter from time to time, the program of speches, sports, dancing, etc., went off as per schedule.

The crowd commenced to gather shortly before noon near the pavilion and by two o'clock the grounds were crowded with automobiles from far and near, most of whom had brought lunch baskets and enjoyed the afternoon in conversation and visiting.

C. L. Hansen and E. M. Stanton of Thief River Falls delivered the main addresses of the day and their talks were heard by a large number of people. Both gentlemen spoke on the significance of July Fourth and reviewed the glorious history of America since Independence day in 1776.

A baseball game between Thief River Falls and Goodridge furnished entertainment for ball fans when the two teams met on th Highlanding diamond and played a spirited game, in which heavy hitting and ragged fielding proved a feature.

After the conclusion of the baseball game, a tug-of-war was staged between the north and south sides of the river, the winner of which is not known. The stage was then cleared for a number of races betwen children from eight to twelve years of age, sack races, foot races, etc.

Music during the afternoon was furnished by a five-piece orchestra which later played for the dancers at the Pavilion. The dancing floor was crowded with young and old and this form of amusement held sway until a late hour.

Taken altogether, the July Fourth celebration at Highlanding is considered most successful, the spot furnishing an ideal place for the picnickers, swimming, etc., and when curtains came early Wednesday morning, all went away satisfied that they had had a good time.

LUTHER LEAGUE TO MEET ON WEDNESDAY EVENING

The Young Peoples Lutheran league of Goodridge will meet at the church Wednesday evening at 8 o'clock, July 12th. A fine program is under way and is under the direction of an able program committee. The main speaker will be Miss Ingeborg Nystul, who has been a missionary in China for the past 15 years and who has recently returned here for a vacation. Miss Nystul's talk alone is sufficient to draw a large crowd, but in addition to that the committee has the following in store: Song, audience; reading, Norton Gunderson; song, Lutheran choir; song, Resan trio. Lunch will be served after the program. All are welcome.

Highlanding Breakers

Mr. and Mrs. Sigurdson are entertaining relatives from Fargo, N. D., this week.

Mr. and Mrs. Anton Johnson were business callers at Thief River Falls Monday.

Mrs. Bob Hudson was at Thief River Falls Saturday.

The Parnow family experienced the misfortune of losing their home, which burned to the ground last week. The fire was started upstairs and had gone too far to be stopped when discovered. Nothing was saved from the flames.

Henry Base went to St. Paul on business last week accompanied by Hallie Jacobson.

Thief River Falls and Goodridge played an interesting game of baseball at the Fourth of July picnic at Highlanding Tuesday. Thief River Falls carried off the honors, for when the game was finished the score was 16 to 9 in favor of the county seat aggregation.

Mrs. John Vad is staying at Thief River Falls for the present. From there she plans on going to Bemidji to make her home.

George Homme returned home last Monday from Kenyon, Minn., where he has been employed. He reports the crops as looking fine down that way.

Mr. and Mrs. Iver Jenson were guests at the Pete Larson home in Erie last Sunday.

J. R. Olson of Fourtown was in the village Monday on business.

WM. PARNOW LOSES HOME BY FIRE

Bedridden Wife Removed to Neighbors When House and Contents Burn.

A fire starting in the upstairs section and the origin of which is not known, last Saturday completely destroyed the farm home of William Parnow, one of the older residents of Kratka township, all household furniture and family wearing apparel being consumed by the flames. So rapidly did the fire gain headway after its first discovery that nothing could be saved, and it required the efforts of Mr. Parnow and neighbors who responded to his call for help, to remove Mrs. Parnow to safety, she having been bedridden for some time.

The loss to Parnow is a severe one as very little insurance was carried, and he and other members of the family are left with just the clothes on their back. The Parnows are elderly people, who have resided in Kratka for many years.

TWO HOME RUNS ARE NOT ENOUGH

Thief River Falls Baseball Team Wins After a Hard Struggle.

One of the most exciting baseball games ever witnessed in this part of the country took place on the Highlanding diamond on the Fourth when Goodridge met a formidable aggregation from the county seat, the latter winning after a hard-fought contest, 16 to 9.

The game opened in a downpour of rain and this prevented the two clubs from playing errorless ball, but seemed to assist in a way the mysterious delivery of Roy Brown, pitcher for Thief River Falls.

Brown had plenty of stuff and mixed them up in a generous fashion, serving them hot and cold. His support at times was ragged, but taken altogether the Thief River Falls bunch put up a good game.

Christianson for Goodridge proved himself the star of the game, both in the field and at bat. In four trips to the plate Tuesday, he hit safely twice and was out on long crashes into the outer fields, but which were picked from the atmosphere by competent and seasoned veterans in left and center field. Christianson made several hard catches at shortstop, one of which looked like a sure enough single into left field, but he got under it and retired the Thief River Falls side.

The game was not one in which hard hitting played a prominent part, for neither of the teams starred in this particular end. The pitchers on both sides worked good and it was hard to pick a winner until the latter stages of the fray.

Two home runs were made by Goodridge, one of which was made with two men on bases. Long blows into right field went rolling under the trees, sheds, barns, etc., which encircled the diamond, and the men came trotting over the plate, and the crowd cheered. Again in the sixth a Goodridge man pounded the ball into the right field bleachers with one man on. The Thief River Falls management had difficulty in successfully filling the right field position, it seeming to be the bulabaloo point of the entire lineup. Shifting Stebbins over there just curbed the wrath of Goodridge batsmen for a time, but that's all. They opened up another barrage into that garden with telling effect upon the Thief River Falls defense.

Goodridge led in the score column until the fifth inning when Thief River Falls started easing away, steadily and surely. Had Goodridge kept up their hitting stride as they had started the outcome would have been an entirely different story to relate, as no one in these parts has any great degree of confidence in the baseball playing ability of the aggregation hailing from the county seat town. They field nice, but under ordinary circumstances can't hit a balloon coming straight at them.

NOTICE.

Notice is hereby given that the annual meeting in District No. 8, in Pennington County, for the election of officers and transaction of business required by law at the annual meeting, will be held at the schoolhouse on the 15th day of July, 1922, between the hours of 7:00 and 8:00 o'clock P. M.

Election of two trustees for terms of three years will take place. Terms of Carl Christianson and John Kusmak will expire at that time.

Bert Gerling was in Goodridge on Monday.

RAIN TUESDAY BOON TO CROPS

Needed Moisture for County Comes at Opportune Time.

The rainfall of Tuesday afternoon and night has given crops of Pennington county added impetus and a lack of extremely hot weather is giving the grain an excellent chance to fill out. Many rye fields already are turning and it is now thought they will be ready for the binder within the next week or ten days.

Travelers to sections south of Pennington county have informed The Banner that crop conditions here are even better than around Fertile, Twin Valley and Erskine. The fields there, however, are somewhat earlier than here because of the fact that they did not have excessive moisture in that section during the planting season and for that reason will be in the midst of the harvest season late this month.

Haying in this section is well under way. There is an abundance of both wild and tame hay here this year and stockmen are making the most of the opportunity of putting up a good supply both for feeding purposes and for the markets.

Potatoes are looking exceptionally well and the heavy rains earlier in the season are not having a bad effect on them, as was thought by many. Practically no potatoes have rotted, but on the other hand are already in the blossom state and in vigorous health. A bumper crop is looked forward to.

Wheat has had a splendid season so far this year and good yields are now considered a certainty. There has not been a great deal of wheat planted around Goodridge, however other sections of Pennington and bordering counties report good prospects.

Not in a dozen years have crop conditions in Northern Minnesota been more favorable than this year and if hot weather does not materialize within the net two weeks, it is expected that this season will harvest one of the best crops in its history.

MISS RACHEN BAKER BRIDE OF HENRY KATZENBERGER

Last Wednesday, July 28th, occurred a wedding of interest to the people in the vicinity of Goodridge, when Miss Rachen Baker was united in marriage to Henry Katzenberger. Father Neoson of Thief River Falls read the service at the Catholic parsonage.

Rachel Baker is the oldest daughter of Barney Baker, residing near Goodridge. The young lady has been visiting friends in Calloway, Minn., for several months and was on her way to her parental home. Henry Katzenberger is a well-to-do farmer near Calloway.

The bride wore a suit of navy blue twill and a hat of white silk poplin.

Up to the time Miss Baker went to Calloway to visit, she resided with her parents here and was a very popular young lady among the younger set and highly esteemed by all who knew her.

They came to Goodridge Thursday evening and went to the Baker farm where in the evening they were serenaded by a large number of friends. Friday evening a reception was given in their honor at the Gerling home.

The young couple will spend a short time visiting at the home of the bride after which they will return to Calloway, where they will make their home on the groom's farm.

Their many friends join in wishing them a long, happy and prosperous wedded life.

GOODRIDGE FOLKS ATTEND FESTIVAL AT MAPLE BAY

The Osmund Urdahl family, H. Christianson family, Gulrud family, Carrie and Della Urdahl, H. B. Rockne, Mable Tweeton and Elmer Reson drove to Maple Bay Sunday to attend the Sangerfest held there. The Goodridge Lutheran choir sang a number of songs as part of the program. A fine program was given and good talks were also enjoyed. A large number of people were present, which helped to make the affair a success from every standpoint.

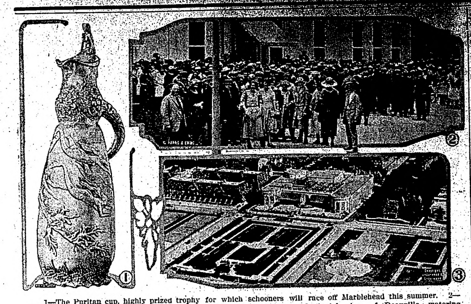
LADIES' AID TO MEET.

The Lutheran Ladies' Aid will be held Thursday, July 13th, at the church. Mrs. Aakre and Mrs. Bennie Johnson will entertain. A cordial invitation is extended to all.

Norwegian Lutheran Church.
V. O. Aakre, Pastor.

Sunday, July 9th, Norwegian services at Torgerson at 11 A. M. Young Peoples society at Erie at 2:00 P. M. and English services at Goodridge at 8:00 P. M. There will also be a Young Peoples' gathering at Bethania church Sunday afternoon at 2 o'clock.

Anton Lien and family visited at the Grimley home Sunday.



1—The Puritan cup, highly prized trophy for which schooners will race off Marblehead this summer. 2—Thousand school children from five states visiting the White House. 3—Aerial view of Deauville, watering place of Normandy, which many Americans are visiting this year.

NEWS REVIEW OF CURRENT EVENTS

Strike of 400,000 Railway Shopmen Sanctioned, and Pullman Workers Included.

LABOR BOARD TAKES ACTION

Coal Miners' Representatives and Operators Called Into Conference by President Harding—Germany Upset by Murder of Rathenau—Fierce Battle Is Fought in Dublin.

By EDWARD W. PICKARD

FOUR HUNDRED THOUSAND railway shop workers were called out on strike, effective Saturday morning, and the order included also all Pullman shopmen in the country. An equal number of maintenance of way employees was expected to join in the walkout, though as their strike vote had not been completely canvassed, it was said their action might be delayed a few days.

The strike was set on the day when the rail workers were to undergo a cut of $184,000,000 in wages, and when the $400,000,000 freight rate reduction went into effect. B. M. Jewell, head of the shop crafts, had told the railway executives the strike would be sanctioned unless they agreed to ignore the federal labor board's wage reduction order, to restore certain working rules which the board had eliminated and to abolish the "farming out" system adopted by some of the railroads. The railway managements would not yield, and the strike decision was promptly sanctioned by the following six international union presidents, constituting the mechanical section of the railway employees' department: William H. Johnston, International Association of Machinists; J. W. Kline, International Brotherhood of Blacksmiths, Drop Forgers and Helpers of America; J. A. Franklin, International Brotherhood of Boilermakers, Iron Shipbuilders and Helpers of America; J. J. Hynes, Amalgamated Sheet Metal Workers' International alliance; James P. Noonan, International Brotherhood of Electrical Workers, and Martin F. Ryan, Brotherhood of Railway Car Men of America.

Railway managers were confident that the strike would not greatly handicap transportation operations, at least for some time. They had anticipated it by making such provisions as were possible, and besides, as has been noted before, the train service men and dispatchers are not involved in the present controversy, and will continue at work.

There was some hope that Ben Hooper, chairman of the labor board, could stave off the strike by persuading certain roads to cancel their contracts for shop work, but it was considered rather unlikely that this would satisfy the unions. Furthermore, bitter internal strife in the labor board developed. The majority members, comprising the group representing the public and the railways, issued a statement that labor members, in their dissenting opinions, were "sowing some of the seeds that have germinated and blossomed into industrial anarchy in Russia," that they had "advised the employees to strike against the decision of the board" and had advanced "incendiary arguments to the railroad employees in favor of striking against a decision of the board."

The board called the shop crafts international officers and the railway executives to appear before it for an inquiry.

PRESIDENT HARDING finally has taken personal action in the matter of the coal strike. The administration, through a high government official, stated its position thus: "Coal is going to be mined in sufficient quantity to prevent any fuel famine next winter," and it was added that if peaceful measures to end the strike failed, more drastic action would be taken. Next, Mr. Harding invited the representatives of the miners and operators to a conference in the White House Saturday for the purpose of devising "methods upon which negotiations for the settlement of the coal strike can be initiated." It was understood that attendance at the meeting did not bind either the operators or the miners to accept any conditions that might be laid down. The belief in Washington was that if the President failed to persuade the employers and workers to get together voluntarily, he might determine on the appointment of an arbitration commission and call on both sides to abide by its decision.

Officials of the miners' union have realized that public sympathy is lost to them by such occurrences as the shocking massacre of non-union men in Williamson county, Illinois, and not only disown all responsibility for acts of violence, but call on the strikers to maintain the peace for their own sakes. Many of the residents and some of the public officials of the southern Illinois region where the outrages took place seem to be in sympathy with the murderous miners, and there is little prospect that the men who slaughtered the strike-breakers will be arrested and prosecuted. Wounded survivors of the massacre in the hospital at Herrin were carefully guarded, for threats had been made that they would not be permitted to leave the town alive, lest they testify against the murderers. The mayor, however, guaranteed their safety.

PRESIDENT HARDING'S statement to congress last December suggesting regulating of labor unions was severely criticized by the special policy committee of the American Federation of Labor in its report to the Cincinnati convention. "It would seem," the report says, "that the propaganda for industrial feudalism supported by political bureaucracy has found its way into the White House. It is most regrettable to note the utterances of the President of the United States wherein he disapproves of labor's reluctant but necessary resort to the right to strike against industrial oppression."

ACQUITTAL of Governor Small of Illinois on the charge of conspiring to defraud the state was no surprise to those who had watched the progress of the trial and observed the attitude of the jury. The latter held that the prosecution failed to trace to the governor any of the misappropriated funds. A sad sequel was the sudden death of the governor's wife, who suffered a stroke of apoplexy during the impromptu celebration at their home in Kankakee. Sympathy for Mr. Small in his bereavement was general and genuine, but unfortunately a lot of ghouls tried to make political capital out of his great loss.

MEXICO got on the front page again because a bunch of bandits in that benighted country captured A. Bruce Bielaski, former chief of the bureau of investigation for the Department of Justice, and held him for $5,000 ransom. Finally he made his escape, ill, badly beaten up and half starved. Then came the story that forty Americans connected with oil companies in the Tampico region were held captive by bandits. This report was denied by President Obregon himself after investigation. Our State department, however, was informed that the bandits had released the forty and then had seized 85 employees of a Dutch-British oil company, including six Americans.

SOVIET RUSSIA'S representatives, headed by the wily Litvinoff, entered the conference at The Hague last week and at first assumed a defiant and uncompromising attitude. They insisted that the first thing to be discussed and established must be the credits to be accorded Russia by the other nations, and to every other proposition Litvinoff merely replied: "We want credits or goods; have you got any?" Outside the conference hall, he said cash was not necessary but Russia was anxious to buy abroad and must have credits from either foreign governments or foreign companies. After this was settled, said he, the conference could take up the question of private property and debts and the status of Russian bonds. The experts of Britain, France and Italy were equally firm in opposition and finally Litvinoff consented to submit to the subcommission on debts the details of Russia's budget covering extraordinary receipts and expenditures so that the other powers may make a careful study of Russia's financial prospects. The subcommission then practically agreed upon cancellation of the Russian war debts and a moratorium on pre-war debts and interest. The financial information thus dragged from the Russians has hitherto been kept scrupulously secret by them.

Litvinoff told American correspondents that the soviet government had issued a decree recognizing post-revolution rights to private property of all kinds except land. The allied and neutral delegates said that if this decree were genuine, it was the most important move the Russians had made since the adoption of their new economic policy.

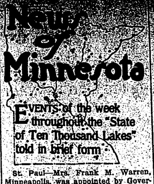
GERMAN nationalists who had been planning great demonstrations for last week in favor of restoration of the monarchy, decidedly overshot their mark by the assassination of Dr. Walter Rathenau, the minister of foreign affairs and one of the country's wealthiest industrial magnates. The socialists and other groups were so aroused by the murder that drastic steps were taken which effectually stopped the proposed uprisings. Chancellor Wirth and the cabinet imposed restrictions that approached martial law, a "state of emergency" being declared. The monarchists, however, did not remain silent and their societies joyfully celebrated the death of Rathenau. In Bavaria, where they are especially strong, the restrictive measures were ignored by populace and officials alike. Stormy scenes took place in the reichstag in Berlin, the nationalists being denounced as murderers. In the German section of Upper Silesia alone was there any actual monarchist uprising. Government troops and nationalists fought in several towns, and the affair then developed into a pogrom, many Jews being robbed and killed.

Rathenau was considered one of the ablest ministers in Europe and was doing his best to restore relations between Germany and the allied nations. In France his murder was regarded as probably ending any policy of conciliation in settling the reparations problem.

IRISH FREE STATE forces, with the aid of English guns and advice, fought fiercely with the republican irregulars in the very heart of Dublin last week, and at this writing the issue of the battle is undecided. The republicans held possession of the Four Courts building and also of several hotels in the vicinity. The Free Staters surrounded the Four Courts and attacked with rifle and artillery fire and bomb-throwers, and by Friday the casualties were somewhere near one hundred. The attackers were hampered by their desire not to injure the handsome building and to spare the invaluable records it contains. Eamon de Valera in an interview characterized the irregulars as "the bravest of the brave in our nation." In other parts of Ireland the insurgents were active and the provisional government issued three manifestoes explaining why it was compelled to act against them.

LATEST advices from China are not encouraging. Gen. Chen Chiung-Ming, who drove Sun Yat Sen from Canton, was said to have been assassinated while at a meeting of his military leaders. Doctor Sun himself, who apparently is again free, is planning to retake Canton as soon as his troops arrive from the north and to re-establish his regime there. The leaders in the Peking government are in favor of establishing the "United States of China."

DISAFFECTED Republicans of North Dakota, in combination with the Nonpartisan league, defeated Senator Porter J. McCumber for renomination, naming in his stead Lynn J. Frazier, former governor who was recalled. McCumber has been in the senate 23 years, chairman of the finance committee, and second in rank on the foreign relations committee. His defeat is another blow to the "old guard." Wisconsin Democrats followed the lead of those in Minnesota by selecting a woman for the senate. She is Mrs. Ben C. Hooper of Oshkosh.



News of Minnesota

EVENTS of the week throughout the "State of Ten Thousand Lakes" told in brief form

St. Paul—Mrs. Frank M. Warren, Minneapolis, was appointed by Governor Preus, the first woman regent of the University of Minnesota.

St. Paul—The motor vehicle tax for the first six months of 1922 amounts to $6,400,014.29, it was announced by Mike Holm, secretary of state.

St. James—Farm Bureau women are now organized in 11 of the 12 townships in Watonwan county. Organization in the remaining townships will be completed soon.

Minneapolis—The Board of Education by a vote of 4 to 2 once again turned down the proposal to take voluntary military training out of the high school curricula.

Sleepy Eye—Sleepy Eye will not have a Chautauqua next year. This was decided when it was found that the one just held had been a money losing propoistion.

Austin—The Credit Men's association of Owatonna, Wells, Mason City, Blue Earth, Fairmont, Albert Lea and Austin met at the Country club here for their annual picnic.

Minneapolis—More than $40,000 of the $3,000,000 endowment fund of Vassar college has been raised by Minnesota, Mrs. Donald Wesbrook, city campaign chairman, said.

Pipestone—Pipestone county now has its seventh newspaper. The Holland Independent has just appeared bearing the name of Postmaster Hubbard as the editor and publisher.

Red Wing—Work on construction of a rifle range for use of Company B was started on a site just below the training school, according to announcemnet made by Captain Hawkins.

Duluth—Convinced that the robbery of a jewelry store of $10,000 worth of diamonds and watches was an "inside job," Duluth police said they expected to make arrests within a short time.

Winona—Miss Edna Burmeister of this city was badly frightened and the side of her face was scorched, when a lighted firecracker, thrown by a 15 year old boy, caught in her hair and exploded.

Winona—The annual meeting of the Minneosta Methodist conference in this city will open Sept. 20, according to an official announcement received here. Bishop William O. Shepard will preside.

Eveleth—Seven members of the Eveleth team in the Mesaba Range team went on strike and refused to play against the team in which were former Chicago White Sox players, known as Black Sox.

Lakefield—H. K. Rue, aged 75, former Jackson county treasurer, was found dead in his hayfield, near here. Rue was killed when the team he was driving on the hayrake, ran away, dragging him several hundred yards.

Albert Lea—H. J. Mortenson of this city has put on exhibition in a local store, the largest snake ever killed here. It is five feet and three inches in length and measures just five and a half inches around the body.

Redwood Falls—At the annual convention of the Marshall district Epworth League here, Rev. B. L. Main, of Redwod Falls, was elected president and Pipestone was selected as the place for holding the next convention.

Rochester—William A. Nolan of Grand Meadow, state senator from the Fifth district and of state-wide prominence in public affairs, died at the Colonial hospital here from injuries and shock suffered in an automobile accident.

Montevideo—Elsie Salisbury, under indictment on a charge of first degree murder in connection with the death of Oscar Erickson, April 25, last, has been released on $10,000 bail, to appear for trial during the December term of the district court here.

Minneapolis — With approximately two thousand tourists already registered and tagged at the Welcome Bureau's headquarters, auto club officials declared that it estimates that approximately twelve thousand persons will have registered with the bureau by the end of the season, November 1.

Red Wing—City Attorney C. R. Hall and Justice of the Peace F. A. Carlson are trying out a new cure for autoists who persist in driving cars while intoxicated. Straight jail sentences of 15 days are now the rule, and two prisoners are now in the county jail serving time.

Minneapolis—Winding up a search of ruins of the Lafayette club at Minnetonka Beach, Lake Minnetonka, destroyed by fire early June 18, for the body of the second of two women burned to death, Sheriff Earle Brown said that hope of finding the body had been abandoned.

Minneapolis—Teachers in Minneapolis schools will be required to live in Minneapolis to qualify for positions after the year 1922-23, if a recommendation by William F. Webster, superintendent of schools, is adopted by the Board of Education.

Two Harbors—Charles Burkman, aged 22 years, who is on a walk around the world, for a prize offered by sportsmen and merchants of Nova Scotia, has reached here. He began this trip Oct. 4, 1921, from Halifax, N. S. He is accompanied by his dog, which pulls the small wagon that carries his baggage.

[illegible] three-day convention to a close.

Red Wing—Several hundred men and women from northwestern states are here for the annual meeting of Mjoesenlaget.

Brainerd—Beginning Monday, July 3, and continuing all the week, Brainerd will celebrate the semi-centennial of its founding.

Pipestone—More than 3,000 people attended the annual farm bureau picnic on the campus of the government Indian school here.

Luverne—Three Luverne girls, who disappeared during the week and were believed to have been kidnaped, returned to their homes in company of the father of one of them.

Winona—Harvesting of one of the biggest rye crops in years will be started the lather part of next week, according to the weekly crop report issued by H. J. Wagen.

Austin—A good many Austin boys who had arranged to work and earn some money during vacation find they cannot because of the restrictions enforced by the Industrial commission of Minnesota.

Austin—Senator W. A. Nolan was elected president of the Mower County Auctioneers' association at the annual meeting held here.

Pipestone—With the opening of a mile of new concrete paving in this city, Pipeston's total paving it brought up to 14½ miles.

Hibbing—More than 5,000 Finnish men and women attended the midsummer festival here. Congressman O. J. Larson delivered one of the principal talks.

Minneapolis — The Transportation National bank of Minneapolis, one of the few railroad brotherhood banks in the United States, is to be opened here.

Albert Lea—The Young People's league of the Minnesota district of the Danish Lutheran church opened its convention here with about 100 delegates in attendance.

Crookston—A sharp fight on a state advisory police bureau was waged on the floor of the convention of the Minnesota League of Municipalities in final session here.

St. Paul—A considerably lower level of prices for the various items entering into highway construction is reported by the bureau of public roads of the United States Department of Agriculture.

Owatonna—Osman Temple Shriners from St. Paul found Owatonna dressed in the Shrine colors, green, yellow and red, when they arrived here, 250 strong, and marched through the principal streets headed by their band, drum and bugle corps.

Minneapolis—Four New York city girls, hiking from the Atlantic coast to the Pacific, reached Minneapolis, after stopping at the capitol in St. Paul to bring greetings to Governor Preus from Mayor Hylan.

Minneapolis—A fight for a new trial will be made by Dr. W. H. MacNeil, Minneapolis dentist, who has been convicted by a jury in district court of receiving a bribe while a member of the State Dental board.

St. Paul—Large savings to farmer members and more effecient handling of their products are reported in statements issued by the Minnesota Cooperative Creameries association and the Minnesota Farm Bureau federation.

Minneapolis—With the seizure of a large shipment of alcohol at the Milwauke freight station, fedral prohibition agents declared that they have uncoverd an interstate liquor ring, with representatives in nearly every city in Minnesota, the Dakotas, Nebraska and Iowa.

Minneapolis—As an additional step toward making Minneapolis the postal headquarters of Minnesota, the local office will audit all money orders from the 1,140 third and fourth class offices in the state beginning July 1, Arch Coleman, acting postmaster, announced.

Minneapolis—An estate valued at approximately $500,000 was left by Mrs. Josephine O. Koon, widow of Judge Martin B. Koon, who lost her life in the fire which destroyed the Lafayette club.

St. Paul—When the steamer "Red Wing" leaves the dock at the foot of Jackson street, several hundred Minneapolis real estate men, members of the Minneapolis Real Estate Board, will be passengers, together with their wives and families.

St. Cloud—To have Central Minnesota recognized as a tobacco producing section and to establish a reputation for Minnesota-grown tobacco is the object of a movement launched at a meeting of the Central Minneosta Tobacco Growers' association.

Canby—While the body of his companion, Joe Wenton of Omaha, lay at the morgue here, August Ernest, also of Omaha, is in the Yellow Medicine county jail at Granite Falls, charged with transporting liquor as the culmination of a "wild" automobile ride.

Hibbing—Addresses by E. G. Quamme, president of the Federal Land bank, St. Paul, John F. Sinclair, head of the Sinclair Oil interst, Minneapolis, and Senator McCarthy of Grand Rapids were the principal features at the opening session of the 25th annual meeting of the Northern Minnesota Development association.

Minneapolis—Estimates of damage made indicated a $40,000 loss in two fires, one of which threatened the $2,000,000 plant of the B. F. Nelson Manufacturing company, and the other the $500,000 Martin elevator.

Crookston—Minnie I. Boe and Myrtle I. Hovland, the two women candidates for primary nominations, developed surprising strength in the voting. For clerk of court, Miss Boe, at present deputy clerk, got the high vote among al candidates. Miss Hovland, for judge of probate, led the two men opposing her, with more votes than both of them together

WOMAN COULD NOT WORK

Made Strong and Well by Lydia E. Pinkham's Vegetable Compound

St. Paul, Minn.—"I took Lydia E. Pinkham's Vegetable Compound for a tired, worn-out feeling and painful periods. I used to get up with a pain in my head and pains in my lowerparts and back. Often I was not able to do my work. I read in your little book about Lydia E. Pinkham's Vegetable Compound and I have taken it. I feel so well and strong and can do every bit of my work and not a pain in my back now. I recommend your medicine and you can use this letter as a testimonial." — Mrs. PHIL. MASER, 801 Winslow St., St. Paul, Minn.

Just another case where a woman found relief by taking Lydia E. Pinkham's Vegetable Compound. Many times these tired, worn-out feelings and pains about the body are from troubles only women have. The Vegetable Compound is especially adapted for just this condition. The good results are noted by the disagreeable symptoms passing away—one after another.

Lydia E. Pinkham's Vegetable Compound is a Woman's Medicine for Women's Ailments. Always reliable.

SAW OPPORTUNITY TO SAVE

If Tale Is True, Peking Merchant Was More Than Ordinary "Childlike and Bland."

Dr. Wellington Koo, the brilliant young Chinese diplomat, said at a dinner party in New York:

"Some men seem to think that we Chinese are a very childlike and very innocent people. They think we all exactly resemble the Peking merchant of the story.

"According to this story—and it is a gem—a Peking merchant took a rather notorious foreigner to board with him at a rate of $20 a week. Six months passed, and the rather notorious foreigner had not yet let his host once see the color of his money.

"So, at the end of the six months, the Peking merchant thought the matter over very thoughtfully and reduced the foreigner's board from $20 to $10. He explained that thus, if the foreigner never paid him, he would not lose so much money."

Solution of "Lake of Mystery" Sought.

An attempt to solve the secret of Lake Eyre, called the "mystery lake," in the interior of Australia, soon will be made by a scientific expedition. The lake is 400 miles from the nearest settlment. Seven rivers from the hills, miles away, penetrate Australia's great interior desert and tumble their contents into the lake. In rainy season these rivers become enormous flooded areas. Without any apparent outlet, Lake Eyre, an inland sea as the result of the flooded rivers, contracts and becomes a lake again in a surprisingly short time.

The Real Fact.

"I understand your wife came from a fine old family." "Came nothing! She brought them with her."

Opinion is general that governments ought to carry on peace as capably as they carry on war.

PERTINENT POINTERS for MODERN FARMERS

Prepared Under Direction of

North Dakota Agricultural College

THREE GREAT AMENDMENTS HELP WIN WAR ON WEEDS

(By H. L. Walster, Agronomist, North Dakota Agricultural College.)

Diversification of crops; emancipation from the thralldom of single crop farming; eradication of weeds; these are indeed three great amendments to the agricultural constitution of the sovereign state of North Dakota.

Inspection of our fields in June and July will tell whether or not we have really started to incorporate these fine phrases into our agricultural practice. Diversification means first of all, more cultivated crops; more cultivated crops means getting at the job of weed eradication.

Is that corn field going to be made a means toward weed destruction, or is it, through neglect, to become a sore spot, a weed breeder? Is that potato field going to grow potatoes alone or is it to become a nursery for weeds as well? We are not concerned at this time with those more serious weed pests which claim entire fields; the battle against quack grass, sow thistle, and Canada thistle is a seperate story. These enemies rear their heads so flauntingly; and entrench their roots so securely that every one recognizes the peril that lies in their spread.

The perennial weeds are hardened sinners; every one will admit that they must suffer the death penalty. It is not these arch criminals that really take the great toll in the average corn or potato field; but it is the annuals which, like bad habits, are permitted to grow in the poorly cultivated field, and like all bad habits that are not up-rooted, will sow the seed that works harm to the following generation. French weed, mustard, pigeon grass, kinghead, Russian thistle, wild oats—these are indeed bad habits and how they do increase. Some of these bad habits are worse than others; none of them are welcome in the society of a Dakota wheat field.

Most annual weeds can be eradicated through growing cultivated crops but the following principles must be observed:

1.—Thorough use of disk and harrow in order to prepare seed bed.
2.—Check row corn—drilled corn will be too weedy.
3.—Blind cultivation of very weedy land.
4.—Harrowing of all corn and potato fields several days after blind cultivation.
5.—Deep (3 to 4 inches) early cultivation. One deep cultivation is usually enough; all other cultivations must be shallow.
6.—Follow the deep cultivation with three to four shallow cultivations as needed.
7.—If a drouthy spell ensues, and the soil cracks badly, use a homemade mower wheel drag to close up cracks and make surface mulch.
8.—Cultivators must be equipped with good shields so that the blades can run close to the row at the first cultivation.
9.—Remove shields as soon as a danger of covering corn is past—this permit covering some weeds in the rows before they get too big to cover.
10.—All later cultivation must be shallow in order to avoid root pruning.
11.—If land is very weedy, have two cultivated crops in succession. Forty acres well cleaned means more progress in the war against weeds than a half-done job on a quarter section.
12.—Cleaning the corn field or the potato field in 1922 is preparing the way for less dockage in the 1923 wheat crop; and what is more important, is practically insuring the 1923 crop.

"Dusting as a mean of destroying both insect and disease pests of plants is coming to the front" said A. F. Yeager, horticulturist at the North Dakota Agricultural College this week in speaking of care of potato fields at this time of the year.

"A standard mixture used in the liquid form for the the control of both diseases and insects is bordeaux mixture and arsenate of lead. The bordeaux mixture serves to destroy the potato wilt and all leaf diseases and to drive away the flea beetles which are carriers of mosiac diseases," said Mr. Yeager. "The arsenate of lead poisons the ordinary potato beetle and all other insects which bite the leaves."

When used as a dust it is better to put in copper lime dust instead of the bordeauv mixture, with the arsenate of lead, said Mr. Yeager. Dusting as a means of insect control is not a new practice nor have we been without good dusting machinery both for orchard and vegetable crops. "But dusting as a means of disease control is still in its experimental stages, he said.

Tobacco sprays and tobacco dust preparations are on sale in some localities and are effective against all sucking insects such as the striped cucumber beetle. Either arsenate of lead, paris green, or calcium arsenate can be used as an insecticide in dusting or liquid preparations. Paris green is the quicker acting poison, calcium arsenate acts slower, and arsenate of lead acts slower still. The quicker acting poison will show results sooner but is more liable to burn the leaves.

On small patches such as back yard gardens the most economical method of applying dust preparations is place them in a flour sack and shake the dust on the plants when the air is still.

"Striped cucumber beetles do not like dust and will be driven away from the garden by the application of any kind of dust such as wood or coal ashes or even common road dust. Dust such as often troubles Ford drivers, will cause these little pests so much discomfort that they will leave the garden as fast as they can," says A. F. Yeager, horticulturist at the North Dakota Agricultural College.

"The dust does not kill the beetles and as soon as little shower comes they will come back to feed upon the plants again and the dust treatment must be renewed," said Mr. Yeager. "The striped cucumber beetle feeds on muskmelon, squash, and pumpkin plants as well as on the cucumber."

TO CONTINUE WORK ON PREVIOUS EXPERIMENTS

"Dairy, poultry, marketing, and cost amounts will be stressed this year without discontinuing or doing any less work on problems of other departments," said Dr. R. F. Trowbridge, director of experiment stations of North Dakota today in speaking of experiment station plans for the coming year.

"The work this summer will be a continuation of experiments previously worked on, some of them having been in process for years while others were begun more recently," he explained. "Each department conducts at least one of each of the two general types of projects. One of these types is the kind of experiment in which an immediate solution is expected for the economic benefit of the farmers of the state and is represented by the work done by the department of entomology in its fight on the pale western cutworm infestations of western North Dakota and by the work of the plant breeders in their efforts to develop a wheat resistant to rust. The other type is the basic or fundamental experiment which may have no immediate economic value to farmers but which supplies knowledge to many problems. This type is represented by the experiment to determine the amount of organic matter in soil and the experiment to determine the protein requirements of growing cattle."

"The heaviest part of the work of the year comes during these summer months for most of the station workers," said Dr. Trowbridge. "However, with the animal husbandry men the spring months are perhaps an equally busy season for it is then that most of the young animals are born. All departments will be busy during June attending the many picnics and fairs of the state."

"Three of the more important ant problems being worked on by the veterinary department are the disentry effecting cattle, swamp fever in horses, and hog colera. Disentry of cattle is a newly begun project while the other two have been worked on for years," said Dr. Trowbridge. "The problem of organic matter in the soil has been worked on for years by the department of agricultural chemistry. It is a problem effecting various factors such as water retention and physical condition of the soil."

WHEAT REMAINS FIRM

Hogs Show Upward Tendency—All Stock Prices Stronger.

U. S. Bureau of Markets, Washington, D. C., for week ended June 30, 1922.

GRAIN: Market strong early in week on unfavorable weather eports but rains and lower temperatures 24th and 26th induced declines. Disappointing threshing returns and strong cash market caused advance on the 27th and prices fairly well maintained remainder of week. Chicago July wheat up 1c for week; Chicago July corn down⅝c.

On the 29th wheat trade nervous but undertone firm. Black rust found on stem of spring wheat South Dakota but no damage claimed as yet. Cash market strong. Corn held moderate range and closed firm.

Closing prices in Chicago cash market: No. 2 red winter wheat $1.16; No. 2 hard winter wheat $1.16; No. 2 mixed corn 63c; No. 2 yellow corn 63c; No. 3 white oats 37c. Average farm prices: No. 2 mixed corn in central Iowa 50c; No. 1 dark northern wheat in central North Dakota $1.22; No. 2 hard winter wheat in central Kansas 95c. Closing future prices: Chicago July wheat $1.14¾; Chicago July corn 62½c; Minneapolis July wheat $1.34¾; Kansas City July wheat $1.08½; Winnipeg July wheat $1.27⅝.

LIVESTOCK AND MEATS: Chicago hog prices ranged 10-20c higher for the week. Beef steers 15-20c higher; butcher cows and heifers firm to 25c higher, feeder steers were firm to 10c higher; light and medium weight veal calves generally 25c higher. Fat and feeding lambs 25-50c higher; yearlings up 40-50c; fat ewes 75-75c higher.

On June 29th Chicago hog prices opened 10-20c higher, closed weak and about 15c higher than Wednesday's average. Beef steers, butcher cows and heifers strong to 15c higher with in-between grades of beef steers showing most advance. Stockers steady; veal calves steady to 25c higher; fat lambs 25c lower; sheep steady to strong.

June 29th Chicago prices: Hogs, top, $11, bulk of sales $9.75-10.95; medium and good beef steers $7.90-9.60; butcher cows and heifers $4-8.60; feeder steers $5.65-7.75; light and medium weight veal calves $7.25-9; fat lambs $12-13.40; feeding lambs $11-12.30; yearlings $8.75-11.75; fat ewes $3.75-7.40.

Stocker and feeder shipments 12 important markets during the week ending June 23rd were: Cattle and calves 53,365; hogs 7,829; sheep 22,149.

DAIRY PRODUCTS: Butter markets firm most of week as result of unexpected export demand and continued buying for storage. Tone weak at close as prices became top-heavy. Price tendency downward.

Closing prices 92 score butter: New York 38; Chicago 36; Philadelphia 38; Boston 38½.

HAY: Eastern markets heavy and unsettled during the week except New York, where market is firm with prices slightly higher. Other markets slow with demand only for top grades. Low grades sold only at a discount.

Quoted June 28th: No. 1 timothy New York $29.50, Chicago $22.50, No. 1 prairie Kansas City $13, St. Louis $16.50, Minneapolis $12.

FEED: No material change in wheat feeds during the week. Offerings from Northwest small with no pressure to sell. Offerings from Southwest normal. Demand quiet especially from the east. Practically no trading in feeds. Quoted June 28th: Spring wheat bran Chicago $17.25, standard middlings Chicago $19.25; winter wheat bran St. Louis $17.

Minneapolis Closing Cash Prices.

Spring wheat—No. 1 dark northern, 1.42@1.49; No. 1 notrhern, 1.41@1.44; No. 1 dark hard, 1.28@1.40; No. 1 hard, 1.33; No. 1 am. dur., 1.20@1.25; No. 1 durum, 1.15@1.20. Corn No. 2 yellow, 57½@58c. Oats No. 2 white, 34⅝@35⅝c. Barley choice to fancy, 55@57c. Rye No. 2, 82½@85c. Flaxseed, No. 1, 2.54@2.56.

South St. Paul Live Stock.

So. St. Paul—Steers, $4.00@6.00; veal calves, $4.00@7.00; cows and heifers, $4.00@6.00; hogs, $8.50@10.50; sheep and lambs, $2.00@12.00.

Minneapolis Butter, Eggs and Poultry.

BUTTER—Extras, 35c; firsts, 32c; seconds, 27c; packing stock, fresh, sweet, 23c; state goods, 5c; grease, 1c.

EGGS—Country receipts, rots out, per case, $5.40; No. 1 candled, good extras, free from rots, small dirties and checks out, per dozen, 21c; small, dirty and held stock, rots and leakers out, dozen, 16c; quotations on eggs include cases.

LIVE POULTRY—Not advisable to ship turkeys under 7 pounds in weight. Hens, 4 pounds and over 19c; hens, under 4 pounds, 16c; cripples and culls unsalable; ducks, fat, 15c; geese, fat, 10c; turkeys, fat, over 8 pounds, 25c; turkeys, thin and small, 15@20c; cripples and culls unsalable, guineas, per dozen, $5.00; roosters, 12c; broilers, 1½ lbs. and up, per pound, 30c; Leghorns and small broilers, lb., 25c.

EXPERIMENTAL HIGHWAY WORK AT ARLINGTON WILL BE CONTINUED

(Prepared by the United States Department of Agriculture.)

A comprehensive program of road-building research and investigation during the coming season at the Arlington Experimental station near Washington, D. C., is announced by the bureau of public roads of the United States Department of Agriculture. Impact tests on pavements, subgrade studies and other experiments, which last year aroused much interest among engineers, will be continued as well as several other lines of work underway last year and new ones to be started.

Bituminous wearing surfaces are to be investigated to determine the reason for the formation of waves and irregularities and to settle mooted questions concerning the proper mixture and the proper mineral aggregates to be used in bituminous roads. More than 80 sections of different types of bituminous construction will be built. These will include mixtures of different mechanical grading and with different percentages of bitumen of several degrees of hardness. Sections are being constructed on a circular track about 600 feet in circumference, the roadway being 13 feet wide. On this roadway will be operated a 5-ton army truck equipped with solid tires. The truck will be operated in a varying path so as to cover practically the entire width of the roadway and will travel at a speed of from 12 to 15 miles an hour for five or six months, or until some results are obtained leading to the solution of the problems involved.

Resistance to Wear.

There is considerable discussion as to what is the proper criterion to be used in selecting and judging concrete aggregates that will offer the greatest amount of resistance to wear. At the present time judgment is based on wear tests made in the laboratory and upon the compressive strength of concrete, also upon the structural strength of concrete beams constructed and broken in the laboratory. The comparison of the wear of concrete in actual use on road surfaces with the indications obtained in laboratory experiments is not wholly satisfactory.

To throw more light on this subject a wear test is to be made with the conditions approximating those actually found on the road. This test will include about 65 sections of concrete wearing surface, each section being of a different quality of concrete, the qualities being varied by virtue of the different aggregates used, different proportions in the mixture and amount of mixing water. These sections are to be constructed on a circular runway about 650 feet in circumference, the runway being 4 feet wide.

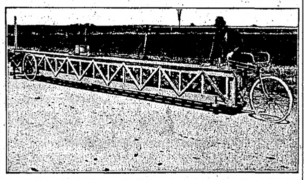
On this runway will be operated a specially constructed car with two truck wheels equipped with solid rubber tires and loaded to represent a truck. The car will be guided by small railroad rails to hold it in position, the power being applied by means of an electric motor to the rear wheel. This apparatus will be operated around the circular runway at a speed of probably 20 miles an hour. The test will involve the use of truck wheels equipped with different kinds of tires and will include the use of non-skid chains. A steel-tired wheel will probably also be used to get the effect of an accelerated wear test.

The object of this experiment is to determine the relative wear of the different concrete sections when subjected to traffic equipped with different types of wheel, also to furnish a comparison between actual service conditions and laboratory tests. This test will be in operation continuously beginning some time in June.

Impact on Roads Studied.

In a rather elaborate series of experiments, the bureau has studied impact of trucks on roads, and has determined approximately the magnitude of impact force under different truck and road conditions. The effect of such impact on concrete pavements and several types of road on concrete base was studied and reported on last year. This series of experiments is to be continued and enlarged. Over 120 road sections or slabs have been constructed in duplicate series. One series is on a carefully drained dry subgrade; the other series is on the same kind of subgrade except that it is kept wet and as nearly saturated as possible by means of an underlying drain tile and side ditches filled with water.

The testing of these slabs will begin some time during the month of May and will be by means of a new impact machine now being constructed which simulates the action of the rear wheel of a truck. On this machine may be mounted truck wheels of different sizes and weights carrying different kinds of truck tires. This apparatus may be so operated as to reproduce the different loading and equipment conditions of a large variety of trucks. The slabs will be hammered by means of this machine in the center, on the corners, and on the sides so as to obtain the relative strength under these different conditions.



Device for Testing and Measuring the Smoothness of Roads.

Subsoil investigations are being continued for the purpose of studying and investigating relative stability, moisture condition, and supporting value. Different methods of determining the bearing value of soils are also being studied, that is, as to whether small or large areas should be used in determining the relative bearing value.

The warping effect of temperature and moisture conditions on concrete pavements is also being investigated. Temperatures and movement are being recorded graphically on continuous charts. In addition to these temperature and movement measurements the pressures on the subgrade under the concrete slab are obtained by means of soil pressure cells. This investigation will give some definite information concerning the support offered by subgrades to rigid concrete roads.

FEED HORSES RIGHT AMOUNT

Pound of Grain and Pound of Roughage Per 100 Pounds of Horse Is Most Satisfactory.

One pound of grain and one pound of roughage per 100 lb. of horse is about the right amount of feed for horses under general work conditions. At hard work increase the grain. When idle or doing light work, decrease both grain and roughage. All alfalfa or clover is not as good as if timothy, prairie, or oat straw, or corn stover made up nearly half of the ration. Timothy hay is standard hay for horses, but it is because of its usual freedom from dustiness rather than its economic food value that makes it so. Well cured, good quality legume hays are better from the food value standpoint.

Hogs Require Mineral.

Hogs require a certain amount of mineral salts and charcoal, for proper development and health. It is this requirement that causes them to root in the ground.

Goose Is Profitable.

Goose culture is not a very extensive industry in this country, and yet where there is good range over pasture land it is one of the most profitable. Of all domestic fowls geese are the hardiest and easiest to raise.

Rotten Sweet Potatoes.

The sweet potatoes which rot in one year would pay for enough potato curing houses to save the entire crop.

Delay Cutting Alfalfa.

Delaying the cutting of alfalfa until it is nearly in full bloom has been found a better practice than mowing it soon after blooming starts.

Outwit the Weeds.

No, it does not take a witty farmer to outwit the weeds. Frequent, shallow cultivation will do that and will also save soil moisture.

Profitable Part of Farm.

A vegetable and fruit garden is a profitable part of any farm. Now is a fine time to establish one on the place.

DAIRY

BEST PLAN TO RAISE CALVES

Minnesota Idea Is to Give Youngsters Good Start and Then Feed Hay and Grain.

The milk of 45 out of every 100 cows kept in the United States is sold as whole milk. Owners of the herds where milk is marketed in this way have a serious problem in raising the necessary number of calves to maintain their herds. If no calves are raised and the farmer depends upon buying what he needs there is constant danger of disease and his herd seldom improves from year to year. When raising calves under these conditions some milk must be used, as there is no substitute for it.

Experiments in progress at the Minnesota experiment station show that the best plan so far worked out is to give the calves a good start with milk and then get them on grain and hay as soon as possible. The plan suggested is to feed milk in the usual way to the age of about fifty days, then if the calf is strong and vigorous gradually reduce the amount until none is fed after the calf is sixty to sixty-five days old.

Alfalfa or clover hay and a grain mixture of cornmeal four parts, bran one part and oilmeal one part is kept before the calves. They will begin eating grain and hay when about a month old and will gradually increase the amount until at the time the milk feeding ceases at sixty to sixty-five days of age they are able to get along very nicely without milk.

Calves handled in this manner will be somewhat checked in growth for a short time after the milk is taken from the ration, but will be in as good condition as the calf raised on skim milk by the time they are six months of age. The total milk used need not exceed 400 pounds. The grain mixture mentioned serves the purpose just as well as more expensive commercial calf meals.—C. H. Eckles, chief of the dairy division, University of Minnesota.

Teaching a Calf to Drink Skim Milk.

MISSOURI DAIRY COW FEEDS

Recommended That Animal Be Fed All Alfalfa or Clover Hay She Will Consume.

In making up a ration for dairy cows the Missouri College of Agriculture recommends that cows be fed all the alfalfa or clover hay they will readily consume, and to feed corn silage when available.

To this should be added a grain mixture if good results are to follow.

A grain mixture often recommended is four parts, by weight, of corn chops, two parts wheat bran and one part either cottonseed or linseed meal. This mixture is to be fed according to the quantity of milk produced.

One pound of the mixture is sufficient for every four pounds of milk produced by a Holstein cow or for every three pounds produced by a Jersey.

It is not a bad plan, in the above ration, to mix the cottonseed and linseed meal half and half, instead of using one alone.

LET CALVES RUN ON PASTURE

As Grass Contains Large Amount of Water, Something Additional Must Be Given.

Calves dropped in the fall and early winter should be allowed to run on pasture during the summer. Pasture, however, should not be depended upon altogether, as it contains too large an amount of water in proportion to the food nutrients to insure the calves a satisfactory ration.

Local News

Otto and Einar Hohle visited in Thief River Falls on Wednesday.

J. P. Jensen and family spent the Fourth at Maple Lake.

The A. S. Gaudland family visited with friends near Grygla Sunday.

Stewart and Victor McLeod, Harry Halvorson and Curtis Francher drove to Fourtown on Sunday on business.

Mrs. Tollef Loyland of Erie went to Thief River Falls on business Friday. They returned the next day.

Harry Halvorson has accepted a position with the Goodridge State Bank. He started his duties in that bank on Wednesday morning.

Rev. Aakre and family and Mr. and Mrs. Ronkin drove to Middle River Sunday to attend the Lutheran Young Peoples' Convention held there.

Ole Kirkelie, Halvor Homme and Ole Halvorson of Erie autoed to Grand Forks Wednesday to take in the Saterday Lag.

Mr. and Mrs. M. O. [illegible] and her daughter were guests at the Josephson home Saturday.

Mr. and Mrs. Oen Olson and family drove to Pelican Rapids to visit with relatives until after the Fourth.

Mrs. H. Christianson, who has been visiting at Erskine for several weeks, returned to her home Sunday evening.

Mr. and Mrs. J. P. Jensen and son, Raymond, drove to Warren on business Thursday.

Carl Fevig of Thief River Falls, the Standard Oil inspector, was here on business several days this week.

A. Halvorson and family attended the Aid Society at Kilan's farm Sunday afternoon.

Gerda Miliander left for Hazeldal, Sask., Monday where she will visit with her sister, Agnes, for a time.

Barney Baker and Henry Katzenberger, living east of Goodriage, were shoppers here Monday.

Mrs. Gunder Skretvedt came here Saturday from Nielsville. She will spend a week visiting relatives southwest of Goodridge.

Myrtle Stephenson and grandfather left Monday morning for Pelican Rapids, where they will visit for a short time.

Miss Irma Johnson of Thief River Falls spent Thursday visiting at the home of Mr. and Mrs. Theodore Tandberg.

Lillian Stephenson, who has been absent from her home for some time. is spending a short time visiting with her parents.

John Gangness, who has been away for a few days, returned Friday via Electric Line on his way to the W. P. T. U. ranch, where he is employed.

Mrs. P. C. Halvorson of Erie has been a guest at the Thoreson home this week. Mrs. Halvorson has been serving on the grand jury.

Miss Violet Brown of Grygla passed through here Wednesday on her way to Thief River Falls where she will visit with friends.

Mrs. Ed Sheldrew passed through here Friday en route to Grygla where she will visit relatives. Mrs. Sheldrew's home is in Wisconsin.

Mrs. Melvin Stephenson left for Pelican Rapids Friday to visit relatives. She was accompanied by her daughter Murial.

Peter Englestad, secretary of the Thief River Falls Co-operative Creamery Association, was a business caller here Saturday.

George and John Smedberg autoed here from Fargo Saturday, where they visited with relatives and friends over Sunday. They are both employed in Canada and are driving through the country. They left Monday for the southern part of the state.

Myrtle [illegible] spent Monday in this village with friends.

Mrs. Will Vaughan shopped in Goodridge Friday.

Mrs. McWayne and daughter, Agnes shopped here Saturday.

Mrs. John Dahlen of Erie shopped in Thief River Falls Friday.

Sheriff J. W. LaBree was a business caller here Friday afternoon.

Mr. and Mrs. Elmer Olson shopped here Saturday. They also visited with relatives.

E. L. Katley started out Wednesday morning to repair the telephone line west of town.

Mrs. J. P. Ferdinandson and son, Wesley, went to Thief River Falls on Wednesday morning to attend to shopping.

M. G. Thoreson has been driving to Thief River Falls every day during the past week, serving on the jury at that place.

Christina Bundhund left Monday morning for Thief River Falls, where she will remain over the Fourth visiting friends and relatives.

Ingvol Geving and Eddie Halvorson, who are working with the Minneapolis Bridge Company in Canada, are home to spend a few days with relatives.

Hans, Ole, Hilda and Angela Skretvedt arrived here from Niellsville on Monday on their way to Grygla where they spent the Fourth with relatives.

H. N. Hanson of Grygla had a carload of lumber shipped in here last week. He is going to build a new house and barn this summer.

P. O. Tvedt and family left Sunday morning for Hope, N. D., where they will visit with friends and relatives over the Fourth.

Two carloads of cattle were shipped from here Saturday to South St. Paul. One car was shipped by J. A. McNnelly and one by Albert Wilkins.

Herb. Roberg of Minneapolis visited with the C. Urdahl family last week from Thursday until Saturday. Mr. Roberg is Mrs. Urdahl's nephew.

Mable Tweeton left for Pelican Rapids Monday morning where she will spend a two weeks' vacation with relatives and friends.

Clarence Jacobson, who has been employed at the Strathcona State Bank for the past year, is spending a few days with his parents this week.

Miss Gladys Wilson left Monday for her home near Grygla, where she spent the Fourth with her parents. She returned Wednesday.

Miss Ruth Clark, who has spent several months with her sister, Mrs. J. A. Sundquist, left Wednesday for Thief River Falls, where she is visiting with her sister, Mrs. W. L. Hall.

Guida Gilbertson, who has been employed at Grand Forks for some time, is home to spend one month with her parents before returning to her work again.

John Nystul returned to Goodridge Friday afternoon after having spent a few days at Middle River attending to school affairs. He drove out to his home near Grygla in the evening.

Mr. and Mrs. J. Payne, Miss Gladys Wilson, Mrs. H. B. Rockne and children attended church in Thief River Falls Sunday. They also had a picnic dinner in Lover's Lane.

Mr. and Mrs. V. C. McLeod and family, Mr. and Mrs. McDonald and family, Mr. and Mrs. Elmer Peterson and the A. McLeod family spent the Fourth at the Toomey farm near Thief River Falls.

Mr. and Mrs. Henry Katzenberger left Wednesday morning by auto for Calloway, Minn., where they will make their home. Mrs. Katzenberger is a daughter of Barney Baker, residing near Goodridge.

Mrs. J. W. Hahn, who has spent several weeks visiting with her parents, Mr. and Mrs. J. Stephenson, left Tuesday evening for Rockford, Ill., where she will make her future home. Mrs. Hahn has recently been married and goes to Rockford to join her husband.

Frances Brown, John Bugher, Roy Brown and D. Ebert arrived here last Friday evening from Chicago by auto. They left Chicago Wednesday morning. Roy Brown has a farm near this village and is expecting his family here the latter part of the week.

Mr. and Mrs. John Gilbertson and son, Howard, left for their home at Spokane, Wash., Wednesday afternoon after having spent several weeks visiting with Mrs. Gilbertson's parents, Mr. and Mrs. Simonson, northeast of Goodridge.

CARD OF THANKS.

I wish to thank the many friends who so faithfully rendered their assistance to my son during his long illness and for the many beautiful floral offerings at the time of his death.

SEVERT JOHNSON.

Do You Own Your Home?

THERE'S no place like home. No matter how humble, there's no place like home!

It's the joy of every woman's heart—the most companionable place a man can find.

Are you making preparations for a home of your own? Or to bettering your present one?

Raspberries

Put Up Raspberry Preserves

WHILE the world's best quality raspberries from the Puyallup Valley are available, put up a liberal quantity as Mother used to, in the form of preserves, jam, conserve, and canned raspberries for sauce and pies.

By canning at home you save one-third to one-half. Avoid paying high prices for factory-canned berries. Your family will appreciate your home made preserves. Get your Ball Mason Jars ready.

Only a few weeks in the year can you enjoy fresh raspberries. Eat them with your breakfast food. Serve them for dinner. The crop is short this season—have your grocer notify you when they arrive on the market.

Pacific N. W. Growers & Jobbers Ass'n
General Offices, Minneapolis, Minn.

Raspberry Preserves

One pound of sorted berries. Place in Preserving Kettle one pound granulated sugar. Add one cup water. Allow syrup to boil until it spins a hair, or boil to 250° if thermometer is used. At this degree add berries and boil slowly until fruit is transparent. Skim while boiling, do not stir berries. Boil to a jelly consistency, take from fire, place kettle in pan of cold water to cool. When cold, fill into jars and pour melted paraffin over top. Place in cool room.

Deer Park Gleanings

Carl A. Olson transacted business at Oklee last Friday.

Sam B. Swanson and John Helle are busy cutting brush along the road lines in Mayfield this week.

O. M. Mandt was down to Thief River Falls last week to consult a physician in regard to an abcess starting on his jaw.

Swan Weberg of St. Hilaire and John Carlson of Thief River Falls took in the church picnic in Deer Park last Sunday given for the benefit of the Oak Park church.

Mr. and Mrs. Sjur Stolaas and Mr. and Mrs. Bernt Stolaas transacted business at Aklee last Monday.

Knut Olson was a business caller at Oklee last Monday.

Mrs. Tallak S. Dahle passed away last Thursday morning, June 22nd after being confined to her bed for several weeks previous. Cause of death, old age and other complications. Mrs. Dahle was one of the pioneers in the town of Highlanding, having resided there since 1905. Mrs. Dahle immigrated to this country about 40 years ago, landing at McIntosh, where she resided for several years, and later removed to the town of Garnes, where she also remained about 12 years before taking up her present residence where she resided at time of death. Pioneer life on the frontiers must have agreed with her as she lived to reach the ripe old age of 75 years.

Mrs. Dahle was the mother of three children, two in her first marriage, namely, Ben Kreste of Highlanding and Mrs. Birget Danielson of Erie, and one daughter in her last marriage, Mrs. Edwin Syversrud also of Highlanding. Mrs. Dahle was laid to rest in the Oak Park cemetery, where many friends and relatives gathered to pay their last tribute to the dead.

Mr. and Mrs. C. Habedank and family visited at the H. Roller home Sunday evening.

Mr. and Mrs. Charles Boyce were Sunday callers at the Paul Stack home.

RED LAKE FALLS

(From The Gazette)

A Ford car owned by the Febro boys of this city was taken from the garage at the Febro home late Tuesday evening and was not missed until Wednesday noon, whereupon Sheriff Fellman was notified and the car was soon located in one of the coulees west of the city, near the Lasha farm. The parties taking the car are said to be known and unless satisfactory settlement is made, arrests will likely follow.

An auto driven by Frank Frederrickson, who was accompanied by two Reopelle boys and two other young men went into the ditch a short distance this side of Dorothy early Sunday morning, when a tire and rim came loose on the right front wheel. That the occupants of the car were not seriously injured seems miraculous as the car crossed a deep ditch alongside of the road, but did not turn over. The only occupant of the car to receive any injury was young Frederickson, who received a slight cut on the forehead when he was thrown against the windshield.

Ernest Miller and Gustav Zaiser and crew are putting up guard rails on both sides of Trunk Highway No. 32 on the Skala hill north of town and have the job nearly completed. Both sides of the approach to the Red Lake river bridge, both sides of the Great Northern overhead bridge have been protected and with the completion of the Skala hill job the dangerous places between here and St. Hilaire will have been fixed. The guard rail on the east side of the Clearwater bridge unquestionably averted a serious accident and possibly saved the lives of several people last week when a woman driving a car full of berrypickers, lost control of the car while shifting gears and it backed down hill and would have gone over the embankment had not the guard rail stopped it. As it was the car struck with such force as to break a two by ten rail. Experience has proven that it is better and cheaper to put "a fence around the top of the cliff than an ambulance down in the valley."

Matt Nerva, while plowing on his farm, the E½ of the NE¼, section 31, Garnes township plowed up the bones of a man buried in a shallow grave, evidently many years ago.

The first discovery of the bones was when the plow turned over what appeared to be the soles of a man's shoes, which were in the sod. Little attention was given this until after a little deeper plowing the forearm bone was turned up. Jut when or how the body was buried will probably never ben known.

Some of the older settlers recall the disappearance of a man who had made arrangements to visit his old home in Europe, and before starting on his journey came up missing and was never heard from again, and at that time it was thought that he had met with foul play, as he was supposed to have carried large sums of money.

Further investigation of the burial spot will be made, Mr. Nerva informs the Gazette this (Thursday) morning.

The little striped cucumber beetle, foe of the squash, melon and cucumber, can be controlled by the use of a dust composed of twenty parts lime to one part arsenate of lead. Remember, that the beelte causes damage by eating the leaves and the stem near the surface of the ground. These eggs hatsh in larvae which tunnel into the main root stem. Later a wilting condition of the plant, caused by the destruction of root tissue, develops."

That there are shrong teeth in the law protecting migratory birds was demonstrated recently by the federal judge for the eastern district of Arkansas, when he sentenced to four months in jail a vialator brought before him on the charge of selling wild ducks. This is the twelfth jail sentence imposed for infraction of the migratory bird treaty act, the sentences ranging from five days to six months. The act is administered by the United States department of agriculture.

When Camille Flammarion was five years old, he saw an eclipse of the sun reflected in a bucket of water. That aroused his interest in the stars. Today he is a celebrated French astronomer. Flammarion suggest that he might have followed some other line of work, if chance had not led him to the water pail. Chance—the possibility of the unexpected happening at any moment—is what makes life interesting. The laws of chance have a lot to do with our careers. Many successful men are creations of chance, or luck, though they try hard to pin it on hard work and not watching the clock.

BYGDELAGS CONVENTIONS

The bygdelags, organizations of people of Norse birth or extraction, are now laying plans for their annual reunions. A main purpose of these bodies is to afford opportunities to people hailing from the same districts in Norway to meet and renew acquaintances. The collection of historical and biographical information is also an important work of the bygdelags.

The following "stevner" have been announced:

Gudbrandsdalslaget, Detroit, Minn., June 29 and 30.

Hallinglaget, Devils Lake, N. D., June 8-10.

Kongsberglaget, Minneapolis, June 24-25.

Mjosenlaget, Red Wing, June 23-25.

Nordlandslaget, Thief River Falls, Minn., June 23-24.

Northwest Telelag, Williston, N. D., June 26-28.

Numedalslaget, Hawley, June 22-23.

Romsdalslaget, Grand Forks, N. D., June 27-28.

Smaalenslaget, Minneapolis, Minn., June 22-23.

Sognalaget, Albert Lea, Minn., June 14-15.

Solorlaget, Crookston, June 22-23.

Stavangerlaget, Willmar, June 22-23.

Sondhordlandslaget, Estherville, Ia., Aug. 22-23.

Sondmorelaget, Grand Forks, N. D., June 27-28.

Telelaget, Fergus Falls, June 22-24.

Tronderlaget, Sioux Falls, S. D., June 20-21.

Valdris Samband, Citizen's club, 2010 Minnehaha avenue, Minneapolis, Minn., June 16.

Osterdalslaget, Alexandria, Minn., July 1-2.

A young man who was arrested near Austin for moonshining entered the novel defense that the moonshine was made for his father who was sick. The charge should properly be changed from moonshining to murder.

FELL AND LUCIE

SYNOPSIS.—During the height of the New Orleans carnival season Jachin Fell, wealthy though somewhat mysterious citizen, and Dr. Ansley, are discussing a series of robberies by an individual known as the Midnight Masquer, who, invariably attired as an aviator, has long defied the police. Joseph Maillard, wealthy banker, is giving a ball that night, at which the Masquer has threatened to appear and rob the guests. Fell and Ansley, on their way to the affair, meet a girl dressed as Columbine, seemingly known to Fell, but masked, who accompanies them to the ball. Lucie Ledanois, recently the ward of her uncle, Joseph Maillard, is the Columbine. At the ball, Bob Maillard, son of the banker, again proposes to her and is refused. He offers to buy some of her property. A Franciscan monk interests her. He turns out to be Prince Gramont. In his library Joseph Maillard and a group of his friends are held up and robbed by the Midnight Masquer. Lucie Ledanois, the last of an old family, is in straitened circumstances. Joseph Maillard's handling of her funds has been unfortunate. Fell is an old friend of her parents and deeply interested in the girl. Henry Gramont, really the Prince de Gramont, is enamored of Lucie.

CHAPTER IV—Continued.

—5—

"You saw him?" repeated the girl, quickly. "What was he like? Do you know who he is?"

"Certainly I know," replied Fell, still smiling at her.

"Oh! Then who is he?"

"Softly, softly, young lady! I know him, but even to you I dare not breathe his name until I obtain some direct evidence. Let us call him Mr. X., after the approved methods of romance, and I shall expound what I know.

"The bandit did not enter the house during the evening, nor did he leave, nor was he found in the house afterward," he went on, tonelessly. "So, incredible as it may appear, he was one of the guests. This Mr. X. came to the dance wearing the aviator's costume, or most of it, underneath his masquerade costume. When he was ready to act, he doffed his outer costume, appeared as the Midnight Masquer, effected his purpose, then calmly donned his outer costume again and resumed his place among the guests. You understand? .

"Well, then! Maillard yesterday received a note from the Masquer, brazenly stating that he intended to call during the evening. I have that note. It was written with an extremely hard pencil, such as few men carry, because it does not easily make very legible writing. Last night I asked Mr. X. for a pencil, and he produced one with an extra hard lead—mentioning that he had borrowed it from Bob Maillard, as indeed he had."

"What! Surely you don't mean—"

"Of course I don't. Mr. X. is very clever, that's all. Here is what took place last night. Mr. X. brought us another note from the Masquer, saying that he had found it pinned to the library door. As a matter of fact, he had written it on a leaf torn from his notebook. I took the note from him, observing at the time that the paper had no pin holes. Probably Mr. X. saw that there was something amiss; he presently went back downstairs, took the remainder of the torn leaf from his notebook, and pinned it to the door. A little later I met him and mentioned the lack of pin holes; he calmly referred me to the piece on the door, saying that he had merely torn off the note without removing the pins. You follow me?"

"Of course," murmured the girl, her eyes wide in fascinated interest. "And he knew that you guessed him to be the Masquer?"

"He suspected me, I think," said Fell, mildly. "It is understood that you will not go about tracing these little clues?"

"Don't be silly, Uncle Jachin!" she broke in. "You know I'll do nothing of the sort. Go on, please! Did you find the airplane?"

"Yes." Jachin Fell smiled dryly. "I was thinking of that as I left the house and came to the line of waiting automobiles. A word with one of the outside detectives showed me that one of the cars in the street had been testing its engine about midnight. I found that the car belonged to Mr. X.

"How simple, Lucie, and how very clever! The chauffeur worked a powerful motor with a muffler cutout at about the time Mr. X., inside the house, was making his appearance. It scarcely sounded like an airplane motor, yet frightened and startled, people would imagine that it did. Thus arose the legend that the Midnight Masquer came and departed by means of airplane—a theory aided ingeniously by his costume. Well, that is all I know or suspect, my dear Lucie! And now—"

"Now, I suppose," said the girl, thoughtfully, "you'll put that awful Creole of yours on the track of Mr. X.? Ben Chacherre is a good chauffeur, and he's amusing enough—but he's a bloodhound! I don't wonder that he used to be criminal. Even if you have rescued him from a life of crime, you haven't improved his looks."

"Exactly—Ben is at work," asserted Jachin Fell. "The gentleman under suspicion is very prominent. To accuse him without proof would be utter folly. To catch him in flagrante delicto will be difficult. So I am in no haste. Besides, I can as yet discover no motive for his crimes, since he is quite well off financially. Well, no matter! Now that I have fully unbosomed myself, my dear, it is your turn."

"All right, Uncle Jachin." Lucie took a large morocco case from the chair beside her, and extended it. "You lent me these things to wear last night, and I—"

"No, no," intervened Fell. "I gave them to you, my dear—in fact, I gave them to you two years ago, and kept them until now! You have worn them; they are yours, and you become them better than even did poor Queen Hortense! So say no more."

Lucie leaned forward and imprinted a kiss upon the cheek of the little gray man. "There! that is all the thanks I can give you, dear uncle; the gift makes me very happy, and I'll not pretend otherwise. Only, I feel as though I had no right to wear them—they're so wonderful!"

"Nonsense! But all this isn't why you summoned me here, you bundle of mystery! What bothered you last night, or, rather, who?"

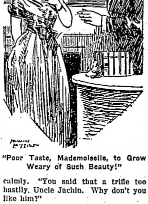
Lucie laughed. "There was a Franciscan who tried to be very mysterious, and to read my mind. He talked about oil, about a grasping, hard man, and mentioned you as my friend. Then he warned me against a proposal that Bob might make; and sure enough, Bob did propose to buy what land is left to me on Bayou Terrebonne, saying he'd persuade his oil company that there was oil on it, and that they'd buy or lease it. I told him no. The Franciscan, afterward, proved to be Henry Gramont; I wondered if you had mentioned—"

"Heaven forbid!" exclaimed Mr. Fell, piously. "I never even met Gramont until last night! Do you like him?"

"Very much." The girl's eyes met his frankly. "Do you?"

"Very much," said Jachin Fell.

Lucie's gray eyes narrowed, searched his face. "I'm almost able to tell when you're lying," she observed calmly. "You said that a trifle too hastily, Uncle Jachin. Why don't you like him?"



"Poor Taste, Mademoiselle, to Grow Weary of Such Beauty!"

Fell laughed, amused. "Perhaps I have a prejudice against foreign nobles, Lucie. Our own aristocracy is bad enough, but—"

"He's discarded all that. He was never French except in name."

"You speak as though you'd known him for some time. Have you had secrets from me?"

"I have!" laughter dimpled in the girl's face. "For years and years! When I was in New York with father, before the war, we met him; he was visiting in Newport with college friends. Then, you know that father and I were in France when the war broke out—father was ill and almost helpless at the time, you remember. Gramont came to Paris to serve with his regiment, and met us there. He helped us get away, procured real money for us, got us passage to New York. He knows lots of our friends, and I've always been deeply grateful to him for his assistance then.

"We've corresponded quite frequently during the war," she pursued. "I mentioned him several times after we got home from France, but you probably failed to notice the name. It's only since he came to New Orleans that I really kept any secrets from you: this time I wanted to find out if you liked him."

Jachin nodded slowly. His face was quite innocent of expression.

"Yes, yes," he said. "Eyes—or He's a geologist or engineer, I think?"

"Both, and a good one. Well, about last night—he probably guessed at some of my private affairs; I've written or spoken rather frankly, perhaps. Also, Bob may have blabbed to him. Bob still drinks—prohibition has not hit him very hard!"

"No," agreed Fell, gravely. "Unfortunately, no. Lucie, I've discovered a most important fact. Joseph Maillard did not own any stock in the Bayou Oil company at the time your land was sold them by him, and he had no interest at all in the real estate concern that bought your St. Landry swamp lands and made a fortune off them. We have really blamed him most unjustly. I do not believe that he has profited in the least from you. His investments in the companies concerned were made afterward, and I am certain he sold the lands innocently."

Lucie drew a deep breath.

"I am glad you have said this," she returned simply. "It's been hard for me to think that Uncle Joseph had taken advantage of me; I think that he honestly likes me, as far as he permits himself to like anyone."

"He'd not loan you money on it," said Fell. "Friendship isn't a tangible security with him."

"Well, who really did profit by my loss? Anyone?"

Fell's pale gray eyes twinkled, then cleared in their usually wide innocence.

"My dear Lucie, is there one person in this world to whose faults Joseph Maillard is deliberately blind—one person to whom he would refuse nothing, in whom he would pardon everything, of whom he would never believe any evil report?"

"You mean—" Lucie drew a quick breath—"Bob?"

"Yes, I mean Bob. That he has profited by your loss I am not yet in a position to say; but I suspect it. When I have finished with the Masquer, I shall take up his trail."

Jachin Fell rose. "Now I must be off, my dear. "Will you dine with us tomorrow evening, Lucie? My mother commanded me to bring you as soon as possible—"

"Oh, your mother!" exclaimed the girl, contritely. "I was so absorbed in the Masquer that I forgot to ask after her. How is she?"

"Quite as usual, thank you."

"I'll come tomorrow night gladly, Uncle Jachin."

"And we'll take a look at the Proteus ball afterward, if you like. I'll send Ben Chacherre for you with the car, if you're not afraid of him."

"I'm not exactly afraid of him," Lucie responded, soberly, "but there is something about him that I can't like. I'm sorry that you're trying to regenerate him, in a way."

Fell shrugged lightly. "All life is an effort, little one! Well, goodby."

Jachin Fell left the house at three-forty. Twenty minutes later the bell rang again. Lucie sent one of the servants to admit Henry Gramont; she kept him waiting a full fifteen minutes before she appeared, and then she made no apologies whatever for the delay.

Not that Gramont minded waiting; he deemed it a privilege to linger in this house! He loved to study the place, so reflective of its owner. He loved the white Colonial mantel that surrounded the fireplace, perpetually alight, with its gleaming sheen of old brasses, and the glittering fire-set to one side. The very air of the place, the atmosphere that it breathed, was sweet to him.

The Napoleon bed that filled the bow window, with its pillows and soft coverings; the inlaid walnut cabinet made by Sheraton, with its quaintly curved glasses that reflected the old-time curios within; the tilt tables, the rosewood chairs, the rugs, bought before the oriental rug market was flooded with machine-made Senna knots—about everything here had an air of comfort, of long use, of restfulness. It was not the sort of place built up, raw item by raw item, by the color-frenzied hands of decorators. It was the sort of place that decorators strive desperately to imitate, and cannot.

When she made her appearance, Gramont bent over her hand and addressed her in French.

"You are charming as ever, Shining One! And in years to come you will be still more charming. That is the beauty of having a name taken direct from the classics and bestowed as a good fairy's gift—"

"Thank you, monsieur—but you have translated my name at least twenty times, and I am weary of hearing it," responded Lucie, laughingly.

"Poor taste, mademoiselle, to grow weary of such beauty!"

"Not of the name, but of your exegesis upon it. Why should I not be displeased? Last night you were positively rude, and now you decry my taste! Did you leave all your manners in France, M. le prince?"

> "You ask anybody on the inside if they ever heard of Memphis Izzy Gumberts!"

(TO BE CONTINUED.)

Daily Thought.

Virtue is bold, and goodness never fearful.—Shakespeare.

Daddy's Evening Fairy Tale

BY MARY GRAHAM BONNER

COPYRIGHT BY WESTERN NEWSPAPER UNION

MR. ELEPHANT.

Billie Brownie was paying a call on Mr. Elephant.

He had promised to take back to the other Brownies the latest news from the elephants, and Mr. Elephant was ready to tell Billie Brownie what they had been thinking and talking about.

Billie Brownie was always delighted to call on Mr. Elephant, for he was a great friend of his. Oh, yes, he was very fond of Mr. Elephant.

Sometimes Mr. Elephant danced for him and that always delighted Billie Brownie.

Now and again he would dance with his keeper and show off all his tricks.

But this time Billie Brownie just wanted to have a chat with Mr. Elephant so as to hear the news.

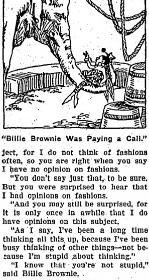
"I've been thinking about many things," said Mr. Elephant after he and Billie Brownie had greeted each other.

"Of course when I speak about fashions I never know but what everything may change before I so much as get out my opinions on fashions."

"I never really knew you had opinions on fashions," chuckled Billie Brownie. "I'm learning."

"On this fashion in particular," said Mr. Elephant.

"It has taken me a long time to get all my thoughts together on this subject, for I do not think of fashions often, so you are right when you say I have no opinion on fashions.



"Billie Brownie Was Paying a Call."

"You don't say just that, to be sure. But you were surprised to hear that I had opinions on fashions.

"And you may still be surprised, for it is only once in awhile that I do have opinions on this subject.

"As I say, I've been a long time thinking all this up, because I've been busy thinking of other things—not because I'm stupid about thinking."

"I know that you're not stupid," said Billie Brownie.

"Good," said Mr. Elephant, "for I'd hate to be thought stupid—especially by my good friend, Billie Brownie.

"And then, too, as I was saying, the fashions may change before I even tell my story—I'm taking a long enough time about it!

"I don't know what we'd do if there were fashions in elephant land as there are in the people's world.

"Now, for example, this fashion for ladies to hide their ears. Young girls do the same. They cover their ears with their hair.

"I've not seen any boys or men do this as yet—but maybe the fashion will spread to them too.

"There's no telling. Far be it from Mr. Elephant to say.

"Of course they'd have to let their hair grow if they were going to follow the fashion. That is one of the reasons we could never follow such a fashion.

"We'd have to grow long locks—perhaps they wouldn't have to flow but they'd have to be fairly long. And then we'd have to wind our hair about and over our ears.

"And as I see no way of our getting hair I'm sure the fashion will never come our way.

"And if it did, what a horrible time there would be! How would people know us apart? Ears are so important in our world.

"Now Miss Smith, doubtless, looks quite different from Miss Jones, even though they both have their ears covered.

"But how could folks know Miss Indian Elephant unless they could see her dainty, triangularly or three-corner shaped ears? And how could they recognize the West African elephant family if it weren't for their lovely little round ears?

"And the pride and joy of the great African Elephant family are the large flapping ears they can show!

"Oh, it would be a fashion that would never do in elephant land.

"The ears of humans are so unimportant that it matters not if they cover them up, poor dears!

"With elephants it is so very, very different!"

And Billie Brownie agreed as he thought amusedly of how absurd it would be if there were fashions in elephant land such as there are among people!

Out of the Mouths of Babes.

Two little tots were watching the clouds near the horizon one evening, when one exclaimed: "Oh, see the sheet lightning!"

Shortly after there was a smaller flash from the small cloud, and the other cried out: "Oh, there is some pillowcase lightning!"

BOWRON SOUGHT RELIEF 40 YEARS

Tanlac Restores Los Angeles Man to Splendid Health After Everything Else Had Failed.

"Tanlac has done me more good than all other medicines and treatments combined, and that's saying a great deal, for I was a sufferer from indigestion forty years and have tried every kind of medicine that came my way," said H. H. Bowron, 1635 W. 17th St., Los Angeles, Cal.

"I could hardly stand the bad spells I frequently had with my stomach. I was weak and nervous, had no appetite, and I felt miserable generally. Nothing I took gave me more than temporary relief and I gradually grew worse.

"About two years ago Tanlac put me in splendid condition and it has been my standby ever since. Whenever I get to feeling a little off, a bottle or two puts me in fine shape. I eat heartily now, sleep fine, have no distress after meals, and, in fact, am enjoying splendid health. Tanlac is just the thing for those who suffer as I did."

Tanlac is sold by all good druggists.

VAST RICHES OF OLD SPAIN

Luxury Surrounding Grandees of Three Centuries Ago Can Hardly Be Imagined.

The luxury displayed at the present age by the great of Spain can in no way compare with that of their ancestors of three centuries ago.

The duke of Albuquerque, we were told recently by the marquess of San Simon, can boast of being the owner of many pieces of furniture made of silver left to him by his father.

In order to weigh and make the inventory of the silver and gold tablesets which were left, it was necessary to devote two hours per day for a period of six weeks. There were 1,400 dozens of dinner plates, 500 large platters and 700 smaller ones, all else being in proportion to this magnificence. Among other relics he has 40 silver step-ladders which were used to ascend to the tops of the cupboards which held these treasures.

The duke of Alba, who says that his father was not the richest, had left him 600 dozens of dinner plates and 800 platters made of wrought silver.

Don't Forget Cuticura Talcum

When adding to your toilet requisites. An exquisite face, skin, baby and dusting powder and perfume, rendering other perfumes superfluous. You may rely on it because one of the Cuticura Trio (Soap, Ointment and Talcum). 25c each everywhere.—Advertisement.

Conscientious.

At one o'clock in the morning the conscientious Smith college freshman tiptoed downstairs and knocked loudly on the housemother's door. Grabbing kimono and slippers in great haste the housemother ran to the door to see what all the excitement was about. A loud knock at 1 a. m. surely meant nothing less than a fire. "Oh, Mrs. Henry," said the conscientious freshman excitedly. "I sneezed a couple of times and think I must be getting a cold. You know Doctor Gilman said in hygiene lecture that the minute we felt a cold coming on we must tell the housemother about it!"

Grammar Doesn't Improve.

With all the money spent on public education the standard of public speech does not seem to improve much. At a recent ball game when a man fainted the announcer paraded in front of the grandstand calling loudly, "Are there a doctor in the audience?" At the circus the ballyhoo man for the tattooed advised the world, "Have your work did here." And the police department still paints on the streets, "Drive careful." — Detroit News.

Classy Dressers in 1776.

The following was the uniform for the officers of the corps, by order of the "Marine Committee," dated September 5, 1776: "A green coat faced with white, round cuff, slashed sleeves and pockets, with buttons round the cuff, skirts turned back, buttons to suit the facings; white waistcoat and breeches edged with green, black gaiters and garters." The order also stated that green shirts were ordered for the men "if they can be procured."

Spring Weather.

"Why have you let your entire force go to the ball game."

"Well, I get very little work out of them in spring. All their efforts go to putting the windows up and down."—Louisville Courier-Journal.

Any man may forget to wind his watch, but the flight of time goes on just the same.

Saying "beauty is but skin deep" never consoled anybody.

"POSSUM AND TATER TIME"

Georgia Editor Also Writes of Other Good Things to Eat and Drink in Seasons.

Persimmon beer is here. That season in which this moderate type of "home brew" is being served from large barrels at the country farmhouses. Really this drink, when properly made, is delicious, is suggestive of a few other things that a tired, hungry editor longs to see. It is suggestive, first of all, of the ginger cakes, like our "mammy" used to bake—large, dark-brown home affairs that really had a flavor of ginger in them—ginger that must have been gathered when the ginger crop was at its best. It suggests the season of the "possum and tater" feasts—times when the community life is astir by the fumes from the baking pan. Did you know that "possum am good?" It is, when properly prepared, a meat that is unequaled, especially if you barricade the brown ribs and fleaks of flesh with several big yellow yams—yams that can be seen partly in and partly out of the rich, brown gravy. Hold on a minute. Don't do anything rash. This is enough to sharpen the appetite of any man, we admit, but never cross the bridge until you get to it.—Walton (Ga.) News.

Elaborate Responsibility.

"It's a busy life," remarked the man who was waving a palm leaf fan.

"How have you been occupying yourself?"

"Voting. It's everybody's duty to vote. In addition to voting for state, county and town officers, I voted in the primaries, got elected as a delegate and voted over and over in the convention. Of course, I'm going to vote in the fall election, and I only hope they'll let me round out my record by putting me in the electoral college."—Detroit News.

Hobson's Choice.

He—"Do you believe in indiscriminate kissing?" She—"Oh, well it's better than none."

Thieves are bound to their profession by hooks of steal.

SEEK WAY TO STOP STRIKE

Conference Called By Harding Gains Little Headway In Coal Strike.

GUARDS MAY BE CALLED

President Harding Has Conference With Coal Mine Workers to Find Way For Stopping Coal Strike.

Chicago.—The conference called by President Harding to devise methods of settling the coal strike assembled, listened to the president's admonition that if the settlement effort failed, "the servants of the American people will be called to the task in the name of American safety," separated into one gathering for the anthracite industry, and a second for the bituminous, and adjourned in a double deadlock.

The bituminous representatives, by far the larger group, after a controversial session, adjourned, while the anthracite contingent set its next meeting for early this week.

Only the intervention of Secretaries Hoover and Davis, the government representatives in the bituminous meeting, prevented a vote being cast on which those negotiations might have ended.

Representation Questioned.

Hardly had the bituminous delegates assembled in the executive session after hearing the president's address of welcome, before John L. Lewis, president of the United Mine Workers of America, raised a question as to the representative character of the operators' spokesmen present. He demanded to know why the New River and Kanawha fields of West Virginia, the upper Potomac fields of Maryland, and Kentucky and Tennesseee, had no representatives present. A. M. Ogle, president of the National Coal association and also chairman of the conference, responded that operators' representatives had been named "only from those districts seeking a conference with the miners' union." Secretary Hoover intervened at this stage and the matter for the time being was passed over.

RAIL STRIKE 100 PRECENT

Rail Shopmen Out All Over U. S.—Strike 100%, Says Jewell.

Chicago.—Telegraphic reports from 128 of the 201 class one railroads in the country showed a walkout of railroad shopmen that B. M. Jewell, head of the railway employes' department of the American Federation of Labor, termed "practically one hundred per cent."

Although reports on the effectiveness of the strike are supposed to go to the international headquarters of the six shop craft unions, Mr. Jewell said he hoped to correlate the results and be in position to give information concerning most of the roads in the country very soon.

See Traffic Interference.

Conferring with newspapermen, Mr. Jewell predicted the strike would interfere with traffic on the railroads of the country within a week and on some roads within two or three days.

Asked as to the basis of a settlement on which the strike could be called off, Mr. Jewell said his letter to Thomas DeWitt Cuyler, head of the railway executives organization, "spoke for itself."

This letter, sent to Mr. Cuyler a few days ago, demanded that the wage decrease for shopmen authorized by the United States railroad labor board be not put into effect, that seven working rules fixed by the labor board and to which the shop crafts object, these relating principally to overtime pay, be continued as they were before the board acted, and that the railroads stop the practice of contracting out shop labor to outside agencies."

"Why Invite Trouble?"

"Would you welcome interference from the White House in the shop men's strike?" a reporter asked.

Mr. Jewell laughed. "Why invite trouble?" he replied.

Chicago.—The walkout of four hundred thousand railway shopmen assumed an even more menacing aspect as the strike threatened to spread to eight hundred thousand additional rail workers in the maintenance of way and clerical departments.

Lisbon—Gasoline motor service on the N. P. between this point and Fargo will be inaugurated July 10.

Grand Forks—Figures from the federal department of agriculture indicate that North Dakota shipped out 10,466 carloads of potatoes during the year ending June 3, 1922. Less than 2,000 carloads were shipped during the previous year.

Old Soldiers Hold Strange Jobs.

Berlin.—What has become of the former officers' corps of the German army? It is not an easy matter to answer this question, as this once efficient body of soldiers has been blown by the winds of fate to the four corners of Germany. Germany was disarmed and disnavied by the terms of the Versailles treaty, whereby thousands of men were tossed out of a supposedly lifelong career into the maelstrom of changed social and economic conditions; another fraction was absorbed by the civil service.

The Young Mother.

THE ILLS OF INFANTS AND CHILDREN should be so well known to the youngest of mothers that a reminder or a repetition of the symptoms of illness seems unnecessary, yet there are some mothers who overlook a feverish condition, a little colic, or a disposition to be irritable. If not corrected they may lead to serious sickness. And to correct them, to bring Baby back to its happy self, is so easy by the use of Castoria—a medicine prepared just for infants and children. It will regulate the bowels (not force them), aid digestion and so bring quiet and rest.

Fletcher's Castoria has been doing this for over 30 years; regulating the stomach and bowels of infants and children. It has replaced the nauseating Castor Oil, so-called Soothing Syrups, poisonous Paregoric and other vicious concoctions in the homes of true and honest mothers—mothers who love their children.

Those mothers will give their babies foods and medicines especially prepared for infants and children.

Children Cry For Fletcher's CASTORIA

A Word About Truth.

"Great is Truth, and mighty above all things." So says the Old Testament, yet it is equally true to-day. Truth shows no favors, fears no enemies.

From the inception of Fletcher's Castoria, Truth has been the watchword, and to the conscientious adherence to this motto in the preparation of Fletcher's Castoria as well as in its advertising is due the secret of its popular demand.

All imitations, all substitutes, all just-as-good preparations lack the element of Truth, lack the righteousness of being, lack all semblance even in the words of those who would deceive.

And you! Mothers, mothers with the fate of the World in your hands, can you be deceived? Certainly not.

Fletcher's Castoria is prepared for Infants and Children. It is distinctly a remedy for the little-ones. The BABY'S need for a medicine to take the place of Castor Oil, Paregoric and Soothing Syrups was the sole thought that led to its discovery. Never try to correct BABY'S troubles with a medicine that you would use for yourself.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

MRS. THEO. TANDBERG
Associate Editor

Entered as second-class matter at the postoffice at Goodridge, Minn.

E D I T O R I A L

PATRONIZE THE ELECTRIC LINE.

The Banner cannot too strongly urge consistent support of the Electric Line on the part of the people of Goodridge and vicinity, both with reference to freight and passenger traffic. Few towns in the northwest have better rail service than that furnished Goodridge and the other towns on the Electric. It would be deplorable, therefore, if substitute truck and bus traffic should reduce the business of the railroad to such an extent as to imperil the present excellent service.

We know the line has been operated at a loss to the company, and as those who have invested their money in the enterprise wait for conditions to sufficiently improve to give them some return upon their stock holdings, the least we people along the line can do is to give them all possible encouragement by refusing to patronize competing concerns.

Des Moines, Iowa, lost her street car system by patronizing the jitney busses and other towns much more important than Goodridge have lost the advantage of rail service by encouraging independent competition. It must not be forgotten that even tho we might arrange to get along without a railroad when roads are good in the summer time, motor trucks cannot serve us in the winter, and that is where the rub is liable to come.

Another important consideration is our mail service, which would be seriously hampered by any reduction in service by the Electric Line. It should be apparent, therefore, that every time we take business away from the railroad, we are gnawing away our own vitals.

THE JURY SYSTEM.

"What 12 Human Mutts May Do" is the heading over a lengthy editorial published last week in the Minneota Mascot under the able pen of Gunnar B. Bjornson, former president of the Minnesota Editorial Association, and indicates in a powerful manner that the present jury system in this country is not altogether to the liking of Mr. Bjornson and that there is something sadly lacking somewhere.

The phrase, "What is the constitution between friends?" has for a long time guided the deliberations of juries in this country and the proposition of providing a remedy for the present ill method of trying men for crime has for years baffled jurists and lawyers and it is highly probable that it will continue to baffle for still some time to come.

In summarily dismissing a jury that had acquitted a man obviously guilty of robbery, Judge Kavanagh of Chicago, said to its members: "Your verdict is a disgrace to the citizenship of this state. It shows conclusively that you have either disregarded the evidence and the facts in the case or you have deliberately sought to free this man."

It is obviously useless to try a man before a jury that is imbued with the feeling that once found expression in the phrase, "What is the constitution between friends?" If the members of a jury have no great respect for law and the protection it offers honest citizens in their business and daily life, if they are swayed by a feeling of the so-called "good-fellowship" that a man ought not to be made to suffer very much for "minor burglary," it is useless to waste the public money by trying cases.

The makeup of a jury is a serious matter. The ends of justice can hardly be furthered by the selection of 12 human "drifters," with no great stake in the community or in the preservation of order, some of them naturally opposed to all law and glad to baffle it; others not much concerned either way and ready to agree to almost any verdict to save themselves trouble.

In his remarks to the discharged Jury, Judge Kavanagh said: "The next jury impaneled will consist of men who appear to have more than average intelligence or who show by their appearance and answers that they are of a character to injure justice in their decisions."

We hear much about an "incorruptible judiciary," but the honestest and wisest of judges are baffled by a panel of 12 human "mutts" with no present vision and no possible foresight nor hindsight to comprehend by what slow and torturous ways the race has crept up to the attainment of whatever measure of imperfect justice it has achieved out of the vast injustice of the past, and no care to preserve what has been so won and to broaden and better it.

The selection and character of the jury of today are [illegible]. What 12 human "mutts" may or may not do, no man can tell. Sometimes it seems that the frequently advocated plan or a "professional" jury list, made up by men chosen for the task, and with no other occupations, might possibly furnish a better system. But this plan, too, has its disadvantages.

THE RED LAKE ROAD.

The people in the vicinity of Goodridge have more than an ordinary interest in the progress of the work on the Red Lake road.

This highway will become at no great future date the most accessible means of reaching a body of water which is already famed in every section of the United States. It will bring to this section a tourist travel which is immensely valuable, not merely for what they leave as pay for board and lodging, but more particularly for the opportunity it gives us to show them a country rich in natural resources and which only needs more settlers to make it blossom like the rose.

We might enumerate a hundred different ways in which this important highway will be beneficial to our section of the country, and there are that many reasons why we should all become enthusiastic boosters for this project, which passes our very door.

This is the vacation period for town people, but we can name a class of people who need a vacation better than anyone else, but who can always be found at the post of duty, morning, noon and night, early and late, summer and winter, who never complain, but meet visitors with a smile and show upon all occasions the finest kind of hospitality. We desire right here to speak for a vacation of some kind, be it ever so short, for the women who work on the farms.

A hundred different reason have been advanced for the defeat of Senator McCumber of North Dakota. Our best guess is that he was defeated because his opponent got most of the votes.

We will never have much faith in the efficiency of the postoffice department until Goodridge gets that new proposed route which will give better mail service to a large number of farmers south and east of this village.

A South Dakota man digging for grub worms unearthed a five-gallon jug of perfectly good whiskey. That kind of fortune must be what is meant by the term, "Fisherman's Luck."

If the postoffice inspectors rule against us this time, The Banner promises to take the matter to a higher court.

GOT $48.89?

If you possess, either in your pocket, sock or favorite bank, more than $48.89, Mr. Reader, you have no business kicking about a lack of money. For if all the money in circulation in the United States were equally distributed today, your share would be exactly that amount. These interesting figures were announced officially last week by the treasuary department at Washington as the per capita circulation on May 1. And it is interesting also to note, that the amount is 92 cents less than it was on April 1. Total money of all kinds in circulation, according to the report, is $5,352,255,730. On April 1 it was $5,466,161,844. On May 1, 1921, the total in circulation was $6,158,170,819. The per capita figures are based on an estimated population of 109,468,000. In 1879 the total amount of money in circulation was only $816,266,721. At that time the country, with a population of 48,331,000 had a per capita circulation of $16,92. So now, if you have $50 consider yourself a plutocrat.

The man who is really worth while, it seems to us, is the man who pays his bills as he goes, treats his family and his friends fairly and squarely and is above board with all mankind. He puts a curb on his tongue, and keeps his hands busy with good deeds; he refrains from petty and malicious gossip and talks the gospel of good fellowship. Such a man may never achieve great fame, but he is sure to win a place in the hearts of all who know him. His memory will always be a thing to cherish, and when he has quitted this life, and his soul has departed for the mysterious unknown region, his friends may well and truly say of him: "He was a man." No higher praise, no better epitaph need be given or written.—Ex.

A lot of lads who say they don't like mathematics will be at the beach this summer to study the figures.

After seeing a certain man give a dime to a cripple, we have concluded that the age of miracles is not past.

[illegible] the country editor is criticized because he [illegible] the local news out of [illegible]. Always every home talent play is presented by amateurs who do as well as professional thespians. The ball player who boddles his plays has the mantle of charity thrown about him. The home boy or girl appearing in vocal or instrumental recital is reported to be—well, you know how the home-town editor stands by the home town through thick and thin. And it is kindly and neighborly to do it this way, even though the report is sometimes rather inaccurate, don't you know.—Jordan, Minn., Independent.

Of course it is; the principle has always been well recognized and handed down. A managing editor will tell his copy readers to "overhead" their [illegible] community, it is always better to "overpaint" rather than underpaint. The thing to do is to put the best side out every time, and to stand up for one's home community.

The editor is on safe ground when he idealizes the town hall into an opera house, the village green into a park, comfortable dwellings into mansions, and geese in general into swans. The aim is not the unworthy one of deception, but the nobler one of making the best of things. It is all a sort of grown-up game in which the editor and his staff of correspond[illegible] ought to see the older children amusing the younger ones.

FARMERS INVITED TO EXPERIMENT STATION

Day Is Set Aside for "Gawkers" at Crookston State Farm Station.

Farm clubs and township Farm Bureau groups in several counties of this section of Minnesota have set aside a day to visit the Northwest Experiment Station at Crookston, and to inspect the work being done there.

Instead of one big visiting day this year, there will be several each week until harvest. The school and station staff extend a cordial invitation to all to come.

The display of crops this year at the station is said to be unusually attractive and already harvesting has been started on a small scale, although the bulk of the crops are still in the growing state. The experiment farm entertains large numbers of visiting agriculturists each day, who are enthusiastic in their praise of the work being done there.

The school and station staff extend a cordial invitation to all to come. Write Superintendent Selvig when you are coming. Usually the group that comes bring picnic lunches or suppers. A very valuable and interesting afternoon can be spent at the Red River Valley Experimental Farm.

FARMERS ELEVATOR COMPANY ELECTS OFFICERS FOR YEAR

The annual meeting of the Farmers Elevator Company of Goodridge took place Tuesday afternoon. The only business of importance transacted was the election of officers, which are as follows: Emil Grams, president; Elev Aakre, vice-president; A. B. Mandt, secretary and treasurer. John Johnson and John Nelson were elected directors.

HIGH SCHOOL GRADUATES HEAD LIST IN STATE EXAMS

The state examination returns were received and distributed Friday, July 7, in High school and eighth grade subjects. The returns were found to be quite satisfactory. Christina Bundhund and Daniel Payne, both graduates of this year's class, have the distinction of heading the list with receiving six certificates each.

Miss Hattie Bundhund Hostess.

Miss Hattie Bundhund was hostess to a number of her girl friends Monday afternoon, the occasion being her fourteenth birthday anniversary. The invited guests were Mable Johnson, Tena Gaudland, Florence Halvorson and Vera Larson. The afternoon was spent in playing games and at the close of the afternoon a very delicious lunch was served.

FOUR CARLOADS OF STOCK ARE SHIPPED FROM HERE

Four carloads of cattle were Saturday shipped out of Goodridge. One car was shipped by Oscar Stenvick and the other three by Mike Tunick, both cattle buyers. The cars were shipped to the South St. Paul stockyards.

P. O. Tvedt and family returned from Hope, N. D., where they spent the Fourth. Mr. Tvedt's sister, Eunice, went with them and will remain for some time visiting.

Mrs. Lee Babcock and family arrived here Friday morning to spend a few days visiting at the home of her parents, Mr. and Mrs. Nick Bundhund.

B. O. Norby was here Friday attending to school affairs. He left Friday evening to attend to business affairs at Oklee and from there will go to Eyota, Minn., where he will attend to school matters. He expects to spend about a week there before returning.

MAIL ROUTE IS FAIRLY CERTAIN

Postmaster General Writes to Goodridge for Further Data.

H. H. Billings, Fourth Assistant Postmaster General, in a letter to Mrs. Payne, Goodridge postmistress, has written for information regarding the establishment of the long sought for delivery from the inadequate mail service which has for so long hampered farmers living to the west and south of Goodridge.

The tone of Mr. Billings' letter indicates that the officer is in sympathy and giving the latest petition and appeal of signers to the document earnest consideration, and it is now thought fairly certain that the route will be established within the near future.

While definite consenta has not been given, it is thought that in the event the right sort of pressure is brought to bear upon the department, it will undoubtedly signify its approval in the matter.

In this connection, The Banner would suggest that as many as possible of those affected by the proposed route make personal appeals to the department in order to bring about a correction of the present service.

While the petition has no doubt had good effect in calling to the attention of the department the disadvantages of the Torgerson route to many farmers living to the west and south of Goodridge, a personal letter addressed at this time to the Postoffice Department by every one who set their names to the petition would indicate in a more forceful manner the great need of it.

If you would have better mail service, be a part of the unit that is endeavoring to bring it about. The very least you can do is to sit down and write the department, stating your grievences in a simple and concise way. T two-cent postage stamp spent by you may mean the necessary leverage to securing the route.

DO IT TODAY!

STOCK JUDGING CONTEST JULY 19

Juvenile Cattle Breeders of Goodridge Expected to Enter.

The first stock-judging contest given by the Merchants Association of Thief River Falls will be held Wednesday at 2 P. M., July 19th.

A calf exhibit will also be held at that time and all boys and girls, or others having calves under one year old, are requested to bring them in in order to have a good showing and receive the substantial premiums offered by the Association.

There will be two judging contests, one for the older people living on the farms and the other for boys and girls of school age. The first one (Class A) will be for farm men and women over 20 years of age. Premiums for this contest will be as follows: First prize: $5; second, $3, third, $2, and the next two $1 each.

Class B will consist of boys and girls under 20 years of age who have not taken part in any state or district contest in stock judging. The premiums for this class will be the same as for Class A. One ring of Holsteins and one ring of Guernsey calves will be placed for the contest, 50 per cent given on reasons and 50 per cent on placings.

The premiums for the best calf will be as follows: Guernsey class—First, $5; second, $3; third, $2, and the next three $1 each. Holstein class—First, $5; second, $3; third, $2, and the next three $1 each.

TO UNDERGO OPERATION.

Albert Halvorson left Wednesday morning by auto for Warren, where he will undergo an operation for gall stones. Mr. Halvorson has had two severe attacks recently and last Saturday went to Warren to consult Dr. Bratrud, who advised him to return immediately for an operation.

Dr. H. W. Froehlich of Thief River Falls made a professional call at the Own Olson home Saturday, their little son, Stanley, being ill. He is getting along nicely.

WTIHDRAWS FROM LOCAL STORE FIRM

M. G. Thoreson Severs Connections With the Goodride Mercantile Co.

H. M. Thoreson, who for the past yeight years or since the organization of the Goodridge Mercantile Company, last week severed his connection with the company and will engage in other business enterprises in this village.

Mr. Thoreson, during his connection with the company, has acted as secretary and has made many friends for the well-known business institution, who regret to hear of his decision to withdraw.

Mr. Thoreson, however, will continue to make Goodridge his home in future and has already engaged in the farm machinery business and has opened an office in the building formerly occupied by a land company, one door east of the Goodridge hotel. A supply of binder twine will shortly be shipped here and Mr. Thoreson will confine his activities to the distribution of the twine to local farmers. He also has secured the agency for the Minnesota line of farm machinery and, while he will not for the present put in a stock here, will make a thorough canvass of the surrounding country in order to place this well-known line among the farmers of Eastern Pennington County. He has had a number of years of experience in the machinery line and it is believed he is well qualified to handle his newly-acquired line.

An announcement in another column of The Banner contains the advertisement of Mr. Thoreson for Minnesota binders, mowers, rakes, etc., and farmers who are in need of articles of machinery are invited to come in and see him before concluding deals for implements. He states that he can have such machinery in Goodridge in a few days and guarantees that his service is as good and better than the best.

Herbert Fuller and son were in Goodridge Thursday afternoon in the interests of the Pennington County Fair to be held August 2, 3 and 4.

"RAINBOW" DIVISION TO HOLD REUNION

Members of Famous Fighting Unit to Convene in Minneapolis.

Members of the famous Rainbow Division (the Forty-second) from every state in the Union will meet in Minneapolis July 14 and 15, for the third annual convention of the Rainbow Veterans Association.

Minnesota is particularly interested in the Rainbow Division, for to that unit was attached the 151st Field Artillery, composed entirely of Minnesota men and the only Minnesota regiment which served overseas as a unit.

Minnesota officials of the Rainbow Association are making an effort to have every man who served in the Forty-second Division in the state attend the Minneapolis convention.

George E. Leach, who was colonel of the regiment, is now mayor of Minneapolis. He is president of the National Association and is making a personal appeal to former members of his regiment to make the trip to Minneapolis for the Rainbow convention.

In a letter to The Banner from Louis Collins, lieutenant-governor, he states that this meeting will be the first national meeting of any divisional organization in Minnesota since the war and will bring to Minnesota such famous national figures as Father Duffey of New York, chaplain of the "Fighting Irish Regiment," the 165th.

Headquarters for the convention are now in the mayor's office in Minneapolis.

ARRIVE FROM CHICAGO.

Mrs. Roy Brown and Mr. Brown's mother, and their little son and daughter, arrived here last Friday from Chicago. Mr. Brown has farming interests here and his family has come north to spend the summer with him. They are now living at the Jershaugen farm. They are making this trip their summer outing and expect to return to Chicago in the fall, where they make their home.

M. G. Thoreson transacted business at Thief River Falls Wednesday forenoon.

SEVER ANDERSON TO ERECT NEW RESIDENCE BUILDING

Sever Anderson has recently purchased a nine-acre tract of land just south of the stockyards from the Empire Lot Company. In the near future Mr. Anderson plans to erect a residence on his newly acquired property. He is now breaking up the land and will put in a garden. This is another good piece of evidence that Goodridge is not at a standstill.

SURPRISE PARTY IN HONOR OF YOUNG HAROLD OLSON

Sunday afternoon the Martin Olson home was the scene of a surprise birthday party in honor of young Harold Olson's twelfth birthday. Those present were Ruth and Harry McDonald, Buddy Ferdinandson, Enice and Hazel Thoreson, Vera Larson, Edith Gunderson, Myrtle Stephenson, Howard Seavey, Fernley Josephson, Morris and Georgia Resan, Raymond and Sidney Stephenson and Stanley Olson. At the close of the afternoon a delicious lunch was served by Harold's mother and the little folks all departed wishing Harold many more happy birthdays, and assuring him that they had had a fine time.

Elmer Peterson shopped here Saturday.

Christina Bundhund returned to Goodridge Friday morning after having spent a few days visiting friends and relatives at Thief River Falls and Bemidji.

Peter Engelstad, secretary of the Thief River Falls Co-Operative Cream Association, and Mr. Olson, were here Friday attending to business pertaining to the local creamery.

Mr. and Mrs. J. M. Bishop of Thief River Falls were dinner guests at the Bundhund home Tuesday. They also transacted business here during the day.

DIAMOND PRESS ARRIVES FOR PLANT

The Banner Installs Latest Thing in Small Cylinder Newspaper Press.

In compliance with its policy of always printing the best little newspaper in Northern Minnesota and in order to maintain its standard, The Banner this week installed a new Diamond cylinder newspaper press, which was purchased from the Union at Ulen, Minn., and until recently employed by that newspaper in producing its newspaper.

The Diamond news press is shortly to be harnessed to a gasoline engine, now a part of the plant, after which The Banner will be issued on each Thursday evening from its own plant.

The old Vaughan hand press, formerly a part of The Banner equipment, has been sold to the North Mankato Review and will be shipped there some time early next week.

It is expected that with the addition of the new news press in The Banner office, this newspaper will boast one of the most up-to-date newspaper plants for a village the size of Goodridge in this section of the state—all power equipment, and with the addition of several other articles of printing machinery, no plant, outside of the larger cities, will be better enabled to print a readable newspaper and produce a better grade of printing.

As has been done during the past several weeks, the typesetting for The Banner will be done on the linotype machines of The Tribune at Thief River Falls, and the old style "body" type now in possession of this newspaper will be sold to other country shops.

August Anderson of Thorhult shopper here Monday.

NEWS REVIEW OF CURRENT EVENTS

Maintenance of Way Men Postpone Strike and Shopmen May Return to Work.

CHANCE FOR A COMPROMISE

President Harding's Utterances on the Industrial Situation—Irish Republicans, Routed in Dublin, Still Fighting—Russia's Amazing Budget Submitted to the Hague Conference.

By EDWARD W. PICKARD.

LABOR troubles, present and prospective, continue to absorb much of the interest of the American public. The railway shopmen are out—practically all of them, according to B. M. Jewell, head of the six federated shop crafts; not nearly all of them, according to the railway executives. The maintenance of way workers, who were expected to strike last week, are still at work. E. F. Grable, president of their brotherhood, and six members of his executive council, held an all-day conference with the members of the railway labor board and then issued a statement saying they had concluded "it is not wise for our membership to leave the service of the carriers until every resource has been exhausted that affords hope of a peaceful adjustment." The chairman on each carrier is to take up at once with the management all grievances and controversies and such as cannot be adjusted are to be taken before the labor board. Pending these efforts at peaceful settlement the men are to continue work under the present wage decision of the labor board under protest.

Mr. Jewell celebrated his Fourth of July by putting forth a long statement in which he bitterly arraigned the labor board because it had "outlawed" the striking shopmen. He declared the board had outlawed itself as the friend of the unions and had "adopted a tragic attitude in attempting to compel American workers to accept a wage scale below decent living." True, the board had in effect declared the strikers outlawed and had invited recruits to fill their places, promising them protection and urging them to form a new shopmen's union within the American Federation of Labor. But in a day or two both Mr. Jewell and Chairman Hooper of the board became milder and the peace prospects brightened somewhat. The former said he was not averse to dealing "with any authorized person on any reasonable basis," and the latter issued a statement in which he undertook to show that the board was protecting the interests of the striking shopmen by advising carriers against contracting out shop work, and also wrote a letter to Mr. Jewell repudiating the charge of injustice on the part of the board and concluding:

"I am yet quite hopeful that your organization will recover their equilibrium and discern that it is vastly better for them to go along with the railroad labor board, patiently when it makes mistakes, but confidently at all times that it profoundly desires to do justice to the men, the carriers, and the public, without fear, favor or affection."

Toward the end of the week W. L. McMeniman, one of the labor members of the board, held conferences with the heads of the railway clerks and freight handlers, and it was predicted that those unions would follow the example set by the maintenance of way men.

Though most disorders last week due to the shopmen's strike were of minor importance, reports reached Washington in increasing numbers that strikers were interfering with the dispatch of the United States mails in various parts of the country. The administration is disposed and prepared to deal vigorously with any persons who hamper the movement of the mails. Postoffice inspectors were sent to all points where trouble was likely to arise, and doubtless every federal agency necessary will be used to protect the mail trains and facilitate their regular movement.

PRESIDENT HARDING'S conference of representatives of the coal mine operators and striking miners in the White House brought no immediate results, but hope of peaceful adjustment was not abandoned and the conferees agreed to get together again July 10. They know that Mr. Harding has in reserve some drastic government action if they fail to agree, though he has not revealed its exact nature.

In Kansas the coal miners who supported the program of Alexander Howatt and who, with their officials, were expelled from the United Mine Workers of America, have decided to return to work, that being the only way they could recover their autonomy and be restored to membership in the union.

IN HIS Fourth of July speech at the celebration in Marion, O., President Harding had some significant things to say of the industrial situation. For instance:

"A free American has the right to labor without any other's leave. It would be no less an abridgement to deny men the right to bargain collectively. Governments can not tolerate any class or group domination through force. It will be a sorry day when group domination is reflected in our laws. Government, and the laws which government is charged with enforcing, must be for all the people, ever aiming at the common good."

Disclaiming any note of pessimism, he asserted that the republic is secure. "Menaces do arise," he added, "but public opinion will efface them. Meanwhile government must repress them."

These of course are truisms, but it is well that they should be repeated from time to time by the voice of highest authority.

General Pershing, who also spoke at the Marion celebration, was loudly applauded when he advocated fearless use of "the strong arm of the law" in communities which "openly sympathize with ruthless murder of inoffensive people in the exercise of the right to earn a livelihood."

CAPTURE of the Four Courts building in Dublin by the troops of the Irish Free State by no means ended the bloody conflict with the republican irregulars. The latter took refuge in hotels and other buildings in O'Connell street and there continued the battle until the shells of the regulars set fire to almost every structure in that part of the street. The conflagration could not be stopped and most of the rebels surrendered. De Valera, who was with them, was said to have escaped in disguise and fled to County Wicklow. Cathal Brugha, minister of defense in the De Valera cabinet, refused to surrender and was seriously wounded. Among the prisoners was Mrs. Terence McSwiney, widow of the late lord mayor of Cork, and Rory O'Conner, commander of the irregulars. The provisional government is now putting its entire military establishment on an active service basis and has issued a proclamation calling for recruits.

The republicans are preparing for a final struggle in the vicinity of Cork. That city is in their hands and, having Skibbereen, they claim control of the entire county, as well as of Counties Kerry and West Limerick, Waterford, East Limerick and parts of Tipperary and Kilkenny.

DESPITE the vigorous action of the government in Berlin, the monarchists have been stirring up trouble in many places in Germany. These were aggravated by the anti-monarchist demonstrations that were staged on July 4 by the Democrats and Socialists. One of the incidents of the week was the attempt to assassinate Maximilian Harden, the famous editor who is so thoroughly hated by the reactionaries.

There is a movement on foot in Germany that is likely to upset the cabinet of Chancellor Wirth and result in the formation of a purely socialistic government in place of the present one, which is a coalition of minorities. To forestall this, an offer has been made to the Independent Socialists of a share in the government. The bourgeois parties fear that this would interfere with Germany's obtaining financial relief abroad.

IT LOOKS at this writing as though the conference at The Hague would come no nearer to settling the Russian problem than did that at Genoa. The soviet delegates in response to the demands of the allies submitted what they called the Russian budget, but Chairman Alphand of the commission characterized it as a "project" and the British called it "an amazing document." This budget admitted that one-fifth of the entire revenues consisted of new issues of paper rubles and undertook to show that the more rubles were printed the more valuable they became—amazing indeed. The budget figures, which were in gold rubles, were calculated on an arbitrary rate in paper rubles every three months. The allied experts were dazed by all this.

The Russians caused further dissension by putting out two questionnaires demanding to know the social positions, the professions, the revenues and the family positions of all previous holders of property, bonds and securities who have claims against Russia. Though told this was practically impossible and unnecessary, Litvinoff insisted his government must have this and other information as a basis for concrete proposals for the settlement of each case. Finally a list of the private agricultural claims of French, British and Belgian nationals was presented to him, and the matter was taken under further consideration.

Representatives of large financial groups have arrived at The Hague, and it may be that Litvinoff will be able to trade a lot of concessions for private credits and so carry back certain valuable results to Moscow even if the formal negotiations fall through.

WHEN the League of Nations assembly meets in September it will have a definite program for reduction of land and sea armaments. The league's commission on disarmament has been in session in Paris and has approved Lord Robert Cecil's plan providing for a general reduction of air and land forces under the supervision of the league, and for continental alliances against aggression. The commission also adopted the British scheme for extending the Washington naval accord to all nations. Objection to limiting the alliances to continents was met by the statement that no nation would be barred from aiding a country that was attacked, no matter on what continent.

SETTLEMENT of the Tacna-Arica dispute in the conference at Washington is delayed by the action of the Peruvian delegates. Chile had accepted the plan offered by Secretary Hughes, but the Peruvians have qualified their acceptance in such a way that further negotiations are necessary. Chile's attitude is explained by her spokesmen as a thoroughly conciliatory one, embracing a willingness to accept Peru's suggestion for any minor changes in the American formula so long as the major principles laid down by Secretary Hughes accepted by Chile are not disturbed.

DREARY tariff debates in the senate grow acrimonious occasionally, and now and then even interesting. Last Wednesday, for instance, Senator Shortridge of California found occasion to predict that a son of Ohio would sit in the President's chair for a good many years to come. Before he had a chance to explain that he was alluding to Mr. Harding he was interrupted by Senator King of Utah with the admission that the Californian was correct and the assertion that the son of Ohio who would occupy the White House next would be Senator Pomerene. King's fellow Democrats seemed to approve the suggestion, so the Pomerene boom may be considered as launched.

THE sporting event of the week was the prize fight between Benny Leonard, lightweight champion, and Rocky Kansas in Michigan City, Ind. It was Leonard's fight all the way and in the eighth round Kansas was technically knocked out, his seconds throwing up the sponge.

News of Minnesota

EVENTS of the week throughout the "State of Ten Thousand Lakes" told in brief form

Duluth—Howard Porter, 23, was shot through the abdomen when an "empty" revolver exploded in the hand of Alec Conlon, a companion.

Minneapolis—One million dollars in school bonds will be placed on sale August 9 when the Board of Estimate and Taxation convenes.

Minneapolis—Eighty-five Elks from this city, St. Paul, Montana and North Dakota lodges left for Atlantic City to attend the B. P. O. E. national convention.

Minneapolis—Holiday motorists, 122 of them, paid fines amounting to $625 in traffic court, one man went to the workhouse for 10 days and two were ordered to stay out of their cars until September.

Crosby—More than 100 citizens of St. Paul and Minneapolis drove into the city and the Cuyuna iron range to inspect the mines. They were met here by the Brainerd city band, which gave concerts both in the village and at the mines.

St. Cloud—Elaborate ceremonies marked the grand opening and dedication of the new $100,000 Knights of Columbus home in this city. The St. Cloud council at present ranks third among those of the state.

Hanley Falls—Fire destroyed the Ing Johnson hardware storage building here, all heavy machinery in the structure being a total loss. The fire is believed to have been started by firecrackers.

Hibbing—Only four jurors have been selected in the Frank Nosie murder case, under way in district court before Judge Martin Hughes. Nosie is charged with the murder of William Ruzic, a motorcab driver of Virginia, last fall.

Osseo—Osseo village and friends gathered at Weaver lake to commemorate the day 70 years ago when Pierre Bottineau, brought from out of the wilderness the French-Canadian settlers who were to found the town.

Minneapolis—Gaining entrance to a wholesale house by explaining that he wanted to fix the burglar alarm, reported out of order, a man robbed the T. W. Stevenson & Co. establishment of $385 in furs and a pistol.

Foley—Having realized about $1,000,000 in cash from the sale of potatoes in 1921, and with a goodly acreage in spuds this year, Benton county truck gardeners are now raising cabbages and beans in larger quantities than ever before. A pickling and preserving company has plans perfected for the erection of a large kraut factory here, and beans have been found to be a paying crop.

Rochester — Rochester's gigantic Fourth of July celebration under auspices of the American Legion, attended by thousands, failed to materialize at the last moment when a large supply of fireworks failed to arrive. Thousands crowded the park where the pyrotechnic display was to be, but they waited in vain.

Grand Meadow—Harry E. Wilson, defeated candidate for nomination for state senator in the Fifth district, compirsing Dodge and Mower counties, has started action to have his name inserted on the ballot in the November election in place of Senator W. A. Nolan, who died following the primaries.

Crosby—Charles Burkman, globe trotter of Halifax, Can., reached Crosby on his trip around the globe. He left Halifax Oct. 14, last to attempt to walk around the world for a prize of $29,000, subscribed by sportsmen of the provinces.

Minneapolis—Wholesalers and manufacturers of Minneapolis and St. Paul have united to conduct a joint Market Week in the Twin Cities July 31 to August 5. During that week the Executive Committee has announced that special attractions will be held out to merchants of the Northwest who will be invited to view the offerings of the Twin City wholesale market. An entertainment program has been arranged to make the visit enjoyable. There will be a fare and a half rate on all railroads to the Twin Cities July 29 to August 7.

Crookston—The Industrial Commission of Minnesota, has opened a free employment bureau at Crookston, Minn., primarily for the purpose of supplying the farmers of the Red River valley with farm help during the coming harvest, as well as supplying help of all kinds to employers generally in that section of the state. The Crookston office will be under the supervision of Theo. Garvik, county commissioner of Polk county, who has a wide acquaintance in that district and is thoroughly familiar with the industrial situation.

Minneapolis—Charles R. Forbes, director of the Veterans' bureau, will come to Minneapolis to inspect sites which have been offered for the proposed neuropsychiatric hospital for the Tenth district of the bureau.

Owatonna—Members of the five units of the Second Battalion, 135th Infantry, are ready for the annual encampment of the regiment at Camp Phillip M. Shelley, Lake City, according to Major Harold S. Nelson of this city. The battalion includes Company E of Jackson, F and Headquarters of Owatonna, and Company G and H of Austin.

[illegible] ate committee.

Minneapolis—Playing the Good Samaritan by [illegible] to a Negro who said he was hungry, cost Eric Lund $450, he told police.

Albert Lea—Irene, aged 6, daughter of Mr. and Mrs. Sylvester Mulcahy, of Albert Lea, died following burns received when a firecracker ignited her dress.

Minneapolis—Firecrackers thrown by small boys were blamed for 30 fires in Minneapolis and St. Paul on the Fourth, as fire marshals checked the list.

Willmar—Maloy Holland, aged 14, an orphan at the Bethesda Young Peoples home here, was drowned in Eagle lake while bathing. His body was recovered.

Minneapolis—Five drowned and five injured by explosions was the toll of the 1922 "safe and sane" Fourth of July in the twin cities, reported by authorities at hospitals and police headquarters.

Le Roy—In the city park here 11 memorial trees were dedicated in honor of Le Roy young men who gave their lives for their country in the World war.

Hibbing—Two policemen were shot and seriously wounded at Holman, 25 miles west of here, when they attempted to arrest John Lence, an alleged moonshiner.

Hastings—The body of an unidentified woman, about 40 years old, was found in the Mississippi river, near Grey Cloud island, about six miles from here.

Fergus Falls—Merle Robertson, aged 18, and Lenora Ruth, aged 19, killed themselves here with the same pistol, but there is no evidence that the double suicide was prearranged.

Willmar—The Fahlun town board has passed a resolution which prohibits Sunday dancing and prescribes that all weekday dances must close promptly at 10 p. m. An annual license fee of $500 also is asked.

Duluth—Bankruptcies filed in United States district court in Duluth for the fiscal year ending June 30 surpassed in number the total of any previous year sinec the enactment of the law, according to J. C. H. Engel, deputy clerk.

St. Paul—Co-operative marketing has added $75,000 to the value of wool on Minnesota farms this year, county farm bureau officers were informed by the Minnesota Farm Bureau federation, in an official statement.

Montevideo—The home of Mr. and Mrs. B. R. Turner was destroyed by fire, and their two children, aged 2 and 4, asleep in the second story, narrowly escaped death.

Ormsby—An entire city block containing a hardware store, general merchandise store and a residence was destroyed by fire. The blaze, which caused a loss of $25,000, is said to have started from a firecracker.

Hibbing—Members of the board of directors of the St. Louis County Fair association have decided to abandon the present site of the annual fair at Hibbing and to establish an exposition on the new site in south of Hibbing.

Hendricks—When a quantity of liquor was hauled over to South Dakota by Minnesota parties to be delivered to a supposed bootlegger's agent, the latter proved to be a federal agent and arrested five men who brought him the liquor.

Windom—The Farmers State bank of Windom, recently closed by the state banking department because of a depleted reserve, has reopened for business with assets of $558,522. H. E. Hanson continues as president of the institution

Minneapolis—Ralph W. Taylor, 30 years old, collector for the Pure Oil company, was held up by three auto bandits and robbed of $2,000 in cash, checks worth $1,000 and 25 negotiable coupon books.

Marshall—The First State bank and the Farmers State bank of Ghent have been consolidated and the new bank, with a capital of $50,000 and surplus of $10,000, will be known as the First and Farmers State bank.

St. Paul—Charles E. Gunnels, treasurer of the American Farm Bureau federation, has been elected treasurer of the Uinted States Grain Growers, Inc. He will serve the grain growers without salary, and accepted the responsibility as a means of extending the service of the farm bureau.

Montevideo—Presentation of a public swimming pool was made by the Lee Osborne post, American Legion, to the community at a Fourth of July celebration. The Legion launched and carried out the plan of installing a large artificial pool in the city's largest park after the community had been aroused to the danger of children drowning in Chippewa river.

Breckenridge—Pocket gophers have been exterminated in the local cemetery. The pastor of one of the churches invented a method of "gassing" the gopher out of their holes. He took a few feet of ordinary garden hose, attached one end to the exhaust of an auto, inserted the other end into the runways and packed the earth around the hose so that no gas would be lost. After the engine had run five minutes the gopher was dead.

Minneapolis—Terms in the state prison at Stillwater will be faced by motorists who failed to stop after accidents under the terms of a new law which is being framed by County Attorney Floyd B. Olson for consideration by the next legisuature.

Bemidji—Plans for the new city detention hospital, to be erected near the poor farm, have been presented to the city council and referred to the state health department. Should they meet with the state regulations, bids for erection of the structure will be opened shortly. It is expected that its cost will be approximately $10,000.

WAS A BROKEN-DOWN WOMAN
Then I Began Taking Lydia E. Pinkham's Medicines

Donaldsonville, La.—"I write with pleasure to praise your medicine—Lydia E. Pinkham's Vegetable Compound—which has done so much to restore my health. I was a broken-down woman until my husband brought me a bottle of your Vegetable Compound and one of Lydia E. Pinkham's Blood Medicine. I had been having pains every month and at intervals between, was weak and seemed to be smothering at times, but in a week I felt like another woman. I also used Lydia E. Pinkham's Sanative Wash. It did me a lot of good too. I cannot praise your medicines too much and will be more than glad to recommend them to any woman who is suffering from female troubles. You may print my testimonial, as it is true."—Mrs. T. A. LANDRY, 612 Miss. St., Donaldsonville, La.

Note Mrs. Landry's words—"as it is true." Every letter recommending Lydia E. Pinkham's Vegetable Compound is genuine. It is a statement telling the merits of these medicines just as the women in your own neighborhood tell each other about them. For fifty years Lydia E. Pinkham's Vegetable Compound has sold on merit.

Her Achievement.

"My wife got after a blue racer with a hatchet out in the yard yesterday," related Gap Johnson of Rumpus Ridge. "After going twice around the track, as it were, she ketched her foot in a mess of baling wire and fell and sprained her arm, if she didn't break it outright. But, by cripes, she shore cut off that there snake's head as she went down!"—Kansas City Star.

Important to Mothers
Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it
Bears the Signature of Chas. H. Fletcher.
In Use for Over 30 Years.

Fresh-Air College.

All resident students at the University of Arizona are obliged to sleep in the open air on porches. The fraternity houses have similar sleeping arrangements.

Have You a Bad Back?
Are you lame every morning? Do you drag through the day with a steady, nagging backache—evening find you "all played out"? Probably your kidneys are to blame. Hurry, worry, lack of rest and a heavy diet, all tend to weaken the kidneys. Your back gives out; you feel depressed and suffer headaches, dizziness and kidney irregularities. Don't go from bad to worse. Use Doan's Kidney Pills. Thousands recommend them. Ask your neighbor!

A Minnesota Case
Gust Elberg, retired farmer, 215 Washington St., Lake City, Minn., says: "Heavy lifting weakened my kidneys and my back became sore and lame. Sharp pains took me like a knife-stab, in the small of my back and I was obliged to get up at night to pass the kidney secretions, which burned in passage. Doan's Kidney Pills relieved me completely."

Western Canada
Land of Prosperity
offers to home seekers opportunities that can not be secured elsewhere. The thousands of farmers from the United States who have accepted Canada's generous offer to settle on FREE homesteads or buy farm land in her provinces have been well repaid by bountiful crops. There is still available on easy terms
Fertile Land at $15 to $30 an Acre
—land similar to that which through many years has yielded from 20 to 45 bushels of wheat to the acre—oats, barley and flax also in great abundance, while raising horses, cattle, sheep and hogs is equally profitable. Hundreds of farmers in Western Canada have raised crops in a single season worth more than the whole cost of their land. With such success comes prosperity, independence, good homes and all the comforts and conveniences which make life worth living.
Farm Gardens, Poultry, Dairying
are sources of income second only to grain growing and stock raising. Attractive climate, good neighbors, churches and schools, good markets, railroad facilities, rural telephone, etc.
For certificate entitling you to reduced railway rates, illustrated literature, maps, description of farm opportunities in Manitoba, Saskatchewan, Alberta and British Columbia, etc., write

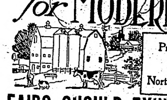
Timely Comments on Agricultural Topics for Our Readers

PERTINENT POINTERS for MODERN FARMERS



Prepared Under Direction of

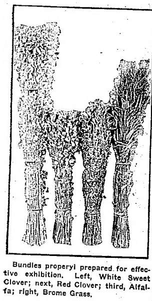
North Dakota Agricultural College

FAIRS SHOULD EXHIBIT EVIDENCE OF HOW N. D. GRASSES PROSPER

(By H. L. Walster, Agronomist, North Dakota Agricultural College.)

Let us make our July fairs big hay shows. Every July fair in North Dakota can show attractive 6-inch bundles of alfalfa, yellow blossom sweet clover, white blossom sweet clover, medium red clover, brome grass, timothy, slender wheat grass, as well as endless varieties of wild grasses. Who will come out with the biggest, the best, and the most attractive collection of hay crops?

The North Dakota State fair, held at Fargo July 17-22, offers premiums for 6-inch bundles of timothy, medium red clover, mammoth red clover, Alsike clover, alfalfa, and brome grass. Through an oversight sweet clover was not included in the premium list for material in bundles; but the secretary informs me that a special prize of $3 $1.50, and $1 for the best bundles, first, second and third prizes, of both yellow and white blossom sweet clover will be offered by the fair association. Fairs that have failed to include any of the popular hay crops will be only too glad to offer special prizes to exhibitors. Study their premium lists, and call the attention of the secretary to the fact that you think certain things should be added, and assure the secretary that you will be there with an exhibit in that class.



Bundles properyl prepared for effective exhibition. Left, White Sweet Clover; next, Red Clover; third, Alfalfa; right, Brome Grass.

Now, if we are going to have this hay show, we must put it on right. That means attractively prepared six inch bundles, well cured and neatly tied up. Let's review some of the tricks of the fellows who bring away the prizes at the hay show. Here they are:

Trick No. 1: Select the tallest, leafiest plants in the field at a time when they are about one-third in blossom in the case of alfalfa and red clover. In the case of sweet clover, select the tallest plants that you can find that are just in the bud stage, or slightly past the flower bud stage. In the case of timothy, brome grass, and other grasses, select heads that are well headed out. Cut about five times as much as you think you will need to make the 6-inch bundle. Spread it out in a sheltered place where it will dry quickly without loss of leaf.

Trick No. 2: Don't let rain or dew fall on the prize bundle that you are preparing to make.

Trick No. 3: Prepare the bundle while the hay is a little tough. If it gets dry, let it lay outdoors over night to toughen, and then prepare the bundle in the morning. Select stems of uniform length; trim the butts neatly; tie each bundle securely with a stout cord at the middle, about six inches from the butt, and about ten inches from the tops. Trim off all extra cord, and then tie a neat yellow or green ribbon, not more than an inch wide, about the bundles at the points where the cords are holding, thus concealing the cords. Make this a simple band without bows or other frills. If ribbon is not available, use only plain cloth or plain white or green cord.

Trick No. 4: After the bundle is prepared, hang it up where air circulates freely until it is thoroughly dry.

Trick No. 5: After bundle is well dried, wrap it in paper or cloth to keep out the light and hang in a secure, airy, place, away from birds or mice until ready to send to fair. Pack it so that the stems and leaves will not be crushed.

FIGHTING SOW THISTLE.

Crops are being destroyed or the yields greatly reduced over large areas at the present time due to perennial sow thistle.

The weed is spreading at the rate of 10 to 25 miles per year, particularly in the Red River Valley and in regions where the soil is heavy and moisture is plentiful.

Legislation has not been effective in a large way for controlling or eradicating the weed, due to faults in the present state laws, failure to enforce them, or both.

Where the weed has not yet appeared, it must be watched for and promptly eradicated.

Changing of farming practices to include summer fallowing, raising of crops that will come off the land before the sow thistle seed is produced, diversification, or raising of livestock, is necessary where sow thistle is found.

Tenants must be given some encouragement by the land-owner to keep the fields clean, either through long-time leases or by cash payment for work not productive during the term of the lease.

COMBATTING THE CUCUMBER BEETLE

Dr. R. L. Webster

The striped cucumber beetle is one of the most dangerous enemies of the cucumber, squash and melon plants. The adults destroy the plants as soon as they get above ground and the grubs feed on the roots of the same plants should they survive the injury from the beetles. Usually the eating of the leaves by the beetles is the injury noticed, although the destruction of the roots by the larvae may be fully as serious. The plants are gradually weakened, finally wilt and die.

No single method of combatting this insect is completely efficient. The best single method is spraying the plants thoroughly with lead arsenate paste, used at the rate of 3 to 5 pounds to 50 gallons of water.

Air slacked lime mixed with sulfur, tobacco dust and other similar preparations, thoroughly dusted over the infested plants on the upper and lower leaf surfaces, does much good by hindering the activities of the beetles. This must be often repeated, since the beetles return to the plants as soon as the offensive substance is blown or washed away.

Where the beetles are known to be abundant, put in a few seeds of early squash around the edges of the garden. These serve as a trap crop and when the beetles begin to feed on them they should be prayed with paris green or some other arsenical, thus destroying the insect before the main crop starts.

As most of the injury is done when the plants are very small, they are often protected with some kind of frame covered with mosquito netting or other thin cloth. A barrel hoop sawed in two and the pieces nailed to right angles of each other at the middle makes a good frame. Make sure that no beetles are confined beneath the screen.

Labor saving home machinery can be replaced; women's backs cannot.

Only infertile eggs keep well in summer. Swat the rooster!

Artificial incubation of poultry was known to the Egyptians and to the Chinese centuries ago.

Baby appreciates comfort in hot weather just as much as grown folks. Too many clothes make everybody cross.

Almost one-half of Ohio farms have automobiles; 62 per cent have telephones; and 12 per cent have running water in the homes.

DECLINE IN WHEAT

Not Much Change in the Livestock Market.

U. S. Bureau of Markets, Washington, D. C., for week ended July 7, 1922.

GRAIN: Wheat prices declined steadily during the week influenced mainly by favorable weather conditions. On the 6th weakness in continental exchange and restricted export demand were also important factors. Corn had independent strength on the 5th. For the week Chicago September wheat lost 3c; Chicago September corn ⅝c. On the 7th all grain prices declined with trade largely local and sentiment bearish. Excellent weather conditions and collapse in continental exchange were main depressing factors. Country offerings wheat fair.

Corn trade narrow and prices lower with wheat.

Closing prices in Chicago cash market: No. 2 red winter wheat $1.16; No. 2 hard winter wheat $1.16; No. 2 mixed corn 64c; No. 2 yellow corn 65c; No. 3 white oats 38c. Average farm prices: No. 2 mixed corn in central Iowa 52c; No. 2 dark northern wheat in central North Dakota $1.17½; No. 2 hard winter wheat in central Kansas 97c. Closing future prices: Chicago September wheat $1.13; Chicago September 66⅝; Minneapolis September wheat $1.20⅝; Kansas City September wheat $1.06; Winnipeg October wheat $1.18.

LIVESTOCK AND MEATS: Chicago hog prices ranged from 5c lower to 5c higher during week. Beef steer prices advanced 10-25c; butcher cows and heifers firm to 5c higher; veal calves 75c net higher while the price of feeding steers remained practically the same as a week ago. Fat lambs advanced 50c, feeding lambs 30-50c; yearlings 25c and fat ewes 10-50c per 100 lbs.

On July 7th hogs opened active 5-10c higher on better grades, mixed and packing grades slow about steady, closed steady to 10c higher than Thursday's average. Cattle market active, beef steers strong, she stock firm; bulls 25c higher; veal calves strong to higher, stockers dull. Sheep and lambs firm with Thursday's marketings. July 7 Chicago prices: Hog, top, $11; bulk of sales $9.20-10.95 medium and good beef steers $8.35-9.85; butcher cows and heifers $4-8.75; feeder steers $5.65-7.75; light and medium weight veal calves $8-9.75; fat lambs $12.75-14; feeding lambs $11.50-12; yearlings $9-12; fat ewes $4.50-7.60.

Stocker and feeder shipments from 12 important markets during the week ending June 30th were: Cattle and calves 50,525; hogs 6,385; sheep 25,941.

In eastern wholesale fresh meat markets during the week prices advanced on all classes of meats except pork loins. Beef advanced $1-1.50; and lamb veal firm to $3 higher; mutton firm to $4 higher, while fresh pork loins ranged from $2 lower to $1 higher.

On July 7 beef veal and mutton practically steady; lamb steady to $2 higher; light pork loins barely steady and heavy loins weak to $2 lower.

July 7 prices good grade meats: Beef $15-17; veal $12-18; lamb $18-27; mutton $14-19; light pork loins $19-22; heavy loins $13-17.

DAIRY PRODUCTS: Butter markets unsettled during the week and declining at close. High price levels reached during time export demand was of influence were not maintained.

Closing prices, 92 score butter: New York 37; Chicago 35; Philadelphia and Boston 37½.

Cheese prices at Wisconsin primary markets July 6: Twins 19¾; Daisies 20c; Double Daisies 19¾c; Young Americas 19¾c; Longhorns 20¼c; Square Prints 20¼c.

Minneapolis Closing Cash Prices.

Spring wheat—No. 1 dark northern, 1.36@1.46; No. 1 northern, 1.34@1.39; No. 1 dark hard, 1.33@1.35; No. 1 hard, 1.26; No. 1 am. dur., 1.19@1.22; No. 1 durum, 1.14@1.18. Corn No. 2 yellow, 59½@60c. Oats No. 2 white, 34⅛@35⅛c. Barley, choice to fancy, 56@58c. Rye No. 2, 79@81½c. Flaxseed, No. 1, 2.59½@2.64½.

South St. Paul Live Stock.

So. St. Paul—Steers $8.50@9.00; v. calves, $3.25@8.00; cows and heifers, $4.00@7.50; hogs, $8.50@10.50; sheep and lambs, $2.00@12.50.

Minneapolis Butter, Eggs and Poultry.

BUTTER—Extras, 35c; firsts, 32c; seconds, 27c; packing stock, fresh, sweet, 23c; state goods, 5c; grease, 1c.

EGGS—Country receipts, rots out, per case, $6.00; No. 1 candled, good extras, free from rots, small dirties and checks out, per dozen, 23c; small, dirty and held stock, rots and leakers out, dozen, 16c; quotations on eggs include cases.

LIVE POULTRY—Not advisable to ship turkeys under 7 pounds in weight. Hens, 4 pounds and over 19c; hens, under 4 pounds, 16c; cripples and culls unsalable; ducks, fat, 15c; geese, fat, 10c; turkeys, fat, over 8 pounds, 25c; turkeys, thin and small, 15@20c; cripples and culls unsalable, guineas, per dozen, $5.00; roosters, 12c; broilers, 1½ lbs. and up, per pound, 30c; Leghorns and small broilers, lb., 25c.

LEARN OF MARKET CONDITIONS BEFORE DISPOSING OF TIMBER

(Prepared by the United States Department of Agriculture.)

Woodland owners many times are confronted with the problem of when to sell standing timber and when to cut it for use on the farm.

Experience has demonstrated that in some localities it unquestionably pays the farmer better at all times to sell, particularly the more valuable kinds of wood. For example, in the central hardwood region farmers sell their select yellow poplar trees profitably and with the money buy and haul back to the farm for distances of from four to eight miles southern pine siding for their houses and barns. On the other hand, there are too often instances where one finds choice white oak of the best quality, suitable for veneer or furniture stock sawed up into posts for the farm.

Keep In Touch With Market.

It would be well for the owner to keep in touch with market conditions, so he may market his product to the best advantage. With rarely an exception the timber is not dying, decaying or "going back" by fungus or insect attack at the rapid rate alleged by buyers, who, obviously, desire to buy as cheaply cs possible. Unless it is overmature it is increasing yearly in volume and value.

Logging One's Own Timber Gives Profitable Employment to Farmer and His Teams.

Cutting during the early period of growth, says the United States Department of Agriculture, often represents a real sacrifice in financial returns. The approximate age at which trees should be cut in order to obtain the highest returns a year is very different for different species. Thus cottonwood, ash, hickory and yellow poplar become commercially valuable at much earlier ages than white oak and black walnut.

When other farm work is least pressing many farmers find it profitable to turn their attention to estimating, measuring, cutting, marketing and selling their timber. Spare help and time to supervise the work make the winter a favorable season for this. It is easier to haul logs on the snow than over ordinary roads, and the logs are less liable than at any other time of the year to deteriorate quickly through attacks of insects or fungi.

Best Method of Selling.

The choice of methods of selling depends largely upon the kind of timber and the owner's knowledge of its value, his past experience and the condition of the market. Timber products are sold either in the standing tree or in a more or less roughly manufactured condition. Except when sold by the lot or lump, sales are based upon a measure by log scale or lumber tally or upon individual count of units of designated size or character.

Timber sold by the lot, boundary, or tract is either "lumped off" to include a designated tract or sold on an acreage basis. This method has prevailed over all others, particularly in the rougher and less-settled districts. As a rule it is strongly favored by the purchaser because in such a transaction his better knowledge of both timber yields and values gives him an advantage over the average owner. Many examples of the sacrifice by the owner of a large share of the value of the timber can be found in nearly any wooded region. On account of greater competition among purchasers and a better understanding on the part of the owners of timber values, sales of standing timber by the lot or lump are now being made with better profit than formerly.

In using this method it is very important, in advance of the sale, first to secure a good estimate of the quantity, quality and unit value of each kind of product in the stand; then to get bids from as many buyers as possible; and, finally, to have an agreement clearly specifying the restrictions in regard to the manner and amount of cutting so as not to impair the producing power of the forest. The sale may include only trees above a specified minimum diameter, or such trees as have been previously marked by the owner for cutting. When properly safeguarded, this becomes one of the safest and most satisfactory of all methods of selling and should receive full consideration when sales are contemplated.

Place Restrictions.

Selling by lump eliminates the anxiety and misunderstandings attending sales by log-scale measurement. If competition is keen, it is likely that nearly or quite the full value of the timber will be reached in the bids. By this method, however, the owner foregoes the opportunity of profitable employment for himself and his teams which he would have if he logged the material and sold it after hauling it to the mill or shipping point.

Unless restricted by the terms of the agreement, the buyer usually cuts very closely. Selling by the lot is therefore a good method to use where the owner intends to clear the land for other uses. But if the land is to be kept in timber, the owner should include provisions in the contract of sale to retain the young, vigorous growing timber and provide for a future crop. The importance of care in cutting, on account of its effect upon succeeding growth and production of the stand, can hardly be overstated.

Spray Walnut Trees.

Spraying walnut trees with lead arsenate at a strength of 6 pounds to 50 gallons of water is an effective method of controlling the butternut curculio, says the bureau of entomology of the United States Department of Agriculture.

GAS-TAR WILL PROTECT CONCRETE

Bureau of Public Roads Gives Results of Tests.

Fluid By-Product of Artificial Gas Plants Proven Satisfactory in Preserving Drain Tile Against Alkali.

(Prepared by the United States Department of Agriculture.)

In its search for a means of protecting Portland cement concrete against the action of alkaline waters, the bureau of public roads, United States Department of Agriculture, announces promising results from treatment with a very fluid crude water-gas tar, such as may be obtained as a by-product from many artificial gas plants. So successful have the tests been that further investigations of the alkali-resisting properties of tar-treated concrete and mortar are under way and the protective effect of water gas-tar on mass concrete structures is being studied.

The treatment consists of simply immersing the concrete in the liquid, which is soaked up, even by a dense concrete. Cement drain tile treated in this way and stored from six to eight months in a strong alkali solution have shown no indication of disintegration, and samples tested for tensile strength were as strong as those stored in pure water. On the other hand, untreated samples showed both disintegration and a loss of strength.

In certain parts of the country where alkali salts exist concrete drain tile and concrete structures have been attacked. In many such places concrete is a very desirable material on account of the accessibility of the materials that go into it. The bureau's investigations aim to devise means of using concrete with assurance.

Small Farm Incomes.

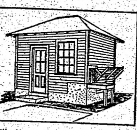
Small farms, small yields from crops and stock and scrub livestock are three conditions that are pretty closely cousins to small farm incomes.

DAIRY POINTS

BEST SITE FOR MILK HOUSE

Not Good Plan to Get Them Too Near Cow Barn—Must Be Clean, Airy and Dust-Proof.

Milk houses must be clean, airy dust-proof places, free from all insects and bad odors. They should not open directly into the barn, but it is equally injudicious to build them a very great distance away from the barn. Prompt removal and quick cooling are the main points to observe in handling milk. Put the milk house on a well-drained spot and away from rubbish heaps, manure piles and fly-breeding places. The outer walls, if of concrete, should be from 6 to 8 inches thick; if of brick, 9 inches; if of tile, 8 inches; if of stone, 14 to 18 inches; and if of wood frame, 6 inches.



Milk House Suitable for a Ten to Twenty-Cow Dairy.

Authorities say that particular care should be exercised in constructing milk house floors. Concrete is by far the best material for this purpose, as it resists moisture, decay and wear. Concrete floors should be built of a base made up of one part cement, three parts sharp, clean sand and five parts stone. This base should be about five inches thick and should be covered with a top coat one inch thick made by mixing one part cement and two parts sand. The top coat should be troweled hard and smooth.

SAFEGUARDING MILK SUPPLY

Form of Ordinance Drawn to Guide Communities in Framing Practicable Law.

(Prepared by the United States Department of Agriculture.)

In properly safeguarding the milk supply of a community, the enactment of a suitable and enforceable law is usually the first step, according to a reprint of department bulletin 585, "A Guide for Formulating a Milk Ordinance," just issued by the United States Department of Agriculture. Milk, in its composition and natural qualities, is a most useful and acceptable food, but may acquire one form or another of insanitary taint on its way from the cow to the consumer; and it is not always possible to require either producers or distributors to observe all the precautions which science has shown to be necessary, unless there is a law to back them up.

The public and officials of a city realizing this need may sometimes, in their zeal to make the new regulations strict enough, go too far and insert provisions that cannot readily be enforced or administered. Even health department officials may not be familiar with all phases of this subject, unless they have already been engaged in the enforcement of milk regulations; and in any case, whether the city is just starting milk regulation or is revising its ordinances to bring them up to date, it is desirable to take advantage of the experience of other communities.

The United States Department of Agriculture has drawn up a form of ordinance to guide communities in framing a finished and practicable law. Copies of the bulletin may be had free upon application to the department at Washington, D. C.

IRREGULAR MILKING IS BAD

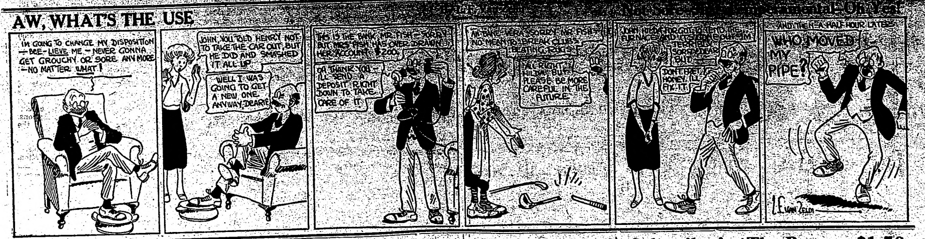
Not Only Lessens Output, but Tends to Disturb Functional Activity of Animal.

Early milking morning or evening one day and later milking morning or evening another day not only lessens the output of milk, but tends to disturb functional activity and prevents a maximum yield for the lactation period.

MIXTURE FOR YOUNG CALVES

Ground Corn, Oats, Bran and Oilmeal Is Recommended for Those Under Six Months.

For calves under six months old in good condition and having a soft, mellow hide, a mixture of 30 pounds ground corn, 30 pounds ground oats, 30 pounds bran and 10 pounds oilmeal, fed three to five pounds daily, is recommended.



AW, WHAT'S THE USE
Not Sore—Just Temperamental—Oh Yes!
I'M GOING TO CHANGE MY DISPOSITION —BEE-LIEVE ME—NEVER GONNA GET GROUCHY OR SORE ANY MORE —NO MATTER WHAT!
JOHN, YOU TOLD HENRY NOT TO TAKE THE CAR OUT, BUT HE DID AND SMASHED IT ALL UP
WELL I WAS GOING TO GET A NEW ONE ANYWAY, DEARIE
THIS IS THE BANK, MR. FISH—SORRY BUT MRS. FISH HAS OVER DRAWN HER ACCOUNT $200
OH THANK YOU—I'LL SEND A DEPOSIT RIGHT DOWN TO TAKE CARE OF IT
AL RIGHT HILDA BUT PLEASE BE MORE CAREFUL IN THE FUTURE
NO MEAN TO BREAK CLUBS BEATING RUGS
SORRY DEAR BUT—
DON'T FRET HONEY, I'LL FIX IT
AND THEN A HALF HOUR LATER
WHO MOVED MY PIPE?

EDITORIAL

HOLDING A STOP-WATCH ON THE COW.

Minnesota once counted its wealth in primeval forests and virgin fields. Then came wheat to make her renowned among the states of the Union. Then iron ore and mineral resources added another chapter to her story of progress.

Now a new rival appears on the scene in the person of her queenship—the Dairy Cow. Through her, Minnesota will produce this year, according to a recent study of the Minneapolis Journal, enough to give eight million persons a pint of milk every day in the year. Last year eighty million dollars' worth of butter mas made in the state—and Minnesota is just on the edge of her great development in dairying.

Wheat will not become less important as a product, because dairy farming replenishes the life of the soil. Under the rejuvenating power of Lady Bossy, old lands are improved and cheap lands are made more valuable.

But not any old cow will do today in Minnesota. The minimum annual yield per animal that any farmer should be satisfied with, is set at 300 pounds. The average now is 146 lbs. per cow, but experts are trying to raise this figure in order to double the revenue of the farm and more than double the farmers' profits.

The mild-eyed, leisurely, cud-chewing bovine must increase her efficiency if she is to qualify her residence in Minnesota. She must yield to that magic word—efficiency—for the stop-watch is now held on her.

LOOKOUT!

Black Stem Rust, "the wheat man's burden," is on the way!

Reports to the United States Department of Agriculture show that common barberry bushes throughout the Northwest are now rusting. This rust on the common barberry is the parent of the rust which later in the year will be found on your wheat, oats, barley and rye. The latter rust comes only from the barberry.

Every common barberry bush destroyed at once means a saving to the farmer of many dollars worth of grain when harvest time comes around.

Find the barberry bushes on your farm. Dig them out immediately, being sure to get all the roots. Mark the place with a white stake so that you may watch the place for sprouts. Don't wait until you see your wheat and other grains destroyed on the eve of harvest.

"THINGS ARE LOOKING BETTER EVERY DAY."

Reports from all sections of the country indicate, not a business boom, but a business revival of large proportions. Crops throughout the country generally are good. There are spotted areas, but the general condition is excellent. The estimated production of corn, while materially below that of last year, is some 30,000,000 bushels greater than the five year average, and the wheat production promises to be above normal and largely in excess of that of last year.

In the matter of prices, there is greater stability and a better balance than there has been at any previous time since the war. Farm crop prices have advanced in many departments and commodity prices generally have been reduced until, in some instances, they have gone below the pre-war level. Of late the tendency has been toward a stiffening of the prices of many commodities, the indication being that the bottom has been passed and that we may expect hereafter no very marked general changes, but rather the occasional fluctuations due to the supply of particular commodities and the demand for them.

There is no more money in the nation than there was. But the money that has always been here is beginning to circulate. Credit, which for a time seemed not to exist, is again taking its place as a vital factor in the world of business. Most of the activity which we see is due to the improvement of domestic conditions. If means can be found to stabilize the foreign situation and to restore production abroad so that those who were once large consumers of American goods will again have something to exchange for them, we shall have an activity in all lines of business as the country has never before seen.

MILK OF HUMAN KINDNESS.

A church in a small town in a southern state is said to own the cow that gives the milk of human kindness. This cow is rented out by the church. A family with a number of children, greatly in need of milk, but lacking sufficient funds to purchase either milk or cow of its own, may rent the church cow for a dollar a week. The church adds the rental money to its growing fund for the purchase of other cows. It wants to have a community herd one of these days.

According to local authorities, the arrangement is working beautifully. The cow was rented first to a family with six children. Such a family ought to consume close to six quarts of milk a day. A little simple multiplication will show that it would cost them several times as much as a dollar a week—the hire of the cow—to provide that much milk.

A member of the church says: "You should see how these children are blossoming forth. You can see the bloom in their cheeks, and the scales also have a story to tell.—Wadena Pioneer-Journal.

THE CASE GOES ON.

Ten years ago an Illinois farmer, according to Capper's Weekly, lent a mule to a neighbor and afterward had to replevin the mule in order to get it back.

The neighbor brought suit, alleging that the wrong mule had been replevined.

The case has been in the courts ever since and has cost the principals 20 times the original cost of the mule.

It has been tried four times, appealed each time, and is now pending before the Supreme Court on a new trial.

Meanwhile two judges who have heard the case have died, the mule has been dead for years, and the plaintiff died last week.

But the law and the lawyers are still busy with the case.—Wadena Pioneer Journal.

If the cause for failure is known there is hope for success later on.

DENBY!

When Secretary of War Denby took the members of his alumni to the Orient in a government transport, President Harding should have fired him at once. It is the principle of the thing that is wrong.

The expense of this trip to the average taxpayer of the United States amounts to very little, but if the government in all its branches were conducted upon such loose lines, how can people be expected to give it whole-hearted support?

One is forced to the conclusion that the national government is strangely out of tune with a tax-burdened public, when it will permit a pleasure jaunt of this kind at government expense at a time like this.

BOYS AND DOGS.

William Allen White of the Emporia (Kansas) Gazette has had his ire aroused by an advertisement published by the city officials offering a reward of twenty-five cents to boys for each stray dog brought to the city pound to be killed. He considers the advertisement a reflection on the boys of the community. In fact he uses decidedly strong language and declares that any boy who would take a stray dog to a pound to be killed for a reward of twenty-five cents is too mean to live himself. He recalls the bond that has always existed between boys and dogs. Nearly every household that has a boy has encountered this intense desire on the part of a boy to provide a home for a stray dog. It makes no difference how forlorn the animal may be, how thin, moth eaten of flea infested, the boy is only too anxious to befriend him. There is something in the way of a bond that exists between a small boy and a dog that defies analysis by older people. William Allen White has written some wonderful stories about boys and dogs. So it is no wonder that he resents what he considers a reflection on the Emporia boys by the advertisement in question.

Never brood over the past except that part of it which has been happy and beautiful.

The men who can "drink or let it alone" seem to be doing it quietly instead of boasting about it as in former days.

TO EXPERIMENT ON PEAT SOILS

Farmers and Others Interested Are Invited to Attend Trials.

Saturday, July 22, has been decided upon as visiting day for 1922. All farmers and others interested in the cultivation of peat soils are urged to attend and inspect the plots on that day to see what can be done on the high-lime peat soils of Northwestern Minnesota. Those who cannot visit the plots on July 22 are invited to do so at their convenience.

The experimental field is located one mile east of the Golden Valley postoffice and 16 miles east of Holt.

Signs along the roads from Holt, Grygla and Goodridge will guide visitors to Golden Valley.

University guides will conduct visitors around the plots between 10 and 12 o'clock and after the program in the afternoon.

The crops are very promising this year. Winter rye and clover are particularly good. Every farmer with unreclaimed peat soils should see the clover on the plots this season.

There will be a picnic dinner at 12:30 o'clock in the grove on the Dahl farm just southeast of the postoffice. Those who cannot bring their dinner will be able to secure refreshments.

A short program will be given at 2 o'clock, consisting of brief addresses. The experiments will be explained and the points of special interest will be called to the attention of the various visitors. Any one who wishes information concerning peat soils are invited to ask questions during the program.

BABY BORN IN PLANE.

For the first time a child has been born in a flying airplane. Mme. Georges Breyer, a Frenchwoman of Lyons, was at a remote seashore resort in southern Italy when she felt the first warnings. She immediately chartered an airplane for Naples and when 40 miles south of that city, 6,000 feet ove rthe Mediterranean, the child was born.

C. A. Berg got a verdict for $300 in district court at Crookston last week against the party who ran into him with an automobile last year while he was walking between Crookston and the Experiment Farm. The verdict just about pays the cost of his doctor bill, etc., but was a wholesome lesson for the other fellow, who was a young man of twenty-two and addicted to fast driving.—Warroad Pioneer.

AMAZING [illegible] IN MOONSHINE

Officer Tells of Conditions He Found in Moonshine Still.

In a signed statement, A. C. Manning, county attorney of Major county, Okla., gives some really remarkable information showing the fearful character of the whisky made by the moonshiners and sold by bootleggers at exorbitant prices.

Mr. Manning declares that most of this whiskey is made of rotten grain or other materials, and that it is usually in buried barrels which have been found on various occasions to contain as much as a gallon of flies with butterflies and other bugs for the sake of variety; and sometimes a crow or ground squirrel in a bad state of dissolution. Mr. Manning's statement is as follows:

"I have personally visited a large number of illicit stills during the past year and in that time I have seen what is called whiskey in every stage and form imaginable. Stills should be of the very best grade of copper, very few 'moonshine stills' are, many of them have never seen copper, although most of them have a few parts of copper, the balance being rubber hose, galvanized iron, well pipe and even tin.

"The cooler or retort into which the mash is placed and from which the heat drives off the alcohol and fusel oil, is usually a very dirty filthy can, round or square or oblong. Some were ice cream cans, some five-gallon galvanized oil cans, some tea kettles, some coffee pots, some wash boilers, while others were iron oil barrels. They were covered with dirt, soot and mash that had boiled over, or out through a leak, run down the sides and had become burned into the outside.

"The insides of these retorts were much worse, if possible for them to become more dirty and filthy, for there is no way to clean them since the tops are soldered on and only small openings left for the steam to go into the coil and another small opening thru which the retort is filled with the raw mash. Old rotten mash collects on the sides, becomes encrusted there and each time it is used another layer is added to the filth already collected there.

The coils are sometimes masterpieces consisting of a piece of common rubber hose running from five to 20 feet in length, sometimes a piece of galvanized well pipe, sometimes the gasoline line pipe from 'Henry' has been twisted into a spiral and answers the purpose, sometimes a tin box with the lid soldered on, sometimes a sure enough copper coil that has answered its purpose in a discarded soda fountain, sometimes 'Old Trusty' (incubator) has been robbed of its hot water pipe.

"The mash is a wonderful thing, consisting of rotten grain, fruit or even syrups, mixed with water, yeast and sugar, and with a smell that would put a glue factory to flight. This mash is usually mixed in common barrels, although sometimes galvanized stock tanks are used. They must be hid, for the officer on the trail of a moonshiner has finished his search when he comes to the mash.

"We have found them buried in the earth with only a small piece of pipe sticking out above the ground, sometimes these buried barrels are found in the center of a large brush heap, with only a few inches of well pipe sticking out to let the air in, sometimes they are in the open with brush thrown over them, sometimes in an old building, sometimes in a cellar. Again they may be found in straw stacks or hidden out in the pastures.

"I have seen all kinds of things in these barrels. On one particular occasion I saw more flies than could be put in a gallon bucket on each barrel of mash; butterflies and all kinds of bugs gather over the stinking stuff and finally drown in the 'spirits.' I have made other discoveries, too; for instance 'Old Crow,' I have found how that 'notable' stuff came by its name. During the summer of 1921, in company with the sheriff and deputy sheriff of our county, we made a raid on an established moonshiner and took possession of several barrels of mash. When we emptied the barrels to destroy them, in the bottom of one was a large, fat, black crow. How long he had added his carcass to the manufacture of 'Old Crow' I am unable to say. Then again we often hear of 'Squirrel Whisky.' For a long time I thought that was a kind of whisky which would cause a person under its influence to want to climb fence posts, telegraph poles and other objects, but that is an erroneous idea, for we have found innocent looking little brown-coated animals, known as fox squirrels in the bottoms of other barrels of mash. In other barrels we have discovered numbers of sparrows."

MORE PRECIOUS STILL.

A church, no matter where, prints on the back of its program of services these words:

I will not worry.
I will not be afraid.
I will not give way to anger.
I will not yield to envy, jealousy or hatred.
I will be kind to every man, woman and child with whom I come in contact.
I will be cheerful and hopeful.
I will trust in God and bravely face the future.

Read them again. They are worth while. Cut them out and paste or pin them where you will see them often. About all there is in life worth striving for is suggested in these few lines.

Houses, lands, bonds, automobiles are fine possessions. But far more precious still to anyone, in any station, are the measures of the mind and soul—composure, courage, cheerfulness, tolerance, kindness, hope—all these and faith in something higher than what the eyes see and the hands hold.

[illegible] cation of the rules [illegible] will probably [illegible] follows:

The standard distance between pegs is forty feet. The pitcher's box extends three feet on either side to the rear and in front of the peg. The pegs are at least one inch in diameter and stand eight inchs above the ground.

The shoes must not exceed 7½ inches in length or 7 inches in width. The toe and heel calks must not be more than three-fourths of an inch in length. The opening between the heel calks shall not exceed 3½ inches inside measurement. No shoe is to weigh more than 2½ pounds.

The regulation game consists of 21 points, although games in national tournaments consist of 50 points. A ringer counts three points and a double ringer six. The shoe closest to the peg scores one point, and if both shoes shoes are closer than either of he opponent's, two points are scored. All equals are counted as ties. That is, if both contestants have one shoe at equal distances from the peg, they are tied and the next closest one scores one point.

In some sections it is the local prac-

[illegible] in which they are thrown.

Teachers' Examinations for Pennington County

Teachers' examinations for this county will be held at the Lincoln High School at Thief River Falls, Minn. The dates for these examinations are July 24, 25 and 26, 1922. The Commercial Rooms will be used as these rooms are provided with the proper tables or desks. Teachers taking the examinations are requested to bring their own pens, ink, blotters and paper pads for use in the arithmetic examinations. The program is as follows:

Program of Examinations for Common School Certificates.

Monday, July 24—A. M.: 8:00 to 8:45, enrollment; 8:45 to 9:15, spelling; 9:15 to 10:00, penmanship; 10:00 to 12:00, arithmetic. P. M.: 1:00 to 2:45, geography; 2:45 to 5:15, com- [illegible]

[illegible] Wednesday, July 26 [illegible] to 8:30, enrollment [illegible] geometry, 10:15 to 12:00 [illegible] M. 1:00 to 2:45, algebra [illegible] physical geography or general history; 4:15 to 5:30, agriculture.

All teachers wishing renewals of their certificates should present their certificates together with applications for renewal and 50 cents state fees the first day of the examinations. Please bring all credits earned in the Teacher College summer schools.

JAMES P. HUMPHREYS, well-known automobile man of Hebron, Md., who declares he believes Tanlac is the best thing to overcome stomach trouble and run-down condition. States it completely restored his health.

"I believe in giving everything its due and I want to say right now I just can't praise Tanlac too highly for what it has done in my case," declared James P. Humphreys, proprietor of the Hebron Motor Co., Hebron, Md.

"For three years or more I suffered from indigestion. After eating I would bloat terribly with gas and my heart would palpitate until it interfered with my breathing. I was habitually constipated and my nerves were all upset. My sleep was unsound, I got up mornings all tired out, and I was only a shadow of my former self.

"Well, Tanlac has given me a keen appetite, stomach trouble has disappeared, my nerves have steadied down, and I have gained several pounds. Tanlac, to my mind, is the best thing ever sold for stomach trouble and run-down condition."

Tanlac is sold by all good druggists.

Story of the World War.

We are a united nation now.

Here is a story told Memorial day: "Are the Yanks coming?" asked a little girl in France.

"Yes, child," replied the colonel, "the Yanks are coming."

It was a Tennessee regiment.—Louisville Courier-Journal.

GRAMONT AND LUCIE

SYNOPSIS.—During the height of the New Orleans carnival season Jachin Fell, wealthy though somewhat mysterious citizen, and Dr. Ansley, are discussing a series of robberies by an individual known as the Midnight Masquer, who, invariably attired as an aviator, has long defied the police. Joseph Maillard, wealthy banker, is giving a ball that night, at which the Masquer has threatened to appear and rob the guests. Fell and Ansley, on their way to the affair, meet a girl dressed as Columbine, seemingly known to Fell, but masked, who accompanies them to the ball. Lucie Ledanois, recently the ward of her uncle, Joseph Maillard, is the Columbine. At the ball, Bob Maillard, son of the banker, again proposes to her and is refused. He offers to buy some of her property. A Franciscan monk interests her. He turns out to be Prince Gramont. In his library Joseph Maillard and a group of his friends are held up and robbed by the Midnight Masquer. Lucie Ledanois, the last of an old family, is in straitened circumstances. Joseph Maillard's handling of her funds has been unfortunate. Fell is an old friend of her parents and deeply interested in the girl. Henry Gramont, really the Prince de Gramont, is enamored of Lucie. Lucie talks with Fell about her affairs and the Masked Masquer.

CHAPTER IV—Continued.

—6—

"Some of them, yes—and all that prince stuff with them." Smiling as he dropped into English, Gramont glanced about the room, and his eyes softened.

"This is a lovely and lovable home of yours, Lucie!" he exclaimed, gravely. "So few homes are worthy the name; so few have in them the intimate air of use and friendliness—why are so many furnished from bargain sales? This place is touched with repose and sweetness; to come and sit here is a privilege. It is like being in another world, after all the money striving and the dollar madness of the city."

"Oh!" The girl's gaze searched him curiously. "I hope you're not going to take the fine artistic pose that it is a crime to make money?"

Gramont laughed.

"Not much! I want to make money myself; that's one reason I'm in New Orleans. Still, you cannot deny that there is a craze about the eternal clutching after dollars. I can't make the dollar sign the big thing in life, Lucie. You couldn't, either."

She frowned a little.

"You seem to have the European notion that all Americans are dollar chasers!"

He shrugged his shoulders slightly. "In a sense, yes; why not?" he answered. "I am an American. I am a dollar chaser, and not ashamed of it. I am going into business here. Once it is a success, I shall go on; I shall see America, I shall come to know this whole country of mine, all of it! I have been a month in New Orleans—do you know, a strange thing happened to me only a few days after I arrived here!"

With her eyes she urged him on, and he continued gravely:

"In France I met a man, an American sergeant named Hammond. It was just at the close of things. We had adjoining cots at Nice—"

"Ah!" she exclaimed, quickly. "I remember, you wrote about him—the man who had been wounded in both legs! Did he get well? You never said."

"I never knew until I came here," answered Gramont. "One night, not long after I had got established in my pension on Burgundy street, a man tried to rob me. It was this same man, Hammond; we recognized each other almost at once.

"I took him home with me and learned his story. He had come back to America only to find his wife dead from influenza, his home broken up, his future destroyed. He drifted to New Orleans careless of what happened to him. He flung himself desperately into a career of burglary and pillage. Well, I gave Hammond a job; he is my chauffeur. You would never recognize him as the same man now! I am very proud of his friendship."

"That was well said." Lucie nodded her head quickly. "I shan't call you M. Le prince any more—unless you offend again."

He smiled, reading her thought. "I try not to be a snob, eh? Well, what I'm driving at is this: I want to know this country of mine, to see it with clear, unprejudiced eyes. We hide our real shames and exalt our false ones. Why should we be ashamed of chasing the dollar? So long as that is a means to the end of happiness, it's all right. But there are some men who see it as an end alone, who can set no finis to their work except the dollar dropping into their pouch. Such a man is your relative, Joseph Maillard. I do not wish to offend you, and I shall therefore refrain from saying all that is in my mind. But you have not hesitated to intimate very frankly that you are not wealthy. Some time ago, if you recall, you wrote me how you had just missed wealth through having sold some land. I have taken the liberty of looking up that deal to some extent, and I have suspected that your uncle had some interest in putting the sale through——"

The gray eyes of the girl flashed suddenly.

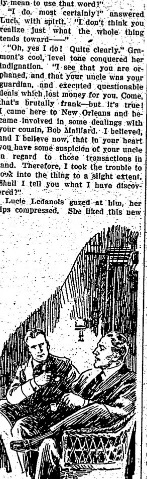
"Henry Gramont! Are my family affairs to be an open book to the world? Do you realize that you are intruding most unwarrantably into my private matters?"

"Unwarrantably?" Gramont's eyes held her gaze steadily. "Do you really mean to use that word?"

"I do, most certainly!" answered Lucie with spirit. "I don't think you realize just what the whole thing tends toward——"

"Oh, yes I do! Quite clearly." Gramont's cool, level tone conquered her indignation. "I see that you are orphaned, and that your uncle was your guardian, and executed questionable deals which lost money for you. Come, that's brutally frank—but it's true! I came here to New Orleans and became involved in some dealings with your cousin, Bob Maillard. I believed, and I believe now, that in your heart you have some suspicion of your uncle in regard to those transactions in land. Therefore, I took the trouble to look into the thing to a slight extent. Shall I tell you what I have discovered?"

Lucie Ledanois gazed at him, her lips compressed. She liked this new manner of his, this firm and resolute gravity, this harshness. It brought out his underlying character very well.



"Hm! Memphis Izzy Gumberts, Eh? What Kind of a Crook Is He, Sergeant?"

"If you please, Henry," she murmured very meekly.

"Well, then, I have discovered that your uncle appears to be honestly at fault in the matter——"

"Thanks for this approval of my family," she murmured.

"And," continued Gramont, imperturbably, "that your suspicions of him were groundless. But, on the other hand, something new has turned up about which I wish to speak—but about which I must speak delicately. Has Bob Maillard offered to buy your remaining land on the Bayou Terrebonne?"

She started slightly. So it was to this that he had been leading up all the while!

"He broached the subject last night," she answered. "I dismissed it for the time."

"Good!" he exclaimed with boyish vigor. "Good! I warned you in time, then! If you will permit me, I must advise you not to part with that land—not even for a good offer. This week, immediately Mardi Gras is over, I am going to inspect that land for the company; it is Bob Maillard's company, you know. Is my unwarrantable intrusion forgiven?"

She nodded brightly. "You are put on probation, sir. You're in Bob's company?"

"Yes." Gramont frowned. "I invested perhaps too hastily—but no matter now. I have the car outside, Lucie; may I have the pleasure of taking you driving?"

"[illegible] I accept—because I must see that famous soldier-bandit [illegible] four. If you'll wait, I'll be ready in a minute."

She hurried from the room, a snatch of song on her lips. Gramont smiled as he waited.

CHAPTER V

The Masquer Unmasks.

In New Orleans one may find pensions in the old quarter—the quarter which is still instinct with the pulse of old-world life. These pensions do not advertise. The average tourist knows nothing of them. Even if he knew, indeed, he might have some difficulty in obtaining accommodations, for it is not nearly enough to have the money; one must also have the introductions, come well recommended, and be under the tongue of good repute.

Gramont had obtained a small apartment en pension—a quiet and severely retired house in Burgundy street, maintained by a very proud old lady whose ancestors had come out of Canada with the Sieur d'Iberville. Here Gramont lived with Hammond, quite on a basis of equality, and they were very comfortable.

The two men sat smoking their pipes before the fireplace, in which blazed a small fire—more for good cheer than through necessity. It was Sunday evening.

Gramont stared into the flickering fire and sucked at his pipe. Suddenly he roused himself and shot a glance at Hammond.

"Sergeant! You seem to have a pretty good recollection of that night at the Lavergne house, when I found you entering and jumped on you."

"You bet I have!" Hammond chuckled. "When you'd knocked the goggles off me and we recognized each other—h—l! I felt like a boob."

Gramont smiled. "How many places had you robbed up to then? Three, wasn't it?"

"Three is right cap'n," was the unashamed response.

"We haven't referred to it very often, but now things have happened." Gramont's face took on harsh lines of determination. "Do you know, it was a lucky thing that you had no chance to dispose of the jewels and money you obtained?"

"No chance?" snorted the other. "No chance is right, cap'n! And I was sore, too. Say, they got a ring of crooks around this town you couldn't bust into with grenades! Listen here, and I'll tell you something big."

Hammond leaned forward, lowered his voice, and tamped at his pipe.

"When I was a young fellow I lived in a little town up north—I ain't sayin' where. My old man had a livery stable there, see? Well, one night a guy come along and got the old man out of bed, and slips him fifteen hundred for a rig and a team, see? I drove the guy ten miles through the hills, and set him on a road he wanted to find.

"Now, that guy was the biggest crook in the country in them days—still is, I guess. He was on the dead run that night, to keep out o' Leavenworth. He kep' out, all right, and he's settin' in the game to this minute. Nobody never pinched him yet, and never will."

"Why?"

"Because his gang runs back to politicians and rich guys all over the country. You ask anybody on the inside if they ever heard of Memphis Izzy Gumberts! Well, cap'n, I seen that very identical guy on the street the other day—I never could forget his ugly mug! And where he is, no outside crooks can get in, you believe me!"

"Hm! Memphis Izzy Gumberts, eh? What kind of a crook is he, sergeant?"

"The big kind. You remember them Chicago lotteries? But you don't, o' course. Well, that's his game—lotteries and such like."

Gramont's lips clenched for a minute, then he spoke with slow distinctness:

"Sergeant, I'd have given five hundred dollars for that information a week ago!"

"Why?" Gramont shook his head. "Never mind. Forget it! Now, this stunt of yours was clever. You showed brains when you got yourself up as an aviator and pulled that stuff, sergeant. But you handled it brutally—terribly brutally."

"It was a little raw, I guess," conceded Hammond. "I was up against it, that's all. When you took over the costume and began to get across with the Raffles stuff—why, it was a pipe for you, cap'n! Look what we've done in a month. Six jobs, every one running off smooth as glass! Your notion of going to parties ready dressed with some kind of loose robe over the flyin' duds was a scream! And then the running that motor with the cut-out on—all them birds that never heard an airplane think you come and go by air, for certain! Nobody will ever find us out."

Gramont nodded thoughtfully.

"Yes? But, sergeant, how about the quiet little man who came along last night at the Maillard house and asked about the car? Perhaps he had discovered you had been running the engine."

"Him?" Hammond sniffed in scorn. "He wasn't no dick."

> "I dare not risk it. That man Fell is too smart."

(TO BE CONTINUED.)

USE TRACTOR ON TRIP TO CANADA

Party of Settlers From United States on Way to the Land of Big Crops.

Settlers on their way to and through Canada do not always rely on the railroads for transportation. Here, for instance, is a photograph of a

party from one of the northern states on the way to their new home near Lake Winnepegosis, Manitoba. They were a sturdy, self-reliant lot and carried with them a full complement of farm machinery. With the tractor outfit they intended to commence rather extensive operations this spring on the land which their scouts had already inspected and reported on favorably as to its productiveness.

At almost every point on the Canadian border where there are located means for admitting settlers, the reports are that it is almost a daily occurrence to admit settlers from states as far off as Texas who have adopted the automobile as a means to [illegible] and their families to the country of their choice. Such settlers are bound to succeed. Some of them go two or three hundred miles inland, and select their homes in the park districts of Manitoba, Saskatchewan and Alberta. Others purchase improved and unimproved farms in the more thickly settled districts in the southerly and central parts of these provinces. Wherever they may go, they are certain to secure land of certain possibilities. They will see grain crops of high value, wheat that will produce from 20 to 40 bushels per acre, oats giving high yields, barley a certain producer, and grass and fodder in quantity and quality that will satisfy them that the cattle and stock raising possibilities are fully as good as they have been told.

The reports from all parts of Western Canada at the present time fully bear out the most optimistic expectations and hopes of the early days of seeding. Evidence of the splendid growth of this year is the fact that alfalfa was cut on the 15th of June and yielded nearly two tons to the acre.

Corn planted on the 23rd of May, on the 5th of June was showing several inches about the ground, and making glad the heart of the farmer who had built his silo, which he hoped to fill in the latter days of August.—Advertisement.

Back to the Fold.

For ye were as sheep going astray; but are now returned unto the Shepherd and Bishop of your souls.—I Peter, 2:25.

Cuticura Comforts Baby's Skin.

When red, rough and itching, by hot baths of Cuticura Soap and touches of Cuticura Ointment. Also make use now and then of that exquisitely scented dusting powder, Cuticura Talcum, one of the indispensable Cuticura Toilet Trio.—Advertisement.

If a man has never made an ass of himself, it is probably because Nature beat him to it.

YOU CAN WALK IN COMFORT

If you Shake Into Your Shoes some ALLEN'S FOOT=EASE, the Antiseptic, Healing powder for shoes that pinch or feet that ache. It takes the friction from the shoe and gives relief to corns and bunions, hot, tired, sweating, swollen feet. Ladies can wear shoes one size smaller by shaking Allen's Foot=Ease in each shoe.—Advertisement.

Less homage to the past; more faith in the future.

What Is It Worth to Change a Tire?

On the road changing a tire is not an especially pleasant task.

The dust or mud, the grease and grime, the tedious delay—all are things we like to avoid.

But the time to think about these things is when you buy the tire—not after the blow-out occurs.

For some tires blow out much more easily than others.

Outward appearance counts for little.

It is the material in the tire and the construction of it that determines its strength.

Goodyear recognizes these facts and all Goodyear Tires are made of long staple cotton.

Take the 30 x 3½ Cross Rib Clincher Tire here illustrated, for example.

It is made of Arizona cotton, the fibres of which average 1½ inches long.

Many 30 x 3½ clincher tires are made of short staple cotton from ½ inch to 1⅛ inches long.

This means less strength and greater danger of blow-outs—more tire troubles.

Yet this high grade guaranteed Goodyear Tire costs only $10.95.

You can buy some tires for even less than this but none with the fine materials and construction of this one.

Can you afford to take a chance on more frequent tire troubles for the sake of the slightly lower price of cheaper tires?

HARDING CALLS FOR SETTLEMENT

President Places Before Coal Men A New Plan For Settling Coal Strike.

MUST RESUME WORK

President Demands Settlement of Coal Strike—Representatives Delay Answer to the Proposal. Another Parley to be Held.

Washington—Pres. Harding placed before the leaders of the employers and employes of the anthracite and unionized bituminous mine fields a government plan for settling the coal strike.

It called for the immediate resumption of work by the miners now out, at wage rates of March 31, last, for fixing of permanent wage levels by arbitraton, and for an investigation to recommend solution of permanent problems in the coal industry.

Groups Delay Answer.

All representatives of the groups concerned had delayed definite answers to the proposal, although union officials informed the president they had no power to give acceptance or refusal, but would summon the general policy committee of the United Mine Workers of America here Saturday to consider the matter.

A day of conferences, at the White House and at other offices, with Secretaries Hoover, Fall, Davis and Attorney General Daugherty participating was taken to bring matters to this stage.

Alfred M. Ogle, chairman of the bituminous operators group, indicated that his associates considered an arbitration plan they had offered last week for district settlements, "the best and fairest way" to get the mines open, but John L. Lewis, president of the union, classed this as "obsolete, in the light of the president's proposals." Anthracite operators, although their committee was three times at the White House, maintained silence.

U. S. TAKES HAND IN STRIKE

Trains Will Continue to Run Regardless of Shopmen Walkout.

Chicago—With increasing numbers of state troops and emergency forces of United States deputy marshals on guard wherever outbreaks have been threatened, the government announced that life and property would be protected, the mails continued and interstate commerce not interrupted despite the strike of railway shopmen.

After a conference with President Harding, Attorney General Harry Daugherty said that the government would make sure that law and order were preserved through the appointment of deputy marshals. He said that their appointment already was authorized and that they would be sent in wherever strike disorders justified.

Guard Ordered Out.

The attorney general's announcement came shortly after Lieutenant Governor Fred E. Sterling, acting head of the state government of Illinois in the absence of Governor Len Small, had ordered five companies of national guardsmen to Bloomington to protect the shops of the Chicago and Alton railroad.

The ordering out of the state troops following appeals from the local authorities, who declared that civil authority had collapsed and that the soldiers were needed to protect life and property.

CROPS IN GOOD CONDITION

Crops Throughout County Looking Fine—Bumper Harvest Predicted.

Washington—Crops in general promise better harvests this year than their avearge for the last five years, forecasts of the department of agriculture, based on July 1 conditions, indicate.

Bumper crops of white and sweet potatoes and tobacco are the forecast and most of the crops are larger than last year's. With the exception of wheat, corn and oats, acreages this year range from one to 22 per cent larger than those of 1921.

Corn Acreage Increased.

Corn acreages are increased this year in most of the corn belt states, but in the cotton states decreases are shown, while in Iowa, largest corn producing state, there is a 2 per cent decrease, and in Missouri a 3 per cent decrease.

The crop in general made good progress to July 1, except in the southeast, where it has been neglected for cotton. Growth has been slow east of the Mississippi, but stands are good and fields fairly well cultivated. Farther west rapid growth has been made.

Germany Asks For Mortatorium.

Paris—A proposal providing for the payment of all the remaining cash installments due this year, provided Germany is granted a moratorium of at least two years, was brought to Paris by German representatives, according to unofficial information which reached the reparations commission. News that Germany intended to ask the reparations commission for a moratorium on cash payments and that Dr. Fisher had left for Paris.

NEGRO'S MEMORY A PUZZLE

Of Limited Educational Attainments, Colored Man Has Wonderful Fund of Useful Information.

Jim Gilmore, a negro aged fifty-six, who lives in the town of Greenville, Tex., is said by scientists who have examined him, to possess one of the most remarkable memories known. With apparently a small amount of educational training Gilmore is able to quote any verse in the Bible suggested to him. He answers any questions pertaining to the Civil war, the Spanish-American war and the late World war, giving dates of all outstanding historical events. He can name every station and water tank from San Francisco to New York on the principal transcontinental railroads.

There seems to be no limit to the amount of poetry Gilmore can quote. "The Sinking of the Titanic," numbering 40 verses, and "The World War From Beginning to End," in 60 verses and three parts, is another literary achievement of which he can boast. He has traveled extensively and possesses an excellent vocabulary for one of limited education.—Exchange.

Part of a Collection.

"Just a moment," interrupted the defendant's lawyer. "You say you despise this man you are suing for $50,000, yet you bring his alleged love letters into court carefully tied up with a pink ribbon."

"There is no sentiment in that," replied the fair plaintiff, haughtily. "I merely used a pink ribbon to distinguish his from the others."

FUNERAL BEARERS ON STRIKE

Incident That Enlightened British Public Concerning Profession About Which Little Is Known.

The strike of funeral bearers in Hull calls attention to a profession of which comparatively little is known.

People are apt to look upon the somber figures who walk beside the hearse and carry the coffin to the graveside as simply a part of the undertaker's outfit, but in reality these men are a profession to themselves. Usually they are small tradesmen, writes a correspondent, or out of work, ready to earn a few shillings in this way. Every undertaker has his own little band who can be relied upon to come whenever a funeral is on. Generally the undertaker provides the tall hats, a fact which accounts for the grotesque fitting of some of the hats, but the black suit must be provided or borrowed by the man himself. The fee varies from 75 cents to $1.25, according to the district, and there are men who can make $5 a week and upwards out of this line. At Hull the fee has been $1.25. Now the undertakers wish to drop it to $1 a funeral, and hence the strike of the bearers.—Manchester Guardian.

Oratory.

"You have never tried to shine as a great orator?"

"No," replied Senator, Sorghum. "My idea of a great orator is a man who has a vast audience unanimously with him at the meeting and then loses every one who goes home and remembers enough of the speech to think it over."

WAS UNDER NO OBLIGATION

Transaction of Youthful Newspaper Proprietor Had Been on a Strictly Business Basis.

George developed a journalistic instinct at the early age of fifteen. With the consent of his father and some assistance from the same cource he bought an "amateur printing outfit" and started the Klinkerville Monthly Journal, subscription price 50 cents a year, payable in advance.

"I suppose you call yourself the editor and proprietor of this office," remarked an envious young associate who dropped in at his "sanctum" in the basement of the paternal dwelling one day.

"Of course I do," responded the youthful journalist. "I don't owe a cent on it."

"Proprietor! Umph. Everybody knows you got $25 from your father to start it with."

"Yes, sir!" stoutly rejoined George. "And his subscription for the Journal is marked paid fifty years ahead on my books!"—Pittsburgh Dispatch.

Uncle Eben.

"Of course, you wants to look at de bright side," said Uncle Eben, "but ain' much comfort in standin' outside lookin' at de 'lectric lights, when you wants to go inside an' look at de pictures.

There may be plenty of room at the top, but victims of that tired feeling never reach it.

A corner in grain isn't necessarily on the square.

Three Hundred Sixty-five days of Health
Grape-Nuts
THE BODY BUILDER

Health is Wealth Itself

—and depends more upon the selection of proper food than upon anything else.

The reason is simple—the *right* kind of food digests promptly and is absorbed into the blood for building sound tissue; while food that digests slowly may ferment and lead to serious conditions.

Grape-Nuts — the delicious cereal food made from whole wheat flour and malted barley—is so easy to digest that even delicate people and young children thrive on it.

This is only natural, because Grape-Nuts is baked for 20 hours, which transforms and partially pre-digests the starch elements, resulting in easy digestion and quick assimilation.

Served with milk or cream Grape-Nuts is a complete food—and along with its nutritive qualities is that wonderful flavor!

Mystery, love and adventure in the land of Creole delight!

The Mardi Gras Mystery

By H. BEDFORD-JONES

If you love dear, old New Orleans—and who that has ever spent much time there does not?—you have a treat before you in this story; for in addition to a pleasing, pulse-quickening romance which introduces the gayeties of Mardi Gras and the most charming characteristics of a people of Latin descent, you are taken into the inner life of the modern city.

You see a city which has changed in outward form with the times, with its aristocracy in lineal descent from chevaliers of France and dons of Spain, one might almost say princes of the blood, graduated into merchant princes and men high in the professions—the prideful, boastful, loveable Creole as a man of affairs.

VOL. XVI. NO. 24. FRIDAY, JULY 28, 192~~1~~2 GOODRIDGE, PENNINGTON COUNTY, MINNESOTA $1.50 PER YEAR

RAILROAD RATES PERIL WOODLOTS

Minnesota Should Save Millions on Fuel, Says Forester.

Minnesota could conserve its forests properly, could keep inside its borders millions of dollars spent every year for coal and for freight to haul it many hundreds of miles and could add large sums to the income of its farmers, if railroads would cut rates on wood fuel enough to make its use on a large scale possible, according to William T. Cox, state forester.

"In some Minnesota counties which are considered fairly well settled," Mr. Cox said, "half the land is woods and wooded pastures. There is no reason for considering woodland as waste land. It can and should be made nearly as profitable as fields in crop.

"The threatened fuel shortage, if as bad as feared, may not be an unmixed evil. It may direct attention to the farm woodlot. A million cords of wood are cut annually in Minnesota, to be used mostly on farms and in the smaller villages. But several times this amount should be cut every year to improve the farm woodlots by taking out the dead, dying and inferior trees. There is enough dead timber alone on farms between the twin cities and Iowa to go a long way toward heating our homes and places of business for a year.

"The railroads of this state probably could reduce their rates on fuel wood considerably and make more money hauling wood than coal."

A CORRECTION.

In making the statement last week that Mrs. Julia Tandberg had announced the wedding of her daughter, Miss Ida Tandberg, to B. O. Norby, The Banner erred in the article referred to. This newspaper printed the news upon what it considered reliable information, but in justice to Mrs. Julia Tandberg desires to correct the impression that she authorized its publication.

MONTANANS VISIT HERE.

Mr. and Mrs. Carroll Griffin of Glendive, Mont., were house guests at the McDonald home Saturday, Sunday and Monday. Mr. and Mrs. Griffin autoed here from Minneapolis, where they had visited a few days. They left Monday for a few days' visit at Fargo and from there will return to Glendive by way of the Yellowstone trail. Mrs. Griffin was formerly Miss Lottie Foss, second daughter of Mr. and Mrs. Foss, who built and managed the Goodridge Hotel for several years, moving from here to Glendive, Mont.

FORMER SOLDIERS TO MEET NEXT MONTH

Hanford McNider to Attend State Legion Convention at Virginia in August.

The appearance of Hanford McNider, national commander of the American Legion at Virginia, Minn., for the state convention to be held August 21st to 24th will complete one of the most extensive Legion programs ever attempted in Minnesota.

A complete program of entertainment has been provided for the 6,000 delegates and guests who are expected to come, it has been announced by the Convention Committee, which is exerting every possible means to put the convention over as the biggest in the state.

Auxiliary units throughout the state are pleased with the fact that Mrs. Hobart, the National Auxiliary President, will be present to address that body, which convenes at the same time as the Legion gathering.

Reduced railroad rates will be available, and it is expected that many will motor here, making a tour of the Mesaba Range and Vermilion Lake districts after the business sessions are concluded.

Mr. and Mrs. M. O. Seavey returned to Grand Forks Thursday after a week's visit with her mother, Mrs. E. Iverson.

TANDBERG-NORBY WEDDING WEDNESDAY

Thief River Falls Woman Is Bride of Former Superintendent of Schools.

The marriage of Miss Ida Tandberg, daughter of Mrs. Julia Tandberg of Thief River Falls, and B. O. Norby, former superintendent of the Goodridge Consolidated Schools, occurred at the home of the bride's mother Wednesday afternoon at 12:30 o'clock, in the presence of intimate friends and relatives. Rev. T. E. Sweger, pastor of Trinity Lutheran Church of Thief River Falls, officiated at the ceremony.

The bride has been a resident of Thief River Falls for a number of years and for several terms has been an instructor in the city schools.

The groom has been at the head of the Goodridge school system until this year when he resigned to accept a similar position at Eyota, Minn. His parents make their home on a farm near Fosston.

The bride was attired in a gown of white canton crepe, trimmed with pearls, and carried a bouquet of bridal roses and sweet peas. She was attended by her sister, Miss Emma Tandberg, who wore an organdie gown of orchid colored material. Andrew Norby, of Fosston, a brother of the groom, acted as bestman.

Miss Agnes Tandberg played Lohengrin's wedding march and Miss Gerda Mortensen sang two solos, "At Dawning" before the ceremony and "My Task" after its conclusion.

The rooms were decorated in pink and white and presented an extremely pleasing appearance. After the ceremony the bride's mother served a wedding dinner in honor of the newly-wedded couple.

Mr. and Mrs. Norby left Thief River Falls during the late afternoon for Grand Forks, N. D., where they will spend a few days visiting. They will also visit the groom's parents at Fosston before going to Eyota, Minn., to make their home.

HIGHLANDING, 8; MOYLAND, 7; ON GOODRIDGE BALL DIAMOND

Trying to steal bases and failing in the attempts, forced the Moyland nine to be defeated in the Moyland-Highlanding baseball game played on the Goodridge diamond Sunday. The final results were 8 to 7 in Highlanding's favor.

Up to the fifth inning, Nelson, on the mound for Highlanding, pitched a fairly consistent game, but was wild during the next three innings, giving the Moyland nine a chance to run in six scores. However, the interest in the game was greatly aroused in the fifth inning.

"DIAMOND GAME" IS NEWEST KIND OF SWINDLING IN IOWA

The brain of the swindler is ever fertile, says an exchange. We are told of a slick game they are working down in Iowa. A prosperous looking gentleman calls at a farm house on some pretext or other and claims to have lost the diamond setting out of his ring somewhere around the yard. He states that the stone is worth $500 to him and offers that reward for its return. After leaving his address he takes his departure.

A few days later along comes a tramp and getting confidential, he tells the man of the place that he has found a diamond down near the gate. In proof of his story he exhibits the stone.

To make a long story short, he finally sells it to the owner of the premises and the man congratulates himself on having made $200 on the deal. He writes to the loser of the stone but of course receives no reply. In return for his $300, he has a worthless imitation on his hand. Can you beat it?—White Rock Journal.

$40 PATRONS FOR MONTH OF JUNE

Increase at Local Creamery Shows 23 Patrons Over the $40 Mark.

The monthly statement issued this week by Secretary Englestad of the Goodridge Co-Operative Creamery Association shows that a total of 23 patrons of the local creamery marketed dairy products that netted them $40 or more for the month. This is a substantial increase over the total for May and is considered a splendid record by the local institution, which is coming along in good shape.

Ed Eelle tops the list this month with a total received for dairy products of $94, closely followed by Stuart McLeod with $93.08 and John Lamporter with $80.17. The June report speaks well for Eastern Pennington county and indicates that this section is fast coming to the front as a dairy marketing center. The report for the month follows:

Ed Eelle	$94.00
Stuart McLeod	93.08
John Lamporter	80.17
O. N. Urdahl	78.05
Ed Kevle	77.04
T. Halvorson	76.30
C. A. Leidberg	67.85
John Ellingson	62.61
Chas. Thompson	55.94
Andrew Feragen	54.53
Tom Harms	53.52
Morgan Vaughan	52.96
Casper Iverson	52.12
E. K. Rime	50.16
T. G. Helle	49.92
Wiseth Bros.	49.56
S. J. Anderson	47.92
Otto Stucy	45.38
John J. Kast	44.34
L. P. Poppenhagen	44.14
Nelson & Nelson	48.82
Albert Fiskevold	42.69
John T. Coan	40.23

ROAD DEMANDS BIG; ROAD FUNDS LITTLE

Inside Stories About Minnesota Highway Executives Afford a Laugh and Point to a Moral.

Close-up stories are being told about Charles M. Babcock, state highway commissioner and chief engineer, who are credited generally with extending road improvements to all parts of Minnesota as rapidly as the incoming funds will allow.

Mr. Mullen was puzzling over a trunk highway and Mr. Babcock inquired:

"What are you looking for?"

"For a 10-mile stretch on the 7,000-mile system that some community or organization does not want improved at once, and I guess it just isn't," responded Mr. Mullen, and there was no argument.

"Here's one that's easy," added the commissioner:

"Could $50,000,000 or more be used for Minnesota highway betterments this season?"

Friends explain that the demand for trunk route improvements is big and widespread. They tell of one delegation with a project that will "cost only $50.000—never be missed out of the fund—that must be built at once," followed by another delegation with another projected identical except that the "cost may run $100,000, but won't be noticed with $7,000,000 for the year;" and a third group with still another for another $100,000 project for the "never will be missed" class, and a fourth, fifth, sixth, and so on, one after another, day after day, at the highway offices in St. Paul.

"The highway department is just as anxious to make every improvement as is the sponsor of each "pet" project, but there is no other way than to remind many that available funds limit highway development and it always has been agreed that 7,000 miles of trunk roads cannot be built in two years," Commissioner Babcock is quoted as saying.

REPORT GOOD CROPS.

Mr. and Mrs. George Josephson and daughter, Violette, and Lawrence and Everette Seavey autoed to Park River, N. D., Sunday, where Lawrence and Everette will be employed. The Josephson family returned Monday and reported that the crops around Park River were very good and the demand for labor greater than it has been for many years.

9 STATES JOIN FARM RATE WAR

Bureau and Railway Commissions Meet to Combat Freight Increase.

Pocketbooks of Minnesota farmers are being protected by the Farm Bureau's traffic experts in a new railroad rate case involving $6,000,000 a year.

C. B. Hutchings, traffic manager of the American Farm Bureau Federation, came to Minnesota to confer with representatives of the state railroad commissions of nine grain producing states and lay plans for combatting an attempt by the roads to wipe out the existing 10 per cent rate differential on coarse grain. When the Interstate Commerce Commission last winter ordered sweeping reductions in freight rates on hay, wheat and coarse grain, it fixed rates on coarse grain 10 per cent. lower than those on wheat. Farm Bureau traffic experts estimate that this 10 per cent difference means a saving of at least $6,000,000 to American farmers raising coarse grains. It is this 10 per cent rate difference which the roads now seek to wipe out.

Representatives of the American Farm Bureau Federation and the railroad commissions of Minnesota, Wisconsin, Iowa, South and North Dakota, Missouri, Kansas, Nebraska and Oklahoma met in St. Paul to decide just what part each should take in fighting the rate increase. The railroads' attempt to raise rates will be strenuously opposed.

FARMERS WATCH FOR "BLUE SKY"

Federation Urges County Bureaus to Foil Worthless Investments.

Establishment of a farmers' "blue sky" committee by every county Farm Bureau which has not already formed such a protective body, will be urged by the Minnesota Farm Bureau Federation in an official communication to county Farm Bureau boards, according to information received here.

A recent decision of the state supreme court, the warning will say, has pulled the teeth out of the state "blue sky" law, by exempting actual owners of securities from jurisdiction of the state securities commission, declaring that stocks once sold can be sold again by the purchaser without the commission's approval and even in spite of its disapproval.

In several Minnesota counties, the Farm Bureau has maintained a "blue sky" committee, composed of three or four leading farmers. Farm Bureau members have been urged to decline to put any money into securities, oil lands and leases, or similar promotion schemes until the salesman had submitted his proposition to the Farm Bureau "blue sky" committee. Such committees have issued warnings to farmers against manifestly unsound schemes, and in some cases, Farm Bureau officers say, have blocked stock selling schemes in counties where the farmers' "blue sky" committee believed the securities offered were worthless.

RIGHT AND WRONG.

"There are two sides to every question," proclaimed the sage.

"Yes," said the fool, "and there are two sides to a sheet of flypaper, but it makes a mighty big difference to the fly which side he chooses."—Legion Weekly.

It might help if Congress were employed by the job instead of by the day.

Little Girls

"There was a little girl and she had a little curl, right in the middle of her forhead," etc.

Well, she didn't remain a little girl for very long.

She soon passed the "little curl" stage and became a woman—and that means a voter these days—and maybe was elected to Congress. Times have changed for the women folks. They are now supposed to be the equal of the men—possibly they have always been superior for all we know—but we do know that every little girl should be taught something about modern banking by having an account of her own. The experience is sure to be helpful in after life.

THE FRIENDLY BANK

FARMERS STATE BANK
of Goodridge

Do You Own Your Home?

THERE'S no place like home. No matter how humble, there's no place like home!

It's the joy of every woman's heart—the most companionable place a man can find.

Are you making preparations for a home of your own? Or to bettering your present one?

Get the habit of "LOOKING AHEAD"—start a bank account this pay day.

BEN CHACHERRE.

SYNOPSIS.—During the height of the New Orleans carnival season Jachin Fell, wealthy though somewhat mysterious citizen, and Dr. Ansley, are discussing a series of robberies by an individual known as the Midnight Masquer, who, invariably attired as an aviator, has long defied the police. Joseph Maillard, wealthy banker, is giving a ball that night, at which the Masquer has threatened to appear and rob the guests. Fell and Ansley, on their way to the affair, meet a girl dressed as Columbine, seemingly known to Fell, but masked, who accompanies them to the ball. Lucie Ledanois, recently the ward of her uncle, Joseph Maillard, is the Columbine. At the ball, Bob Maillard, son of the banker, again proposes to her and is refused. He offers to buy some of her property. A Franciscan monk interests her. He turns out to be Prince Gramont. In his library Joseph Maillard and a group of his friends are held up and robbed by the Midnight Masquer. Lucie Ledanois, the last of an old family, is in straitened circumstances. Joseph Maillard's handling of her funds has been unfortunate. Fell is an old friend of her parents and deeply interested in the girl. Henry Gramont, really the Prince de Gramont, is enamored of Lucie. Lucie talks with Fell about her affairs and the Masked Masquer. Gramont's chauffeur, Hammond, sergeant in the A. E. F., lives with him. He was the original Midnight Masquer, and Gramont had assumed the role. Where Hammond had been a robber for financial gain, Gramont, of course, is not. He arranges to return the "loot" to those whom he has robbed. Gramont and Hammond put the jewels and money in individual packages to be returned the next day.

CHAPTER V—Continued.

—8—

In the garage Hammond switched on the lights of the car. By the glow they disposed their burdens in the luggage compartment of the tonneau, which held them neatly. The compartment closed and locked, they returned into the house and dismissed the affair as settled.

Upon the following morning Gramont, who usually breakfasted en pension with his hostess, had barely seated himself at the table when he perceived the figure of Hammond at the rear entrance of the dining room. The chauffeur beckoned him hastily.

"Come out here, cap'n!" Hammond was breathing heavily, and seemed to be in some agitation. "Want to show you somethin'!"

Gramont rose and followed Hammond out to the garage, much to his amazement. The chauffeur halted beside the car and extended him a key, pointing to the luggage compartment.

"Here's the key—you open her!"

"What's the matter, man?"

"The stuff's gone!"

Gramont seized the key and opened the compartment. It proved empty indeed. He stared up into the face of Hammond, who was watching in dogged silence.

"I knew you'd suspect me," broke out the chauffeur, but Gramont interrupted him curtly.

"Don't be a fool; nothing of the sort. Was the garage locked?"

"Yes, and the compartment, too! I came out to look over that cut tire, and thought I'd make sure the stuff was safe—"

"We're up against it, that's all. Someone must have been watching us last night, eh?"

"The guy that trailed you yesterday, most like," agreed Hammond, dourly. "You think they got us, cap'n? What can we do?"

"Do?" Gramont shrugged his shoulders and laughed. "Nothing except to wait and see what happens next! Don't touch that compartment door. I want to examine it later."

Hammond gazed admiringly after him as he crossed the garden. "If you ain't a cool hand, I'm a Dutchman!" he murmured, and followed his master.

CHAPTER VI.

Chacherre.

At ten o'clock that Monday morning Gramont's car approached Canal street, and halted a block distant. Gramont left the car, and turned to speak with Hammond.

"I've made out at least two fingerprints on the luggage compartment," he said, quietly. "Drive around to police headquarters and enter a complaint in my name to a robbery of the compartment; say that the thief got away with some valuable packages I had been about to mail. They have a process of transferring fingerprints such as these; get it done. Perhaps they can identify the thief, for it must have been some clever picklock to get into the compartment without leaving a scratch. It was someone sent by that devil Jachin Fell, and I'll land him if I can!"

"Then Fell will land us if he's got the stuff!"

"Let him! How can he prove anything, unless he had brought the police to open up that compartment? Get along with you!"

Hammond grinned, saluted, and drove away.

Slowly Gramont edged his way through the eddying crowds to Canal street, and presently gained the imposing portals of the Exeter National bank. Entering the building, he sent his card to the private office of the president; a moment later he was ushered in, and was closeted with Joseph Maillard.

The interior of the Exeter National reflected the stern personality that ruled it. The bank was dark, old-fashioned, conservative, guarded with much effrontery of iron grills and bars against the evil doer.

The window men greeted their customers with infrequent smiles, with caution and reserve so great that it was positively chilly. Suspicion seemed in the air. The bank's reputation for guarding the sanctity of wealth seemed to rest heavily upon each pair of bowed shoulders.

The business customers of this bank found their affairs handled coldly, efficiently, with an inhuman precision that was admirable. It was good for business, and they liked it. There were no mistakes.

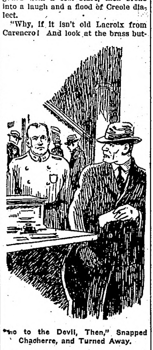
People who were accustomed to dealing with bankers of cordial smile and courteous word, people who liked to walk into a bank and to be met with a personal greeting, did not come here, nor were they wanted here. Chance customers who entered the sacred portals were duly cowed and put in their proper place. Most of them were, that is. Occasionally some intrepid soul appeared who seemed impervious to the gloomy chill, who seemed even to resent it. One of these persons was now standing in the lobby and staring around with a cool impudence which drew unfavorable glances from the clerks.

He was a decently dressed fellow, obviously no customer of this sacrosanct place, obviously a stranger to its interior. Beneath a rakishly cocked soft hat beamed a countenance that bore a look of self-assured impertinent deviltry. After one look at that countenance the assistant cashier crooked a hasty finger at the floor guard, who nodded and walked to the intruder with a polite query.

"Can I help you, sir?"

The intruder turned, favored the guard with a cool stare, then broke into a laugh and a flood of Creole dialect.

"Why, if it isn't old Lacroix from Carencro! And look at the brass buttons—diable! You must own this place, hein?—the cat's tail grows in time, I see! You remember me?"



"Go to the Devil, Then," Snapped Chacherre, and Turned Away.

"Ben Chacherre!" exclaimed the guard, losing his dignity for an instant. "Why—you vaurien, you!"

"So you turn up your sanctified nose at Ben Chacherre, do you?" exclaimed that person jauntily. "A vaurien, am I? Old peacock! Lead me to the man who cashes checks, lackey, brass buttons that you are! Come, obey me, or I'll have you thrown into the street!"

"You—you wish to cash a check? But you are not known here—"

"Bah, insolent one! Monkey in the calabash that you are! Do you not know me?"

"Heaven preserve me! I will not answer for your accursed checks."

"Go to the devil, then," snapped Chacherre, and turned away.

His roving eyes had already found the correct window by means of the other persons seeking it, and now he stepped into the small queue that had formed. When it came his turn, he slid his check across the marble slab, tucked his thumbs into the armholes of his vest, and impudently stared into the questioning, coldly repellent eyes of the teller.

"Well?" he exclaimed, as the teller examined the check. "Do you wish to eat it, that you sniff so hard?"

The teller gave him a glance. "This is for a thousand dollars—"

"Can I not read?" said Chacherre, with an impudent gesture. "Am I an ignorant 'Cajun? Have I not eyes in my head? If you wish to start an argument, say that the check is for a hundred dollars. Then, by heaven, I will argue something with you!"

"You are Ben Chacherre, eh? Does anyone here know you?"

Chacherre exploded in a violent oath. "Dolt that you are, do I have to be known when the check is indorsed under my signature? Who taught you business, monkey?"

"True," answered the teller sulkily. "Yet the amount—"

"Oh, bah!" Chacherre snapped his fingers. "Go and telephone Jachin Fell, you old woman! Go and tell him you do not know his signature—well, who are you looking at? Am I a telephone, then? You are not hired to look but to act! Get about it."

The enraged and scandalized teller beckoned a confrere. Jachin Fell was telephoned. Presumably his response was reassuring, for Chacherre was presently handed a thousand dollars in small bills, as he requested. He insisted upon counting over the money at the window with insolent assiduity, flung a final compliment at the teller, and swaggered across the lobby. He was still standing by the entrance when Henry Gramont left the private office of the president and passed him by without a look.

Toward noon Gramont arrived afoot at his pension. Behind the garage, in the alley, he discovered Hammond busily at work cleaning and polishing the engine of the car.

"Hello!" he exclaimed, cheerily. "What luck?"

"Pretty good, cap'n." Hammond glanced up, then paused.

A stranger was strolling toward them along the alleyway, a jaunty individual who was gayly whistling and who seemed entirely carefree and happy. He appeared to have no interest whatever in them, and Hammond concluded that he was innocuous.

"They got them prints fine, cap'n. What's more, they think they've located the fellow that made 'em."

"Ah, good work!" exclaimed Gramont. "Some criminal?"

Hammond frowned. The stranger had come to a halt a few feet distant, flung them a jerky, careless nod, and was beginning to roll a cigarette. He surveyed the car with a knowing and appreciative eye. Hammond turned his back on the man disdainfully.

"Yep—a sneak thief they'd pinched a couple of years back; didn't know where he was, but the prints seemed to fit him. They'll come up and look things over sometime today, then go after him and land him."

Gramont gave the stranger a glance, but the other was still surveying the car with evident admiration. If he heard their words he gave them no attention.

"Who was the man, then?" asked Gramont.

"A guy with a queer name—Ben Chacherre." Hammond pronounced it as he deemed correct—as the name was spelled. "Only they didn't call him that. Here, I wrote it down."

He fished in his pocket and produced a paper. Gramont glanced at it and laughed.

"Oh, Chacherre!" He gave the name the Creole pronunciation.

"Yep, Sasherry. I expect they'll come any time now—said two bulls would drop in."

"All right." Gramont nodded and turned away, with another glance at the stranger. "I'll not want the car today nor tonight that I know of. I'm not going to the Proteus ball. So your time's your own until tomorrow; make the most of it!"

He disappeared, and Hammond returned to his work. Then he straightened up, for the jaunty stranger was bearing down upon him with evident intent to speak.

"Some car you got there, brother!" Ben Chacherre, who had overheard most of the foregoing conversation, lighted his cigarette and grinned familiarly. "Some car, eh? All she needs is some good tires, a new coat of paint, a good steel chassis, and a new engine—"

"Huh?" snorted Hammond. "Say, you 'bo, who sold you chips in this game? Move along!"

Ben grinned anew and rested himself against a near-by telephone pole

"Free country, ain't it?" he inquired lazily. "Or have you invested your winnings and bought this here alley?"

Hammond reddened with anger and took a step forward. The next words of Chacherre, however, jerked him sharply into self-control.

"Seen anything of an aviator's helmet around here?"

"Huh?" The chauffeur glared at his tormentor, yet with a sudden sick feeling inside his bosom. "Who you kiddin' now?"

"Nobody. I was asking a question, that's all. I was flyin' along here last night in my airplane, and I lost my helmet overboard. Thought maybe you'd seen it. So long, brother!"

"Few crooks in the country had not heard the name of Izzy Gumberts."

DON'T OBSERVE 8-HOUR DAY

Law Is No Longer Popular With Workmen in Hamburg, Germany, Says Writer.

Keener competition is causing a decided swing away from many post-war pet ideas in Germany. Even the eight-hour law is no longer popular, Frederick Simpich writes in Our World. The labor inspection bureau in a recent report pictures the trouble its enforcement is bringing as Hamburg's economic condition improved. Employers complain that laborers of both sexes, after an eight hour day, undertake to do outside work for other people—which cuts down their efficiency on their regular job. Workers, on the other hand, consider it an interference with their personal liberty if their employers try to hold them to the eight-hour plan. Although the law was passed to safeguard the health of the workers, they appear to have lost sight of its real intention, and the authorities show reluctance to prosecute cases of its violation. In the hotels and cafes, especially, it has been difficult to enforce the eight-hour day; waiters are loath to give up their chances for more tips during overtime.

Great Stuff.

"Gonna put Hamlet in the films."

"Can get some great effects with the ghost."

"Huh?"

"Look at the way he can fade in and out."—Judge.

The right kind of a man seldom has to spend half of his time looking for a job.

GETS CLOCK, BUT NOT "TIME"

Court Robbed of Imposing Timepiece Under Its Very Eyes and With Its Permission.

Thousands of law-breakers have been given "time" at Berlin's central criminal court in Moabit, but recently an ingenious crook posing as a repair man actually was given the court's official clock and that while a case was being tried.

The sitting was well under way when a man in working clothes entered the courtroom with a long ladder which he calmly placed under the huge, imposing timepiece on the wall. The judge, counsel, accused and spectators were astonished as such an unprecedented interruption. The president stopped the workman's ascent of his ladder long enough to inquire the meaning of his conduct. The visitor explained that he merely wanted to get the clock for repair and that it would take only a moment. The president objected, but consented when the man said he already had called six times and always found the court in session.

The vacant space on the wall surprised the janitor later in the day, and his investigations revealed that the court had been robbed under its very eyes, in fact, with its permission.

Scandal.

Her mother—I believe that daughter is looking for a husband.

Her Father—For goodness sake! Whose?

There are two sides to every story—and some have four and a ceiling.

ASSYRIANS NOT SO ROUGH

Were More Humane Than Popularly Fabled, Says Professor Who Has Studied Their Laws.

The Assyrian is popularly recalled as coming down "like a wolf on the fold." But one provision of the Assyrian code of laws indicates that the Assyrians are more humane than they are popularly fabled. This requires that the destitute widow be supported by her sons "as the bride whom one loves."

Instead of the Assyrians being wholly abject, their letters, says Prof. A. F. Olmstead, of the University of Illinois, show high officials speaking their minds with the greatest plainness, the kings making pathetic appeals to those whose support they would win. Their imperial free cities were as free as those in western Europe in the Middle ages, with charters of freedom from corners of the earth and to all tongues.

Two Viewpoints.

Sim and Sam, who hadn't seen each other since overseas days, met in the street and, after partially strangling each other by way of greeting, began getting personal.

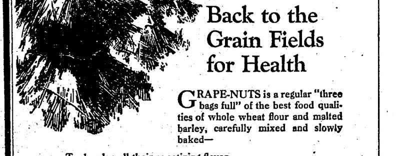
"Married?" asked Sim.

"Yep," replied Sam. "You?"

"Nope," answered Sim. "You're a lucky dog. 'Tain't good for a man to live alone."

"No-o-o," drawled Sam somewhat dubiously. "Prob-ly not, but sometimes I'd be willing to try it."

The virtues we are proudest of we practice because we have to.



Back to the Grain Fields for Health

GRAPE-NUTS is a regular "three bags full" of the best food qualities of whole wheat flour and malted barley, carefully mixed and slowly baked—

To develop all their appetizing flavor,

To preserve all their wholesomeness,

And to provide nature's "broom" that keeps the digestive system spick and span.

There's not a bit of artificial sweetening in Grape-Nuts—it just *becomes* sweet of its own accord in the long baking.

And that enticing flavor—how good it is with good milk or cream! Fruits, too, fresh or cooked, add to the delight of a dish of Grape-Nuts, morning, noon or sundown.

It is a compact, ready-to-eat food—no cooking needed. Why not try it for tomorrow's breakfast?

News of Minnesota

EVENTS of the week throughout the "State of Ten Thousand Lakes" told in brief form

Stillwater—The Washington county Holstein Breeder's association held its annual picnic in Crocus park here. About 2,500 participated in the program of sports and athletics.

Hibbing—The city council has adopted a resolution ordering a cut of 5 per cent in wages of all city employees, from heads of depatrments to common laborers, except where the pay is fixed by law.

New Ulm—Small grains in this vicinity will be an excellent crop. Already 2,000 bushels of rye have been delivered to the local mills.

Ortonville—The drouth in this district, which has extended over a period of 35 days and which had seriously menaced the corn crop, was broken with a heavy rain.

Pine Island—Farmers in the vicinity of Pine Island gathered at the farm of August Karow, two miles north of town, to destroy some 1,500 barberry bushes growing wild in a 20 acre pasture.

Cloquet—Forest fire claims in this city are being settled rapidly. Approximately 100 claims are yet to be settled in Cloquet, and settlements are being made at a rate from 15 to 20 claims each day.

Grand Rapids—A crowd estimated at 10,000 people attended the fourth annual Legion day celebration here. Beginning with a big parade there was something "doing" all day. Every business house in Itasca county closed.

St. Paul—Work was resumed on an addition to St. Mark's school, following a fire started when a heavy beam falling from the top of the building broke two electric light wires each carrying 4,500 volts.

Duluth—Erection of a hospital for contagious diseases through bond issue is prevented by the Minnesota supreme court in a decision holding the city council lacks authority to sell bonds for such purpose under its charter, without vote of the people.

Montevideo—Miss Elsie Salisbury, held for the murder of Oscar Erickson in April, has been released from custody on bonds of $20,000. The bonds were signed by Minneapolis and Marshall friends of the accused.

Minneapolis—Minneapolis' 1923 budget for transient relief provides for an appropriation of $40,000, Richard Tattersfield, secretary of the ways and means committee of the public welfare board, said.

St. Paul—Five hundred and ten dollars in gold will be awarded to boys and girls of Minnesota in a "perfect teeth" competition which will be feature of the health education work to be conducted at the public health building at the Minnesota State Fair.

Minneapolis—As a memento to be treasured by the University of Minnesota, a battered study desk used by the late Dr. Cyrus Northrop, former president of the university, in his student days at Yale and later when he was a member of the Yale faculty, will be presented to the university alumni association.

Pipestone—Max Menzel, druggist, is in a precarious condition in a Sioux Falls hospital as the result of an accident he suffered while playing golf on the municipal links at Sioux Falls. Menzel was accidentally hit on the head with a club by another player.

Duluth—Inauguration of a lakes-to-ocean service in advance of the deep water project is virtually assured through the announcement of definite plans for the erection of a large terminal warehouse on the Duluth waterfront and the building of a fleet of modern electrically propelled freighters for operation between Duluth and New York.

Austin—Ignoring the guards stationed at the roundhouse and shops of the Chicago, Milwaukee & St. Paul railway here, 100 strike sympathizers forced 13 Negroes from those buildings and escorted them out of the city. The sheriff and police, who had been summoned, arrived on the scene after the crowd had dispersed.

Ely—The jury in the case against the four men tried here on the charge of murder in connection with the killing of Orso Kovich, returned a verdict finding Matt Settinen and Matt Banich guilty of murder in the third degree and acquitting Nick Kostelos and Mike Svetich.

Mahnomen — After luncheon and sight-seeing at the "wonder farm" of J. B. Schermerhorn, Minneapolis residents, at Mahnomen, with its 30,000 acres, $250,000 in buildings and 1,400 head of fine beef cattle, the automobile party of the University of Minnesota agricultural department faculty, regents and farm paper editors, definitely abandoned the prairie and struck for the woods.

Crookston—Albert Lea was chosen as the next convention site of the first district of the Sons of Norway, which adjourned their sessions here after all officers had been re-elected.

Fairmont—"Every time the wheel goes round, someone wins a prize," murmured Judge E. C. Dean, as he gave a gambling wheel a whirl in district court here. As the wheel spun, the court watched it contemplatively, and when it stopped he said: "This time you draw $100 and the costs," addressing two prisoners who were before him, charged with gambling at Blue Earth.

[illegible] over the idea of being sent to the poorhouse, Nels Rasmussen, aged [illegible], blacksmith here, shot and killed himself.

Crosby—Oscar Tuomi attempted suicide in the Crosby jail by hanging himself to his cell with a chain he took from his bunk. He was rescued by the jailer.

Winona—The annual meeting of the Southeastern Minnesota Education association will be conducted here next spring, it was decided at a meeting of the executive committee.

St. Paul—Major E. D. Libby, pioneer resident of St. Paul, Civil war veteran and adjutant general of Minnesota in Governor S. R. Van Sant's administration, is critically ill at his home.

Grand Rapids—Contracts for the construction of the senior high school here have been awarded by the board of education for $205,540.55, or about $16,000 more than the estimate.

Faribault—A joint picnic of the Knights Templar of southern Minnesota was conducted at Cannon lake, near here. The Knights prepared an all day program of entertainment.

Hibbing—At the meeting of the town board of Stuntz, 13 bids were received for the filling in of the Iron Junction road contract.

Marshall—An automobile owned by M. R. Ford, of Minneapolis, which was stolen from the street here, was found upside down in a ditch on a country highway not far from here.

Owatonna—Private services were held at the home preceding the funeral of James M. Diment, former postmaster and mayor of Owatonna, because of the serious illness of Mrs. Diment.

Minneapolis—While Minneapolis is going ahead with its engineering program for the development of power at the Mississippi river high dam, St. Paul has turned its attention to other power sites.

Sleepy Eye—St. Patrick's council, Knights of Columbus, of Sleepy Eye, have plans perfected for the entertainment of visiting knights at the annual district picnic at Sleepy Eye Lake, State Park, Sunday, July 30. Several bands will furnish music.

Rochester—The first "barberry bee" in history is planned in this vicinity when farmers in the northwest section of the county gather in a drive to eradicate the barberry bush, 1,500 plants of which have been found in one small section.

Minneapolis—A 2 cent reduction in the price of gasoline and a 1 cent reduction in the price of refined oil by all gasoline companies went into effect in Minneapolis. Gasoline is now selling at 24.5 cents for standard grades, with one brand selling at 27.5 cents.

Crookston—More than two score professional and amateur painters donated their services at a "painting bee" at the fair grounds here. The "clean up" campaign was inaugurated to improve the appearance of the fair buildings for the annual fair August 7, 8, 9 and 10.

New Prague—The American Legion of New Prague did its job well. That was the verdict of hundreds of legionaries of the third district in Minnesota, who returned to their homes following the close of the third district convention here.

Lamberton—Fire of mysterious origin completely destroyed the large barn on the Fred Black farm near here. Six head of horses, a registered bull, several head of cattle and a large quantity of grain and hay burned with the building.

Fairmont—Omaha passenger train No. 6 pulled out for the Twin Cities backward and 40 minutes late because a union brakeman refused to tell S. F. Durga, agent, how to release the air when the train pulled in.

Fairmont—W. L. Nichols, court reporter in this district, will resign Oct. 1, because of impaired health and his business interests. Mr. Nichols has served for 25 years, being appointed by Judge James H. Quinn, now associate justice of the Minnesota supreme court in the spring of 1897.

Fairmont—The pea picking season at this point will be finished soon, officials of the canning plant say. The pack will amount to 40 carloads, twice the amount of last year's pack, 864,000 cans in 36 cases. It required three weeks for 100 workers to handle the crop.

Ortonville—More than 100 Minnesota and South Dakota boys and girls attended the second annual meeting of the boys and girls clubs at Simpson park here. Eleven counties in the two states had representatives at the gathering. Two Pope county boys rode more than 100 miles on their bicycles to attend the meeting.

Duluth—Lieutenant Governor Louis L. Collins, Mayor George E. Leach of Minneapolis and Mrs. Sandy Hamilton, president of the state auxiliary of the American Legion, will be guests at the banquets of the Legion and auxiliary posts of the eighth District in Duluth.

Austin—L. F. Liebenstein, agricultural agent of Mower county, has a sample of a fungous disease of the smut variety, which, he says, if not checked, will rapidly spread throughout the entire county. The growth is known as ergot and so far it has been found on only a few farms in rye fields.

Chaska—Sugar beet growers in Minnesota this year will receive at least $750,000 net for their crop, according to H. A. Dougl a,sprYbgRe fs cmfwyy to H. A. Douglas, president of the Minnesota Sugar company.

Morris—Winter wheat plots estimated to yield at a rate of from 30 to 35 bushels an acre and hard spring wheat plots from 25 to 30 bushels at the agricultural college experiment station at Morris impressed the touring party of educators and farm paper editors here with the significance of the transition of western Minnesota from grain to diversified farming.

The Utility Coupé

Built Especially for Busy Men

$720 *f. o. b. Flint, Mich.*

Here is a new closed car built especially for utility purposes in city or country driving.

Farmers and ranchers have long wanted a low-priced, economical, closed car of better quality and great durability—completely equipped with all the essentials of modern motoring.

Chevrolet Utility Coupé satisfies this need in every particular.

It also possesses distinct advantages for salesmen, business men, suburban residents and those who need a car for every day use providing protection against all kinds of weather.

The Chevrolet Utility Coupé has a high-grade, Fisher body with black finish; gray whipcord upholstery; plate glass windows; double ventilating windshield, sun visor and extra wide doors.

Under the rear deck is a compartment approximately twice as large as those usually found on coupés.

EDITORIAL

PENNINGTON COUNTY FAIR

The Pennington County Fair takes place next week at Thief River Falls. The dates are August 2, 3 and 4.

Aside from the opportunity it offers for amusement and recreation, the main idea of the Fair and its greatest usefulness comes from the showing of livestock, grains, grasses, vegetables and the handiwork of the housewife, and from the chance thus afforded to discuss these things with your neighbors.

Only the best of everything is placed on exhibition, and since it is the ambition of all of us to excel in whatever we undertake, this annual fair of ours becomes a school where we take a post-graduate course and may derive much knowledge.

People are prone to overlook the educational advantages of the Fair and seek the noisy places of amusement. This is all good and well, but no one should attend the Fair except with the idea of gaining knowledge of a useful character.

Our own Fair is known far and wide as one of the very best fairs in Minnesota, and it is to our advantage to keep the Fair up to its former standard and to seek methods of improvement. By your attendance and by participating in the exhibits, by your interest in all its departments and by helpful suggestions, you can make the Pennington County Fair the best in Minnesota.

By all means, the people of Goodridge and surrounding country and all of Eastern Pennington County should attend en masse.

THE PRICE OF GASOLINE.

This newspaper is pleased over the action of the American Automobile Association in making violent protest against the steady increase in the price of gasoline.

Last week there was a reduction of two cents per gallon, but we are of the opinion that further reductions should take place. Gasoline is selling at more than 26 cents a gallon when it probably could be sold profitably at 15 cents.

The supply of gasoline in the United States during the first quarter of 1922 was 854,232,000 gallons, which was greater by 20 per cent than the 1921 supply and 36 per cent greater than the supply in 1920. There has been no corresponding decrease in the price. Every cent of increase in the price of gasoline means $50,000,000 to the gasoline users of the United States during the year.

If the matter was sufficiently agitated, we believe relief would come, but such relief can only come if newspapers and individuals make a noise that can be heard at headquarters. It is suggested that people write the senators and representatives in congress asking an investigation of this matter of high-priced gasoline.

THE SOUL OF A TOWN.

The soul of a town is a wonderful thing. It has indefinable spirit that sets a town apart from any other town. It is the composite spirit of the people who live in the town and represents their ideals, their aspirations, their hopes and their ambitions.

A town cannot be greater than its inhabitants. It invariably reflects their habits, ideals, hopes and fears. No city can grow in advance of its people. They must first mark out the way, then being their onward march to their goal.

According to the Hutchinson Leader owned by Carlos Avery, state game and fish commissioner, "hunters will find their names on the black list when they come to make application for licenses this fall unless they have made reports on last year's licenses. These reports are required whether game was secured or not. If licenses have been lost, blank cards for making these reports may be had of the county auditor or any game warden."

True success is the educating and adapting of one mind and soul to such a manner that he may be able to enjoy life and appreciate its highest conceptions, that he may partake of the sweetness of Nature, and in his daily walks and labors be able to teach and enlighten the minds of others, thus making life a pleasure to his fellow men as well as to himself.—Orison Swett Marden.

Judging by the number of game birds seen along the roads throughout the country, there is going to be some mighty good shooting for hunters around Goodridge this fall.

The 1922 season for Chautauqua entertainments has so far proven a tough proposition for the guarantors. Frazee, Vergas and Detroit have had to dig up to make good on their guarantees to the professional entertainers and now Thief River Falls has entered the deficit column, as it has several times in the past. It looks as though people care but little for the big tents during the summer months and it would not be at all surprising to see them pass out of existence altogether, in the same way as all the other various kinds of road shows have furled their wings.

It is said that Douglas county, the home of Senator Knute Nelson, voted against him 2-to-1 two years ago. All of which goes to show they are getting some sense down there. The chances are that the "Grand Old Man of Minnesota" would be a poor 10-to1 shot in another election.

When a girl goes riding with a stranger, she thereby advertises herself to the stranger and everybody else as that kind of a girl.

An exchange says that if love is blind there must be a lot of married folks in the world who enjoy excellent eyesight.

We haven't got that new rural route yet, but everything good is slow in coming. Probably as slow as the mail is in coming at present.

What has become of the old fashioned man who used to think he could not get along without his wee nip before breakfast?

Our idea of a dirty coward is a man who will strike a child or lie about a young girl.

Never start a bad story about another person. It may be a damn lie to begin with.

There are many men in the poor house who wrote books on "How to Get Rich."

It won't be long before some promotor will be organizing a company to skim the cream off the Milky Way.

Who said Friday was unlucky? Washington was born on Friday. Shakespeare was born on Friday. America was discovered on Friday. Richmond was evacuated on Friday. The Mayflower Pilgrims landed on a Friday. The Battle of Bunker Hill was fought Friday. The Battle of New Orleans was fought on Friday. The Battle of Waterloo was fought on Friday, and the Declaration of Independence was signed Friday. Yes, and Robinson Crusoe had a man named Friday.

Deer Park Gleanings

J. R. Jones pulled into camp last Friday after a two weeks' stay at Brooks and other points.

S. B. Swanson left for the North Dakota harvest fields last Friday and expects to be gone about two months.

The Scandia Young Peoples society met at the place of Gunder Asbjornson last Sunday. A fair sized crowd was present.

Mr. and Mrs. Cash Waldron and family came up from Chisholm last week for a few days with old friends and relatives in Hickory and Deer Park. Mr. Waldron reports that the mines down there are nearly all working full blast again.

* * *

A nice big deer with two little fawns were seen in this vicinity last week.

* * *

The rye harvest is now in full blast. Haying is well under way and will be finished by time harvesting of the rest of the grain.

* * *

In the entire township of Deer Park there is but 164 acres of wheat this year. This is but an indication of what is taking place all over the country. Will Congress permit the bread basket of the world to go empty by default or will they awake to the fact that it is soon time for action?

* * *

Corn and late seeded buckwheat have been on the standstill for some time. From present indications it appears that buckwheat at least will be a pretty scarce article in the fall unless wonderful changes in its growth takes place inside of the next few days. Flax runs uneven, with a fair prospect in view for an ordinary crop.

THIEVES ARE BUSY AT WARREN DURING FAIR

Thieves were busy at the Fair Grounds during the county fair held here, last week. Adrian Cormier of Argyle was the heavy loser. His big Buick six was stolen Wednesday evening. The car was found near the John Ahlstrom farm in the town of Boxville stripped of the tires, battery, spot light and all the tools. No clues have been found as yet, but the guilty party is apt to be found and will be punished to the full extent of the law.

Bert Woods Buick was worked upon by the thieves, the lock was broken, but he had planned for safety and had his gears locked so the car could not be moved.

Several spare tires and other things of value on an automobile were stolen. A person nowadays will have to take his car with him if he wants to be sure of not losing it.—Warren Sheaf.

NORTHERN MINNESOTA FAIR TO BE EARLIER THIS YEAR

The Northern Minnesota Fair this year at Bemidji, Minn., is to be held earlier than it was last year, and will give the management an opportunity to provide better amusements and races. The permanent fair board has been active since the day the fair closed last year and assures those who attend that this year's efforts will surpass anything ever attempted in this part of the state. It is to last five days, August 15, 16, 17, 18 and 19. Tuesday, August 15, being the entry day, and Saturday, August 19, will be the big sale day, a great number of thoroughbred stock having already been listed for sale, and any one who wishes to dispose of stock on that day may communicate with H. M. Clark, president of the Fair Board.

An added attraction for the evening shows will be a pageant of "The History of Beltrami County," which is to be staged in front of the big grandstand for three nights. This will be a wonderful spectacle and will be worth making arrangements to attend. Every effort will be made to care for the crowds that are expected to attend this year's fair at Bemidji.

Reduced fare for railroad travel on these dates has been granted by most of the roads, to date, and the others are expected to do the same.

A great list of entries have already been registered, coming from a long distance, and the exhibits are expected to surpass any other year.

BINDER TWINE Handle the Minnesota Line Farm Machinery

I have secured the agency for the Minnesota line of farm machinery for the territory tributary to Goodridge and am prepared to furnish you with this well-known make of Binders, Mowers, Rakes, etc. Will later make a canvass of this section of the County and hope at that time to secure orders for Minnesota Machinery. I will shortly have a shipment of Binder Twine in Goodridge and it is requested that you leave your orders early. **Office One Door East of Goodridge Hotel.**

Sham Battle to Feature Pennington County Fair

Tin Derbies and Gas Masks, Machine Guns and Rattle of Musketry When Service Men Present Spectacle.

The manner in which Elmer J. Eklund Post of the American Legion is taking hold of the request of the Pennington County Fair Association for the staging of a Sham Battle on the evening of Friday, August 4, 1922, assures a grand finish to what will no doubt be the most eventful season of the Pennington County Agricultural Society.

Arrangements are being made through Adjutant General Rhinow for the use of machine guns and equipment and the country is being scoured for overseas equipment for the event and any overseas man having a "Tin Derby" or Gas Mask that can be available for use will please report same to Oscar Paulson, Commander, at the American Railway Express Co. office.

Plans are rapidly being made to demonstrate to the home folks just how No Man's Land appeared to their sons and a demonstration will be given of the method of taking a machine gun nest, that event which won for so many the coveted Congressional Medal of Honor.

The action will commence with the sending of a patrol out in "No Man's Land" for the purpose of cutting the enemy wire entanglements of the enemy and star shells and very lights fired the same as were used in France, and the patrol will then be met by a German patrol, and a hand-to-hand fight take place, the sole survivor returning to the American ranks to report.

The attack will be preceded by an artillery barrage, using specially prepared fireworks which similate the form and effect of a barrage and a skirmish line will go "over the top" and will be subjected to shrapnel fire represented by fireworks and star shells and very bright lights will light up No Man's Land.

Heavy counter-artillery fire will then be encountered by the attacking party and the French system of squad formation will be adopted, and later squad rushes will be made to place the attacking party in position to take the machine gun nest.

A barrage will then be laid down by the rifle grenadiers and the automatic reflemen, and under incessant fire from the machine guns the bombers or moppers-up, with the use of hand grenades, will deploy and bomb the dugouts and machine gun nests, and the final rush with fixed bayonets will demonstrate how the American Army in France silenced the German machine gun nests, the greatest known hindrance to infantry advance.

Later a demonstration of the activities of the Red Cross and Medical Service will be given and stretcher bearers will demonstrate the care given the wounded after action.

Oscar Paulson, Commander, is in charge, or arranging for the personnel of the opposing armies and all those who are willing to participate will report to him. Members of the Engineering Corps familiar with laying out a trench system, step to the front (no digging required).

Lawrence Hermanson is in charge of properties and is busy arranging for the required equipment. A. W. Jardine is in charge of the machine gun nests and is busily engaged in getting German soldiers and equipment. G. Howard Smith is in charge of the infantry section and attacking party and is desirous of lining up a bunch of Bucks for the old game of "Squads East."

Taking it all in all, Friday evening, August 4, 1922, will be a hot time at the Fair Grounds. We want you there!

STATEMENT BY RAILWAY EMPLOYEES' DEPARTMENT

Messrs. R. A. Henning, President, 2395 University Ave., St. Paul, Minn.; Wm. Parranto, Vice-President, 409 Dakota Bldg., St. Paul, Minn.; John Williams, Sec'y.-Treas., 407 Dakota Bldg., St. Paul, Minn.

Dear Sirs and Brothers:

The Executive Council, Section 2, Railway Employes' Department, has met your committee and understand that you have had a conference with officials of the Northern Pacific, Great Northern and other railroads in the Northwest, and there was discussed a possible basis of settlement of the present strike. It was proposed by the management:

1. That the employees now on strike be promptly returned to service and to their former positions, with seniority rights unimpaired.

2. That as promptly as possible after the men had returned to service, conference would be arranged including seventeen railroads, at which time there would be under consideration:

(a) The removal of the objections of the shop craft employees to the seven rules, and it was indicated although not promised, that Rule 6 could be agreed upon.

(b) That the question of rates of pay be subject matter of negotiations. No deffinite promise being made as to what could be expected, or what could be accomplished.

We understand your committee urged the railroad management whom you met to assist in bringing about a settlement of the situation by prevailing upon the other railroad managements to meet the Conference committee of the Railway Employees' Department and negotiate a general settlement, and that it was your committee's understanding that these officials had done everything that they could think of along this line, and could probably not be expected to go further, and that unless negotiations on the basis they suggested, or for the railroads in that particular section could be opened within a few days, the men being promptly returned to service, the management would issue instructions notifying the men now on strike, that failure to return to service on day and hour to be set they forfeited their seniority rights and the railroads would not thereafter employ these men.

Your committee requested the Council to give them permission to restore the men to service and negotiate a settlement for the group of railroads in your territory, and I am by the Executive Council directed to make to you, your committee and those whom you represent this reply:

Railroad managements of the United States, thru the Association of Railway Executives did, upon the return of the railroads in 1920, accounce a policy which railroad employees were requested to follow, which if pursued would have invariably lead to chaotic conditions, and everything that could be done was urged by the employes' organizations to persuade the managements thus represented to not pursue such a policy.

It should be born in mind that in March, 1920, the railroads were the one industry so well safeguarded and protected, and in the most favorable conditions to meet the requirements of the American people, in terms of transportation. The greatest degree of co-operation and good feeling ever known in the industry existed between the railway employees and the practical operating officials. Confidence in each of these parties had been restored. Men had their hearts in their work. Efficiency of railway employees and practical operating railway managements were at the highest point ever reached. Continued industrial peace was insured, if those who controlled and directed the financial operation of the railways would permit same.

Notwithstanding these facts and that the American public would have been insured that volume and character of service to which they are entitled, the financial management of the railways would certainly have received their fair and proper share of the increased incomes of the industry. This has been, and now there is a well organized and directed campaign of attack, persecution, oppression and deflation of railroad employees.

Railroad managements thru the Association of Railway Executives met and announced policies of the railways. These policies are carried out and complied with by the individual railroad companies. As a part of these policies the railroads claim that there must be system negotiations, and during 1921 there was conducted or an effort was made to conduct on each railroad in the United States system negotiations with the result that the System Federated Committees met the individual railroad managements and found that each and every railroad, generally speaking, was demanding that certain conditions of employment which had been in effect for approximately half a century must be taken away from the employees. There was no serious attempt made by these practical operating officials to defend these demands which they were instructed to present and stand unyielding for. These practical railroad managers knew that the demands could not be successfully defended. In many, many instances they made it quite clear that it was not expected that the Labor Board would endorse, even in part, these demands [illegible] who announced [illegible] program (the Association of Railway Executives) knew that if they secured any concessions from the Railroad Labor Board, that they were taking from the railway employees, conditions of employment resulting from years of efforts and negotiations all of which conditions had been given by many of the same managers with whom the Federated Committees were in conference.

The Association of Railway Executives knew that the Labor Board was somewhat of an Arbitration Board, that it would attempt to find a half ground, that its decisions were subject always to the approval of both the railroad managements and the employees, that the employees were asking only for a continuation of the working conditions which had been in existence for years.

The pronouncement of the Railroad Labor Board resulted in many important rules governing working conditions being modified, or taken from the employees entirely, and with a sincere and earnest desire to see peace established on railroads, the employees whom your committee represents accepted all the rules announced by the Labor Board, except Rules 6, 10, 12,14,15,46 and 177. These seven rules were not accepted by the general Conference committee of the Department, by the System Federations on the respectives railroads, by the Convention of the Railway Employees Department, or by a referendum vote of the membership, but in each of the above instances they were by practically unanimous vote rejected.

The Shop Crafts Employees have, from the first day the railroads were released from Federal control, urged that an established preliminary to industrial peace on railroads there must be a National Board of Adjustment created, by agreement with the railroads, and that this was clearly contemplated and provided for in the Transportation Act. The railroads have refused to create any Board of Adjustment for the shop craft employees. They have apparently done everything they possibly could to flood the Railway Labor Board, the only agency in existence to whom disputes could be submitted. They have undoubtedly sought to flood this board in order to make it impossible and ineffective, with the hope of leading it into the rendering of unjust and unreasonable decisions, creating dissatisfaction among the employees by the delay in adjusting disputes, the vast majority of which ought to have been adjusted in the system Conferences. Few, if any, could have been adjusted, however, because of the interference by the Association ofRailway Executives.

You know, and we know, that there is not a practical railroad official who would dare decline to comply with the program announced by the Association of Railway Executives.

There have been two uncalled for, unjustifiable and vicious campaigns of deflation of wages of railroad employees (shop crafts) one in 1921 and one in 1922. All will recall that the chairman of the conference committee of the Railway Association of Executives in the early part of 1921 appeared before the Labor Board and there issued an ultimatum stating that unless the working conditions then in existance, in accordance with the provisions of the Transportation Act. were, by the Labor Board, immediately annulled and the wages of the railroad employes promptly and materially reduced; that unless these things were done forthwith, the railroads would flood the Labor Board with demands for wage reductions.

The Association of Railway Executives knew that the law would not permit the Labor Board to grant the demands made. It was simply a part of the general campaign of propaganda intending to coerce the railway employees and influence the unthinking and uninformed American Public.

It will be recalled that in 1920 and 1921 railroad management contracted out hundreds of locomotives and thousands of cars to railroad construction and repair companies in which the railroads themselves are financially interested, during the time when their own railroad shops were closed down entirely, or their forces were largely reduced. This policy of the railroads resulted in great costs of operation, the expenditure of millions of dollars unnecessarily, and was not intended to save money, but was intended only to coerce, intimidate and starve railroad employees into submission of unjust and unreasonable treatment. During these two years and one half, the railroad employees have been patient, [illegible] to [illegible] They have presented [illegible] costing thousands of [illegible] Labor Board. They have spent days and days in hearings before the proper committees of congress, discussing the injustices that were being heaped upon them. They have participated in investigations conducted by the Interstate Commerce Commission, hoping there to secure relief. They have appealed to every known authority empowered to deal with the questions, and each and every appeal has apparently fallen upon deaf ears.

Fraternally Yours,
B. M. JEWELL,
President.

Council Proceedings

June 5, 1922.

Regular meeting of the Village Council held June 5, 1922. Meeting called to order by the President. All members present.

Moved and carried that Bert Tanem be granted pool table license for one year.

Moved and carried that the trustees' salaries be set at $1 each meeting.

The Clerk's salary $60 a year.

The Treasurer's salary $20 a year.

The Clerk's salary for collecting light bills be set at $50 a year.

Moved and carried that the President be appointed to see Mr. Arneson about getting the minutes printed in The Banner.

Moved and seconded that Rev. Aakre and M. G. Thoreson be appointed as clerks for the Primary Election and Mr. Gaudland, A. C. Tvedt and J. Stephenson act as judges.

Moved that the village put up a sign at the Jefferson Highway at Oklee showing the distance to Goodridge.

N. BUNDHUND,
President.
M. G. THORESON, Clerk.

July 3, 1922.

Regular meeting of the Village Council was held July 3, 1922.

Meeting called to order by President.

Following bills were allowed:

Jack Donahue, work on street	$4.50
Farmers Elevator Co., lights for May and June	200.48
G. C. Gulrud, painting signs	6.00
Oliver Resan, dragging streets	48.50
G. Josephson, hauling gravel	2.10
M. O. Sevey, hauling gravel	42.75
M. G. Thoreson, collecting light bills, four months	16.66
A. C. Tvedt, judge of election	5.60
Halvor Homme, work on streets	10.50
John Sundquist, nails	.60

N. BUNDHUND,
President.
M. G. THORESON, Clerk

Citation for Hearing on Petition to Sell, Mortgage or Lease Land.

Estate of Ole A. San, Incompetent.

STATE OF MINNESOTA, COUNTY of Pennington, ss. In Probate Court.

In the Matter of the Estate of Ole A. San, Incompetent.

The State of Minnesota, to Ole A. San, and all persons interested in the sale of certain lands belonging to said Ole A. San. The petition of Nick Bundhund, as representative of the above named Ole A. San, being duly filed in this court representing that it is necessary and for the best interest of said estate and of all interested therein that certain lands of said Ole A. San, described therein be sold and praying that a license be to him granted to sell the same.

Now, Therefore, You and each of you, are hereby cited and required to show cause, if any you have, before this court, at the Probate Court Rooms, in the Court House in the city of Thief River Falls, County of Pennington, State of Minnesota, on the 12th day of August, 1922, at 10 o'clock A. M., why the prayer of said petition should not be granted.

WITNESS, The Judge of said court, and the seal of said court, this 18th day of July, 1922.

(COURT SEAL) LARS BACKE,
Judge of Probate.
H. O. CHOMMIE,
Attorney for Petitioner. J-21-28 A-4

Nevertheless, that assurance of enough planes to move the mails is not taken so seriously by the public as by the postoffice department. The average letter writer still has to be shown about the aerial mail.

Nothing surprises a woman so much as the failure of the unexpected to happen.

Highlanding Breezes

Mrs. M. Johnson of Grand Forks, N. D., and Miss Myrtle Ellingson left for Fisher, Minn., this week where they will visit for an indefinite period.

Mrs. Nissen of Minneapolis is visiting with her sister, Mrs. Iner Jensen, this week.

Mrs. Anton Johnson was a caller at Chris Nissen's last Thursday.

Mrs. Bakke and daughter were callers at the Nissen home last week.

Mrs. William Vaughan is entertaining her sister from Washington this week.

Miss Julia Sigurdson is home for a few weeks visiting from Devils Lake, N. D.

Mrs. A. E. Ellingson, Miss Julia Sigurdson and Mrs. Otto Sunsdahl of Grand Forks, N. D., were business callers at Thief River Falls Thursday.

The Ellingson and Sigurdson families were blueberry picking Sunday.

A number of people from Bemidji en route to Germantown to visit at the home of Emil Ristau passed thru Highlanding Saturday.

Miss Hattie Wilde shopped at Highlanding Monday.

The debate at Highlanding Sunday evening was well attended, a most interesting program being rendered. One of the most interesting numbers on the program was a song by the "Happy Six," a boy sextette. They will sing again August 6. Come out and hear them.

A number of young folks of Highlanding autoed to Goodridge Sunday to attend the ball game played between Highlanding and Moyland. The game was won by the Highlanding nine.

Anton Johnson and Iner Jensen autoed to Thief River Falls Friday evening to take Mrs. Nissen on the train for Minneapolis.

Mr. and Mrs. Cousins and children, Ella, Harry and Otto, spent the weekend in North Dakota visiting relatives and friends.

Mrs. H. Hiland and Mrs. Hunt were callers at the Hanson home Saturday evening.

Ole Narvarson and Mr. Eliason were business callers at Thief River Falls Friday.

Mr. and Mrs. Anton Johnson and children, Vivian and Walter, were callers at Prestogaard's Sunday.

BIDS FOR BUS DRIVING.

The school board of District No. 110, Marshall county, will meet at the clerk's office, August 4, 1922, at 8 o'clock, for the purpose of accepting open bids for the transportation of school children to Goodridge for the coming term. Driver to furnish own rig.

The Board reserves the right to reject any or all bids.

L. P. POPPENHAGEN,
Clerk.

Sell Your Cream at the Creamery

There is a big advantage in disposing of your dairy products at the creamery, chief of which is the fact that the local institution is founded upon he co-operative basis and you therefore receive its advantages. You get as much—and more—here for your cream than from independent buyers.

10,600 POUNDS OF BUTTER
MANUFACTURED LAST MONTH

Help swell the total next month by selling all your cream to us. Only by your co-operation can the creamery exist and remember we are always willing to meet competition from all outside sources.

Goodridge Co-Operative Creamery

MRS. FRANK WILKIE, of Syracuse, N. Y., formerly matron at the State Reformatory at Industry, N. Y., who says she is delighted with Tanlac since it restored her health after she suffered eight years.

"This is the first time in eight years that I have been free from stomach trouble and it is all because of the wonderful good Tanlac has done me," said Mrs. Frank Wilkie, 229 Cedar St., Syracuse. Mrs. Wilkie formerly resided in Buffalo and for two years was matron of the State Reformatory at Industry, N. Y.

"I was eating scarcely enough to keep alive," she declared, "for I would rather not touch a bite than suffer the misery I knew would follow. Even sweet milk disagreed with me. I was sick in bed for two and three days at a time, and gas on my stomach made such awful pressure on my heart it almost cut off my breath. I had horrible dreams at night and in the morning was all tired out.

"Well, the longest day I live I will praise Tanlac, for my improvement has been simply remarkable. I have no more heartburn, my appetite is wonderful, I can eat most anything I want, and my sleep is sound and restful. I am thoroughly delighted with Tanlac. It is wonderful."

Tanlac is sold by all good druggists. —Advertisement.

Flowers for Luck.

In Switzerland when the cows are driven to the mountain pastures for the summer, the leader, which wears a bell, has her neck garlanded with flowers for luck.

ALLEN'S FOOT-EASE DOES IT

When shoes pinch or corns and bunions ache, get a package of ALLEN'S FOOT=EASE, the antiseptic powder to be shaken into the shoes. It takes the sting out of corns and bunions, gives instant relief to Smarting, Aching, Swollen feet. 1,500,000 pounds of powder for the feet were used by our Army and Navy during the war.—Advertisement.

CABINET TO TAKE HAND IN CRISIS

Further Breakdown Of Commerce Can Not Be Permitted Is Belief At Capital.

PRESIDENT CAN ACT

Harding Can Operate Railroads If Executives Resist, Claim—Two Courses Open to Him in Order to Operate.

Washington.—The impression gained in official circles was that the rail situation was being rapidly "shaken down" to a point where a new move by the administration could be expected.

Cabinet members, who discussed the situation, declared that President Harding was in personal charge of the quetsion and, though there was a strong belief that the cabinet would be called upon to consider it at the regular session this week, no hint was given as to the manner in which the transportation crisis would be laid before the president's official family.

Further evidence was obtained that advisers of the chief executive have urged that the government cannot permit the breakdown of the country's arteries of commerce to go further.

Official reports have been received giving details of the extent to which the strike has been responsible for "blanketing" of the healthy business revival in the United States. While instances of direct interference with the United States mails have recently been absent, postal inspectors have recorded further annulments of important mail trains.

Some administration advisers who favor a drastic move by the government believe President Harding should demand that the railroad executives make every effort to restore interstate commerce to the extent of abandoning their stand on the seniority issue. The matter of a fair living wage for railroad employes, conceeded to be the remaining important issue, could then be settled directly.

NO SHORTAGE OF LABOR

Threshing Begins in N. D. and the Harvest of Wheat Is Started.

Fargo.—The season's first threshing in thi svicinity was reported yesterday at Casselton. Rye threshing started last week at the farm of William Askew, five miles east of that place. While no definite figures on the yield were obtainable, the threshing results were reported excellent with the grain of good quality.

Threshing is expected to be in full swing for the rye crop within the next week, but there is still no shortage of farm help, according to Mrs. M. B. Bowe, in charge of the United States employment office here.

Plenty of Help.

Men are proving no more backward in accepting jobs this year than in former years and altho the majority of orders are being filled, Mrs. Bowe declared. Since the latter part of last week demand for threshing help has been received and Mrs. Bowe predicts that rye harvest and threshing will be practically completed before the wheat harvest is even commenced.

Rye harvest in the central and southern portions of the state is practically complete now and the northern counties are well under way. Strongest demands for labor are coming from Bismarck and Minot, where the crops are reported heavy and the local office is directing the drift of men that way.

MOONSHINERS OVERRUN CITY

Village Is Terrorized by Moonshiners —Are Promised Aid.

Minneapolis.—Terrorized by moonshiners, who, they declared are overrunning the district, citizens of the little town of Kingsdale, 40 miles south of Duluth, appealed to state and federal authorities for aid, declaring their village has become the center of organized liquor dealings extending throughout Minnesota.

A delegation, headed by Charles R. Grace, of Kingsdale, whose hotel was mysteriously dynamited July 17, waited on Governor J. A. O. Preus and asked his aid. Governor Preus referred them to S. B. Qvale, federal prohibition director for Minnesota.

"The government will co-operate to the fullest extent to wipe out the moonshiners," Mr. Qvale said. "If necessary, armed forces will be sent in. The government will not tolerate such things, nor permit them to continue."

Fight for Wool Duty Limit on.

Washington.—Failing to get aciton from the senate finance committee majority, Senator Lenroot, Republican, Wisconsin, launched today in the senate his fight to limit to 60 per cent ad valorem the duties in the pending bill on coarse wools, both in the raw and the manufactured state. His proposal met with sharp opposition from the spokesmen for the committee and senators engaged in the production of wool and there were frequent and, at times, sharp exchanges.

MRS. ADAMS-WILLIAMS

Mrs. Lydia Adams-Williams, candidate for the Republican nomination for United States senator from Nevada, has taught her male opponents a new political maneuver. She is following circus companies across the state, and in this way finds opportunities to address large audiences.

20 TRAINS ANNULED

Rock Island Granted Injunction —Strikers Obey Court

Minneapolis—Curtailment of passenger train service on the entire system of the Northern Pacific railroad on account of the strike of railroad workers and to conserve coal was announced by the Northern Pacific Railway company. Approximately 20 passenger trains are withdrawn most of them in suburban service.

The principal train eliminated is the Yellowstone Park Special, operated between the Twin Cities and Yellowstone park. This train, it was announced is discontinued in order to conserve motive power for regular coast trains. Yellowstone park passengers will be carried on regular coast trains.

Other developments in the Northwest strike situation are:

The Rock Island railroad obtained a federal court order restricing picketing of the yards, shops and property of the company in Minnesota, making a total of six roads which have sought and obtained restraining orders directed at the striking shopmen.

Deputy United States marshals left the Twin Cities for many railroad junction points in the state to serve restraining orders on shop craft leaders and other defendants.

Western presidents' committee on public relations explains position of the Western roads in the strike by issuing a formal statement, declaring that the men wishing to return to work must be protected.

Union officials give orders to limit picketing at the yards in Minneapolis, in conformity with the provisions of the orders of the United States district court.

OUTPUT SETS STATE RECORD

169 Million Pounds Produced During 1921, Dairy Commission Reports.

St. Paul—Minnesota, far-famed as the greatest butter-producing state in the country, eclipsed all of her former efforts in 1921 by manufacturing the largest amount of this product of the creameries in her history, according to a statement issued by Chris Heen, dairy and food commissioner.

Sworn reports from all the creameries of their total production have been received and compiled, showing that a total of 169,574,872 pounds was made. This is an increase of more than 21 per cent over the production total of 1920, which was 139,229,843 pounds. This is also the largest yearly percentage of increase in 15 years. The largest previous production was in 1919, when a total of 143,176,204 was manufactured.

13 Boats Taken Off Lakes.

Milwaukee—A fleet of 13 large freight boats operated by a Buffalo steamship company will be taken off the great lakes shortly because of shortage and high prices of fuel coal, Milwaukee shippers, seeking to avail themselves of these boats learned. The company refused to give the shippers a boat for a local cargo. Fuel coal at most of the lake points is selling at $8 a ton, an unprecedented figure, so large that grain transportation costs are raised one cent a bushel by reason of it, according to local shippers.

Sold for $2,000,000.

Columbus, Ohio—Announcement was made here by Frederick W. Schumacher, Columbus banker, that he has sold extensive gold mining interests in Canada for more than two million dollars.

Los Angeles—Lee Moran, film comedian, was made defendant in a suit for divorce filed by Esther E. Moran. She asks $1,000 a month alimony.

Corn Growing Fast.

Fairmont, Minn.—Corn is of surprising size for this time of year. Stalks are now on exhibition here from several Martin county farms ranging from 8 to 11 feet in height, with two to three ears on each stalk, in the silk.

Workers Hold Out.

Spokane, Wash.—Ranks of the 67 fire fighters who are standing idle at St. Maries, Idaho, while flames over a 5,000-acre area endanger the St. Joe National forest, were unbroken.

SHOPMEN ISSUE PEACE TERMS

Fight on Seniority Rights Seen as Chief Obstacle to Settlement—Urges Rehearing.

Chicago—Three principal issues now prevent a possible settlement of the railway shopmen's strike, B. M. Jewell, head of the railway employes' department of the American Federation of Labor, said in a statement. These issues, he said, are found in the refusal of the rail executives:

First—To discontinue contracting out of work.

Second—To establish a national board of adjustment.

Third—To continue seniority rights of employes who suspended work.

"The responsibility for increasing losses to the railroads, to the communities they serve and to wage earners upon the railroads and elsewhere, through continuance of the present suspension of work," the statement said, "rests plainly upon the Association of Railway Executives, and particularly upon that small but dominating group, representing the New York banking interests."

Pointing out that the Railroad Labor board has decided against the practice of contracting out railroad work in certain cases, Mr. Jewell asserted that the Erie railroad, the New York Central and its subsidiaries, including the Indiana Harbor Belt, the Michigan Central and the Big Four, and the Western Maryland road have all contracted out shop work."

"Many other roads," the statement said, "have followed the same practice, and always with the purpose and result of reducing wages, evading decisions of the labor board, degrading working conditions and attacking the employes' organizations."

FALL THRESHING MENACED

Emergency Facing State and Northwest Described as Serious.

St. Paul, Minn.—Threshing of Minnesota's harvest is apt to be seriously retarted by a shortage of coal, and immediate steps are necessary to insure farmers of the Northwest enough fuel to thresh their crops, Governor Preus told a group of coal operators and retail dealers and civic association officials of Minneapolis and St. Paul at a conference called by him in the office of the Hanna Coal company.

The normal needs for threshing in the Northwest are 1,000,000 tons, he said, and at the present time there are only 100,000 tons on the docks at the Head of the Lakes. Dealers stocks also are low, the Governor was informed, and he will determine the exact amount of their stocks by circularizing them.

"Aside from the needs of the railroads, who must have coal to transport coal, the most immediate need for fuel in Minnesota will be for threshing," said Governor Preus. "A special kind of coal is required. Coke cannot be used. Oil cannot be used. Straw, the next most satisfactory fuel, will not go far. Farmers of the state must have coal, and this is an immediate emergency."

STRIKE OF 7,300 AVERTED

Employes Accept Wage Cut—Plan Appeal for New Hearing.

Chicago—The threatened strike of 7,300 clerks on The Chicago & North Western railway was settled through the efforts of W. L. McMenimen, labor member of the United States Railroad Labor board, according to a formal announcement by J. H. Sylvester, vice president, and G. A. Worrell, general chairman of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employes.

The settlement, effected at conferences between Mr. McMenimen, railroad officers and union officials, provides for the re-establishment of past practices on the road for vacations, sick leave and Saturday afternoon holidays with no reduction in pay, provided, however, there is no extra expense to the company involved.

Safe at Port Arthur.

Port Arthur, Ont.—After 36 hours in the timber, miles away from railroads and telegraph wires, 60 mud plastered automobiles carrying 225 Twin City motorists on the annual good roads tour of the Minnesota Automobile association, rolled into Port Arthur, completing the last lap of their 373 mile journey.

Call General Strike.

Oamha—Executives of the American Federation of Labor were called upon in a resolution adopted by the Central Labor Union of Omaha to call a national strike at the earliest possible date, "to bring the full power of labor to bear in one grand national protest against the slavery conditions being imposed upon us."

Workers Walk Out.

Des Moines, Iowa—A strike within a tsrike was declared at the Chicago, Rock Island & Pacific shops at Valley Junction, when 54 non-union workers discontinued work and walked out.

Slump in Gas Supply.

New York—Although gasoline refineries in the United States are breaking all records for production, the reserve supply of "gas" for the nation's automobiles is steadily growing smaller, the American Petroleum institute disclosed.

TROOPS GUARD REOPENED MINES

Disorders and Property Losses Mount As Reports Come In From Different States.

Washington—Slowly paralyzing the nation's industries, threatening widespread shortage of light and heat within a few days, causing increasing disorders, loss of life and property damage already running into millions, the combined rail and coal strikes have brought on an industrial crisis, the magnitude of which has revealed in reports from all parts of the country.

Not only are wheels slowing on the country's transportation system, but public utilities are closing down and actual suffering because of shortage of coal is not far off, advices indicate.

Disorders are reported from coast to coast. New England carriers announce increasing sabotage on many lines; Pacific coast roads report kidnapings and beatings.

Trouble is feared in western Pennsylvania, West Virginia and Ohio as mines are re-opening. State troops are out in New Hampshire, Pennsylvania and Ohio.

Serious fuel shortages, due in part to the coal strike, but to the car shortage caused by the rail shopmen's walkout, as well, were reported from all parts of the country.

Business, big and little, throughout the country, feel the pinch. In Illinois the slump was estimated at 50 per cent. The steel industry at Youngstown, O., was limping—down to "scrapings."

Rationing, confiscation and emergency measures to import coal were announced from many states. Wisconsin expects to ration fuel shortly; Ohio threatens to confiscate private coal shipments; industries at Cleveland will start closing down in five days unless emergency rationing is immedately effective.

Train services continued to feel more and more the grip of the strikes. Trains came off on practically all roads running into Chicago. Eastern carriers were announcing further suspensions, as were southern roads, while in the extreme west, where the coal shortage had not made itself felt, many trains have been taken off.

Strikebreakers have been assaulted in Indianapolis, Fort Wayne, Kansas City, San Francisco, St. Paul, Concord, N. H. and several deaths directly due to the rail strike occurred.

BLACK RUST DANGER OVER

Bumper Wheat Crop in North Dakota Assured.

Fargo, N. D.—A bumper North Dakota wheat crop is assured, for even were rust to sweep the state, according to the weekly report of J. W. Hall, county agent, after perusal of reports from all over the state, the crop has virtually reached the point where it can be said that rust will not materially lower the general average yield over the state.

Grade of wheat might be affected by rust, says the report, but it could hardly affect the general average state yield in excess of one or two bushels an acre. Such a condition, Mr. Hall adds, is unlikely.

Weather the last 10 days has been excellent for corn.

Reports from potato-growing localities say that disease is more prevalent than usual and that blackleg will cut down the yield.

NORTHWEST GIVEN PRIORITY

Divert Fuel to Transportation Lines and Northern Great Lake Ports.

Washington—Development of plans for stretching the nation's coal supply was the immediate concern of federal officials acting in the industrial situation. Secretary Hoover announced that within a day or two the Interstate Commerce commission and the Commerce department would put in operation a scheme of diverting coal to essential transportation lines by use of priority orders governing transportation.

Next in order for coal supply, it was indicated, would be the northern Great Lake ports, and should it be found impossible to avert a shortage the coal distribution plan might be expanded to become a complete rationing of supply to other industries.

Attorney General Daugherty said in connection with this plan, that the strikes had already made it certain that there would be a coal shortage next winter.

Cows Eat Booze Mash.

Wisconsin Rapids, Wis.—"They're drunk, that's what's the matter with them," was the verdict of Under Sheriff Cliff Bluett after he had been called to the Robert Hannemann farm near Kellner where a bunch of cows were acting in a manner to alarm their owner.

Chile, Peru Sign Pact.

Washington—The agreement of Chile and Peru to arbitrate their Tacna-Arica controversy was signed by the plenipotentiaries of the two governments at a final session of the Chilean-Peruvian conference here.

Actress Owes $2,830.

Los Angeles—Zasu Pitts, film comedienne, has filed a petition in bankruptcy in the United States district court here, declaring her only assets are clothes valued at $200, and her liabilities debts totalling $2,830.

WILL ANSWER ANY WOMAN WHO WRITES

Woman Restored to Health by Lydia E. Pinkham's Vegetable Compound Makes This Offer

Cumberland, Md.—"My mother gave me Lydia E. Pinkham's Vegetable Compound when I was between thirteen and fourteen years old and was going to school, because I suffered with pains and could not rest. I did not have any more trouble after that until I was married, then I always was troubled in my back while carrying a child and could not do my work until I took the Vegetable Compound. I am strong, do all my washing and ironing and work for seven children and feel fine. I always have an easy time at childbirth and what it did for me it will do for other women. I am willing to answer any woman if she will write asking what it did for me."—Mrs. JOHN HEIER, 53 Dilley St., Cumberland, Md.

During girlhood and later during motherhood Lydia E. Pinkham's Vegetable Compound brought relief to Mrs. Heier. Her case is but one of many we constantly publish recommending our Vegetable Compound. She is willing to answer your letter. Write to her.

The Limit.

"Bump is awfully henpecked."

"Yes; his wife lets him eat only the things which agree with her." —Judge.

An old man with a young wife makes her appear like dancing on crutches.

Some kinds of misfortune make former bad luck look good.

ARE YOU GIVING OUT?

Does every day mean just another day of suffering? Are you lame, stiff and achy—tortured with a nerve-racking backache? Surely there's a reason why you feel so badly and likely it's weakened kidneys. When the kidneys fail, poisons accumulate and upset the whole system. That's why you have constant backache and sharp, stabbing twinges. You may have headaches, nervous and dizzy spells with annoying bladder irregularities. Don't risk serious kidney disease. Use *Doan's Kidney Pills. Doan's* have helped thousands and should help you. *Ask your neighbor!*

A North Dakota Case

Mrs. C. R. Getty, Carrington, N. D., says: "My back gave out and I couldn't do a bit of work. Shooting pains darted across my back. I suffered from headaches and dizziness and doctored for a time, but only got temporary relief. A friend recommended Doan's Kidney Pills and I got some. Three boxes of Doan's cured me."

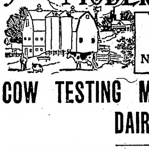
PERTINENT POINTERS for MODERN FARMERS



Prepared Under Direction of North Dakota Agricultural College

COW TESTING MAKES DAIRYING PAY BETTER

Individual records of cows on the dairy farms are every day becoming more a necessity instead of a fad, as they were classified a few years ago. Although North Dakota is not yet a big dairying state, many of the progressive dairy men are members of cow testing associations and are rapidly improving their dairy herds by weeding out the poor milk producers.

Dairying, like all other industries, must first be put on a business basis and that is the result obtained at once when the cream producer begins keeping accurate record of his individual cows.

According to J. R. Dice, dairy husbandmen at the Agricultural college, dairying cannot be a paying proposition until the farmer knows his herd. By keeping record of the amount of milk and butter fat secured from each cow each day and also the amount of feed consumed by the cow the dairyman is able to tell exactly what profit he gets from each member of the milk herd.

"A cow does not necessarily have to be off pure-bred stock to be a good milker," Mr. Dice declared. "There are good cattle in every herd but unless a farmer keeps individual accounts for each cow he cannot know which cows are giving the return that they should, and which cattle are cutting down the money-making value of his herd."

The breeding and cow-testing associations of the state are setting various standards. Some adopt certain pure-bred types of cattle as the standard of their organization aim, but many have as their purpose only the culling of the herds to leave the best milk and butter fat yielding stock.

The usual organization has a superintendent who visits each farm once a month and checks the records of the dairy. In many places the duties of the superintendent are even greater and he heads the organized sales department of th eassociation. Ward, Morton, Pembina, Grand Forks, Stutsman, Barnes and Richland counties are the big centers of dairying in North Dakota at present.

Because grain farming is especially profitable in certain parts of the state dairying is not getting a big foothold as yet and in some places the country is unsuited, but there are many localities in the state where dairying should flourish and only a creation of interest is needed.

Farmers who already have cows and would like to get their dairying on a business basis are urged to take up the individual record system. The state dairy commissioners of North Dakota, has a special man working on organization work for cow-testing associations and inquiries to the state department of the Agricultural college would result in full information as to methods of keeping records.

One good cow will produce as large returns as two poor ones and requires only half the feed, shelter and labor. The big object of cow-testing is to get rid of the "boarders" and save the laborers. Knowing which cows are poor milk producers the farmer will of course get rid of the calves of those cows also and will save the offspring of those cattle that give real yields of milk and butter-fat. This will result in a real building up process and in time will build up a real high class dairy herd.

Too many farmers are keeping the scrub cow, feeding and milking her twice each day, merely for the pleasure of her company when a portion of this time might well be expended in estimating the feed, weighing and testing the milk and crediting the same to each cow. Many good dairying men spend 30 minutes each day gambling with the scrub cow when three minutes time with the scales, tester and record book would put the herd upon a paying basis. Keeping records not only show which cows make or lose money for their owners but they show to what extent each is profitable, the amount of feed given to each cow, and the kinds of feed at prevailing prices that will produce the most satisfactory financial results.

The working tools necessary for a farmer who wishes in inaugurate the record system are a spring balance milk scale, daily and monthly record sheets and a milk tester. The milk from each cow is weighed after each milking and recorded on the record sheets. For the testing, certain days in each month can be selected to make tests of the value of the milk given by each cow. The total pounds of milk produced by the cow during the month multiplied by the percentage of butter-fat found in the test will give the number of pounds of butter-fat produced during the month.

Tested herds are of greater value than the mixed herd that is merely milked and fed twice a day and no record kept of the performance of each cow.

Boosters for cow testing associations have suggested the following rules which have made dairying a success:

First, eliminate the unprofitable cows.

Secodn, raise the average production of the herd.

Third, practice liberal feeding of a good grain ration.

Fourth, buy the winter feed supply cooperatively.

Fifth, learn the value of the herd sire through the production of his daughters.

Sixth, help in selection of heifers for future herds.

Seventh, increase the valuation of the herd.

Eighth, study the records in the herd record book.

Ninth, develop the knowledge of what each animal is doing, and develop personal pride and interest in the herd.

Tenth, locate the persistent milkers and from such cows choose the future herd.

WINTER WHEAT IN N. D.

The low yields of spring wheat in North Dakota during the last 10 years have been an important factor in the immense increase in the winter rye crop during the same period within the state, says L. R. Waldron, plant breeder at the experiment station. Winter rye has been grown in preferance to winter wheat because of its greater hardiness. The present winter rye acreage would be changed in large measure to a winter wheat acreage could a variety be found sufficiently hardy and at the same time of good technical value. Winter rye is a safe and successful crop for North Dakota. Winter wheat is less hardy but it occasionally succeeds. Success in winter wheat depends (1) upon the mildness, or severity, of the winter, (2) upon the conditions under which it is sown, and (3) upon the variety used.

The climate of North Dakota is not changing, and the occurrence of one or even two mild winters should not lead us to change our crops without good reason. The varities of winter wheat heretofore tried in North Dakota have not been of sufficient hardiness to be successful under ordinary methods of culture. When the growing crop is given sufficent protection in the fall to insure its living through the winter. the high cost of such portection generally makes the crop unprofitable. Winter wheat "stubbled in" may live through and make a crop when the same wheat on clean land would kill. Continued "subbling in" of a crop is not good farming and cannot be recommended. This method, used occasionally under proper conditions, is suggested as likely to produce a crop of winter wheat and at a minimum cost.

Experiments and farm practices of the past have shown that future success with winter wheat in North Dakota depends upon securing a variety hardier than any grown in the state. There are new varieties, not yet generally availabel, which promise something for the future. Those interested in winter wheat should write to the expriment station, Agricultural college, for Bulleln 151 on winter wheat.

POULTRY

MARKET SEASON FOR GUINEAS

Latter Part of Summer and Throughout Fall Is Best Time to Dispose of Fowls.

The marketing season for guinea fowl is during the latter part of summer, and throughout the fall. At this time the demand in the city market is for young birds weighing from one to two pounds each. At about 2½ months old guineas weigh from one to 1½ pounds, and at this size they begin reaching the markets in August. As the season advances the demand is for heavier birds.

The usual practice in marketing game birds is to place them on the market unplucked, and in most markets guineas are sold this way. They appear more attractive with feathers on, and sell more readily. Dressed, the small size and dark color of the skin are likely to prejudice the prospective customer who may be unfamiliar with the bird's excellent eating qualities. For hotel and restaurant trade, however, guineas should be dressed in the same way as common fowl. Better ask the dealer, before shipping, whether he wants the feathers on or off.

Guineas Are Usually Placed on Market Unplucked.

If the feathers are to be left on the birds all that is necessary in preparing for market is to bleed them by severing the principal blood vessels of the neck, allowing them to hang head downward until bleeding is complete.

If the feathers are to be removed it should be done by dry picking. When the brain is pierced after severing the blood vessels in the neck the feathers are loosened by a convulsive movement of the muscles and can be removed easily.

DEMAND IS FOR WHITE EGGS

An Exceptionally Keen Sense of Taste Would Be Required to Note Any Difference.

It would take an exceptionally keen sense of taste to distinguish any difference between white and brown eggs at breakfast, but human beings are such faddists that, in the opinion of some, the difference is there just the same. In New York the demand is for white shells, while in Boston the brown egg is just as popular.

"Some men will have only Dutch Belted cattle or Hampshire hogs," said one of the poultry specialists in the Department of Agriculture. "They are color enthusiasts. The liking for white-shelled eggs may have grown from associating the egg with the white poultry, an agreeable picture suggesting cleanliness. Actually, however, the brown-shell egg is every bit as good as the white until you arrive at the price in New York. The difference there sometimes is considerably in favor of the white."

At present all the general purpose breeds of chickens are layers of brown eggs. Some of the leading markets demand the white egg, however, and as the price favors the white product it is important to supply it if possible and at the same time produce a fowl having weight in meat.

POULTRY NOTES

The busy hen is the one that makes the best layer.
